

PROHIBITION OF SALES TO EEA RETAIL INVESTORS – Other than with respect to offers of the Notes in any jurisdiction(s) for which a key information document under Regulation (EU) No 1286/2014 (as amended, the “**PRIIPs Regulation**”) has been drawn up, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“**EEA**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or (ii) a customer within the meaning of Directive (EU) 2016/97, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129. Consequently, save as provided above, no key information document required by the PRIIPs Regulation for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom (“**UK**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No. 2017/565 as it forms part of UK domestic law by virtue of the EUWA; or (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No. 600/2014 as it forms part of UK domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of the UK Prospectus Regulation. Consequently no key information document required by Regulation (EU) No. 1286/2014 as it forms part of UK domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

PROHIBITION OF OFFER TO PRIVATE CLIENTS IN SWITZERLAND - Other than for the duration of the listing of the Notes on SIX Swiss Exchange for which a key information document according to the Swiss Federal Financial Services Act (“**FinSA**”) or an equivalent document under FinSA has been prepared, the Notes are not intended to be offered or recommended to private clients within the meaning of FinSA in Switzerland. For these purposes, a private client means a person who is not one (or more) of the following: (i) a professional client as defined in Article 4(3) FinSA (not having opted-in on the basis of Article 5(5) FinSA) or Article 5(1) FinSA; or (ii) an institutional client as defined in Article 4(4) FinSA; or (iii) a private client with an asset management agreement according to Article 58(2) FinSA.

The Notes do not constitute a participation in a collective investment scheme in the meaning of the Swiss Federal Act on Collective Investment Schemes (“**CISA**”) and are not subject to the supervision by the Swiss Financial Market Supervisory Authority FINMA, and investors will not benefit from the specific investor protection under the CISA.

What are the key risks that are specific to the Issuer?

Business and Economic Conditions: The Issuer's financial results are affected to varying degrees by the general business and economic conditions in the geographic regions in which the Issuer operates. These conditions may include factors such as: economic growth or contraction trends; consumer saving and spending habits, consumer and corporate borrowing and repayment patterns, unemployment rates; the differing economic trajectories among nations across the globe, global tensions and geopolitical uncertainty and conflicts; the level of business investment and overall business sentiment; trade policy developments; the emergence of a new outbreak of a pandemic or other health crisis; the level of government spending as well as fiscal and monetary policy; the level of activity and volatility of the financial markets; disruptions to energy and other commodity markets; competitiveness; supply chain challenges and labour shortages; the evolution of inflationary pressures; and possible stagflation or deflation. Moreover, interest rate changes and actions taken by central banks to manage inflation, deflation, or the broader economy have implications for the Issuer. The Issuer's financial results are sensitive to changes in interest rates, as described in the "Government fiscal, monetary and other policies" section below. For example, a slowdown in economic growth or an economic downturn could adversely impact employment rates and household incomes, consumer spending, housing prices, corporate earnings and business investment and could adversely affect the Issuer's business, including, but not limited to, the demand for its loan and other products, and result in lower earnings and higher credit losses. In addition to risks arising from monetary policy uncertainty (e.g., the pace and magnitude of monetary easing), risks are also emerging around how governments manage elevated debt burdens and how they may introduce new support measures to deal

with emerging economic challenges. This may include, for example, changes to tax policy to address fiscal capacity concerns and to balance budgets in the future.

There are also emerging risks related to wealth and income inequality, as well as changing demographics and immigration, which could impact the labour market, the housing market, inflation, demand and consumer trends, and potentially have broader societal and government policy implications.

Information Technology and Cyber Risks: Information technology risk, cyber risks and third-party risk remain top risks, not only for the financial services sector, but for other industries worldwide. Geopolitical tensions have increased the risk of nation state actors attacking critical infrastructure, including banks and critical third parties. Information technology risk is the risk associated with the use, ownership, operation and adoption of information systems that can result in business interruptions, client service disruptions and loss of confidential information causing financial loss, reputational damage and regulatory fines and penalties. Cybersecurity risk is the risk to the Issuer associated with cyberattacks initiated to disrupt or disable its operations or to expose or damage data. The Issuer continues to be subject to heightened inherent risk of cyberattacks, data breaches, cyber extortion and similar compromises, due to: (i) the size, scale, and global nature of its operations; (ii) its heavy reliance on the internet to conduct day-to-day business activities; (iii) its intricate technological infrastructure; and (iv) its reliance on third-party service providers.

Privacy and Data Related Risks: Information management risk is the risk of failing to manage information appropriately throughout its lifecycle due to inadequate processes, controls and technology, resulting in legal and regulatory consequences, reputational damage and/or financial loss. Privacy risk is defined as the risk of improper creation or collection, use, disclosure, retention or destruction of personal information ("PI"), including the failure to safeguard PI against unauthorized access. PI is information entrusted to the Issuer that identifies an individual or can be reasonably used to identify an individual. PI can relate to current, former and prospective clients, employees and contractors. The protection and responsible use of PI are critical to maintaining the Issuer's clients' trust. In addition, the management and governance of the Issuer's data also remains a top risk given the high value attributed to its data for the insights it can generate for clients and communities. Resulting implications from failing to manage data and privacy risks could include financial loss, theft of intellectual property and/or confidential information, litigation, enhanced regulatory attention and penalties, and reputational damage. Effective privacy and information management practices continue to grow in importance, as demonstrated by the continued development of complex regulations in the jurisdictions in which the Issuer operates. Privacy and data related risks have also heightened as a result of the evolving threat landscape, and associated data breach risks.

Regulatory Changes: The ongoing introduction of new or revised regulations requires enhanced focus across the organization on meeting additional regulatory requirements across the multiple jurisdictions in which the Issuer operates. See business segment results on pages 32 to 61 of the 2024 MD&A and pages 12 to 23 of the Second Quarter 2025 MD&A incorporated by reference in the Base Prospectus for information on the Issuer's business segments and the jurisdictions in which it operates. Financial and other reforms that have been implemented or are being implemented, across multiple jurisdictions, such as digital, data and technology reforms, cyber security and anti-money laundering regulations, interest rate benchmark and payments reform, as well as privacy, tax reforms, climate, sustainability and consumer protection regulatory initiatives, continue to impact the Issuer's operations and strategies. Failure to effectively manage this risk may negatively impact the Issuer's financial performance, condition and prospects.

Where will the securities be traded?

Application has been made by the Issuer (or on its behalf) for the Notes to be listed and admitted to trading on the SIX Swiss Exchange.

What are the key risks that are specific to the securities?

Risks associated with the Notes include the following:

Modification and waivers: holders of the Notes are exposed to the risk that their rights in respect of the Notes are varied against their will, which may result in an investment in any Notes becoming less advantageous to a particular holder depending on individual circumstances.

Secondary market: an active secondary market in respect of the Notes may never be established or may be illiquid and this would adversely affect the value at which an investor could sell its Notes.

Exchange rate risk: if an investor holds Notes which are not denominated in the investor’s home currency, the investor will be exposed to movements in exchange rate adversely affecting the value of the holding of Notes. Also the imposition of exchange controls or certain other specified events in relation to the Notes could result in an investor not receiving payment on the Notes.

Credit ratings: Credit ratings assigned to the Issuer or the Notes might not reflect all the risks associated with an investment in the Notes.

Cap on return: the maximum possible return on the Notes will be limited to principal amount of the Notes.

Market disruptions: the Calculation Agent may determine that a market disruption event or other adjustment event has occurred which may have an adverse effect on the value of or payment received with respect to the Notes and/or may delay applicable payments or settlement.

Additional disruption events: if any of Change in Law, Hedging Disruption or Increased Cost of Hedging occur, the Notes will be subject to adjustment or may be redeemed early. The amount due on such redemption may be substantially less than an investor’s investment and may in certain circumstances be zero.

II. SIGNIFICANT RISKS FOR INVESTORS

RISKS	
Product Risk	These Securities are capital protected. These Securities are not guaranteed against losses by the Issuer, Dealer, their affiliates, the UK Financial Services Compensation Scheme or any equivalent European deposit guarantee scheme.
U.S. Withholding Tax on Dividend Equivalent Payments	The United States Internal Revenue Code of 1986, as amended, treats a “dividend equivalent” payment as a dividend from sources within the United States. Unless reduced by an applicable tax treaty with the United States, such payments generally would be subject to U.S. withholding tax of 30% if paid to a non-U.S. holder. A non-U.S. holder is a beneficial owner of a Note that, for U.S. federal income tax purposes, is a non-resident alien individual, a foreign corporation, or a foreign estate or trust. Under recently finalized U.S. Treasury Department regulations, payments on certain equity-linked instruments (including deemed payments) that are contingent upon or determined by Reference to actual or estimated U.S. source dividends, (regardless of whether such contingency or determination is explicitly stated or implicitly taken into account in computing one or more of the terms of such instruments) may be treated as dividend equivalents subject to withholding tax. Withholding tax will apply to dividend equivalent payments on Notes issued or materially modified on or after January 1, 2017. If any payments are treated as dividend equivalent subject to withholding, we (or the applicable paying agent) would be required to withhold taxes and would not be required to pay any additional amounts with respect to amounts so withheld. Prospective investors of the Notes should consult their own tax advisers regarding the application of the U.S. rules for withholding on dividend equivalents.
Issuer Risk	Investors bear the issuer risk. The Security’s value and the payment of any income or bonus amount (where one is payable) are dependent not only on the development of the Reference Item, but also on the creditworthiness of the Issuer, which may vary over the term of the Security. The ratings of the Issuer noted above reflect the independent opinion of the rating agencies as to the safety of payments of principal and interest. These ratings are not a guarantee of credit quality. The ratings do not take into consideration any risk associated with fluctuations in the market value of this Security, or where factors other than the Issuer’s credit quality determine the level of principal and interest payments.
Reference Item	N/A
FX Risk	N/A
Physical Delivery	N/A
Liquidity Risk	The investor should be prepared to hold this Security until maturity should it not be called or terminated early, if such option exists, by the Issuer. The Dealer will, however, use its reasonable endeavours to provide liquidity to the Security (either directly or through an affiliate) but is not obliged to do so and may stop providing liquidity at any time without notice. This means an investor should not rely on having the ability to redeem the Security at a particular time or for a certain price. If the Security is redeemed early, the investor may get back less than the stated redemption amount. The Issue Price is not a direct reflection of the market value of the Security. The level at which the investor purchases the Security includes hedging costs and profits that the Dealer or its affiliates expect to incur or realize. The Issue Price may also include selling commissions paid by the Dealer to distributors and/or intermediaries. Any selling commissions, costs and profits will reduce the secondary market level, if any secondary

market develops, for the Security. As a result, the investor may experience an immediate and substantial decline in the value of the Securities on the Issue Date.

The investor may receive less than its original invested amount in the Securities.

Tax Risk

An investment in the Securities may give rise to tax consequences. Any tax liability is dependent on the taxpayer's personal circumstances. The basis and level of any taxes may change during the term of the Security.

Fees

The Issue Price may include a fee or commission payable by the Dealer to a distributor or third party, such a fee or commission will be determined by a number of factors including but not limited to the maturity of the Security, hedging

costs and legal fees. Any fee or commission received by the distributor or third party may be in addition to the fee normally charged by that party in connection with an investment in the Security. Further details in respect of the fee or commission are available upon request.

SALES RESTRICTION

EEA Retail Investor Offering Information

The Base Prospectus (as contemplated by the Final Terms of the Notes) has been prepared on the basis that any offer of Notes in any Member State of the European Economic Area (“EEA”) which has implemented Regulation (EU) 2017/1129 (the “Prospectus Regulation”) will be made pursuant to an exemption under the Prospectus Regulation, as implemented in the Relevant State, from the requirement to publish a prospectus for offers of Notes. Accordingly, the Notes should not be sold or offered, directly or indirectly, to persons in any Relevant State except in circumstances which would not require the publication of a prospectus and any person making or intending to make an offer in that Relevant State of Notes should only do so in circumstances in which no obligation arises for the Issuer or RBC Europe Limited to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation in relation to such offer. No recipient of this termsheet is authorized by any person to act in a way which would result in an offer to it being considered to be a placement through an intermediary for the purposes of the Prospectus Regulation.

The Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA without an up-to-date PRIIPS KID being in place with the prior written consent of RBC Europe Limited and provided in accordance with the PRIIPS Regulation. If the aforementioned consent of RBC Europe Limited has not been received then no key information document required by Regulation (EU) No 1286/2014 (as amended, the “PRIIPs Regulation”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

L'indicateur synthétique de risque permet d'apprécier le niveau de risque de ce produit par rapport à d'autres. Il indique la probabilité que ce produit enregistre des pertes en cas de mouvements sur les marchés ou d'une impossibilité de notre part de vous payer.

Nous avons classé ce produit dans la classe de risque 2 sur 7, qui est une classe de risque basse. Autrement dit, les pertes potentielles liées aux futurs résultats du produit se situent à un niveau faible et, si la situation venait à se détériorer sur les marchés, il est très peu probable que notre capacité à vous payer en soit affectée.

L'inflation érode la valeur d'achat de l'argent au fil du temps, ce qui peut provoquer la baisse en termes réels de tout capital remboursé ou de tout intérêt que vous pouvez recevoir dans le cadre de l'investissement.

Vous avez le droit à la restitution d'au moins 115,00 % de votre capital. Toutefois, cette protection contre les performances futures du marché ne s'appliquera pas si vous sortez avant l'échéance ou en cas de résiliation immédiate par l'émetteur.

Si nous ne sommes pas en mesure de vous verser les sommes dues, vous pouvez perdre l'intégralité de votre investissement.

Pour obtenir des informations détaillées sur tous les risques liés au produit, veuillez-vous reporter aux sections sur les risques dans le prospectus ainsi qu'aux suppléments éventuels y figurant, comme indiqué dans la section « 7. Autres informations pertinentes » ci-dessous.

Les scénarios favorable, intermédiaire, défavorable et de tensions représentent des résultats possibles basés sur des simulations utilisant la performance passée du **taux de référence** pendant une période jusqu'à 5 années. Il n'est pas facile de sortir de ce produit. Si vous sortez de l'investissement avant la fin de période de détention recommandée aucune garantie ne vous est donnée et vous pourriez subir des coûts supplémentaires.

Les chiffres indiqués comprennent tous les coûts du produit lui-même, mais pas nécessairement tous les frais dus à votre conseiller ou distributeur. Ces chiffres ne tiennent pas compte de votre situation fiscale personnelle, qui peut également influencer sur les montants que vous recevrez.

3. Que se passe-t-il si l'émetteur n'est pas en mesure d'effectuer les versements?

Vous êtes exposé au risque que l'émetteur ne soit pas en mesure d'honorer ses obligations concernant le produit, par exemple en cas de faillite ou de décision administrative de mesure de résolution. Cela peut avoir une incidence défavorable sur la valeur du produit et pourrait vous amener à perdre tout ou partie de votre investissement dans le produit. Le produit n'est pas couvert par un système de protection des dépôts.

4. Que va me coûter cet investissement?

Il se peut que la personne qui vous vend ce produit ou qui vous fournit des conseils à son sujet vous demande de payer des coûts supplémentaires. Si c'est le cas, cette personne vous informera au sujet de ces coûts et vous montrera l'incidence de ces coûts sur votre investissement.

Coûts au fil du temps

Les tableaux présentent les montants prélevés sur votre investissement afin de couvrir les différents types de coûts. Ces montants dépendent du montant que vous investissez, du temps pendant lequel vous détenez le produit et du rendement du produit. Les montants indiqués ici sont des illustrations basées sur un exemple de montant d'investissement et différentes périodes d'investissement.

La durée de ce produit est aléatoire étant donné qu'il peut être résilié à différents moments selon l'évolution du marché. Les montants indiqués ici prennent en considération deux scénarios différents (remboursement anticipé et échéance). Dans le cas où vous choisissez de sortir avant la fin du produit, des coûts de sortie peuvent s'appliquer en plus des montants indiqués ici.

Nous avons supposé:

- que 10 000 EUR sont investis
- une performance du produit qui correspond à chaque période de détention présentée.

	<i>Si le produit est remboursé par anticipation à la première date possible, le 1 mars 2029</i>	<i>Si le produit arrive à échéance</i>
Coûts totaux	292 EUR	292 EUR
Incidence des coûts annuels*	1,10 % chaque année	0,31 % chaque année

*Ceci montre dans quelle mesure les coûts réduisent annuellement votre rendement au cours de la période de détention. Par exemple, ceci montre que si vous sortez à l'échéance, il est prévu que votre rendement moyen par an soit de 3,70 % avant déduction des coûts et de 3,39 % après cette déduction.

Il se peut que nous partagions les coûts avec la personne qui vous vend le produit afin de couvrir les services qu'elle vous fournit. Cette personne vous informera du montant.

5. Combien de temps dois-je le conserver, et puis-je retirer de l'argent de façon anticipée?

Période de détention recommandée: 10 ans

Le produit vise à vous fournir le rendement décrit dans la section « 1. En quoi consiste ce produit? » ci-dessus. Toutefois, cela ne s'applique que si le produit est détenu jusqu'à l'échéance. Il est donc recommandé que le produit soit conservé jusqu'au 28 février 2036 (échéance), bien que le produit puisse être remboursé par anticipation.

Le produit ne garantit pas la possibilité de désinvestir autrement qu'en vendant le produit soit (1) via la bourse (si le produit est négocié en bourse), soit (2) hors-marché si une offre pour le produit existe. Sauf indication contraire dans les coûts de sortie (veuillez voir la section « 4. Que va me coûter cet investissement? » ci-dessous), l'émetteur n'appliquera pas de frais ou pénalités supplémentaires pour une telle opération. Des frais d'exécution peuvent toutefois être facturés par votre courtier, le cas échéant. En vendant le produit avant l'échéance, vous encourez le risque de recevoir un rendement inférieur à celui que vous auriez reçu si vous aviez conservé le produit jusqu'à l'échéance.

Dans des conditions de marché volatiles ou exceptionnelles, ou en cas de défaillances ou perturbations techniques, l'achat et/ou la vente du produit peut être temporairement entravé et/ou suspendu et éventuellement peut ne pas être possible du tout.
