

PROHIBITION OF SALES TO EEA RETAIL INVESTORS – Other than with respect to offers of the Notes in any jurisdiction(s) for which a key information document under Regulation (EU) No 1286/2014 (as amended, the “**PRIIPs Regulation**”) has been drawn up, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“**EEA**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or (ii) a customer within the meaning of Directive (EU) 2016/97, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129. Consequently, save as provided above, no key information document required by the PRIIPs Regulation for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom (“**UK**”). For these purposes, a retail investor means a person who is neither: (i) a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No. 600/2014 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“**EUWA**”); nor (ii) a qualified investor as defined in paragraph 15 of Schedule 1 to the Public Offers and Admissions to Trading Regulations 2024 (“**POATRs**”). Consequently no key information document required by Regulation (EU) No. 1286/2014 as it forms part of UK domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

PROHIBITION OF OFFER TO PRIVATE CLIENTS IN SWITZERLAND - Other than for the duration of the listing of the Notes on SIX Swiss Exchange for which a key information document according to the Swiss Federal Financial Services Act (“**FinSA**”) or an equivalent document under FinSA has been prepared, the Notes are not intended to be offered or recommended to private clients within the meaning of FinSA in Switzerland. For these purposes, a private client means a person who is not one (or more) of the following: (i) a professional client as defined in Article 4(3) FinSA (not having opted-in on the basis of Article 5(5) FinSA) or Article 5(1) FinSA; or (ii) an institutional client as defined in Article 4(4) FinSA; or (iii) a private client with an asset management agreement according to Article 58(2) FinSA.

The Notes do not constitute a participation in a collective investment scheme in the meaning of the Swiss Federal Act on Collective Investment Schemes (“**CISA**”) and are not subject to the supervision by the Swiss Financial Market Supervisory Authority FINMA, and investors will not benefit from the specific investor protection under the CISA.

What are the key risks that are specific to the Issuer?

Business and Economic Conditions: The Issuer's financial results are affected to varying degrees by the general business and economic conditions in the geographic regions in which the Issuer operates. These conditions may include factors such as: economic growth or contraction trends; consumer saving and spending habits, consumer and corporate borrowing and repayment patterns, unemployment rates; the differing economic trajectories among nations across the globe, global tensions and geopolitical uncertainty and conflicts; the level of business investment and overall business sentiment; trade policy developments; the emergence of a new outbreak of a pandemic or other health crisis; the level of government spending as well as fiscal and monetary policy; the level of activity and volatility of the financial markets; disruptions to energy and other commodity markets; competitiveness; supply chain challenges and labour shortages; the evolution of inflationary pressures; and possible stagflation or deflation. Moreover, interest rate changes and actions taken by central banks to manage inflation, deflation, or the broader economy have implications for the Issuer. The Issuer's financial results are sensitive to changes in interest rates, as described in the "Government fiscal, monetary and other policies" section below. For example, a slowdown in economic growth or an economic downturn could adversely impact employment rates and household incomes, consumer spending, housing prices, corporate earnings and business investment and could adversely affect the Issuer's business, including, but not limited to, the demand for its loan and other products, and result in lower earnings and higher credit losses. In addition to risks arising from monetary policy uncertainty (e.g., the pace and magnitude of monetary easing), risks are also emerging around how governments manage elevated debt burdens and how they may introduce new support measures to deal

with emerging economic challenges. This may include, for example, changes to tax policy to address fiscal capacity concerns and to balance budgets in the future.

There are also emerging risks related to wealth and income inequality, as well as changing demographics and immigration, which could impact the labour market, the housing market, inflation, demand and consumer trends, and potentially have broader societal and government policy implications.

Information Technology and Cyber Risks: Information technology risk, cyber risks and third-party risk remain top risks, not only for the financial services sector, but for other industries worldwide. Geopolitical tensions have increased the risk of nation state actors attacking critical infrastructure, including banks and critical third parties. Information technology risk is the risk associated with the use, ownership, operation and adoption of information systems that can result in business interruptions, client service disruptions and loss of confidential information causing financial loss, reputational damage and regulatory fines and penalties. Cybersecurity risk is the risk to the Issuer associated with cyberattacks initiated to disrupt or disable its operations or to expose or damage data. The Issuer continues to be subject to heightened inherent risk of cyberattacks, data breaches, cyber extortion and similar compromises, due to: (i) the size, scale, and global nature of its operations; (ii) its heavy reliance on the internet to conduct day-to-day business activities; (iii) its intricate technological infrastructure; and (iv) its reliance on third-party service providers.

Privacy and Data Related Risks: Information management risk is the risk of failing to manage information appropriately throughout its lifecycle due to inadequate processes, controls and technology, resulting in legal and regulatory consequences, reputational damage and/or financial loss. Privacy risk is defined as the risk of improper creation or collection, use, disclosure, retention or destruction of personal information ("PI"), including the failure to safeguard PI against unauthorized access. PI is information entrusted to the Issuer that identifies an individual or can be reasonably used to identify an individual. PI can relate to current, former and prospective clients, employees and contractors. The protection and responsible use of PI are critical to maintaining the Issuer's clients' trust. In addition, the management and governance of the Issuer's data also remains a top risk given the high value attributed to its data for the insights it can generate for clients and communities. Resulting implications from failing to manage data and privacy risks could include financial loss, theft of intellectual property and/or confidential information, litigation, enhanced regulatory attention and penalties, and reputational damage. Effective privacy and information management practices continue to grow in importance, as demonstrated by the continued development of complex regulations in the jurisdictions in which the Issuer operates. Privacy and data related risks have also heightened as a result of the evolving threat landscape, and associated data breach risks.

Regulatory Changes: The ongoing introduction of new or revised regulations requires enhanced focus across the organization on meeting additional regulatory requirements across the multiple jurisdictions in which the Issuer operates. See business segment results on pages 32 to 61 of the 2024 MD&A and pages 12 to 23 of the Second Quarter 2025 MD&A incorporated by reference in the Base Prospectus for information on the Issuer's business segments and the jurisdictions in which it operates. Financial and other reforms that have been implemented or are being implemented, across multiple jurisdictions, such as digital, data and technology reforms, cyber security and anti-money laundering regulations, interest rate benchmark and payments reform, as well as privacy, tax reforms, climate, sustainability and consumer protection regulatory initiatives, continue to impact the Issuer's operations and strategies. Failure to effectively manage this risk may negatively impact the Issuer's financial performance, condition and prospects.

“Final Valuation Date” means 31 March 2036

“Initial Value” means Initial Valuation 1

“Relevant Initial Monitoring Date” means 30 March 2026

Maturity: Subject to any purchase and cancellation or early redemption following an Autocall Event, each Note will be redeemed on 16 April 2036 at the Final Redemption Amount set out below.

“Final Level” means the Single Relevant Reference Performance Level on the Final Valuation Date

Final Redemption Amount:(a) If the Final Level is equal to or greater than its corresponding Digital Strike Level, the Final Redemption Amount shall be: Specified Denomination \times 200.20% (b) Otherwise, if the Final Level is equal to or greater than its corresponding Put Barrier Level, then the Final Redemption Amount shall be: Specified Denomination \times 100.00% (c) Otherwise, the Final Redemption Amount shall be calculated in accordance with the following formula: Specified Denomination \times (Single Underlying Relevant Reference Performance / Put Strike Level)

“Put Barrier Level” means 50.00%

“Digital Strike Level” means 70.00%

“Put Strike Level” means 100.00%

Early Redemption: The Notes may be redeemed early for taxation reasons, illegality, or event of default, or on the occurrence of certain events (“**Benchmark Events**”) relating to the Reference Item or the administrator or sponsor (including without limitation material change; cancellation; prohibition of use; non-representativeness; or rejection,

suspension or withdrawal of authorisation or registration) at the fair value of the Notes as determined by the Calculation Agent.

Adjustments: The terms of the Notes may be subject to adjustment as provided therein to take into account events in relation to the Reference Item or the Notes or the occurrence of a Benchmark Event.

Where will the securities be traded?

Application has been made by the Issuer (or on its behalf) for the Notes to be listed and admitted to trading on the SIX Swiss Exchange.

What are the key risks that are specific to the securities?

Risks associated with the Notes include the following:

Modification and waivers: holders of the Notes are exposed to the risk that their rights in respect of the Notes are varied against their will, which may result in an investment in any Notes becoming less advantageous to a particular holder depending on individual circumstances.

Secondary market: an active secondary market in respect of the Notes may never be established or may be illiquid and this would adversely affect the value at which an investor could sell its Notes.

Exchange rate risk: if an investor holds Notes which are not denominated in the investor's home currency, the investor will be exposed to movements in exchange rate adversely affecting the value of the holding of Notes. Also the imposition of exchange controls or certain other specified events in relation to the Notes could result in an investor not receiving payment on the Notes.

Credit ratings: Credit ratings assigned to the Issuer or the Notes might not reflect all the risks associated with an investment in the Notes.

Risks relating to Reference Item Linked Notes: an investor's return (if any) will depend upon the performance of the Reference Item. An investment in the Notes entails significant risks that are not associated with similar investments in conventional debt or equity securities and in some circumstances the amount of interest payable on the Notes on an interest payment date may be zero and/or the value of the Notes and/or the amount paid at maturity may be less than the purchase price amount of the Notes and may be zero in which case an investor may lose some or all of the amount it invested in the Notes.

The Notes do not benefit from a protection amount: on the maturity date the amount payable in respect of the Notes may be less than the initial investment amount and purchasers of the Notes are exposed to full loss of their investment due to the lack of protection amount.

Cap on return: the maximum possible return on the Notes will be limited to principal amount of the Notes and the return will not increase even if the Reference Item outperforms the stated maximum return.

Market disruptions: the Calculation Agent may determine that a market disruption event or other adjustment event has occurred which may have an adverse effect on the value of or payment received with respect to the Notes and/or may delay applicable payments or settlement.

Additional disruption events: if any of Change in Law, Hedging Disruption or Increased Cost of Hedging occur, the Notes will be subject to adjustment or may be redeemed early. The amount due on such redemption may be substantially less than an investor's investment and may in certain circumstances be zero.

II. SIGNIFICANT RISKS FOR INVESTORS

RISKS	
Product Risk	These Securities are capital at risk. This means there is a risk that you could lose your entire investment or part of it. These Securities are not guaranteed against losses by the Issuer, Dealer, their affiliates, the UK Financial Services Compensation Scheme or any equivalent European deposit guarantee scheme.
U.S. Withholding Tax on Dividend Equivalent Payments	The United States Internal Revenue Code of 1986, as amended, treats a “dividend equivalent” payment as a dividend from sources within the United States. Unless reduced by an applicable tax treaty with the United States, such payments generally would be subject to U.S. withholding tax of 30% if paid to a non-U.S. holder. A non-U.S. holder is a beneficial owner of a Note that, for U.S. federal income tax purposes, is a non-resident alien individual, a foreign corporation, or a foreign estate or trust. Under recently finalized U.S. Treasury Department regulations, payments on certain equity-linked instruments (including deemed payments) that are contingent upon or determined by Reference to actual or estimated U.S. source dividends, (regardless of whether such contingency or determination is explicitly stated or implicitly taken into account in computing one or more of the terms of such instruments) may be treated as dividend equivalents subject to withholding tax. Withholding tax will apply to dividend equivalent payments on Notes issued or materially modified on or after January 1, 2017. If any payments are treated as dividend equivalent subject to withholding, we (or the applicable paying agent) would be required to withhold taxes and would not be required to pay any additional amounts with respect to amounts so withheld. Prospective investors of the Notes should consult their own tax advisers regarding the application of the U.S. rules for withholding on dividend equivalents.
Issuer Risk	Investors bear the issuer risk. The Security’s value and the payment of any income or bonus amount (where one is payable) are dependent not only on the development of the Reference Item, but also on the creditworthiness of the Issuer, which may vary over the term of the Security. The ratings of the Issuer noted above reflect the independent opinion of the rating agencies as to the safety of payments of principal and interest. These ratings are not a guarantee of credit quality. The ratings do not take into consideration any risk associated with fluctuations in the market value of this Security, or where factors other than the Issuer’s credit quality determine the level of principal and interest payments.
Reference Item	The value of the Security is linked to the Reference Item(s). The past performance of the Reference Item(s) is not an indication or guarantee of future performance. Any decision to invest in the Securities should not be based solely or primarily on the past performance of the Reference Item(s). The performance of the Reference Item(s) may be volatile and subject to unpredictable changes over the term of the Security. The investor should be prepared to assume this risk, including the potential risk of insolvency of the Reference Item(s) issuer(s). Fluctuations in price of the Reference Item(s) may result in the investor losing the entire investment or a substantial part of it. An investment in the Securities does not create a direct investment in the underlying Reference Item(s). Where the Reference Item(s) is an equity/basket of equities, the

investor will not be eligible to receive dividend payments or any voting rights associated with a direct investment in the Reference Item(s).

FX Risk

N/A

Liquidity Risk

The investor should be prepared to hold this Security until maturity should it not be called or terminated early, if such option exists, by the Issuer. The Dealer will, however, use its reasonable endeavours to provide liquidity to the Security (either directly or through an affiliate) but is not obliged to do so and may stop providing liquidity at any time without notice. This means an investor should not rely on having the ability to redeem the Security at a particular time or for a certain price. If the Security is redeemed early, the investor may get back less than the stated redemption amount. The Issue Price is not a direct reflection of the market value of the Security. The level at which the investor purchases the Security includes hedging costs and profits that the Dealer or its affiliates expect to incur or realize. The Issue Price may also include selling commissions paid by the Dealer to distributors and/or intermediaries. Any selling commissions, costs and profits will reduce the secondary market level, if any secondary market develops, for the Security. As a result, the investor may experience an immediate and substantial decline in the value of the Securities on the Issue Date.

It is therefore possible that RBCEG or one of its subsidiaries, or affiliates, or one of their officers, employees, representatives or agents (together "the Bank Group") or another client of the Bank Group may have interests, relationships and/or arrangements that give rise to conflicts of interest in relation to business that is transacted with you. Any conflicts of interest will be managed in accordance with the Bank Group's established policies and procedures.

Tax Risk

An investment in the Securities may give rise to tax consequences. Any tax liability is dependent on the taxpayer's personal circumstances. The basis and level of any taxes may change during the term of the Security.

On-sale of Securities

It is strongly recommended that investors seek independent tax advice prior to an investment in the Securities. The Issuer, Dealer and members of the Bank Group do

not provide tax advice. To the extent that any general information is provided with regard to tax, this is for information purposes only and should neither be construed as tax advice nor should it be relied on, or treated as a substitute for seeking independent tax advice.

Fees	The payment of any fee or commission by the Dealer is subject to the relevant regulatory requirements, including those applicable in the jurisdiction(s) that the Dealer and distributor operate in, as well as the jurisdiction(s) into which the Securities are distributed, if different. The Issue Price may include a fee or commission payable by the Dealer to a distributor or third party, such a fee or commission will be determined by a number of factors including but not limited to the maturity of the Security, hedging costs and legal fees. Any fee or commission received by the distributor or third party may be in addition to the fee normally charged by that party in connection with an investment in the Security. Further details in respect of the fee or commission are available upon request.

Durée Objectifs

(Les termes qui apparaissent en gras dans cette section sont décrits plus en détail dans les tableaux ci-dessous.)

Le produit a une durée déterminée et sera échu le 16 avril 2036, à moins qu'un événement de remboursement par anticipation ne se produise.

Le produit est conçu pour fournir un rendement sous forme d'un paiement à l'échéance. Le moment et le montant de ce paiement dépendront de la performance de l'**actif sous-jacent**. Si, à l'échéance, le **niveau de référence final de l'actif sous-jacent** s'est déprécié(e) et est inférieur(e) au **niveau de barrière**, le montant de remboursement final pourrait être inférieur au **montant nominal du produit** ou même être égal à zéro.

Résiliation anticipée suite à un remboursement par anticipation: Le produit sera remboursé de façon anticipée avant la **date d'échéance** si, à une **date d'observation du remboursement par anticipation**, le **niveau de référence** est supérieur ou égal au **niveau de la barrière de remboursement par anticipation** correspondant. Lors d'une telle résiliation anticipée, vous recevrez à la **date de paiement du remboursement par anticipation** associée, un paiement égal au **paiement du remboursement par anticipation** correspondant. Les dates mentionnées, les **niveaux de barrière de remboursement par anticipation** et les **paiements du remboursement par anticipation** sont indiqués dans les tableaux ci-dessous.

Indicateur de risque

← Risque le plus faible ————— Risque le plus élevé →

L'indicateur de risque part de l'hypothèse que vous conservez le produit jusqu'au 16 avril 2036. Le risque réel peut être très différent si vous optez pour une sortie avant échéance, et vous pourriez obtenir moins en retour. Vous risquez de ne pas pouvoir vendre facilement votre produit, ou de devoir le vendre à un prix qui influera sensiblement sur le montant que vous percevrez en retour.

L'indicateur synthétique de risque permet d'apprécier le niveau de risque de ce produit par rapport à d'autres. Il indique la probabilité que ce produit enregistre des pertes en cas de mouvements sur les marchés ou d'une impossibilité de notre part de vous payer.

Nous avons classé ce produit dans la classe de risque 4 sur 7, qui est une classe de risque moyenne. Autrement dit, les pertes potentielles liées aux futurs résultats du produit se situent à un niveau moyen et, si la situation venait à se détériorer sur les marchés, il est très peu probable que notre capacité à vous payer en soit affectée.

Si la devise du pays dans lequel vous achetez ce produit ou la devise de votre compte diffère de la devise du produit, veuillez faire attention au risque de change. Les sommes qui vous seront versées le seront dans une autre monnaie; votre gain final dépendra donc du taux de change entre les deux monnaies. Ce risque n'est pas pris en compte dans l'indicateur ci-dessus.

L'inflation érode la valeur d'achat de l'argent au fil du temps, ce qui peut provoquer la baisse en termes réels de tout capital remboursé.

Ce produit ne prévoit pas de protection contre les aléas de marché, vous pourriez perdre tout ou partie de votre investissement.

Si nous ne sommes pas en mesure de vous verser les sommes dues, vous pouvez perdre l'intégralité de votre investissement.

Pour obtenir des informations détaillées sur tous les risques liés au produit, veuillez-vous reporter aux sections sur les risques dans le prospectus ainsi qu'aux suppléments éventuels y figurant, comme indiqué dans la section « 7. Autres informations pertinentes » ci-dessous.

3. Que se passe-t-il si l'émetteur n'est pas en mesure d'effectuer les versements?

Vous êtes exposé au risque que l'émetteur ne soit pas en mesure d'honorer ses obligations concernant le produit, par exemple en cas de faillite ou de décision administrative de mesure de résolution. Cela peut avoir une incidence défavorable sur la valeur du produit et pourrait vous amener à perdre tout ou partie de votre investissement dans le produit. Le produit n'est pas couvert par un système de protection des dépôts.

4. Que va me coûter cet investissement?

Il se peut que la personne qui vous vend ce produit ou qui vous fournit des conseils à son sujet vous demande de payer des coûts supplémentaires. Si c'est le cas, cette personne vous informera au sujet de ces coûts et vous montrera l'incidence de ces coûts sur votre investissement.

Coûts au fil du temps Les tableaux présentent les montants prélevés sur votre investissement afin de couvrir les différents types de coûts. Ces montants dépendent du montant que vous investissez, du temps pendant lequel vous détenez le produit et du rendement du produit. Les montants indiqués ici sont des illustrations basées sur un exemple de montant d'investissement et différentes périodes d'investissement.

La durée de ce produit est aléatoire étant donné qu'il peut être résilié à différents moments selon l'évolution du marché. Les montants indiqués ici prennent en considération deux scénarios différents (remboursement anticipé et échéance). Dans le cas où vous choisissez de sortir avant la fin du produit, des coûts de sortie peuvent s'appliquer en plus des montants indiqués ici.

5. Combien de temps dois-je le conserver, et puis-je retirer de l'argent de façon anticipée?

Période de détention recommandée: 10 ans

Le produit vise à vous fournir le rendement décrit dans la section « 1. En quoi consiste ce produit? » ci-dessus. Toutefois, cela ne s'applique que si le produit est détenu jusqu'à l'échéance. Il est donc recommandé que le produit soit conservé jusqu'au 16 avril 2036 (échéance), bien que le produit puisse être remboursé par anticipation.

Le produit ne garantit pas la possibilité de désinvestir autrement qu'en vendant le produit soit (1) via la bourse (si le produit est négocié en bourse), soit (2) hors-marché si une offre pour le produit existe. Sauf indication contraire dans les coûts de sortie (veuillez voir la section « 4. Que va me coûter cet investissement? » ci-dessus), l'émetteur n'appliquera pas de frais ou de pénalités supplémentaires pour une telle opération. Des frais d'exécution peuvent toutefois être facturés par votre courtier, le cas échéant. En vendant le produit avant l'échéance, vous encourez le risque de recevoir un rendement inférieur à celui que vous auriez reçu si vous aviez conservé le produit jusqu'à l'échéance.
