First Quarter Results

March 1, 2023

All amounts are in Canadian dollars unless otherwise indicated and are based on financial statements prepared in compliance with International Accounting Standard 34 Interim Financial Reporting, unless otherwise noted. Our Q1 2023 Report to Shareholders and Supplementary Financial Information are available on our website at: <http://www.rbc.com/investorrelations>.

From time to time, we make written or oral forward-looking statements within the meaning of certain securities laws, including the “safe harbour” provisions of the United States Private Securities Litigation Reform Act of 1995 and any applicable Canadian securities legislation. We may make forward-looking statements in this presentation, in other filings with Canadian regulators or the SEC, in reports to shareholders, and in other communications. Forward-looking statements in this document include, but are not limited to, statements relating to our financial performance objectives, vision and strategic goals. The forward-looking information contained in this presentation is presented for the purpose of assisting the holders of our securities and financial analysts in understanding our financial position and results of operations as at and for the periods ended on the dates presented, as well as our financial performance objectives, vision and strategic goals, and may not be appropriate for other purposes. Forward-looking statements are typically identified by words such as “believe”, “expect”, “foresee”, “forecast”, “anticipate”, “intend”, “estimate”, “goal”, “commit”, “target”, “objective”, “plan” and “project” and similar expressions of future or conditional verbs such as “will”, “may”, “might”, “should”, “could” or “would”.

By their very nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties, which give rise to the possibility that our predictions, forecasts, projections, expectations or conclusions will not prove to be accurate, that our assumptions may not be correct, that our financial performance, environmental & social or other objectives, vision and strategic goals will not be achieved, and that our actual results may differ materially from such predictions, forecasts, projections, expectations or conclusions.

We caution readers not to place undue reliance on these statements as a number of risk factors could cause our actual results to differ materially from the expectations expressed in such forward-looking statements. These factors – many of which are beyond our control and the effects of which can be difficult to predict – include: credit, market, liquidity and funding, insurance, operational, regulatory compliance (which could lead to us being subject to various legal and regulatory proceedings, the potential outcome of which could include regulatory restrictions, penalties and fines), strategic, reputation, competitive, model, legal and regulatory environment, systemic risks, and other risks discussed in the risk sections of our annual report for the fiscal year ended October 31, 2022 (the 2022 Annual Report) and the Risk management section of our Q1 2023 Report to Shareholders; including business and economic conditions in the geographic regions in which we operate, Canadian housing and household indebtedness, information technology and cyber risks, geopolitical uncertainty, environmental and social risk (including climate change), digital disruption and innovation, privacy, data and third party related risks, regulatory changes, culture and conduct risks, the effects of changes in government fiscal, monetary and other policies, tax risk and transparency, and the emergence of widespread health emergencies or public health crises such as pandemics and epidemics, including the COVID-19 pandemic and its impact on the global economy, financial market conditions and our business operations, and financial results, condition and objectives. Additional factors that could cause actual results to differ materially from the expectations in such forward-looking statements can be found in the risk section of our 2022 Annual Report and the Risk management section of our Q1 2023 Report to Shareholders.

We caution that the foregoing list of risk factors is not exhaustive and other factors could also adversely affect our results. When relying on our forward-looking statements to make decisions with respect to us, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. Material economic assumptions underlying the forward-looking statements contained in this presentation are set out in the Economic, market and regulatory review and outlook section and for each business segment under the Strategic priorities and Outlook sections in our 2022 Annual Report, as updated by the Economic, market and regulatory review and outlook section of our Q1 2023 Report to Shareholders. Except as required by law, we do not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by us or on our behalf.

Additional information about these and other factors can be found in the risk sections of our 2022 Annual Report and the Risk management section of our Q1 2023 Report to Shareholders.

| Adjusted Diluted EPS⁽³⁾ | \$3.10 | 8% | 12% |

Net Income (\$ millions)

Earnings

- **Net income** down 22% YoY; adjusted⁽³⁾ net income up 5% YoY
 - PPPT⁽²⁾ up 7% YoY

Revenue

- **Net interest income** (slide 11) up 18% YoY
 - Net interest income (ex-trading) up 29% YoY⁽⁴⁾. Higher spreads and strong loan growth in Canadian Banking and Wealth Management, partially offset by lower Capital Markets results
- **Non-interest income** (slide 29) up 14% YoY
 - Down 2% YoY, net of Insurance FV change⁽¹⁾ and U.S. WM WAP⁽⁵⁾
 - Strong growth in Global Markets offset by lower Insurance revenue and challenging market conditions impacting underwriting and other advisory fees and mutual fund revenues

Non-Interest Expense (see slide 13)

- **Compensation⁽⁶⁾**: Up 14% due to increased investments in client-facing employees, higher base salaries and higher variable and stock-based compensation
 - Salaries up 17% YoY; RBC Brewin Dolphin added 4% to growth
- **Non-compensation⁽⁷⁾**: Up 22% (Impact of RBC Brewin Dolphin and prior year release of legal provision added 7% to growth rate)
 - Higher discretionary and tech-adjacent costs reflecting higher travel, investments in technology and infrastructure to support clients and business growth

Provision for Credit Losses

- **PCL on loans⁽⁸⁾**: 25 bps, up 20 bps YoY; up 7 bps QoQ
 - **Stage 1 & 2 PCL on loans** (slide 19): \$173MM charge
 - **Stage 3 PCL on loans** (slide 21): 17 bps, up 8 bps YoY; up 5 QoQ

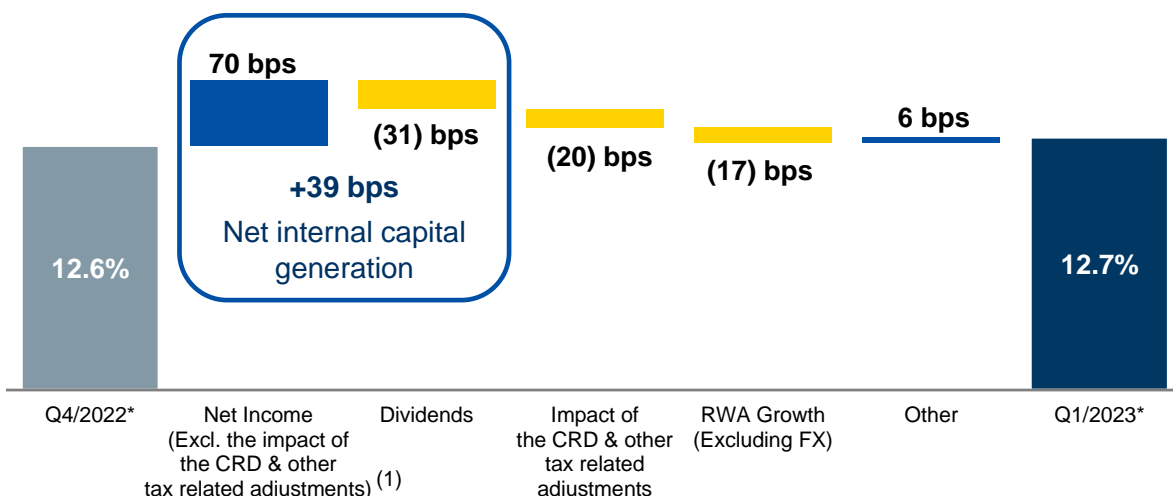

Tax Rate

- Effective tax rate of 39.8%; adjusted⁽³⁾ tax rate of 20.2%
 - 21.9% (adjusted for CRD and TEB⁽⁹⁾), down 4 pts YoY, benefitting from favourable changes in earnings mix in Capital Markets, partly offset by 1.5% increase in the Canadian corporate tax rate

Capital: Strong capital position supporting business growth and shareholder returns

CET1 Movement

- CET1 ratio of 12.7%, up 10 bps QoQ, reflecting:
 - + Net internal capital generation (earnings net of dividends)
 - Impact of the Canada Recovery Dividend (CRD) and other tax related adjustments
 - Organic RWA growth supporting higher volumes
 - Other primarily includes unrealized gains on OCI securities
- Leverage ratio⁽²⁾ of 4.4%, flat QoQ
- TLAC⁽²⁾ ratio of 28.2%, up 180 bps QoQ

RWA Movement (\$ billions)

- RWA increased \$4.4BN, mainly reflecting:
 - Continued business growth, primarily in:
 - Wholesale lending, including loan underwriting commitments
 - Securities and due from banks
 - Retail lending
 - + Partially offset by lower trading exposures
 - Unfavourable impact of market risk model update
 - + Favourable FX translation

Net interest income: Robust growth reflecting rising rates and higher volumes

All-Bank Net Interest Income (\$ millions)

- Net interest income up 18% YoY due to higher spreads and solid loan growth in Canadian Banking and Wealth Management, partially offset by lower results in Capital Markets
 - Net interest income (ex-trading)⁽¹⁾ up 29% YoY
- NIM on average earning assets⁽³⁾ up 8 bps YoY (down 9 bps QoQ)
 - The cost of funding of certain transactions is recorded in interest expense while related revenue is recorded in non-interest income
 - NIM (ex-Trading Assets, Trading net interest income and Insurance Assets) on total average assets⁽⁴⁾ up 29 bps YoY (up 1 bp QoQ)
 - Canadian Banking NIM up 32 bps YoY, up 3 bps QoQ (see slides 12 and 26)
 - CNB NIM up 70 bps YoY, down 5 bps QoQ (see slide 26)

Average Assets (\$ billions)⁽⁵⁾

Drivers of Net Interest Income

Tractors: An illustrative example of the latent benefit of rate hikes

Tailwinds

- Higher ST interest rates
- Steepening yield curve
- Volume growth
- Higher utilization rates

Headwinds

- Deposit run-off and shift to lower margin deposits
- Higher deposit betas and pricing competition

(1) See note 11 on Slide 42. (2) Includes Capital Markets and Corporate Support. (3) Refer to Glossary on slides 44-45 for explanation of composition of this measure. (4) See note 14 on Slide 42. (5) Totals may not add due to rounding. (6) Includes Insurance and Corporate Support.

Canadian Banking: Higher deposit margins partly offset by changing client activity

Canadian Banking NIM on Average Earning Assets

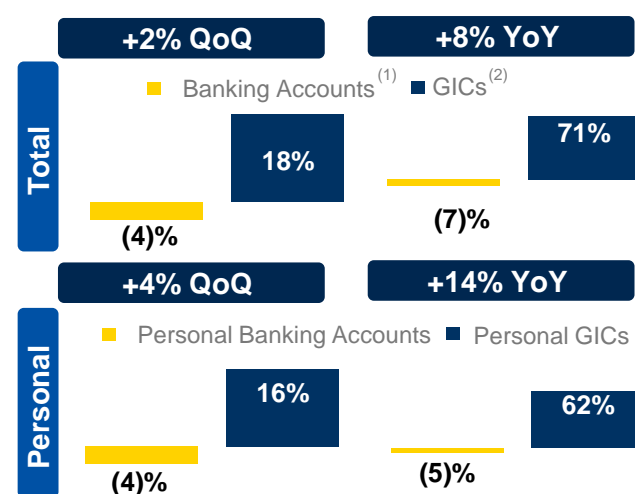

Loan growth largely funded through lower cost client deposits

Rising deposit costs buffered by non-interest bearing deposits

Client behaviour is driving a change in deposit mix

Volatility in the Prime-BA spread impacting asset spreads

(1) Reflects changes in personal banking accounts and business deposit accounts. (2) Reflects changes in personal GICs and business GICs. (3) Not meaningful.

Non-interest expense: Higher compensation costs and investments for growth

Non-Interest Expense (NIE, \$ millions)

Q1/2023 Highlights

- **Non-interest expense up 17% YoY**
 - Overall, RBC Brewin Dolphin added 3% to expense growth
 - Higher variable & share-based compensation, mainly reflecting an increase in the U.S. WM WAP⁽²⁾ (see slide 39)
- Up 17% YoY excluding variable and share-based compensation⁽¹⁾ (which includes changes in U.S. WM WAP)
 - Higher salary costs in Wealth Management reflecting the addition of RBC Brewin Dolphin, and increased FTE in Canadian Banking and Capital Markets to support business growth
 - Higher discretionary and tech-adjacent costs (+20% YoY)
 - Rebound in marketing, travel & training in support of client and business growth
 - Higher professional fees and investments in technology and infrastructure in support of business growth, product innovation and preparation for HSBC Canada integration
- Other expenses rose reflecting partial release of legal provision in the prior year, and higher trade execution costs in support of higher trading activity

Risk Review

Graeme Hepworth
Chief Risk Officer

Allowance for Credit Losses: Prudent reserve increases on performing loans

Movement in Allowance for Credit Losses (ACL) on Loans & Acceptances (\$ millions)

- ACL on loans and acceptances increased \$268MM QoQ
- ACL of 0.53% on loans and acceptances was up 3 bps QoQ
- We added \$173MM of provisions on performing loans this quarter
 - With the passage of time, more of our recession forecast period moved into the 12-month Stage 1 IFRS 9 window which drove an increase in Stage 1 expected credit losses during the quarter
 - This was partially offset by a modest shift in scenario weights from our downside scenario to our base case scenario, as uncertainty around more severe inflation and interest rates outcomes starts to abate
 - PCL on performing loans was primarily in Canadian Banking (largely in our retail portfolios) and City National Bank

(1) Loans and acceptances

Gross Impaired Loans: Normalization of new formations

Gross Impaired Loans (GIL) (\$ millions, bps)

Key Drivers of GIL (QoQ)

- Total GIL increased \$400MM (up 5 bps QoQ)

Canadian Banking

- GIL of \$1,191MM increased \$171MM QoQ, with increases in both the retail and commercial portfolios
 - Retail:** New formations increased \$60MM QoQ, with increases across all products
 - Commercial:** New formations increased \$50MM QoQ, due primarily to two loans in the Real Estate & Related (RE&R) sector where we do not expect to incur any losses

Capital Markets

- GIL of \$686MM increased \$127MM QoQ, due primarily to higher new formations, across a number of sectors, including RE&R, Consumer Staples and Telecom and Media

Wealth Management (including CNB)

- GIL of \$396MM increased \$118MM QoQ, largely due to higher new formations. During the quarter, new formations were primarily in the Consumer Staples, Consumer Discretionary and Other Services sectors

New Formations (\$ millions)⁽¹⁾

Net Formations (\$ millions)

(1) See note 18 on Slide 43.

PCL on impaired loans: Increasing, but remains below pre-pandemic levels

Total RBC (\$ millions, bps)

- Provisions were up \$103MM QoQ, with higher provisions in Capital Markets, Wealth Management and Canadian Banking
- PCL ratio of 17 bps remains below the pre-pandemic 2019 PCL ratio of 27 bps

Wealth Management (\$ millions, bps)

- Higher provisions QoQ, due primarily to provisions on two newly impaired loans at CNB in the Consumer Discretionary and Other Services sectors

Canadian Banking (\$ millions, bps)

- Retail:** Provisions of \$235MM were up \$27MM QoQ, due primarily to the Personal Lending and Credit Card portfolios; provisions on residential mortgages were flat QoQ
- Commercial:** Provisions of \$24MM were down \$11MM QoQ

Capital Markets (\$ millions, bps)

- Provisions up \$42MM QoQ
- In Q1/23, provisions were across a number of sectors, including a larger provision on a loan in the Telecom and Media sector

Commercial Real Estate (CRE) portfolio summary

- CRE exposure of \$77.6 billion at Q1/2023 accounts for 9% of total Loans and Acceptances
- The portfolio was originated with sound lending standards, and remains well-diversified by geography, business and property type

Exposure by Business Segment

Exposure by Geography

Exposure by Property Type

Spotlight on Office Property Exposure (1.9% of total L&A)

Capital Markets

0.8% of total L&A

- Primarily Class A properties backed by strong financial sponsors
- To date, sponsors have been contributing additional equity (and providing credit enhancements) when required to right-size leverage in the face of market headwinds
- Geographically diverse (53% U.S.; 25% Canada; 22% Other International)
- 2% of outstanding exposure rated CCC+ or lower

P&CB

0.7% of total L&A

- Primarily smaller suburban properties
- Average loan size: P&CB ~\$5MM; CNB <\$10MM
- Loans typically benefit from amortization and additional recourse outside of the asset (e.g., guarantees or other collateral)
- Late-stage delinquency rates are generally in-line with the broader portfolios

Inter-connectedness with Non-Interest Income

Capital Markets

- Repo gains in non-interest income is partly offset in interest expense
- The cost of funding of certain Treasury Services transactions in Capital Markets is recorded in interest expense, while related gains are recorded in Other revenue in non-interest income

Wealth Management (including CNB)

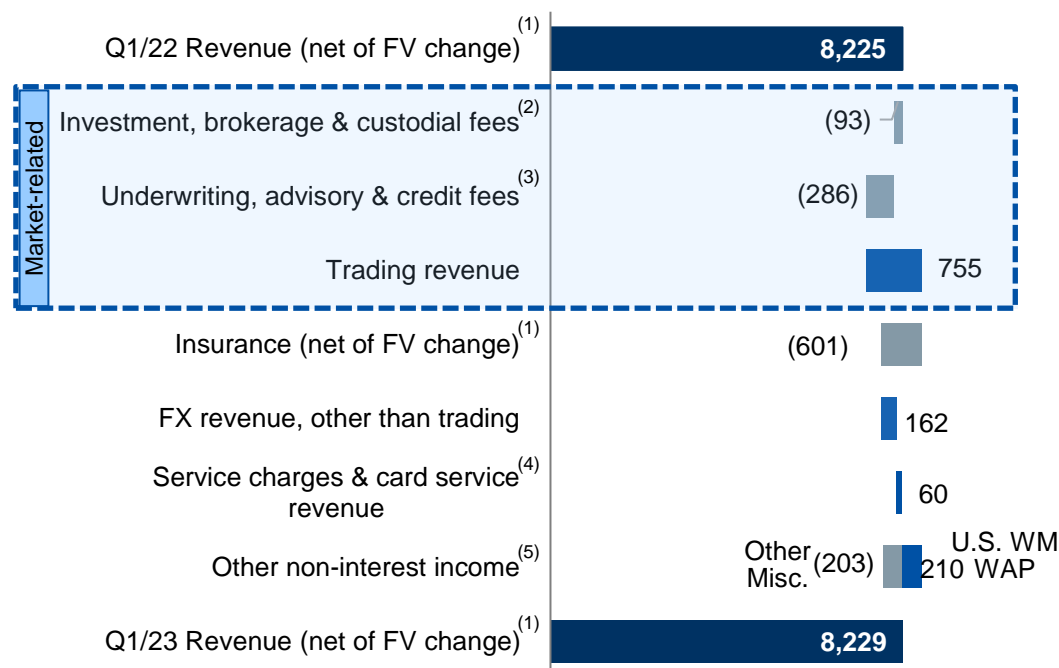

- U.S. Wealth Management sweep revenue is largely recorded in non-interest income

(1) Represents the 12-month revenue exposure (before-tax) to a 100bps immediate and sustained shift in interest rates. (2) Represents the 12-month revenue exposure (before-tax) to a 25bps immediate and sustained shift in interest rates. (3) Represents balances and net yield in the Capital Markets core fixed income repo business.

Non-interest income: Benefiting from robust Global Markets and client activity

Non-Interest Income (\$ millions)

Q1/2023 Highlights

- **Non-interest income was up 14% YoY; flat net of Insurance FV change⁽¹⁾**
- + Higher Global Markets revenue driven by swap gains in Repo book (partly offset in net interest income, see slide 28), as well as strong client activities in macro and credit trading, partly offset by lower origination activities
- Lower Investment Banking revenue driven by a decline in global fee pools, partly offset by higher market share
- Lower mutual fund revenue, largely in Wealth Management and Canadian Banking, mainly reflecting challenging market conditions
- Lower Insurance revenue (net of FV change)⁽¹⁾ reflecting lower group annuity sales
- Other non-interest income:
 - Favourable change in the fair value of hedges related to our U.S. share-based compensation plans in our Corporate Support segment (U.S. WM WAP gains / losses), which was largely offset in expenses (see slide 39)

Market-related revenue

Capital Markets: Revenue and loan breakdown by geography

Capital Markets Revenue Breakdown by Geography^{(1) (2)} (\$ millions)

- **Canada:** Up YoY, mainly driven by higher equities, fixed income and commodities trading revenue; partially offset by lower equity origination
- **U.S.:** Down YoY, due to lower loan syndication and debt origination fees; partially offset by strong results in fixed income trading
- **U.K. & Europe:** Up YoY, mainly due to higher fixed income trading; partially offset by softer loan syndication fees
- **Australia, Asia & Other:** Down YoY, driven by lower equities trading revenue, as well as lower debt and equity origination fees; partially offset by higher M&A activity

Capital Markets Lending Revenue (\$ millions) & Average Loans Outstanding by Region^{(2) (3)} (\$ billions)

- We continue to deepen relationships with our clients, including financing to support their strategic objectives
- Diversification driven by strict limits on a single name basis, country, industry, and product levels across all businesses, portfolios, transactions and products
- Strong lending revenues are underpinned by higher average loans outstanding
- 61% of our total Capital Markets exposure⁽⁴⁾ is investment grade

(1) Certain amounts have been revised from those previously presented to conform to our new basis of segment presentation. For more information, refer to the about Royal Bank of Canada section of our Q1/2023 Report to Shareholders. (2) Totals may not add up due to rounding. Excludes mortgage investments, securitized mortgages and other non-core items. (4) Total exposure represents exposure at default (EAD) which is the expected gross exposure upon the default of an obligor.

Canadian Banking: Continuing to see signs of credit normalization

- 30-89 day delinquency rates were relatively stable QoQ across most portfolios
 - QoQ increases observed in the Cards portfolio (seasonal) and the Small Business portfolio (due to the impact of higher interest rates and government guaranteed facilities)
- PCL and GIL ratios also increased QoQ, as credit outcomes continue to return to more normal levels

Market risk trading revenue and VaR

(\$ millions)

- During Q1/2023, there were no days with net trading losses
- Average VaR remained relatively stable from last quarter
- Average SVaR of \$176 million increased \$18 million from last quarter, largely driven by unfavourable market conditions that improved towards the end of the quarter, which impacted loan underwriting commitments. This was partially offset by reduced exposures in equity derivative and fixed income portfolios

(1) Trading revenue (teb) in the chart above excludes the impact of loan underwriting commitments.

1. Adjusted for (i) after-tax effect of amortization of other intangibles (Q1/23: \$71MM; Q4/22: \$52MM; Q1/22: \$47MM), (ii) Canada Recovery Dividend and other tax related adjustments (Q1/23: \$1,050MM; Q4/22: \$nil; Q1/22: \$nil) and (iii) HSBC Canada transaction and integration costs (Q1/23: \$8MM; Q4/22: \$nil; Q1/22: \$nil). This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.
2. Pre-provision, pre-tax earnings is calculated as income before income taxes and PCL. This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.
3. Revenue net of Insurance fair value change of investments backing policyholder liabilities (Q1/23: \$663MM; Q1/22: \$(430)MM). This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.
4. Non-interest expense YoY growth excluding variable and share-based compensation. Non-interest expense YoY growth excluding the impact of FX. These are non-GAAP measures. For reconciliation, see slides 46-49. For more information, see slide 50.
5. PCL on loans ratio is calculated using PCL on loans as a percentage of average net loans and acceptances.
6. ROTCE is calculated as net income available to shareholders excluding the after-tax impact of amortization and write down of other intangibles (excluding software) and goodwill divided by average tangible common equity. ROTCE is based on actual balances of average tangible common equity before rounding. This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.
7. Tangible book value per share is calculated as common equity excluding goodwill and other intangibles (excluding software) net of deferred tax on a spot basis divided by total outstanding shares. This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.

8. Revenue and non-interest income net of Insurance fair value change of investments backing policyholder liabilities (Q1/23: \$663MM; Q4/22: \$(440)MM; Q1/22: \$(430)MM). This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.
9. Revenue and non-interest income net of U.S. Wealth Accumulation Plans (WAP) gains/(losses), which was \$121MM in Q1/23, \$(98)MM in Q4/22 and \$(89)MM in Q1/22. This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.
10. Effective tax rate adjusted for CRD and other tax related adjustments (Q1/23: \$1,050; Q4/22: \$nil; Q1/22: \$nil) TEB (Q1/23: \$116MM; Q4/22: \$142MM; Q1/22: \$142MM). This is a non-GAAP measure. For reconciliation, see slides 46-49. For more information, see slide 50.
11. Net interest income (ex-trading) is calculated as net interest income less trading net interest income.
12. Compensation expense is calculated as the sum of salaries, variable compensation, benefits and retention compensation, and share-based compensation.
13. Non-compensation expense is calculated as total non-interest expense less salaries, variable compensation, benefits and retention compensation, and share-based compensation.

Slide 11

14. NIM (ex-Trading Assets, Trading net interest income and Insurance Assets) on total average assets is calculated as net interest income ex trading divided by total average assets less trading assets and insurance assets.

Slide 13

15. Variable & share-based comp YoY growth includes changes in U.S. Wealth Management Wealth Accumulation Plans (WAP Q1/23: \$100MM; Q1/22: \$(71)MM).
16. Other non-interest expenses include YoY change in non-interest expense from the following line items: Telecommunications, Postage and courier, Stationery and printing, Business and capital taxes, Donations, Outsourced item processing, Impairment of other intangibles, Impairment of investments in joint ventures and associates and Other.
17. Non-interest expense YoY growth excluding the impact of CNB legal provision release in Q1/22, RBC Brewin Dolphin and FX translation.

Slide 25

19. Loan yield is calculated as interest income on loans as a percentage of average total net loans. Total earning asset yield is calculated as interest income on assets as a percentage of average total earning assets. Securities yield is calculated as interest and dividend income on securities as a percentage of average securities, net of applicable allowance. Repo & securities lending yield is calculated as interest and dividend income on repo & securities lending as a percentage of average repo & securities lending balances, net of applicable allowance. These metrics do not have a standardized meaning and may not be comparable to similar measures disclosed by other financial institutions. For more information, see slide 50.
20. Total deposit costs is calculated as interest expense on deposits and other as a percentage of average deposits. Term-deposit costs is calculated as interest expense on term-deposits as a percentage of average term-deposits. Personal chequing & savings deposit costs is calculated as interest expense on personal chequing & savings deposits as a percentage of average personal chequing & savings deposits. Interest cost on repos is calculated as interest expense on repos as a percentage of average repo liabilities. These metrics do not have a standardized meaning and may not be comparable to similar measures disclosed by other financial institutions. For more information, see slide 50.

Glossary (1/2)

Assets under administration (AUA):

- Assets administered by us, which are beneficially owned by clients. Services provided in respect of assets under administration are of an administrative nature, including safekeeping, collecting investment income, settling purchase and sale transactions, and record keeping.

Assets under management (AUM):

- Assets managed by us, which are beneficially owned by clients. Services provided in respect of assets under management include the selection of investments and the provision of investment advice. We have assets under management that are also administered by us and included in assets under administration.

Average balances (assets, loans and acceptances, deposits, risk capital etc.):

- Calculated using methods intended to approximate the average of the daily balances for the period, as applicable.

Average earning assets, net:

- Average earning assets include interest-bearing deposits with other banks, securities, net of applicable allowance, assets purchased under reverse repurchase agreements and securities borrowed, loans, net of allowance, cash collateral and margin deposits. Insurance assets, and all other assets not specified are excluded. The averages are based on the daily balances for the period.

Book value per share (BVPS):

- Calculated as common equity divided by the number of common shares outstanding at the end of the period.

Common equity tier 1 (CET1) ratio:

- A risk-based capital measure calculated as CET1 capital divided by risk-weighted assets. CET1 capital is a regulatory Basel III capital measure comprised mainly of common shareholders' equity less regulatory deductions and adjustments for goodwill and intangibles, defined benefit pension fund assets, shortfall in allowances and other specified items.

Dividend payout ratio:

- Common dividends as a percentage of net income available to common shareholders.

Efficiency ratio:

- Non-interest expense divided by total revenue.

Leverage ratio:

- A Basel III regulatory measure, the ratio divides Tier 1 capital by the sum of total assets plus specified off-balance sheet items. Tier 1 capital comprises predominantly of CET1 capital, with additional Tier 1 items such as preferred shares, limited recourse capital notes and non-controlling interests in subsidiaries Tier 1 instruments.

Liquidity coverage ratio (LCR):

- The Liquidity Coverage Ratio is a Basel III metric that measures the sufficiency of HQLA available to meet net short-term financial obligations over a thirty day period in an acute stress scenario.

Loan-to-Deposit Ratio:

- Average Canadian Banking loans as a percentage of average Canadian Banking deposits.

Glossary (2/2)

Net interest margin (NIM):

- Calculated as net interest income divided by average earning assets, net.

Net stable funding ratio (NSFR):

- The Net Stable Funding Ratio is a Basel III metric that measures the sufficiency of available stable funding to meet the minimum coverage level of required stable funding.

Net yield:

- Net yield is calculated as total repo revenue as a percentage of average reverse repo balances.

Operating leverage:

- The difference between our revenue growth rate and non-interest expense growth rate.

Reported diluted earnings per share (EPS):

- Calculated as net income available to common shareholders divided by the average number of shares outstanding adjusted for the dilutive effects of stock options and other convertible securities.

Return on common equity (ROE):

- Net income available to common shareholders, expressed as a percentage of average common equity.

Risk-weighted assets (RWA):

- Assets adjusted by a regulatory risk-weight factor to reflect the riskiness of on and off balance sheet exposures. Certain assets are not risk-weighted, but deducted from capital. The calculation is defined by guidelines issued by OSFI.

Total loss absorbing capacity (TLAC); TLAC ratio:

- The aggregate of Tier 1 capital, Tier 2 capital, and external TLAC instruments, allow conversion in whole or in part into common shares under the Canada Deposit Insurance Corporation Act and meet all of the eligibility criteria under the guideline. The risk-based TLAC ratio is defined as TLAC divided by total risk-weighted assets.

Total payout ratio:

- Total shareholder distributions (common dividends + share repurchases) as a percentage of net income available to common shareholders.

Total shareholder distribution:

- Calculated as the total dollar value of common dividends plus total shares repurchased.

Total shareholder return (TSR):

- TSR is a concept used to compare the performance of our common shares over a period of time, reflecting share price appreciation and dividends paid to common shareholders.

Trading net interest income (Trading NII):

- Trading net interest income reflects net interest income arising from trading-related positions, including assets and liabilities that are classified or designated at fair value through profit or loss (FVTPL).

Note to users

We use a variety of financial measures to evaluate our performance. In addition to generally accepted accounting principles (GAAP) prescribed measures, we use certain key performance and non-GAAP measures we believe provide useful information to investors regarding our financial condition and result of operations:

- Measures which exclude the impact of the amortization or impairment of intangibles (excluding software) and goodwill and other significant items enhances comparability as transaction specific intangible assets and/or goodwill can differ widely between organizations, and impairments and other significant items can give rise to volatility in a particular period.
- Measures which exclude insurance fair value change of investments backing policy holder liabilities, U.S. WM WAP gains/(losses), trading net interest income, impact of FX and variable and share-based compensation and CRD and other tax related adjustments enhance comparability, as these excluded items can lead to volatility that could obscure trends in underlying business performance and reduce comparability with prior periods.
- Pre-provision, pre-tax earnings is used to assess our ability to generate sustained earnings growth outside of credit losses, which are impacted by the cyclical nature of the credit cycle.
- TEB adjusted amounts are useful to illustrate the impact of tax-advantaged revenue sources in our Capital Markets business on our effective tax rate.

Readers are cautioned that key performance measures, such as ROE and non-GAAP measures, including ROTCE, adjusted ROE/ROTCE, adjusted earnings per share, pre-provision, pre-tax earnings, adjusted pre-provision and pre-tax earnings, adjusted effective tax rate, revenue and non-interest income net of insurance fair value change of investments backing policy holder liabilities, non-interest expense excluding variable and share-based compensation, tangible book value per share, revenue and non-interest income net of U.S. WM WAP gains/losses, TEB adjusted measures, loan yields, total deposit costs, and revenue, expenses, non-interest income and non-interest expense excluding various items, do not have any standardized meanings prescribed by GAAP, and therefore are unlikely to be comparable to similar measures disclosed by other financial institutions.

Additional information about key performance and non-GAAP measures can be found under the “Key performance and non-GAAP measures” sections of our Q1/2023 Report to Shareholders and 2022 Annual Report.
