NEWFOUNDLAND AND LABRADOR'S ECONOMIC GROWTH TO TAKE A REST THIS YEAR, SAYS RBC ECONOMICS

TORONTO, July 3, 2008 — After leading all provinces in 2007 with a growth rate of 9.1 per cent, Newfoundland and Labrador's economy will slow down significantly this year, posting growth of 0.2 per cent for 2008 and 1.3 per cent in 2009, according to the latest provincial forecast released today by RBC.

"We do not expect a repeat this year of the outsized, energy-induced advance recorded in 2007," said Craig Wright, senior vice-president and chief economist, RBC. "The giant 21 per cent increase in oil production that resulted last year from White Rose's expansion and Terra Nova's return to full operation will not reoccur, as no further expansion is planned in the near term."

The report noted that, the volume of energy output is even likely to decline a little this year, as the producing oil fields mature. However, high energy prices and their boosting effect on incomes in the province should provide a powerful offset, supporting strong consumer spending and robust construction activity. Vigour in the metal mining sector will also positively contribute to economic growth.

Housing should remain a bright spot for the economy, as demand benefits from an improving job market and a net inflow of people coming from other provinces, many of whom likely to be ex-Newfoundlanders who had previously left during tougher economic times.

The main theme of the Provincial Outlook continues to be the different paths the Eastern and Western parts of the country are taking. Record-high commodity prices and strong global demand for resources sustain unprecedented prosperity in the Western provinces, while the strong Canadian dollar, downturn in the U.S. economy and high energy prices continue to cause hardship in key sectors in provinces east of Manitoba. Saskatchewan is projected to lead all of the provinces in economic growth for both 2008 and 2009, followed by Alberta, while Newfoundland and Labrador and Ontario are expected to lag the group this year, but should show some improvement next year.
