What are the key risks that are specific to the Issuer?

Business and Economic Conditions: The Issuer's financial results are affected to varying degrees by the general business and economic conditions in the geographic regions in which the Issuer operates. These conditions may include factors such as: economic growth or contraction trends; consumer saving and spending habits, consumer and corporate borrowing and repayment patterns, unemployment rates; the differing economic trajectories among nations across the globe, global tensions and geopolitical uncertainty and conflicts; the level of business investment and overall business sentiment; trade policy developments; the emergence of a new outbreak of a pandemic or other health crisis; the level of government spending as well as fiscal and monetary policy; the level of activity and volatility of the financial markets; disruptions to energy and other commodity markets; competitiveness; supply chain challenges and labour shortages; the evolution of inflationary pressures; and possible stagflation or deflation. Moreover, interest rate changes and actions taken by central banks to manage inflation, deflation, or the broader economy have implications for the Issuer. The Issuer's financial results are sensitive to changes in interest rates, as described in the "Government fiscal, monetary and other policies" section below. For example, a slowdown in economic growth or an economic downturn could adversely impact employment rates and household incomes, consumer spending, housing prices, corporate earnings and business investment and could adversely affect the Issuer's business, including, but not limited to, the demand for its loan and other products, and result in lower earnings and higher credit losses. In addition to risks arising from monetary policy uncertainty (e.g., the pace and magnitude of monetary easing), risks are also emerging around how governments manage elevated debt burdens and how they may introduce new support measures to deal

with emerging economic challenges. This may include, for example, changes to tax policy to address fiscal capacity concerns and to balance budgets in the future.

There are also emerging risks related to wealth and income inequality, as well as changing demographics and immigration, which could impact the labour market, the housing market, inflation, demand and consumer trends, and potentially have broader societal and government policy implications.

Information Technology and Cyber Risks: Information technology risk, cyber risks and third-party risk remain top risks, not only for the financial services sector, but for other industries worldwide. Geopolitical tensions have increased the risk of nation state actors attacking critical infrastructure, including banks and critical third parties. Information technology risk is the risk associated with the use, ownership, operation and adoption of information systems that can result in business interruptions, client service disruptions and loss of confidential information causing financial loss, reputational damage and regulatory fines and penalties. Cybersecurity risk is the risk to the Issuer associated with cyberattacks initiated to disrupt or disable its operations or to expose or damage data. The Issuer continues to be subject to heightened inherent risk of cyberattacks, data breaches, cyber extortion and similar compromises, due to: (i) the size, scale, and global nature of its operations; (ii) its heavy reliance on the internet to conduct day-to-day business activities; (iii) its intricate technological infrastructure; and (iv) its reliance on third-party service providers.

Privacy and Data Related Risks: Information management risk is the risk of failing to manage information appropriately throughout its lifecycle due to inadequate processes, controls and technology, resulting in legal and regulatory consequences, reputational damage and/or financial loss. Privacy risk is defined as the risk of improper creation or collection, use, disclosure, retention or destruction of personal information ("PI"), including the failure to safeguard PI against unauthorized access. PI is information entrusted to the Issuer that identifies an individual or can be reasonably used to identify an individual. PI can relate to current, former and prospective clients, employees and contractors. The protection and responsible use of PI are critical to maintaining the Issuer's clients' trust. In addition, the management and governance of the Issuer's data also remains a top risk given the high value attributed to its data for the insights it can generate for clients and communities. Resulting implications from failing to manage data and privacy risks could include financial loss, theft of intellectual property and/or confidential information, litigation, enhanced regulatory attention and penalties, and reputational damage. Effective privacy and information management practices continue to grow in importance, as demonstrated by the continued development of complex regulations in the jurisdictions in which the Issuer operates. Privacy and data related risks have also heightened as a result of the evolving threat landscape, and associated data breach risks.

Regulatory Changes: The ongoing introduction of new or revised regulations requires enhanced focus across the organization on meeting additional regulatory requirements across the multiple jurisdictions in which the Issuer operates. See business segment results on pages 32 to 61 of the 2024 MD&A and pages 12 to 23 of the Second Quarter 2025 MD&A incorporated by reference in the Base Prospectus for information on the Issuer's business segments and the jurisdictions in which it operates. Financial and other reforms that have been implemented or are being implemented, across multiple jurisdictions, such as digital, data and technology reforms, cyber security and anti-money laundering regulations, interest rate benchmark and payments reform, as well as privacy, tax reforms, climate, sustainability and consumer protection regulatory initiatives, continue to impact the Issuer's operations and strategies. Failure to effectively manage this risk may negatively impact the Issuer's financial performance, condition and prospects.

“Single Underlying Relevant Reference Performance” has the meaning given in the Base Prospectus

“Autocall Trigger Event” means if, on any Trigger Early Redemption Observation Date, the Single Underlying Relevant Reference Performance level is equal to or greater than 100%, then an Autocall Trigger Event shall be deemed to have occurred and the Notes shall be redeemed on the relevant Trigger Early Redemption Date at the Specified Denomination x the relevant Trigger Early Redemption Percentage.

Trigger Early Redemption Observation Date	Trigger Early Redemption Date	Trigger Early Redemption Percentage
15 July 2026	5 August 2026	111.52%
15 July 2027	5 August 2027	123.04%
17 July 2028	7 August 2028	134.56%
16 July 2029	6 August 2029	146.08%

“Final Valuation Date” means 15 July 2030

“Initial Value” means EUR 76.23

Maturity: Subject to any purchase and cancellation or early redemption following an Autocall Event, each Note will be redeemed on 5 August 2030 at the Final Redemption Amount set out below.

“Final Level” means the Single Relevant Reference Performance Level on the Final Valuation Date

Final Redemption Amount:(a) If the Final Level is equal to or greater than its corresponding Digital Strike Level, the Final Redemption Amount shall be: Specified Denomination \times 157.60% (b) Otherwise, if the Final Level is equal to or greater than its corresponding Put Barrier Level, then the Final Redemption Amount shall be: Specified Denomination \times 100.00% (c) Otherwise, the Final Redemption Amount shall be calculated in accordance with the following formula: Specified Denomination \times (Single Underlying Relevant Reference Performance / Put Strike Level)

Where will the securities be traded?

Application has been made by the Issuer (or on its behalf) for the Notes to be listed and admitted to trading on the SIX Swiss Exchange.

What are the key risks that are specific to the securities?

Risks associated with the Notes include the following:

Modification and waivers: holders of the Notes are exposed to the risk that their rights in respect of the Notes are varied against their will, which may result in an investment in any Notes becoming less advantageous to a particular holder depending on individual circumstances.

Secondary market: an active secondary market in respect of the Notes may never be established or may be illiquid and this would adversely affect the value at which an investor could sell its Notes.

Exchange rate risk: if an investor holds Notes which are not denominated in the investor's home currency, the investor will be exposed to movements in exchange rate adversely affecting the value of the holding of Notes. Also the imposition of exchange controls or certain other specified events in relation to the Notes could result in an investor not receiving payment on the Notes.

Credit ratings: Credit ratings assigned to the Issuer or the Notes might not reflect all the risks associated with an investment in the Notes.

Risks relating to Reference Item Linked Notes: an investor's return (if any) will depend upon the performance of the Reference Item. An investment in the Notes entails significant risks that are not associated with similar investments in conventional debt or equity securities and in some circumstances the amount of interest payable on the Notes on an interest payment date may be zero and/or the value of the Notes and/or the amount paid at maturity may be less than the purchase price amount of the Notes and may be zero in which case an investor may lose some or all of the amount it invested in the Notes.

The Notes do not benefit from a protection amount: on the maturity date the amount payable in respect of the Notes may be less than the initial investment amount and purchasers of the Notes are exposed to full loss of their investment due to the lack of protection amount.

Cap on return: the maximum possible return on the Notes will be limited to principal amount of the Notes and the return will not increase even if the Reference Item outperforms the stated maximum return.

Market disruptions: the Calculation Agent may determine that a market disruption event or other adjustment event has occurred which may have an adverse effect on the value of or payment received with respect to the Notes and/or may delay applicable payments or settlement.

Additional disruption events: if any of Change in Law, Hedging Disruption or Increased Cost of Hedging occur, the Notes will be subject to adjustment or may be redeemed early. The amount due on such redemption may be substantially less than an investor's investment and may in certain circumstances be zero.

II. SIGNIFICANT RISKS FOR INVESTORS

RISKS

Product Risk	These Securities are capital at risk. This means there is a risk that you could lose your entire investment or part of it. These Securities are not guaranteed against losses by the Issuer, Dealer, their affiliates, the UK Financial Services Compensation Scheme or any equivalent European deposit guarantee scheme.
U.S. Withholding Tax on Dividend Equivalent Payments	The United States Internal Revenue Code of 1986, as amended, treats a "dividend equivalent" payment as a dividend from sources within the United States. Unless reduced by an applicable tax treaty with the United States, such payments generally would be subject to U.S. withholding tax of 30% if paid to a non-U.S. holder. A non-U.S. holder is a beneficial owner of a Note that, for U.S. federal income tax purposes, is a non-resident alien individual, a foreign corporation, or a foreign estate or trust.

Under recently finalized U.S. Treasury Department regulations, payments on certain equity-linked instruments (including deemed payments) that are contingent upon or determined by Reference to actual or estimated U.S. source dividends, (regardless of whether such contingency or determination is explicitly stated or implicitly taken into account in computing one or more of the terms of such instruments) may be treated as dividend equivalents subject to withholding tax. Withholding tax will apply to dividend equivalent payments on Notes issued or materially modified on or after January 1, 2017. If any payments are treated as dividend equivalent subject to withholding, we (or the applicable paying agent) would be required to withhold taxes and would not be required to pay any additional amounts with respect to amounts so withheld. Prospective investors of the Notes should consult their own tax advisers regarding the application of the U.S. rules for withholding on dividend equivalents.

Issuer Risk

Investors bear the issuer risk. The Security's value and the payment of any income or bonus amount (where one is payable) are dependent not only on the development of the Reference Item, but also on the creditworthiness of the Issuer, which may vary over the term of the Security. The ratings of the Issuer noted above reflect the independent opinion of the rating agencies as to the safety of payments of principal and interest. These ratings are not a guarantee of credit quality. The ratings do not take into consideration any risk associated with fluctuations in the market value of this Security, or where factors other than the Issuer's credit quality determine the level of principal and interest payments.

Reference Item

The value of the Security is linked to the Reference Item(s). The past performance of the Reference Item(s) is not an indication or guarantee of future performance. Any decision to invest in the Securities should not be based solely or primarily on the past performance of the Reference Item(s). The performance of the Reference Item(s) may be volatile and subject to unpredictable changes over the term of the Security. The investor should be prepared to assume this risk, including the potential risk of insolvency of the Reference Item(s) issuer(s). Fluctuations in price of the Reference Item(s) may result in the investor losing the entire investment or a substantial part of it.

An investment in the Securities does not create a direct investment in the underlying Reference Item(s). Where the Reference Item(s) is an equity/basket of equities, the investor will not be eligible to receive dividend payments or any voting rights associated with a direct investment in the Reference Item(s).

FX Risk

N/A

Liquidity Risk

The investor should be prepared to hold this Security until maturity should it not be called or terminated early, if such option exists, by the Issuer. The Dealer will, however, use its reasonable endeavours to provide liquidity to the Security (either directly or through an affiliate) but is not obliged to do so and may stop providing liquidity at any time without notice. This means an investor should not rely on having the ability to redeem the Security at a particular time or for a certain price. If the Security is redeemed early, the investor may get back less than the stated redemption amount. The Issue Price is not a direct reflection of the market value of the Security. The level at which the investor purchases the Security includes hedging costs and profits that the Dealer or its affiliates expect to incur or realize. The Issue Price may also include selling commissions paid by the Dealer to distributors and/or intermediaries. Any selling commissions, costs and profits will reduce the secondary market level, if any secondary market develops, for the Security. As a result, the investor may experience an immediate and substantial decline in the value of the Securities on the Issue Date.

On-sale of Securities	It is strongly recommended that investors seek independent tax advice prior to an investment in the Securities. The Issuer, Dealer and members of the Bank Group do not provide tax advice. To the extent that any general information is provided with regard to tax, this is for information purposes only and should neither be construed as tax advice nor should it be relied on, or treated as a substitute for seeking independent tax advice.
Fees	The payment of any fee or commission by the Dealer is subject to the relevant regulatory requirements, including those applicable in the jurisdiction(s) that the Dealer and distributor operate in, as well as the jurisdiction(s) into which the Securities are distributed, if different. The Issue Price may include a fee or commission payable by the Dealer to a distributor or third party, such a fee or commission will be determined by a number of factors including but not limited to the maturity of the Security, hedging costs and legal fees. Any fee or commission received by the distributor or third party may be in addition to the fee normally charged by that party in connection with an investment in the Security. Further details in respect of the fee or commission are available upon request.

UK Retail Investor Offering Information

The Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("UK") without an up-to-date UK PRIIPS KID being in place with the prior written consent of RBC Capital Markets (Europe) GMBH and provided in accordance with the UK PRIIPS Regulation. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("EUWA"); or (ii) a customer within the meaning of provisions of the FSMA and any rules or regulations made under the Financial Services and Markets Act 2000 (the "FSMA") to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. If the aforementioned consent of RBC Capital Markets (Europe) GMBH has not been received then no key information document ("KID") required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Securities or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

1. What is this product?

Type	English law governed equity-linked notes / Return depends on the performance of the underlying / No capital protection against market risk
Term	The product has a fixed term and will be due on 5 August 2030, subject to an early redemption.
Objectives	<p>The product is designed to provide a return in the form of a cash payment on termination of the product. The timing and amount of this payment will depend on the performance of the underlying. The payment at maturity will not exceed EUR 1,576. If, at maturity, the final reference price of the underlying has fallen below EUR 45.738, the product may return less than the product notional amount or even zero.</p> <p>Early termination following an autocall: The product will terminate prior to the maturity date if, on any autocall observation date, the reference price is at or above the autocall barrier price. On any such early termination, you will on the immediately following autocall payment date receive a cash payment equal to the applicable autocall payment. The relevant dates and autocall payments are shown in the table(s) below.</p>

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

Autocall observation dates	Autocall payment dates	Autocall payments

- if the **final reference price** is at or above EUR 45.738 and below EUR 53.361, a cash payment equal to EUR 1,000; or
- if the **final reference price** is below EUR 45.738, a cash payment directly linked to the performance of the **underlying**. The cash payment will equal (i) the **product notional amount** multiplied by (ii) (A) the **final reference price** divided by (B) EUR 76.23.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlying**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

You do not have any entitlement to a dividend from the **underlying** and you have no right to any further entitlement resulting from the **underlying** (e.g., voting rights).

Intended retail investor The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have basic knowledge and/or experience of investing in similar products which provide a similar market exposure and have the ability to understand the product and its possible risks and rewards, either independently or through professional advice;
2. they seek capital growth, expect the movement in the underlying to perform in a way that generates a favourable return, have an investment horizon of the recommended holding period specified below and understand that the product may terminate early;
3. they accept the risk that the issuer could fail to pay or perform its obligations under the product and they are able to bear a total loss of their investment; and
4. they are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

2. What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		Until the product is called or matures	
		This may be different in each scenario and is indicated in the table	
Example investment:		EUR 10,000	
Scenarios		If you exit after 1 year	If you exit at call or maturity
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 2,119	EUR 619
(product ends after 5 years)	Average return each year	-78.81%	-42.68%
Unfavourable	What you might get back after costs	EUR 5,795	EUR 2,690
(product ends after 5 years)	Average return each year	-42.05%	-23.10%
Moderate	What you might get back after costs		EUR 11,152
(product ends after 1 year)	Average return each year		11.52%
Favourable	What you might get back after costs	EUR 10,514	EUR 14,608
(product ends after 4 years)	Average return each year	5.14%	9.93%

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the past performance of the **underlying** over a period of up to 5 years. In the case of an early redemption, it has been assumed that no reinvestment has occurred. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period, you may have to pay extra costs.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if the issuer is unable to pay out?

You are exposed to the risk that the issuer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not covered by any deposit protection scheme.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- EUR 10,000 is invested
- a performance of the product that is consistent with each holding period shown.

	<i>If the product is called at the first possible date, on 5 August 2026</i>	<i>If the product reaches maturity</i>
Total costs	EUR 236	EUR 236
Annual cost impact*	2.70% each year	0.52% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 10.05% before costs and 9.52% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	2.36% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 236
Exit costs	0.50% of your investment before it is paid out to you. These costs are already included in the price you receive and are only incurred if you exit before maturity. If an early redemption occurs or if you hold the product until maturity, no exit costs will be incurred.	EUR 50

5. How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 5 August 2030 (maturity), although the product may terminate early.

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Six Swiss Exchange - Blue Chips Segment	Price quotation	Percentage
Smallest tradable unit	EUR 1,000		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Vous êtes sur le point d'acheter un produit qui n'est pas simple et qui peut être difficile à comprendre.

1. En quoi consiste ce produit?

Type	Titres de créance régis par le droit anglais / Le rendement dépend de la performance de l'actif sous-jacent / Aucune protection du capital contre le risque de marché
Durée	Le produit a une durée déterminée et sera échu le 5 août 2030, à moins qu'un événement de remboursement par anticipation ne se produise.
Objectifs	Le produit est conçu pour fournir un rendement sous forme d'un paiement à l'échéance. Le moment et le montant de ce paiement dépendront de la performance de l' actif sous-jacent . Le paiement à l'échéance ne sera pas supérieur à 1 576 EUR. Si, à l'échéance, le cours de référence final de l' actif sous-jacent s'est déprécié(e) et est inférieur(e) à 45,738 EUR, le montant de remboursement final pourrait être inférieur au montant nominal du produit ou même être égal à zéro. Résiliation anticipée suite à un remboursement par anticipation: Le produit sera remboursé de façon anticipée avant la date d'échéance si, à une date d'observation du remboursement par anticipation , le cours de référence est supérieur ou égal au niveau de la barrière de remboursement par anticipation . Lors d'une telle résiliation anticipée, vous recevrez à la date de paiement du remboursement par anticipation associée, un paiement égal au paiement du remboursement par anticipation correspondant. Les dates mentionnées et les paiements du remboursement par anticipation sont indiqué(e)s dans les tableaux ci-dessous.

(Les termes qui apparaissent en **gras** dans cette section sont décrits plus en détail dans les tableaux ci-dessous.)

Dates d'observation du remboursement par anticipation	Dates de paiement du remboursement par anticipation	Paiements du remboursement automatique par anticipation
15 juillet 2026	5 août 2026	1 115,20 EUR
15 juillet 2027	5 août 2027	1 230,40 EUR
17 juillet 2028	7 août 2028	1 345,60 EUR
16 juillet 2029	6 août 2029	1 460,80 EUR

Remboursement à la date d'échéance: Si le produit n'a pas été remboursé par anticipation, à la **date d'échéance**, vous recevrez:

- si le **cours de référence final** est supérieur ou égal à 53,361 EUR, un paiement de 1 576 EUR;
- si le **cours de référence final** est supérieur ou égal à 45,738 EUR et inférieur à 53,361 EUR, un paiement de 1 000 EUR; ou
- si le **cours de référence final** est inférieur à 45,738 EUR, un paiement directement lié à la performance de l'**actif sous-jacent**. Ce paiement sera égal à (i) le **montant nominal du produit** multiplié par (ii) (A) le **cours de référence final** divisé par (B) 76,23 EUR.

Selon les termes du produit, certaines dates spécifiées ci-dessus et ci-dessous seront ajustées si la date en question n'est pas un jour ouvré ou un jour de négociation (selon le cas). Tout ajustement peut affecter le rendement, le cas échéant, que vous recevrez.

Les termes du produit prévoient également que, si certains événements exceptionnels se produisent (1) des ajustements peuvent être apportés au produit et/ou (2) l'émetteur peut procéder au remboursement anticipé du produit. Ces événements sont spécifiés dans les modalités du produit et concernent principalement l'**actif sous-jacent**, le produit et l'émetteur. Le rendement (le cas échéant) que vous recevrez en cas de remboursement anticipé est susceptible d'être différent du rendement dans les scénarios décrits ci-dessus et peut être inférieur au montant que vous avez investi.

Vous ne bénéficierez d'aucun dividende ou de droits liés à la détention de l'**actif sous-jacent** (par exemple, les droits de vote).

2. Quels sont les risques et qu'est-ce que cela pourrait me rapporter?

Indicateur de risque

← Risque le plus faible Risque le plus élevé →

L'indicateur de risque part de l'hypothèse que vous conservez le produit jusqu'au 5 août 2030. Le risque réel peut être très différent si vous optez pour une sortie avant échéance, et vous pourriez obtenir moins en retour. Vous risquez de ne pas pouvoir vendre facilement votre produit, ou de devoir le vendre à un prix qui influera sensiblement sur le montant que vous percevrez en retour.

L'indicateur synthétique de risque permet d'apprécier le niveau de risque de ce produit par rapport à d'autres. Il indique la probabilité que ce produit enregistre des pertes en cas de mouvements sur les marchés ou d'une impossibilité de notre part de vous payer.

Nous avons classé ce produit dans la classe de risque 6 sur 7, qui est une classe de risque élevée. Autrement dit, les pertes potentielles liées aux futurs résultats du produit se situent à un niveau élevé et, si la situation venait à se détériorer sur les marchés, il est très peu probable que notre capacité à vous payer en soit affectée.

Si la devise du pays dans lequel vous achetez ce produit ou la devise de votre compte diffère de la devise du produit, veuillez faire attention au risque de change. Les sommes qui vous seront versées le seront dans une autre monnaie; votre gain final dépendra donc du taux de change entre les deux monnaies. Ce risque n'est pas pris en compte dans l'indicateur ci-dessus.

L'inflation érode la valeur d'achat de l'argent au fil du temps, ce qui peut provoquer la baisse en termes réels de tout capital remboursé.

Ce produit ne prévoyant pas de protection contre les aléas de marché, vous pourriez perdre tout ou partie de votre investissement.

Si nous ne sommes pas en mesure de vous verser les sommes dues, vous pouvez perdre l'intégralité de votre investissement.

Pour obtenir des informations détaillées sur tous les risques liés au produit, veuillez-vous reporter aux sections sur les risques dans le prospectus ainsi qu'aux suppléments éventuels y figurant, comme indiqué dans la section « 7. Autres informations pertinentes » ci-dessous.

Ce que vous obtiendrez de ce produit dépend des performances futures du marché. L'évolution future du marché est aléatoire et ne peut être prédite avec précision.

Les scénarios présentés représentent des exemples basés sur les résultats du passé et sur certaines hypothèses. Les marchés pourraient évoluer très différemment à l'avenir.

Période de détention recommandée:		Jusqu'à ce que le produit soit remboursé par anticipation ou arrive à échéance	
		Ceci peut être différent selon le scénario et est indiqué dans le tableau	
Exemple d'investissement:		10 000 EUR	
Scénarios		Si vous sortez après 1 an	Si vous sortez suite à un remboursement par anticipation ou à l'échéance
Minimum	Il n'existe aucun rendement minimal garanti. Vous pourriez perdre tout ou une partie de votre investissement.		
Tensions	Ce que vous pourriez obtenir après déduction des coûts	1 794 EUR	629 EUR
(le produit est remboursé après 5 ans)	Rendement annuel moyen	-82,06 %	-42,48 %
Défavorable	Ce que vous pourriez obtenir après déduction des coûts	5 867 EUR	2 724 EUR
(le produit est remboursé après 5 ans)	Rendement annuel moyen	-41,33 %	-22,90 %
Intermédiaire	Ce que vous pourriez obtenir après déduction des coûts		11 152 EUR
(le produit est remboursé après 1 an)	Rendement annuel moyen		11,52 %
Favorable	Ce que vous pourriez obtenir après déduction des coûts	10 311 EUR	14 608 EUR
(le produit est remboursé après 4 ans)	Rendement annuel moyen	3,11 %	9,93 %

Les scénarios favorable, intermédiaire, défavorable et de tensions représentent des résultats possibles basés sur des simulations utilisant la performance passée de l'actif sous-jacent pendant une période jusqu'à 5 années. En cas de remboursement anticipé, il a été supposé qu'aucun réinvestissement n'a été réalisé. Le scénario de tensions montre ce que vous pourriez obtenir dans des situations de marché extrêmes. Il n'est pas facile de sortir de ce produit. Si vous sortez de l'investissement avant la fin de période de détention recommandée vous pourriez subir des coûts supplémentaires.

Les chiffres indiqués comprennent tous les coûts du produit lui-même, mais pas nécessairement tous les frais dus à votre conseiller ou distributeur. Ces chiffres ne tiennent pas compte de votre situation fiscale personnelle, qui peut également influencer sur les montants que vous recevrez.

3. Que se passe-t-il si l'émetteur n'est pas en mesure d'effectuer les versements?

Vous êtes exposé au risque que l'émetteur ne soit pas en mesure d'honorer ses obligations concernant le produit, par exemple en cas de faillite ou de décision administrative de mesure de résolution. Cela peut avoir une incidence défavorable sur la valeur du produit et pourrait vous amener à perdre tout ou partie de votre investissement dans le produit. Le produit n'est pas couvert par un système de protection des dépôts.

4. Que va me coûter cet investissement?

Il se peut que la personne qui vous vend ce produit ou qui vous fournit des conseils à son sujet vous demande de payer des coûts supplémentaires. Si c'est le cas, cette personne vous informera au sujet de ces coûts et vous montrera l'incidence de ces coûts sur votre investissement.

Coûts au fil du temps Les tableaux présentent les montants prélevés sur votre investissement afin de couvrir les différents types de coûts. Ces montants dépendent du montant que vous investissez, du temps pendant lequel vous détenez le produit et du rendement du produit. Les montants indiqués ici sont des illustrations basées sur un exemple de montant d'investissement et différentes périodes d'investissement.

La durée de ce produit est aléatoire étant donné qu'il peut être résilié à différents moments selon l'évolution du marché. Les montants indiqués ici prennent en considération deux scénarios différents (remboursement anticipé et échéance). Dans le cas où vous choisissez de sortir avant la fin du produit, des coûts de sortie peuvent s'appliquer en plus des montants indiqués ici.

Nous avons supposé:

- que 10 000 EUR sont investis
- une performance du produit qui correspond à chaque période de détention présentée.

	<i>Si le produit est remboursé par anticipation à la première date possible, le 5 août 2026</i>	<i>Si le produit arrive à échéance</i>
Coûts totaux	236 EUR	236 EUR
Incidence des coûts annuels*	2,70 % chaque année	0,52 % chaque année

*Ceci montre dans quelle mesure les coûts réduisent annuellement votre rendement au cours de la période de détention. Par exemple, ceci montre que si vous sortez à l'échéance, il est prévu que votre rendement moyen par an soit de 10,05 % avant déduction des coûts et de 9,52 % après cette déduction.

Il se peut que nous partagions les coûts avec la personne qui vous vend le produit afin de couvrir les services qu'elle vous fournit. Cette personne vous informera du montant.

Composition des coûts

	Coûts ponctuels à l'entrée ou à la sortie	Si vous sortez après 1 an
Coûts d'entrée	2,36 % du montant que vous payez au moment de l'entrée dans l'investissement. Ces coûts sont déjà compris dans le prix que vous payez.	236 EUR
Coûts de sortie	0,50 % de votre investissement avant qu'il ne vous soit payé. Ces coûts sont déjà compris dans le prix que vous recevrez et seront dus seulement si vous sortez avant échéance. Si un remboursement anticipé se produit ou que vous détenez le produit jusqu'à l'échéance, aucun coût de sortie ne sera dû.	50 EUR

5. Combien de temps dois-je le conserver, et puis-je retirer de l'argent de façon anticipée?

Période de détention recommandée: 5 ans

Le produit vise à vous fournir le rendement décrit dans la section « 1. En quoi consiste ce produit? » ci-dessus. Toutefois, cela ne s'applique que si le produit est détenu jusqu'à l'échéance. Il est donc recommandé que le produit soit conservé jusqu'au 5 août 2030 (échéance), bien que le produit puisse être remboursé par anticipation.

Le produit ne garantit pas la possibilité de désinvestir autrement qu'en vendant le produit soit (1) via la bourse (si le produit est négocié en bourse), soit (2) hors-marché si une offre pour le produit existe. Sauf indication contraire dans les coûts de sortie (veuillez voir la section « 4. Que va me coûter cet investissement? » ci-dessous), l'émetteur n'appliquera pas de frais ou pénalités supplémentaires pour une telle opération. Des frais d'exécution peuvent toutefois être facturés par votre courtier, le cas échéant. En vendant le produit avant l'échéance, vous encourez le risque de recevoir un rendement inférieur à celui que vous auriez reçu si vous aviez conservé le produit jusqu'à l'échéance.

Dans des conditions de marché volatiles ou exceptionnelles, ou en cas de défaillances techniques ou perturbations, l'achat et/ou la vente du produit peut être temporairement entravé et/ou suspendu et éventuellement peut ne pas être possible du tout.
