

# RBC Covered Bond Programme Monthly Investor Report

Calculation Date:

1/30/2026

This report contains information regarding assets pledged as security (the "Cover Pool") in respect of the obligations under the Covered Bonds issued under RBC's Global Covered Bond Programme (the "Programme") as of the indicated Calculation Date. In this report, credit bureau scores refer to CreditVision® Scores obtained from TransUnion, based on the latest available information as at the cut-off date of the report and generally calculated in the same calendar quarter as this report. The composition of the Cover Pool will change as Loans are added and removed from the Cover Pool from time to time and, accordingly, the characteristics and performance of the Loans in the Cover Pool will vary over time. Certain of the information set forth in this report, including credit bureau scores, current ratings and "The Teranet-National Bank House Price Index™" Methodology has been obtained from and is based upon sources believed by RBC and the Guarantor LP to be accurate, however, neither RBC nor the Guarantor LP makes any representation or warranty, express or implied, in relation to the accuracy, completeness or reliability of such information or assumes any liability for any errors or any reliance you place on such information. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. The information contained in this report does not constitute an invitation or recommendation to invest or otherwise deal in, or an offer to sell or the solicitation of an offer to buy or subscribe for, any security, which will be made only by a prospectus or otherwise in accordance with applicable securities laws. Reliance should not be placed on the information herein when making any decision to buy, hold or sell any security or for any other purpose. THESE COVERED BONDS HAVE NOT BEEN APPROVED OR DISAPPROVED BY CANADA MORTGAGE HOUSING CORPORATION (CMHC) NOR HAS CMHC PASSED UPON THE ACCURACY OR ADEQUACY OF THIS REPORT. THE COVERED BONDS ARE NOT INSURED OR GUARANTEED BY CMHC OR THE GOVERNMENT OF CANADA OR ANY OTHER AGENCY THEREOF. The Cover Pool is owned by RBC Covered Bond Guarantor Limited Partnership (Guarantor LP), which has no liabilities or claims outstanding against it other than those relating to the RBC Covered Bond Programme. Please click on the link below for additional information about the RBC Covered Bond Programme and the information contained herein. <sup>(1)</sup> Determined on the basis of the most recent assessment or appraisal of value (whether upon origination or refinancing of the Loans or subsequent thereto).

<sup>(2)</sup> For Collateral Mortgages, authorized and drawn LTV has been calculated based on all Loans that are secured by the applicable Collateral Mortgage regardless of whether they form part of the Covered Bond Portfolio.

<sup>(3)</sup> Indexed at the time (and in the manner and with the frequency) required by Section 4.6 of the Guide (see Appendix Housing Price Index Methodology for details).

Disclaimer: Due to rounding, numbers presented in the following distribution tables may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

<sup>(1)</sup> None of the Mortgage asset in the Covered Bond Portfolio is non-amortizing. Non-amortizing refers to an Eligible Loan whose payments have stopped amortizing principal (including negative or stagnant amortizing mortgages) after transfer to the Guarantor LP. As long as any portion of principal is paid the loan will not be considered non-amortizing.

<sup>(2)</sup> When reporting Collateral Mortgage amounts, only Eligible Loans in the Covered Bond Portfolio are included.

## Appendix

The following is intended to provide details in relation to market risks, including interest rate risk, currency risk, credit risk, and liquidity risks as required by Annex H, VI. B of the Guide.

The information contained herein is intended solely for persons that thoroughly understand the Covered Bonds issued under the Programme and the terms of the Programme and associated risks and is not intended to be and should not be considered a complete or comprehensive summary of any aspect of, or risks associated with, the Issuer, the Guarantor LP, the Covered Bonds issued under the Programme or any other aspect of the Programme.

Reference to the "Prospectus" is to the Prospectus filed with the UKLA" on the Programme website as the same may be modified by any applicable supplemental prospectus under the heading "Supplemental Prospectuses" on the Programme website.

### Property Valuation Policies and Methodology

For property valuation method(s) used in respect of Eligible Loans, please see "Loan Origination, Renewals, Refinancing and Lending Criteria" in the most recently dated Prospectus under the heading "Prospectus filed with the UKLA" on the Programme website as the same may be modified by any applicable supplemental prospectus under the heading "Supplemental Prospectuses" on the Programme website.

### Methodology

The Market Value of the Properties used in calculating the Asset Coverage Test, the Valuation Calculation and the Amortization Test (except in respect of Calculation Dates prior to June 30, 2014) and for other purposes required by the Guide is adjusted, at least quarterly, for subsequent price developments with respect to the Property subject to the Related Security in respect of each such Loan by adjusting the Latest Valuation for such Property by a rate of change determined by the Index (as described below).

The Teranet-National Bank House Price Index™ Composite 11 (the **Index**) is an independently developed representation of monthly average home price changes in the following eleven Canadian metropolitan areas: Victoria, Vancouver, Calgary, Edmonton, Winnipeg, Hamilton, Toronto, Ottawa, Montréal, Québec and Halifax. These metropolitan areas are combined to form the Index. The Index is the weighted average of these eleven metropolitan areas.

Further details on the Index including a description of the method used to calculate the Index is available at [www.housepriceindex.ca](http://www.housepriceindex.ca)

A three-step process is used to determine the Market Value for each Property subject to the Related Security in respect of a Loan. First, a code (the Forward Sortation Area (**FSA**)) which identifies the location of the Property is compared to corresponding codes maintained by Teranet Inc. to confirm whether the property is located within any of the 11 Canadian metropolitan areas covered by the Index. Second, to the extent an FSA match is not found, the name of the city in which such Property is located is used to confirm whether such city matches any of the Canadian metropolitan areas covered by the Index. The Market Value is then determined by adjusting the Latest Valuation for such Property, at least quarterly, by the rate of change for the corresponding Canadian metropolitan area, and where there is no corresponding Canadian metropolitan area, the rate of change indicated in the Index, from the date of the Latest Valuation to the date on which the Latest Valuation is being adjusted for purposes of determining the Market Value for such Property. Where the Latest Valuation in respect of such Property pre-dates the first available date for the relevant rate of change in the Index, the first available date for such rate of change is used to determine the rate of change to apply to adjust the Latest Valuation for purposes of determining the Market Value for such Property. Such adjusted Market Value is the adjusted Original Market Value referred to in footnote 2 on page 4 of the Investor Report.

The Issuer and the Guarantor LP may from time to time determine to use a different index or indices or a different indexation methodology to adjust the Latest Valuation for subsequent price developments to determine Market Value for example, to obtain rates of changes in home prices for metropolitan or geographic areas not covered by the Index, to use an index or indices that the Issuer and Guarantor LP believe will produce better or more reliable results or that is more cost effective. Any such change in the Index or Index Methodology used to determine Market Value will be disclosed to Covered Bondholders and made in accordance with the definition of "Market Value" and "Index Methodology" in the Master Definition and Construction Agreement and be required to meet the requirements in the Guide, which include the requirement that any such change may only be made (i) upon notice to CMHC and satisfaction of any other conditions specified by CMHC in relation thereto, (ii) if such change constitutes a material change, subject to Rating Agency Confirmation, and (iii) if such change is materially prejudicial to the Covered Bondholders, subject to the consent of the Bond Trustee. In addition, the Issuer is required, pursuant to the Guide, to provide CMHC notice upon becoming aware of any change or proposed change in the method used to calculate the Index.

No website referred to herein forms part of the Investor Report, nor have the contents of any such website been approved by or submitted to CMHC or any other governmental, securities or other regulatory authority.

### Risk Factors relating to the Indexation Methodology

The Issuer and the Guarantor LP believe that the following factors, although not exhaustive, could be material for the purpose of assessing risks associated with the use of the Index. No recourse for errors in the data in the Index

The Issuer and the Guarantor LP have received written permission from the Index providers to use the Index. The data in the Index is provided on an "as is" basis and without any warranty as to the accuracy, completeness, non-infringement, originality, timeliness or any other characteristic of the data and the Index providers disclaim any and all liability with respect to such data. Neither the Issuer nor the Guarantor LP makes any representation or warranty, express or implied, in relation to the accuracy, completeness or reliability of such information or assumes any liability for any errors or reliance placed on such information. As a result, there will not be any recourse for investors, the Issuer or the Guarantor LP for any errors in the data in the Index relied upon to determine the Market Value in respect of any Property subject to the Related Security in respect of a Loan.

The actual rate of change in the value of a Property may differ from the rate of change used to adjust the Latest Valuation for such Property in determining its Market Value

The Index does not include a representation of changes in average home prices outside of the Canadian metropolitan areas that it covers and was developed as a representation of monthly average home price changes in the Canadian metropolitan areas that it does cover. While the Index uses data from single family properties, including detached, semi-detached, townhouse/row homes and condominium properties, it is being used to determine the Market Value of all Properties included as Related Security for Loans in the Covered Bond Portfolio, which may not correspond in every case to the categories included in the Index. The actual value of a Property subject to the Related Security in respect of each Loan may change at a rate that is greater than or less than the rate of change used to determine the Market Value for such Property. This discrepancy may be magnified when the Index is used to determine the Market Value for a Property outside of the Canadian metropolitan areas covered by the Index given factors that affect housing prices may vary significantly regionally from a national average or where the Index is used to determine Market Value for a Property in a category not covered by the Index and whose value is affected by factors that are different from those that affect the value of properties in the categories used by the Index. In addition, the methodology applied to produce the Index makes certain fundamental assumptions that impose difficulties in selecting or filtering the properties that are used to produce the Index due to a lack of information about the properties, which may result in such properties being excluded and may impact the accuracy of the representation of the rate of change in the Index.

The Index may not always be available in its current form or a different Index may be used to determine Market Value for a Property subject to Related Security in respect of a Loan. The Index providers may make a change to the method used to calculate the Index, the frequency with which the Index is published may change (such that the Index no longer meets the requirements in the Guide), or the Index may cease to be available to the Issuer and the Guarantor LP for determining the Market Value of the Property subject to Related Security in respect of a Loan. In such circumstances, the Issuer and the Guarantor LP may or will need to select one or more new indices for determining Market Value of the Property subject to Related Security in respect of a Loan. The Issuer and the Guarantor LP may also determine at any time to use a different index or indices to adjust the Latest Valuation of the Property subject to Related Security in respect of a Loan for subsequent price developments to determine the Market Value of such Property, for example, to obtain rates of changes in home prices for metropolitan or geographic areas not covered by the Index, to use an index or indices that the Issuer and Guarantor LP believe will produce better or more reliable Market Value results or that is more cost effective. The use of any such new indices to adjust Latest Valuation could result in a significant change in the Market Value of the real property subject to the Related Security in respect of each Loan. See "Housing Price Index Methodology - Indexation Methodology".

## Market Risk (namely, volatility in interest rates and exchange rates)

The Issuer and the Guarantor LP have entered into an Interest Rate Swap Agreement including a confirmation that is intended to provide the Guarantor LP with a hedge against possible variances in the rates of interest payable on the Loans in the Covered Pool (which may, for instance, include variable rates of interest or fixed rates of interest) and the amounts payable on the Intercompany Loan and (following the occurrence of a Covered Bond Guarantee Activation Event) the Covered Bond Swap Agreement. The Interest Rate Swap Agreement is currently effective. The Issuer may be required to post collateral to secure its obligations under the Interest Rate Swap Agreement upon the activation of rating triggers. These rating triggers have not been activated and no collateral has been posted. See "Supplementary Information", including "Description of Rating Triggers", "Cover Pool Flow of Funds" and "Valuation Calculation", above" and the Prospectus, including under the heading "Summary of the Principal Documents – Interest Rate Swap Agreement".

The Issuer and the Guarantor LP have entered into Covered Bond Swap Agreements to provide the Guarantor LP with a hedge against currency risks, interest rate risks and timing risks arising in respect of amounts received by the Guarantor LP under the Interest Rate Swap Agreement and amounts payable in respect of its obligations under the Covered Bond Guarantee. A separate swap confirmation has been entered into for each outstanding Series (or Tranche) of Covered Bonds. Each such confirmation is contingent with an effective date, following the issuance of the Series (or Tranche) of Covered Bonds to which it relates, being the earlier of (i) a Covered Bond Guarantee Activation Event, (ii) a Trigger Event Date, or (iii) an impending or actual insolvency on the part of the Issuer that constitutes an Issuer Event of Default pursuant to Condition 7.01(f). The Issuer may be required to post collateral to secure its obligations under the Covered Bond Swap Agreements upon activation of rating triggers. These rating triggers have not been activated. See "Supplementary Information", including "Description of Rating Triggers", "Cover Pool Flow of Funds" and "Valuation Calculation", above" and the Prospectus, including under the heading "Summary of the Principal Documents – Covered Bond Swap Agreement".

## Interest rate risk

Covered Bonds themselves are subject to interest rate risk. See "Risk Factors" in the Prospectus for further information including with respect to these and other risks, including under the heading "Risk Factors – Factors which are material for the purposes of assessing the risks relating to the Covered Bonds". Also see "Programme Information – Outstanding Covered Bonds – Interest Basis and Rate Type" above.

Loans in the Cover Pool are affected by credit, liquidity and interest rate risks. Borrowers may default on their obligations due under the Loans. Defaults may occur for a variety of reasons. As such, the Loans are affected by credit, liquidity, housing market, economic and interest rate risks. See "Market Risk (namely volatility in interest rate and exchange rates)", "Cover Pool Rate Type Distribution" and "Cover Pool Mortgage Rate Distribution", above, in addition to information in the Prospectus.

## Currency risk

Each Loan in the Cover Pool is denominated in Canadian dollars, while Covered Bonds may be payable in Canadian dollars or a currency other than Canadian dollars. The Asset Coverage Test, which is intended to monitor and ensure that the assets and cashflows of the Guarantor LP, including the Loans and their Related Security in the Covered Bond Portfolio and cashflows in respect thereof, will be adequate to enable the Guarantor LP to meet its obligations under the Covered Bond Guarantee and Regulatory OC Minimum Calculation, for example, uses the Canadian Dollar Equivalent of the aggregate Principal Amount Outstanding of the Covered Bonds as calculated at the relevant Calculation Date for purposes of such calculation. See "Programme Information – Outstanding Covered Bonds – Initial Principal Amount, Translation Rate and C\$ Equivalent" and "Market Risk (namely volatility in interest rate and exchange rates)", above, in addition to information in the Prospectus regarding the Asset Coverage Test and Regulatory OC Minimum Calculation, including under the heading "Credit Structure".

## Credit risk

Credit risk in respect of the Covered Bonds includes the risk of loss associated with the Issuer's potential inability to pay on the Covered Bonds. This obligation to pay is guaranteed by the Guarantor LP pursuant to the Covered Bond Guarantee. The Asset Coverage Test, the Regulatory OC Minimum Calculation, the Valuation Calculation, the Amortization Test and the Index Methodology are intended to monitor and ensure that the assets and cashflows of the Guarantor LP, including the Loans and their Related Security in the Covered Pool and cashflows in respect thereof, will be adequate to enable the Guarantor LP to meet its obligations under the Covered Bond Guarantee. See "Market Risk (namely volatility in interest rate and exchange rates)", above, in addition to information in the Prospectus, including under the heading "Credit Structure".

## Liquidity risk

If a Covered Bond Guarantee Activation Event occurs, the Guarantor LP may need to sell Loans and their Related Security to meet its obligations to creditors and under the Covered Bond Guarantee. There is no guarantee that a buyer will be found to acquire such Loans and their Related Security at the times required and there can be no guarantee or assurance as to the price which may be able to be obtained, which may affect payments under the Covered Bond Guarantee. An Extended Due for Payment Date twelve-months after the Final Maturity Date has been specified in the Final Terms for each Series (or Tranche). Following a Covered Bond Guarantee Activation Event, in the six months prior to, as applicable, the Final Maturity Date or Extended Due for Payment Date, the Guarantor LP will sell Loans and their Related Security for the best price reasonably available notwithstanding that such price may be less than the Adjusted Required Redemption Amount. Where the Guarantor LP determines it is necessary to sell the Loans and their Related Security by a particular date, this may have an adverse effect on their sale price.

Covered Bonds themselves may also be subject to liquidity risks. See "Risk Factors" in the Prospectus for further information including with respect to these and other risks, including under the heading "Risk Factors – Factors which are material for the purposes of assessing the risks relating to the Covered Bonds".

## Maturity Structure, Extension Triggers and Extended Due Dates

An Extended Due for Payment Date twelve-months after the Final Maturity Date has been specified in the Final Terms for each Series (or Tranche). This means that if the Issuer fails to pay the Final Redemption Amount of a series of Covered Bonds on the Final Maturity Date (subject to applicable grace periods) and the Guarantor LP has insufficient moneys available to pay in full the Guaranteed Amounts corresponding to the Final Redemption Amount in accordance with applicable Priorities of Payments, then payment of the unpaid amount pursuant to the Covered Bond Guarantee will be automatically deferred and will be due and payable on the Extended Due for Payment Date specified in the applicable Final Terms. To the extent it has available funds the Guarantor will be required to make partial payments of amounts remaining unpaid on each Interest Payment Date until the Extended Due for Payment Date. The Interest Basis specified in this report in respect of each Series (or Tranche) applies until the Final Maturity Date for the relevant Series (or Tranche) following which the floating rate of interest specified in the Final Terms of each Series (or Tranche) is payable monthly in arrears from the Final Maturity Date to but excluding the Extended Due for Payment Date. For further details, see the Final Terms for each Series (or Tranche) and the Prospectus, including Condition 6.01 and the description under the heading "Structure Overview - Structure Overview – Extendable obligations under the Covered Bond Guarantee".
