

NOVA SCOTIA'S ECONOMIC GROWTH LIMITED BY PRESSURES ON EXPORTS, SAYS RBC ECONOMICS

TORONTO, June 22, 2007 — According to a provincial economic forecast released today by RBC, Nova Scotia has limited economic growth prospects as exports declined sharply last year and remain under pressure in 2007.

“While a drop in gas production contributed to the decline, a new compression platform at the Sable Offshore Energy Project, that was installed late last year, should lift gas production by about 20 per cent this year,” said Craig Wright, vice-president and chief economist, RBC. “With this boost, the province’s growth should hover just above two per cent for the next few years.”

Key projects could also provide a major lift to the economy by the end of the decade RBC said. The fate of the Deep Panuke project, which may finally be determined this summer, and the possible approval of a \$4.5 billion combined petrochemical plant and LNG receiving terminal in Goldsboro, all have significant potential for the province.

According to the RBC report, healthy job creation and solid gains in the housing market should help continue to strengthen the economy. However, softening construction markets have already started to emerge and are expected to continue to weaken in the year ahead as both non-residential and residential construction slow down.

Across Canada, Newfoundland and Labrador will be the provincial growth leader in 2007 at 7.5 per cent before experiencing a dramatic pull back next year, shifting the spotlight back onto the more sustainable growth in Western Canada. Prince Edward Island and Ontario will be at the back of the pack, each with growth rates just shy of two per cent this year.

The RBC Economics *Provincial Outlook* assesses the provinces according to economic growth, employment growth, unemployment rates, personal income growth, retail sales, housing starts and the Consumer Price Index.

According to the report (available online as of 8 a.m. E.D.T., at www.rbc.com/economics/market/pdf/provfcst.pdf), provincial forecast details are as follows:

	Real GDP			Housing starts			Retail sales			Employment			CPI		
	06	07	08	Thousands						06	07	08	06	07	08
