${ }^{1}$ Certain amounts have been revised from those previously presented as part of the adoption of IFRS 17 effective November 1, 2023. Refer to Note 2 of our Condensed Financial Statements for further details on these changes.
${ }^{2}$ See 'Glossary' beginning on page 35 for explanation of composition of this measure.
${ }^{3}$ Net earned premiums excludes the cost of premiums to other institutions for reinsurance coverage, plus segregated fund deposits.

 in Insurance policyholder benefits, claims and acquisition expense (PBCAE).
${ }^{5}$ Premiums and deposits include premiums on risk-based insurance and annuity products, and individual and group segregated fund deposits, consistent with insurance industry practices.
${ }^{6}$ The revenue impact of the change in fair value on investments backing policyholder liabilities is reflected in Insurance premiums, investment and fee income and largely offset in PBCAE.

${ }^{1}$ Actual loss reflects internal credit loss experience realized over a given period. Actual loss rate is the sum of PCL on impaired loans divided by average of loans and acceptances period end outstanding for the current and prior 3 -quarter period.
Estimated loss represents the expected loss calculated using the Basel III "through the cycle" parameters of PD x LGD x EAD, which is estimated based on available historical loss data for Advanced Internal Ratings Based (AIRB) exposures as of the prior 12 month period. Estimated loss rate represents the expected loss as a proportion of drawn EAD
${ }^{3}$ Average annual actual loss rate from fiscal 2003 through to the most recent full year. The information is updated on an annual basis and is based on consolidated results. The Average historical actual loss rate on a continuing operations basis is $0.30 \%$.

${ }^{4}$ Back-testing is performed to check the effectiveness of the models used to measure PD, LGD and EAD. Actual and Estimated percentages for Retail are as of the reporting quarter. Actual and Estimated percentages for Wholesale are reported on a one quarter lag.
${ }^{5}$ There are several key differences under current Basel and IFRS 9 reporting rules which could lead to significantly different expected loss estimates for PD and LGD. Basel parameters reflect historical experience adjusted for periods of downturn whereas IFRS 9 parameters are based on forwardlooking macroeconomic scenarios. For further information refer to our 2023 Annual Report.
${ }^{6}$ For Retail, EAD rate represents the utilization of the authorized credit limit. For Wholesale, EAD rate represents the utilization of the authorized amount.

## Non-GAAP financial measures and non-GAAP ratios

Management measures and evaluates the performance of our consolidated operations and each of our segments based on a variety of financial measures. In addition to generally accepted accounting principles (GAAP) prescribed measures, we use certain non-GAAP measures and key performance measures. We believe these measures provide useful information to investors regarding our financial condition and result of operations:

- Adjusted measures and ratios are useful as they provide users with a better understanding of management's perspective on our performance and enhance comparability of our financial performance with prior periods as these measures and ratios exclude items, noted as adjusting items on page 2 , that may impact a given period, which can lead to volatility in key performance measures. Prior to 2023 these ratios include an adjustment to exclude insurance policy benefits, claims and acquisition expense (PBCAE)
adjusted amounts are useful to illustrate the impact of tax-advantaged revenue sources in our Capital Markets business on our effective tax rate
- Measures which exclude the impact of the amortization or impairment of intangibles (excluding software) and goodwill enhances comparability as transaction specific intangible assets and/or goodwill can differ widely between organizations and impairments can give rise to volatility in a particular period

## Adjusted basis measures

Adjusted basis measures such as adjusted net income available to common shareholders, adjusted basic and diluted earnings per share (EPS), adjusted diluted EPS growth, adjusted Return on Equity (ROE), adjusted Return on Tangible Common Equity (ROTCE), and adjusted Return on Assets (ROA) are calculated by adding back to net income the amount of amortization of intangibles (excluding amortization of software), and other significant items, noted as adjusting items on page 2 , that may impact a given period.

Adjusted efficiency ratio, operating leverage, revenue growth and non-interest expense growth Where applicable, the ratio and calculations exclude items, noted as adjusting items on page 2 , that may impact a given period from revenue, revenue growth and non-interest expense growth. Prior to 2023 these ratios includ an adjustment to exclude insurance policy benefits, claims and acquisition expense (PBCAE). Refer to 'Glossary' for the definition of the efficiency ratio, operating leverage, revenue growth and non-interest expense growth.

Adjusted effective tax rate and their taxable equivalent basis (teb)
The calculations are adjusted to exclude significant items, noted as adjusting items on page 2 , that may impact a given period.

## Effective tax rate (teb)

Effective tax rate (teb) is calculated using the income tax expense for the period adjusted for the teb amount divided by the net income before tax for the period also adjusted for the teb amount. For teb, refer to Glossary section, following

Net income available to common shareholders excluding the after-tax effect of amortization of other intangibles Net income available to common shareholders with the after-tax effect of amortization of other intangibles added back.

Return on Tangible Common Equity (ROTCE)
Net income available to shareholders excluding the impact of amortization and write down
of other intangibles (excluding software) and goodwill divided by average tangible common equity.
ROTCE is based on actual balances of average tangible common equity before rounding.
Tangible common equity
Common equity excluding goodwill and other intangibles (excluding software) net of deferred tax.

Assets under administration (AUA)
Assets administered by us, which are beneficially owned by clients. Services provided in respect of assets under administration are of an administrative nature, including safekeeping, collecting investment income settling purchase and sale transactions, and record keeping.

Assets under management (AUM)
Assets managed by us, which are beneficially owned by clients. Services provided in respect of assets under management include the selection of investments and the provision of investment advice. We have assets under management that are also administered by us and included in assets under administration.

## Attributed capital

We attributed capital based on the Basel III regulatory capital requirements and economic capital.

Average Balances (assets, loans and acceptances, deposits, risk capital etc)
Calculated using methods intended to approximate the average of the daily balances for the period, as applicable.

## Average common equity

Calculated using methods intended to approximate the average of the daily balances for the period For the business segments, calculated using methods intended to approximate the average of the daily attributed capital for the period.

Average earning assets, net
Average earning assets include interest-bearing deposits with other banks, securities, net of applicable allowance, assets purchased under reverse repurchase agreements and securities borrowed, loans, net of allowance, cash coliateral and margin deposits. Insurance assets, and all other assets not specified are excluded. The averages are based on the daily balances for the period.

Book value per share
Common equity divided by Common shares outstanding.

## Capital ratio

Capital ratio is calculated by dividing capital by risk-weighted assets, using OSFI's CAR guideline

## Common equity

Common equity includes common shares, common treasury shares, retained earnings and other components of equity.

## Common Equity Tier 1 capital ratio

Common Equity Tier 1 (CET1) capital mainly consists of common shares, retained earnings and other components of equity and other items. Regulatory adjustments include deductions of goodwill and other intangibles, certain deferred tax assets, defined benefit pension fund assets, investments in banking, financial and insurance entities, the shortfall of provisions to expected losses and other deductions. CET1 ratio is calculated by dividing CET1 capital by risk-weighted assets, in accordance with OSFI's CAR guideline.

Contractual service margin (CSM)
For insurance contracts, the CSM represents the unearned profit (net inflows) for providing insurance coverage.
For reinsurance contracts held, the CSM represents the net cost or net gain of purchasing reinsurance.

Diluted EPS is net income attributable to common shareholders divided by the average diluted shares outstanding. Both net income and number of shares outstanding have been adjusted for the impact of exchangeable shares. For adjusted Diluted EPS, refer to the Non-GAAP measures above.

## Diluted EPS Growth

The growth rate is calculated based on diluted EPS in the same period a year ago. For adjusted diluted EPS growth, refer to the Non-GAAP measures above.

## Dividend payout ratio

Common dividends as a percentage of net income available to common shareholders

## Dividend yield

Dividends per common share divided by the average of the high and low share prices in the relevant period

## Efficiency ratio

Non-interest expense as a percentage of total revenue. For adjusted efficiency ratio refer to the Non-GAAP measures on page 35

## Goodwill and intangibles

Goodwill represents the excess of the price paid for the business acquired over the fair value of the net identifiable assets acquired. An intangible asset is an identifiable non-monetary asset without physical substance.

## Insurance Assets

Comprised of all assets related to the Insurance business

## Insurance investment result

Calculated as Net investment income from the Insurance segment, Insurance finance income (expense) from insurance contracts and Reinsurance finance income (expense) from reinsurance contracts held.

## Insurance service result

Calculated as Insurance revenue less Insurance service expense from insurance contracts and Net income (expense) from reinsurance contracts held.

## Leverage ratio

A Basel III regulatory measure, the ratio divides Tier 1 capital by the sum of the total assets plus specified off-balance sheet items in accordance with OSFl's Leverage Requirements guideline. The leverage ratio is a non-risk based measure.

## Leverage ratio exposure

Leverage ratio exposure is the sum of the total assets plus specified off-balance sheet items in
accordance with OSFI's Leverage Requirements guideline

## Market capitalization

End of period common shares outstanding multiplied by the closing common share price on the
Toronto Stock Exchange.
Market price to book value
Closing share price divided by book value per share
Net impaired loans and acceptances
Gross impaired loans and acceptances less the associated allowance for credit losses on impaired loans by portfolio.

## Net interest margin (NIM) (average assets)

Net interest income as a percentage of total average assets

## Net interest margin (NIM) (average earning assets, net)

Net interest income as a percentage of total average earning assets, net.

## NIM (average earning assets, net) excluding trading assets, trading net interest income and insurance assets Net Interest Income less trading net interest income divided by total average earning assets less average trading

 and insurance assets.
## Net write-offs

Gross write-offs less recoveries of amounts previously written off.

## Non-interest expense Growth

The growth rate is calculated based on Non-interest expense in the same period a year ago. For adjusted Non-interest expense growth refer to the Non-GAAP measures on page 35.

## Operating leverage

The difference between our revenue growth rate and non-interest expense growth rate. For adjusted operating leverage ratio, refer to the Non-GAAP measures on page 35

Pre-tax margin
Income before income taxes divided by total revenue.
Related loans and acceptances
Loans gross of ACL plus acceptances gross of ACL.

## Return on assets (ROA)

Net income as a percentage of average assets. For adjusted ROA, refer to the Non-GAAP measures on page 35

## Return on common equity (ROE)

Business segment return on equity is calculated as net income available to common shareholders divided by
Average attributed capital for the period and using methods that are intended to approximate the average of the daily balances for the period. Corporate Support also includes average unattributed capital. ROE is based on actual balances of average common equity before rounding. For adjusted ROE, refer to the Non-GAAP measures on page 35 .

## Return on risk capital (RORC)

Net income available to common shareholders divided by average risk capital. Business segment RORC is calculated as net income available to common shareholders divided by average risk capital for the period. RORC is based on actual balances of average common equity before rounding.

## Return on risk-weighted assets (RWA)

Net income as a percentage of average risk-weighted assets.

## Revenue Growth

The growth rate is calculated based on revenue in the same period a year ago. For adjusted revenue growth, refer to the Non-GAAP measures on page 35 .

## Risk capital

Risk capital is attributed capital excluding goodwill and other intangibles

## Risk-weighted assets (RWA)

RWA represents assets adjusted by a regulatory risk-weight factor to reflect the riskiness of on and off-balance sheet exposures. Certain assets are not risk-weighted, but deducted from capital. RWA calculation is defined by OSFI CAR guidelines. While the majority of our credit risk exposures are reported under the Basel III IRB Approach for regulatory capital purposes, certain portfolios continue to use the Basel III Standardized Approach (SA) for credit risk. For marke isk RWA we use both for operational risk RWA.

## Taxable equivalent basis (teb)

Income from certain specified tax-advantaged sources is increased to a level that would make it comparable to income from taxable sources. There is an offsetting adjustment in the tax provision, thereby generating the same after-tax net income. We record teb adjustments in Capital Markets and record elimination adjustments in Corporate Support.

## Tier 1 capital ratio

Tier 1 capital comprises predominantly of CET Tier 1 capital, with additional Tier 1 items such as preferred shares, limited recourse capital notes and non-controlling interests in subsidiaries Tier 1 instruments. Tier 1 capital ratio is calculated by dividing Tier 1 capital by risk-weighted assets, in accordance with OSFI's CAR guideline

## Total trading revenue

Total trading revenue is comprised of trading-related revenue recorded in Net interest income and Non-interest income.

## Trading Assets

Include Trading securities, Assets purchased under reverse repurchase agreements and securities borrowed and Derivatives

## Unattributed capital

Unattributed capital represents common equity in excess of common equity attributed to our business segments and is reported in the Corporate Support segment.
