PROHIBITION OF SALES TO EEA RETAIL INVESTORS – Other than with respect to offers of the Notes in any jurisdiction(s) for which a key information document under Regulation (EU) No. 1286/2014 (as amended, the "**PRIIPs Regulation**") has been drawn up, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "**MiFID II**"); or (ii) a customer within the meaning of Directive (EU) 2016/97, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129. Consequently, save as provided above, no key information document required by the PRIIPs Regulation for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Notes are not intended to be offered, sold, distributed or otherwise made available to and should not be offered, sold, distributed or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For these purposes, a retail investor means a person who is either one (or both) of the following: (i) not a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No. 600/2014 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**EUWA**") or (ii) not a qualified investor as defined in paragraph 15 of Schedule 1 to the Public Offers and Admissions to Trading Regulations 2024 ("**POATRs**"). Consequently, no disclosure document required by the FCA Product Disclosure Sourcebook ("**DISC**") for offering, selling or distributing the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering, selling or distributing the Notes or otherwise making them available to any retail investor in the UK may be unlawful under DISC and the Consumer Composite Investments (Designated Activities) Regulations 2024.

PROHIBITION OF OFFER TO PRIVATE CLIENTS IN SWITZERLAND - Other than for the duration of the listing of the Notes on SIX Swiss Exchange for which a key information document according to the Swiss Federal Financial Services Act ("**FinSA**") or an equivalent document under FinSA has been prepared, the Notes are not intended to be offered or recommended to private clients within the meaning of FinSA in Switzerland. For these purposes, a private client means a person who is not one (or more) of the following: (i) a professional client as defined in Article 4(3) FinSA (not having opted-in on the basis of Article 5(5) FinSA) or Article 5(1) FinSA; or (ii) an institutional client as defined in Article 4(4) FinSA; or (iii) a private client with an asset management agreement according to Article 58(2) FinSA.

The Notes do not constitute a participation in a collective investment scheme in the meaning of the Swiss Federal Act on Collective Investment Schemes ("**CISA**") and are not subject to the supervision by the Swiss Financial Market Supervisory Authority FINMA, and investors will not benefit from the specific investor protection under the CISA.

What are the key risks that are specific to the Issuer?

Business and Economic Conditions: The Issuer's financial results are affected to varying degrees by the general business and economic conditions in the geographic regions in which the Issuer operates. These conditions may include factors such as: economic growth or contraction trends; consumer saving and spending habits, consumer and corporate borrowing and repayment patterns, unemployment rates; the differing economic trajectories among nations across the globe, global tensions and geopolitical uncertainty and conflicts; the level of business investment and overall business sentiment; trade policy developments; the emergence of a new pandemic outbreak or other health crisis; the level of government spending, including developments relating to tariffs and trade agreements, as well as fiscal and monetary policy; the level of activity and volatility of the financial markets; disruptions to energy and other commodity markets; competitiveness; supply chain challenges and labour shortages; the evolution of inflationary pressures; and possible stagflation or deflation. Moreover, interest rate changes and actions taken by central banks to manage inflation, deflation or the broader economy have implications for the Issuer. The Issuer's financial results are sensitive to changes in interest rates, as described in the "Government fiscal, monetary and other policies" section below. For example, certain sectors, economies and markets have been adversely impacted by uncertainty generated by geopolitical shocks, such as protectionist trade policy developments, which continue to evolve. In addition, governments may face increasing fiscal challenges due to high debt-loads, ongoing deficits, higher spending pressures, and changing demographic and immigration trends. These fiscal challenges may limit future crisis response tools for governments and lead to higher taxes, spending cuts and adverse economic, market, credit and/or liquidity impacts. Moreover, monetary policy uncertainty, due to central bank challenges through a period of potential trade- or supply-related inflationary pressures, could increase economic, credit and market risks. A slowdown in economic growth or an economic downturn could adversely impact employment rates and household incomes, consumer spending, housing prices, corporate earnings and business investment, all of which could adversely affect the Issuer's business,

including, but not limited to, the demand for its loan and other products, and result in lower earnings and higher credit losses. There are also emerging risks related to technological developments and wealth and income inequality, as well as the broader implications of changing demographics and immigration, which could impact the labour market, productivity, the housing market, inflation, demand and consumer trends, and potentially have widespread societal and government policy implications.

Information Technology, Cyber and Third-Party Risks: Information technology risk, cyber risk and third-party risk remain top risks, not only for the financial services sector, but for other industries worldwide. Geopolitical tensions have increased the risk of nation state actors attacking critical infrastructure, including banks and critical third parties. Information technology risk is the risk associated with the use, ownership, operation and adoption of information systems that can result in business interruptions, client service disruptions and loss of confidential information causing financial loss, reputational damage and regulatory fines and penalties. Cybersecurity risk is the risk to the Issuer associated with cyberattacks initiated to disrupt or disable its operations or to expose or damage data. The Issuer continues to be subject to heightened inherent risk of cyberattacks, data breaches, cyber extortion and similar compromises, due to: (i) the size, scale, and global nature of its operations; (ii) its heavy reliance on the internet to conduct day-to-day business activities; (iii) its intricate technological infrastructure; and (iv) its reliance on third-party service providers. Third-party risk is a risk that arises if and when there is a failure to effectively manage third parties which may expose the Issuer to service disruptions, regulatory action, financial loss, litigation or reputational damage. The Issuer's exposure to information technology, cyber and third-party risks increases as it continues to partner with third-party service providers and adopt new business models and technologies (e.g., cloud computing, software-as-a-service ("SAAS"), generative artificial intelligence ("GenAI") and machine learning). Threat actors gravitate towards vulnerabilities in an ecosystem, and the weakest link in the supply chain can be a supplier or third-party service provider that may not have sufficiently robust controls. Other key drivers of third-party risk include global economic pressures related to inflation, and concentration of suppliers and fourth parties (i.e. suppliers of the Issuer's third-party providers) within the broader supply chain. Third-party providers critical to the Issuer's operations are actively monitored for impacts on their ability to deliver services to the Issuer, including impacts resulting from fourth parties. Ransomware threats continue to grow in sophistication and ransomware is being used to launch major supply chain attacks. Resulting implications could include business interruptions, client service disruptions, financial loss, theft of intellectual property and confidential information, litigation, enhanced regulatory attention and penalties, as well as reputational damage. Furthermore, the adoption of emerging technologies, such as cloud computing, AI, including GenAI and robotics, call for continued focus and investment to manage risks effectively. Failure to effectively manage these risks may have an adverse impact on the Issuer's financial performance and condition.

Privacy, Data and Third Party Related Risks: Information management risk is the risk of failing to manage information appropriately through its lifecycle due to inadequate processes, controls and technology, resulting in legal and regulatory consequences, reputational damage and/or financial loss.Privacy risk is defined as the risk of improper creation or collection, use, disclosure, retention or destruction of personal information ("PI"), including the failure to safeguard PI against unauthorized access. PI is information entrusted to the Issuer that identifies an individual or can be reasonably used to identify an individual. PI can relate to current, former and prospective clients, employees and contractors. The protection and responsible use of PI are critical to maintaining the Issuer's clients' trust. In addition, the management and governance of the Issuer's data also remains a top risk given the high value attributed to its data for the insights it can generate for clients and communities. Resulting implications from failing to manage data and privacy risks could include financial loss, theft of intellectual property and/or confidential information, litigation, enhanced regulatory attention and penalties, reputational damage and damaged client and employee trust. With the proliferation of artificial intelligence (“AI”), privacy regulators globally have begun issuing guidance around ensuring appropriate use of AI when processing personal information, in addition to guardrails around transparency and

ensuring the rights of the individual are respected in the context of AI systems. Adherence to these guidelines and guardrails and trusted integration into existing privacy programs continues to be a focal area for the Issuer.

Regulatory Changes: The ongoing introduction of new or revised regulations requires enhanced focus across the organization on meeting additional or modified regulatory requirements and expectations across the multiple jurisdictions in which the Issuer operates. See business segment results on pages 32 to 59 of the 2025 MD&A and pages 11 to 19 of the Second Quarter 2026 MD&A incorporated by reference in the Base Prospectus for information on the Issuer's business segments and the jurisdictions in which it operates. Regulatory reforms that have been implemented or are being implemented, across multiple jurisdictions, such as in areas of digital and operational resilience, data and technology reforms, including AI, cyber security, capital, anti-money laundering and consumer protection continue to impact the Issuer's operations and strategies. Not managing this risk may negatively impact the Issuer's financial performance, condition and prospects.

Digital Disruption and Innovation: As the demand for digital banking services grows, the need to meet the rapidly evolving needs of clients and compete with traditional and non-traditional competitors has increased the Issuer's strategic and reputation risks. Additional risks continue to emerge as demographic trends, evolving client expectations, the increased power to analyze data and the emergence of disruptors are creating competitive pressures across a number of sectors. Moreover, established technology companies, new competitors, digital assets and other products and regulatory changes continue to foster new business models that could challenge traditional banks and financial products. The regulatory landscape of digital assets, in particular as it relates to stablecoins, has evolved materially in the past year across multiple jurisdictions. The Issuer is closely monitoring and assessing emerging risks associated with wider adoption of stablecoins by the market and the related regulatory requirements. Finally, while the adoption of new technologies, such as AI (including GenAI) and machine learning, presents opportunities for the Issuer, it is resulting or could result in new and complex strategic, operational, regulatory, compliance and related reputational risks that would need to be managed effectively. Not managing these risks may adversely impact the Issuer's financial performance and condition.

Where will the securities be traded?

Application has been made by the Issuer (or on its behalf) for the Notes to be listed and admitted to trading on the SIX Swiss Exchange.

What are the key risks that are specific to the securities?

Risks associated with the Notes include the following:

Modification and waivers: holders of the Notes are exposed to the risk that their rights in respect of the Notes are varied against their will, which may result in an investment in any Notes becoming less advantageous to a particular holder depending on individual circumstances.

Secondary market: an active secondary market in respect of the Notes may never be established or may be illiquid and this would adversely affect the value at which an investor could sell its Notes.

Exchange rate risk: if an investor holds Notes which are not denominated in the investor's home currency, the investor will be exposed to movements in exchange rate adversely affecting the value of the holding of Notes. Also the imposition of exchange controls or certain other specified events in relation to the Notes could result in an investor not receiving payment on the Notes.

Credit ratings: Credit ratings assigned to the Issuer or the Notes might not reflect all the risks associated with an investment in the Notes.

Risks relating to Reference Item Linked Notes: an investor's return (if any) will depend upon the performance of the Reference Item. An investment in the Notes entails significant risks that are not associated with similar investments in conventional debt or equity securities and in some circumstances the amount of interest payable on the Notes on an interest payment date may be zero and/or the value of the Notes and/or the amount paid at maturity may be less than the purchase price amount of the Notes and may be zero in which case an investor may lose some or all of the amount it invested in the Notes.

The Notes do not benefit from a protection amount: on the maturity date the amount payable in respect of the Notes may be less than the initial investment amount and purchasers of the Notes are exposed to full loss of their investment due to the lack of protection amount.

Cap on return: the maximum possible return on the Notes will be limited to principal amount of the Notes and the return will not increase even if the Reference Item outperforms the stated maximum return.

Market disruptions: the Calculation Agent may determine that a market disruption event or other adjustment event has occurred which may have an adverse effect on the value of or payment received with respect to the Notes and/or may delay applicable payments or settlement.

Additional disruption events: if any of Change in Law, Hedging Disruption, Increased Cost of Hedging or Insolvency Filing occur, the Notes will be subject to adjustment or may be redeemed early. The amount due on such redemption may be substantially less than an investor's investment and may in certain circumstances be zero.

U.S. Withholding Tax on Dividend Equivalent Payments	The United States Internal Revenue Code of 1986, as amended, treats a "dividend equivalent" payment as a dividend from sources within the United States. Unless reduced by an applicable tax treaty with the United States, such payments generally would be subject to U.S. withholding tax of 30% if paid to a non-U.S. holder. A non-U.S. holder is a beneficial owner of a Note that, for U.S. federal income tax purposes, is a non-resident alien individual, a foreign corporation, or a foreign estate or trust. Under recently finalized U.S. Treasury Department regulations, payments on certain equity-linked instruments (including deemed payments) that are contingent upon or determined by Reference to actual or estimated U.S. source dividends, (regardless of whether such contingency or determination is explicitly stated or implicitly taken into account in computing one or more of the terms of such instruments) may be treated as dividend equivalents subject to withholding tax. Withholding tax will apply to dividend equivalent payments on Notes issued or materially modified on or after January 1, 2017. If any payments are treated as dividend equivalent subject to withholding, we (or the applicable paying agent) would be required to withhold taxes and would not be required to pay any additional amounts with respect to amounts so withheld. Prospective investors of the Notes should consult their own tax advisers regarding the application of the U.S. rules for withholding on dividend equivalents.
Issuer Risk	Investors bear the issuer risk. The Security's value and the payment of any income or bonus amount (where one is payable) are dependent not only on the development of the Reference Item, but also on the creditworthiness of the Issuer, which may vary over the term of the Security. The ratings of the Issuer noted above reflect the independent opinion of the rating agencies as to the safety of payments of principal and interest. These ratings are not a guarantee of credit quality. The ratings do not take into consideration any risk associated with fluctuations in the market value of this Security,

	or where factors other than the Issuer's credit quality determine the level of principal and interest payments.
Reference Item	The value of the Security is linked to the Reference Item(s). The past performance of the Reference Item(s) is not an indication or guarantee of future performance. Any decision to invest in the Securities should not be based solely or primarily on the past performance of the Reference Item(s). The performance of the Reference Item(s) may be volatile and subject to unpredictable changes over the term of the Security. The investor should be prepared to assume this risk, including the potential risk of insolvency of the Reference Item(s) issuer(s). Fluctuations in price of the Reference Item(s) may result in the investor losing the entire investment or a substantial part of it. An investment in the Securities does not create a direct investment in the underlying Reference Item(s). Where the Reference Item(s) is an equity/basket of equities, the investor will not be eligible to receive dividend payments or any voting rights associated with a direct investment in the Reference Item(s).
FX Risk Quanto	N/A
Liquidity Risk	The investor should be prepared to hold this Security until maturity should it not be called or terminated early, if such option exists, by the Issuer. The Dealer will, however, use its reasonable endeavours to provide liquidity to the Security (either directly or through an affiliate) but is not obliged to do so and may stop providing liquidity at any time without notice. This means an investor should not rely on having the ability to redeem the Security at a particular time or for a certain price. If the Security is redeemed early, the investor may get back less than the stated redemption amount. The Issue Price is not a direct reflection of the market value of the Security. The level at which the investor purchases the Security includes hedging costs and profits that the Dealer or its affiliates expect to incur or realize. The Issue Price may also include selling commissions paid by the Dealer to distributors and/or intermediaries. Any selling commissions, costs and profits will reduce the secondary market level, if any secondary market develops, for the Security. As a result, the investor may experience an immediate and substantial decline in the value of the Securities on the Issue Date.
Suitability	This termsheet is provided for information purposes only and should not be used as the sole or primary basis of any investment decision. Transactions of a type described herein, may involve a high degree of risk and may not be suitable for all investors. Transactions in the Securities should not be undertaken unless the prospective investor understands and is capable of bearing all of the risks associated with an investment in the Securities. Before entering into any transaction, potential investors should take steps to ensure they understand the transaction and have assessed the appropriateness of the transaction in light of their own objectives and circumstances, including the possible risks, benefits and also the tax implications of entering into this proposed transaction. The information in this termsheet does not constitute financial, tax or legal advice and should not be used as a substitute for seeking professional advice. The Dealer is acting as an arm's length counterparty and not as an advisor or fiduciary. It is strongly recommended that potential investors consult their own professional advisers. Institutions referencing this termsheet or extracting information from this termsheet to provide to their clients should ensure that the information satisfies their local jurisdictional requirements and applicable securities laws for conducting business, including any applicable suitability and appropriateness assessment. Investments of a type described herein should only be sold to investors that have the necessary knowledge and experience to fully understand the related risks and are able to bear such risks.
Conflicts of Interest Disclosure	RBC Capital Markets (Europe) GMBH ("RBCEG") forms part of a major banking group. It is therefore possible that RBCEG or one of its subsidiaries, or affiliates, or one of their officers, employees, representatives or agents (together "the Bank Group") or another client of the Bank Group may have interests, relationships and/or arrangements that give rise to conflicts of interest in relation to business that is transacted with you. Members of the Bank Group may perform a variety of roles in connection with the issuance. The Issuer, Dealer, or their affiliates may act as the Calculation Agent and

	may enter into positions in connection with the issuance. The Issuer, Dealer, or their affiliates may undertake hedging activity including trading in the Reference Item(s) or instruments related to the Reference Item(s), which may have an adverse impact on the value of the Securities. The Issuer, Dealer, or their affiliates may from time-to-time possess or have access to information concerning the Reference Item(s) and are under no obligation to disclose this information to investors. Any conflicts of interest will be managed in accordance with the Bank Group's established policies and procedures.
Tax Risk	An investment in the Securities may give rise to tax consequences. Any tax liability is dependent on the taxpayer's personal circumstances. The basis and level of any taxes may change during the term of the Security.
On-sale of Securities	It is strongly recommended that investors seek independent tax advice prior to an investment in the Securities. The Issuer, Dealer and members of the Bank Group do not provide tax advice. To the extent that any general information is provided with regard to tax, this is for information purposes only and should neither be construed as tax advice nor should it be relied on, or treated as a substitute for seeking independent tax advice.
Calculation of the Reference Index	N/A
Fees	The payment of any fee or commission by the Dealer is subject to the relevant regulatory requirements, including those applicable in the jurisdiction(s) that the Dealer and distributor operate in, as well as the jurisdiction(s) into which the Securities are distributed, if different. The Issue Price may include a fee or commission payable by the Dealer to a distributor or third party, such a fee or commission will be determined by a number of factors including but not limited to the maturity of the Security, hedging costs and legal fees. Any fee or commission received by the distributor or third party may be in addition to the fee normally charged by that party in connection with an investment in the Security. Further details in respect of the fee or commission are available upon request.

III. OTHER INFORMATION

SALES RESTRICTION	
EEA Retail Investor Offering Information	The Base Prospectus (as contemplated by the Final Terms of the Notes) has been prepared on the basis that any offer of Notes in any Member State of the European Economic Area ("EEA") which has implemented Regulation (EU) 2017/1129 (the "Prospectus Regulation") will be made pursuant to an exemption under the Prospectus Regulation, as implemented in the Relevant State, from the requirement to publish a prospectus for offers of Notes. Accordingly, the Notes should not be sold or offered, directly or indirectly, to persons in any Relevant State except in circumstances which would not require the publication of a prospectus and any person making or intending to make an offer in that Relevant State of Notes should only do so in circumstances in which no obligation arises for the Issuer or RBC Capital Markets (Europe) GMBH to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation in relation to such offer. No recipient of this termsheet is authorized by any person to act in a way which would result in an offer to it being considered to be a placement through an intermediary for the purposes of the Prospectus Regulation.
UK Retail Investor Offering Information	The Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("UK") without an up-to-date UK PRIIPS KID being in place with the prior written consent of RBC Capital Markets (Europe) GMBH and provided in accordance with the UK PRIIPS Regulation. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("EUWA"); or (ii) a customer within the

	meaning of provisions of the FSMA and any rules or regulations made under the Financial Services and Markets Act 2000 (the "FSMA") to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. If the aforementioned consent of RBC Capital Markets (Europe) GMBH has not been received then no key information document ("KID") required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Securities or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

The Issuer has neither authorized, nor does authorize any offer of Notes which would require the Issuer or any offeror to publish a prospectus pursuant to article 35 of the FinSA in respect of such offer. Investisseurs de détail visés

Le produit est destiné à être offert aux investisseurs de détail qui remplissent tous les critères ci-dessous:

1. ils possèdent des connaissances et/ou expériences de bases de l'investissement dans des produits similaires offrant une exposition similaire sur le marché et ont la capacité de comprendre le produit et ses risques et avantages éventuels, soit de manière indépendante, soit par des conseils professionnels;
2. ils s'attendent à ce que l'actif sous-jacent évolue de manière à générer un rendement favorable, disposent d'un horizon d'investissement correspondant à la période de détention recommandée ci-dessous et comprennent que le produit peut être remboursé de façon anticipée;
3. ils acceptent le risque que l'émetteur ne paie pas ou ne respecte pas ses obligations contractuelles liées au produit et sont en mesure de supporter une perte totale de leur investissement; et
4. ils sont prêts à accepter un niveau de risque pour obtenir des rendements potentiels qui est compatible avec l'indicateur synthétique de risque présenté ci-dessous.

2. Quels sont les risques et qu'est-ce que cela pourrait me rapporter?

Indicateur de risque

Risque le plus faible **Risque le plus élevé**

L'indicateur de risque part de l'hypothèse que vous conservez le produit jusqu'au 14 octobre 2031. Le risque réel peut être très différent si vous optez pour une sortie avant échéance, et vous pourriez obtenir moins en retour. Vous risquez de ne pas pouvoir vendre facilement votre produit, ou de devoir le vendre à un prix qui influera sensiblement sur le montant que vous percevrez en retour.

L'indicateur synthétique de risque permet d'apprécier le niveau de risque de ce produit par rapport à d'autres. Il indique la probabilité que ce produit enregistre des pertes en cas de mouvements sur les marchés ou d'une impossibilité de notre part de vous payer.

Nous avons classé ce produit dans la classe de risque 6 sur 7, qui est une classe de risque élevée. Autrement dit, les pertes potentielles liées aux futurs résultats du produit se situent à un niveau élevé et, si la situation venait à se détériorer sur les marchés, il est très peu probable que notre capacité à vous payer en soit affectée.

L'inflation érode la valeur d'achat de l'argent au fil du temps, ce qui peut provoquer la baisse en termes réels de tout capital remboursé.

Ce produit ne prévoyant pas de protection contre les aléas de marché, vous pourriez perdre tout ou partie de votre investissement.

Si nous ne sommes pas en mesure de vous verser les sommes dues, vous pouvez perdre l'intégralité de votre investissement.

Pour obtenir des informations détaillées sur tous les risques liés au produit, veuillez-vous reporter aux sections sur les risques dans le prospectus ainsi qu'aux suppléments éventuels y figurant, comme indiqué dans la section « 7. Autres informations pertinentes » ci-dessous.

Scénarios de performance

Ce que vous obtiendrez de ce produit dépend des performances futures du marché. L'évolution future du marché est aléatoire et ne peut être prédite avec précision.

Les scénarios présentés représentent des exemples basés sur les résultats du passé et sur certaines hypothèses. Les marchés pourraient évoluer très différemment à l'avenir.

Période de détention recommandée:		**Jusqu'à ce que le produit soit remboursé par anticipation ou arrive à échéance** Ceci peut être différent selon le scénario et est indiqué dans le tableau	
Exemple d'investissement:		10 000 EUR	
Scénarios		***Si vous sortez après 1 an***	***Si vous sortez suite à un remboursement par anticipation ou à l'échéance***
Minimum	**Il n'existe aucun rendement minimal garanti. Vous pourriez perdre tout ou une partie de votre investissement.**		
Tensions	**Ce que vous pourriez obtenir après déduction des coûts**	2 924 EUR	1 430 EUR
(le produit est remboursé après 4 ans et 11 mois)	Rendement annuel moyen	-70,76 %	-32,52 %
Défavorable	**Ce que vous pourriez obtenir après déduction des coûts**	7 182 EUR	3 172 EUR
(le produit est remboursé après 4 ans et 11 mois)	Rendement annuel moyen	-28,18 %	-20,72 %
Intermédiaire	**Ce que vous pourriez obtenir après déduction des coûts**	9 791 EUR	11 890 EUR
(le produit est remboursé après 1 an et 11 mois)	Rendement annuel moyen	-2,09 %	9,33 %
Favorable	**Ce que vous pourriez obtenir après déduction des coûts**	11 218 EUR	13 780 EUR
(le produit est remboursé après 3 ans et 11 mois)	Rendement annuel moyen	12,18 %	8,47 %

Les scénarios favorable, intermédiaire, défavorable et de tensions représentent des résultats possibles basés sur des simulations utilisant la performance passée de l'**actif sous-jacent** pendant une période jusqu'à 5 années. En cas de remboursement anticipé, il a été supposé qu'aucun réinvestissement n'a été réalisé. Le scénario de tensions montre ce que vous pourriez obtenir dans des situations de marché extrêmes. Il n'est pas facile de sortir de ce produit. Si vous sortez de l'investissement avant la fin de période de détention recommandée vous pourriez subir des coûts supplémentaires.

Les chiffres indiqués comprennent tous les coûts du produit lui-même, mais pas nécessairement tous les frais dus à votre conseiller ou distributeur. Ces chiffres ne tiennent pas compte de votre situation fiscale personnelle, qui peut également influer sur les montants que vous recevrez.

3. Que se passe-t-il si l'émetteur n'est pas en mesure d'effectuer les versements?

Vous êtes exposé au risque que l'émetteur ne soit pas en mesure d'honorer ses obligations concernant le produit, par exemple en cas de faillite ou de décision administrative de mesure de résolution. Cela peut avoir une incidence défavorable sur la valeur du produit et pourrait vous amener à perdre tout ou partie de votre investissement dans le produit. Le produit n'est pas couvert par un système de protection des dépôts.

4. Que va me coûter cet investissement?

DocID: 767be38c-db73-48ea-a834-a2cd6526c903

Il se peut que la personne qui vous vend ce produit ou qui vous fournit des conseils à son sujet vous demande de payer des coûts supplémentaires. Si c'est le cas, cette personne vous informera au sujet de ces coûts et vous montrera l'incidence de ces coûts sur votre investissement.

Coûts au fil du temps

Les tableaux présentent les montants prélevés sur votre investissement afin de couvrir les différents types de coûts. Ces montants dépendent du montant que vous investissez, du temps pendant lequel vous détenez le produit et du rendement du produit. Les montants indiqués ici sont des illustrations basées sur un exemple de montant d'investissement et différentes périodes d'investissement.

La durée de ce produit est aléatoire étant donné qu'il peut être résilié à différents moments selon l'évolution du marché. Les montants indiqués ici prennent en considération deux scénarios différents (remboursement anticipé et échéance). Dans le cas où vous choisissez de sortir avant la fin du produit, des coûts de sortie peuvent s'appliquer en plus des montants indiqués ici.

Nous avons supposé:

- que 10 000 EUR sont investis
- une performance du produit qui correspond à chaque période de détention présentée.

	Si le produit est remboursé par anticipation à la première date possible, le 13 octobre 2028	*Si le produit arrive à échéance*
Coûts totaux	290 EUR	531 EUR
Incidence des coûts annuels*	1,51 % chaque année	0,88 % chaque année

*Ceci montre dans quelle mesure les coûts réduisent annuellement votre rendement au cours de la période de détention. Par exemple, ceci montre que si vous sortez à l'échéance, il est prévu que votre rendement moyen par an soit de 9,02 % avant déduction des coûts et de 8,14 % après cette déduction.

Il se peut que nous partagions les coûts avec la personne qui vous vend le produit afin de couvrir les services qu'elle vous fournit. Cette personne vous informera du montant.

Composition des coûts

	Coûts ponctuels à l'entrée ou à la sortie	**Si vous sortez après 1 an**

5. Combien de temps dois-je le conserver, et puis-je retirer de l'argent de façon anticipée?

Période de détention recommandée: 4 ans et 11 mois

Le produit vise à vous fournir le rendement décrit dans la section « 1. En quoi consiste ce produit? » ci-dessus. Toutefois, cela ne s'applique que si le produit est détenu jusqu'à l'échéance. Il est donc recommandé que le produit soit conservé jusqu'au 14 octobre 2031 (échéance), bien que le produit puisse être remboursé par anticipation.

Le produit ne garantit pas la possibilité de désinvestir autrement qu'en vendant le produit soit (1) via la bourse (si le produit est négocié en bourse), soit (2) hors-marché si une offre pour le produit existe. Sauf indication contraire dans les coûts de sortie (veuillez voir la section « 4. Que va me coûter cet investissement? » ci-dessus), l'émetteur n'appliquera pas de frais ou pénalités supplémentaires pour une telle opération. Des frais d'exécution peuvent toutefois être facturés par votre courtier, le cas échéant. En vendant le produit avant l'échéance, vous encourez le risque de recevoir un rendement inférieur à celui que vous auriez reçu si vous aviez conservé le produit jusqu'à l'échéance.
