What are the key risks that are specific to the Issuer?

Business and Economic Conditions: The Issuer's financial results may be affected to varying degrees by the general business and economic conditions in the geographic regions in which the Issuer operates. These conditions may include factors such as consumer saving and spending habits as well as consumer borrowing and repayment patterns, unemployment rates, the impact of containment measures associated with the COVID-19 pandemic or other health crises on businesses' operations, the level of business investment and overall business sentiment, the level of activity and volatility of the financial markets, inflation, the level of government spending, monetary policies that are adopted by the BoC, the Federal Reserve in the U.S., the European Central Bank in the European Union and monetary authorities in other jurisdictions in which the Issuer operates, and the fiscal policies of the governments of Canada, the U.S., Europe and such other jurisdictions. Such policies can also adversely affect the Issuer's clients and counterparties in Canada, the U.S. and internationally, which may increase the risk of default by such clients and counterparties. For example, economic downturns may result in higher unemployment rates and lower household incomes, lower corporate earnings, changes in business investment and consumer spending, and could adversely affect the Issuer's business, including but not limited to the demand for its loan and other products and result in lower earnings, including higher credit losses. The Issuer's financial results are also sensitive to changes in interest rates and to weaker investor confidence and market conditions, which may lead to lower client activity and unfavourable changes in earnings. Additional risks are emerging around how countries will seek to recoup the unprecedented levels of stimulus measures introduced in response to the COVID-19 pandemic and balance budgets in the future, and around the potential implications that a prolonged low interest rate environment will have, for example, on increasing wealth inequality and extended retirement ages, among others.

Information Technology and Cyber Risks: Information technology (IT) and cyber risks remain top risks, not only for the financial services sector, but for other industries worldwide. Cybersecurity is the risk to the business associated with cyber-attacks initiated to disrupt or disable the Issuer's operations or to expose or damage data. The Issuer continues to be subject to heightened risks in the form of cyberattacks, data breaches, cyber extortion and similar compromises, due to: (i) the size, scale, and global nature of the Issuer's operations; (ii) the Issuer's heavy reliance on the internet to conduct day-to-day business activities; (iii) the Issuer's intricate technological infrastructure; and (iv) the Issuer's use of third-party service providers. Additionally, clients' use of personal devices can create further avenues for potential cyber-related incidents, as the Issuer has little or no control over the safety of these devices. IT and cyber risks have increased during the COVID-19 pandemic, as increased malicious activities are creating more threats for cyberattacks including COVID-19 phishing emails, malware-embedded mobile apps that purport to track infection rates, and targeting of vulnerabilities in remote access platforms as many companies continue to operate with work from home arrangements. Resulting implications could include business interruptions, service disruptions, financial loss, theft of intellectual property and confidential information, litigation, enhanced regulatory attention and penalties, as well as reputational damage. Furthermore, the adoption of emerging technologies, such as cloud computing, AI and robotics, call for continued focus and investment to manage risks effectively. Not managing this risk effectively may have an adverse effect on the Issuer's financial performance and condition.

Privacy, Data and Third Party Related Risks: The collection, use and sharing of data, as well as the management and governance of data, are increasingly important as the Issuer continues to invest in digital solutions and innovation, as well as, expanding its business activities. Data management is the risk of failing to manage information appropriately throughout its lifecycle due to

inadequate processes and controls, resulting in legal or regulatory consequences, reputational damage or financial loss. In addition to the management and governance of data, its collection, use, and sharing also remain a top risk given the high value attributed to the Issuer's data. Resulting implications from failing to manage this risk could include financial loss, theft of intellectual property and confidential information, litigation, enhanced regulatory attention and penalties, as well as reputational damage. Privacy risk is the risk of improper creation or collection, use, disclosure, retention or destruction of information. Effective privacy and information management practices continue to grow in importance, as demonstrated by the continued development of complex regulations in the jurisdictions in which the Issuer operates and recent regulatory developments relating to data privacy. The Chief Privacy Office and the Chief Data Office partner with cross- functional teams to develop and implement enterprise-wide standards and practices that describe how data is used, protected, managed and governed. The Issuer's potential exposure to these risks also increases as the Issuer continues to partner with third-party service providers and adopt new technologies (e.g., cloud computing, AI and machine learning, etc.) and business models. Third-party risk is the risk of failure to effectively manage third parties which may expose the Issuer to service disruptions, regulatory action, financial loss, litigation or reputational damage. Privacy, data and third-party related risks have been heightened as the use of work from home arrangements have become common practice. As the majority of the Issuer's employees continue to work from home, it is continuously monitoring and enforcing best practices as it seeks to maintain the privacy and confidentiality of all sensitive information. The Issuer's security awareness program is required to be completed by each employee annually and includes cyber awareness training on managing risks while working remotely. Third-party providers critical to its operations are being monitored for any impact on their ability to deliver services, including vendors of its third-party providers. Failure to properly onboard and manage service providers may expose the Issuer to service disruption, financial loss and other risks that may negatively impact its financial performance and condition.

Regulatory Changes: The ongoing introduction of new or revised regulations will continue to lead to increasing focus across the organization on meeting additional regulatory requirements across the multiple jurisdictions in which the Issuer operates. See "Business segment results" on pages 26 to 48 of the 2020 MD&A incorporated by reference in the Base Prospectus for information on the Issuer's business segments and the jurisdictions in which they operate. Financial and other reforms that have come into effect or are coming into effect, across multiple jurisdictions, such as Canadian anti-money laundering regulations, the interest rate benchmark reform, as well as data, privacy, consumer protection regulations, Canadian benchmark rate for qualifying insured mortgages and client focused reforms, continue to provide challenges and impact the Issuer's operations and strategies and may negatively impact its financial performance, condition and prospects.

Digital Disruption and Innovation: The COVID-19 pandemic has changed the way consumers interact with financial services providers. Demand for digital banking services has increased, and while this represents an opportunity for the Issuer to leverage its technological advantage, the need to meet the rapidly evolving needs of clients and compete with non- traditional competitors has increased the Issuer's strategic and reputational risks. Additional risks also continue to emerge as demographic trends, evolving client expectations, the increased power to analyze data and the emergence of disruptors are creating competitive pressures across a number of sectors. Moreover, established technology companies, newer competitors, and regulatory changes continue to foster new business models that could challenge traditional banks and financial products. Finally, while the adoption of new technologies, such as AI and machine learning, presents opportunities for the Issuer, it could result in new and complex strategic, reputational, operational, regulatory and compliance risks that would need to be managed effectively and, if not, may adversely impact its financial performance and condition.

Please refer to the section "Product Description".

Effect of the performance of the Reference Item on the redemption amount:

Positive performance:

If the Reference Item performs positively, the investor realises no return.

Sideways to slightly negative performance:

If the Reference Item performs sideways to slightly negative, the investor realises no return.

Pronounced negative performance:

If the Reference Item performs negatively, the investor realises no return.

III. SIGNIFICANT RISKS FOR INVESTORS

RISKS

Product Risk	These Securities are capital protected. These Securities are not guaranteed against losses by the Issuer, Dealer, their affiliates, the UK Financial Services Compensation Scheme or any equivalent European deposit guarantee scheme.
U.S. Withholding Tax on Dividend Equivalent Payments	The United States Internal Revenue Code of 1986, as amended, treats a "dividend equivalent" payment as a dividend from sources within the United States. Unless reduced by an applicable tax treaty with the United States, such payments generally would be subject to U.S. withholding tax of 30% if paid to a non-U.S. holder. A non-U.S. holder is a beneficial owner of a Note that, for U.S. federal income tax purposes, is a non-resident alien individual, a foreign corporation, or a foreign estate or trust. Under recently finalized U.S. Treasury Department regulations, payments on certain equity-linked instruments (including deemed payments) that are contingent upon or determined by Reference to actual or estimated U.S. source dividends, (regardless of whether such contingency or determination is explicitly stated or implicitly taken into account in computing one or more of the terms of such instruments) may be treated as dividend equivalents subject to withholding tax. Withholding tax will apply to dividend equivalent payments on Notes issued or materially modified on or after January 1, 2017. If any payments are treated as dividend equivalent subject to withholding, we (or the applicable paying agent) would be required to withhold taxes and would not be required to pay any additional amounts with respect to amounts so withheld. Prospective investors of the Notes should consult their own tax advisers regarding the application of the U.S. rules for withholding on dividend equivalents.
Issuer Risk	Investors bear the issuer risk. The Security's value and the payment of any income or bonus amount (where one is payable) are dependent not only on the development of the Reference Item, but also on the creditworthiness of the Issuer, which may vary over

	<p>the term of the Security. The ratings of the Issuer noted above reflect the independent opinion of the rating agencies as to the safety of payments of principal and interest. These ratings are not a guarantee of credit quality. The ratings do not take into consideration any risk associated with fluctuations in the market value of this Security, or where factors other than the Issuer's credit quality determine the level of principal and interest payments.</p>
Reference Item	<p>The value of the Security is linked to the Reference Item. The past performance of the Reference Item(s) is not an indication or guarantee of future performance. Any decision to invest in the Securities should not be based solely or primarily on the past performance of the Reference Item(s). The performance of the Reference Item may be volatile and subject to unpredictable changes over the term of the Security. The investor should be prepared to assume this risk, including the potential risk of insolvency of the Reference Item issuer. Fluctuations in price of the Reference Item may result in the investor losing the entire investment or a substantial part of it.</p> <p>An investment in the Securities does not create a direct investment in the underlying Reference Item(s). Where the Reference Item(s) is an equity/basket of equities, the investor will not be eligible to receive dividend payments or any voting rights associated with a direct investment in the Reference Item(s).</p>
FX Risk	N/A
Physical Delivery	N/A
Liquidity Risk	<p>The investor should be prepared to hold this Security until maturity should it not be called or terminated early, if such option exists, by the Issuer. The Dealer will, however, use its reasonable endeavours to provide liquidity to the Security (either directly or through an affiliate) but is not obliged to do so and may stop providing liquidity at any time without notice. This means an investor should not rely on having the ability to redeem the Security at a particular time or for a certain price. If the Security is redeemed early, the investor may get back less than the stated redemption amount. The Issue Price is not a direct reflection of the market value of the Security. The level at which the investor purchases the Security includes hedging costs and profits that the Dealer or its affiliates expect to incur or realize. The Issue Price may also include selling commissions paid by the Dealer to distributors and/or intermediaries. Any selling commissions, costs and profits will reduce the secondary market level, if any secondary market develops, for the Security. As a result, the investor may experience an immediate and substantial decline in the value of the Securities on the Issue Date.</p>
Suitability	<p>This termsheet is provided for information purposes only and should not be used as the sole or primary basis of any investment decision. Transactions of a type described herein, may involve a high degree of risk and may not be suitable for all investors. Transactions in the Securities should not be undertaken unless the prospective investor understands and is capable of bearing all of the risks associated with an investment in the Securities. Before entering into any transaction, potential investors should take steps to ensure they understand the transaction and have assessed the appropriateness of the transaction in light of their own objectives and circumstances, including the possible risks, benefits and also the tax implications of entering into this proposed transaction. The information in this termsheet does not constitute financial, tax or legal advice and should not be used as a substitute for seeking professional advice. The Dealer is acting as an arm's length counterparty and not as an advisor or fiduciary. It is strongly recommended that potential investors consult their own professional advisers.</p> <p>Institutions referencing this termsheet or extracting information from this termsheet to provide to their clients should ensure that the information satisfies their local jurisdictional requirements and applicable securities laws for conducting business, including any applicable suitability and appropriateness assessment. Investments of a type described herein should only be sold to investors that have the necessary knowledge and experience to fully understand the related risks and are able to bear such risks.</p>
Conflicts of Interest Disclosure	RBC Europe Limited ("RBCEL") forms part of a major banking group. It is therefore possible that RBCEL or one of its subsidiaries, or affiliates, or one of their officers,

employees, representatives or agents (together "the Bank Group") or another client of the Bank Group may have interests, relationships and/or arrangements that give rise to conflicts of interest in relation to business that is transacted with you. Members of the Bank Group may perform a variety of roles in connection with the issuance. The Issuer, Dealer, or their affiliates may act as the Calculation Agent and may enter into positions in connection with the issuance. The Issuer, Dealer, or their affiliates may undertake hedging activity including trading in the Reference Item(s) or instruments related to the Reference Item(s), which may have an adverse impact on the value of the Securities. The Issuer, Dealer, or their affiliates may from time-to-time possess or have access to information concerning the Reference Item(s) and are under no obligation to disclose this information to investors. Any conflicts of interest will be managed in accordance with the Bank Group's established policies and procedures.

Tax Risk	An investment in the Securities may give rise to tax consequences. Any tax liability is dependent on the taxpayer's personal circumstances. The basis and level of any taxes may change during the term of the Security.
On-sale of Securities	It is strongly recommended that investors seek independent tax advice prior to an investment in the Securities. The Issuer, Dealer and members of the Bank Group do not provide tax advice. To the extent that any general information is provided with regard to tax, this is for information purposes only and should neither be construed as tax advice nor should it be relied on, or treated as a substitute for seeking independent tax advice.
Fees	The payment of any fee or commission by the Dealer is subject to the relevant regulatory requirements, including those applicable in the jurisdiction(s) that the Dealer and distributor operate in, as well as the jurisdiction(s) into which the Securities are distributed, if different. The Issue Price may include a fee or commission payable by the Dealer to a distributor or third party, such a fee or commission will be determined by a number of factors including but not limited to the maturity of the Security, hedging costs and legal fees. Any fee or commission received by the distributor or third party may be in addition to the fee normally charged by that party in connection with an investment in the Security. Further details in respect of the fee or commission are available upon request.

Kleinanleger-Zielgruppe

Das Produkt ist für Privatanleger bestimmt, die sämtliche der folgenden Kriterien erfüllen:

1. Sie verfügen über grundlegendes Wissen und/oder grundlegende Erfahrungen im Zusammenhang mit der Anlage in ähnliche Produkte und haben die Fähigkeit, das Produkt sowie seine potenziellen Risiken und Ertragsaussichten, entweder selbst oder unter Zuhilfenahme professionellen Rates, zu verstehen;
2. Sie streben ein regelmäßiges Einkommen an und/oder vorbehaltlich der Zahlungsfähigkeit der Emittentin, einen vollständigen Kapitalschutz, erwarten, dass sich der Wert der Referenzsätze in einer Art und Weise entwickelt, die einen positiven Ertrag erwirtschaftet und haben einen Anlagehorizont, der der unten angegebenen empfohlenen Haltedauer entspricht;
3. Sie akzeptieren das Risiko, dass die Emittentin möglicherweise nicht zahlt oder ihren Verpflichtungen aus dem Produkt nicht nachkommt und sind nicht in der Lage, einen Verlust aus ihrer Anlage zu tragen; und
4. Sie akzeptieren ein Maß an Risiko, um potenzielle Erträge zu erzielen, das mit dem unten gezeigten Gesamtrisikoindikator konsistent ist.

2. Welche Risiken bestehen und was könnte ich im Gegenzug dafür bekommen?

Risikoindikator

Niedrigeres Risiko

Höheres Risiko

Dieser Risikoindikator beruht auf der Annahme, dass Sie das Produkt bis zum 28. April 2025 halten. Wenn Sie die Anlage frühzeitig auflösen, kann das tatsächliche Risiko erheblich davon abweichen und Sie erhalten unter Umständen weniger zurück. Es kann sein, dass Sie Ihr Produkt nicht ohne Weiteres veräußern können oder dass Sie es zu einem Preis veräußern müssen, der den Betrag, den Sie zurück erhalten, erheblich schmälert.

Der Gesamtrisikoindikator hilft Ihnen, das mit diesem Produkt verbundene Risiko im Vergleich zu anderen Produkten einzuschätzen. Er zeigt, wie hoch die Wahrscheinlichkeit ist, dass Sie bei diesem Produkt Geld verlieren, weil sich die Märkte in einer bestimmten Weise entwickeln oder wir nicht in der Lage sind, Sie auszubezahlen.

Wir haben dieses Produkt auf einer Skala von 1 bis 7 in die Risikoklasse 1 eingestuft, wobei 1 der niedrigsten Risikoklasse entspricht. Das Risiko potenzieller Verluste aus der künftigen Wertentwicklung wird als sehr niedrig eingestuft. Bei ungünstigen Marktbedingungen ist es äußerst unwahrscheinlich, dass unsere Fähigkeit beeinträchtigt wird, Sie auszuzahlen.

Sofern die Währung des Landes, in dem Sie dieses Produkt erwerben, oder des für dieses Produkt genutzten Kontos sich von der Währung des Produkts unterscheidet, beachten Sie bitte das Währungsrisiko. Sie erhalten Zahlungen in einer anderen Währung, sodass Ihre endgültige Rendite vom Umrechnungskurs zwischen den beiden Währungen abhängen wird. Dieses Risiko ist bei dem oben angegebenen Indikator nicht berücksichtigt.

Sie haben Anspruch darauf, mindestens 100,00% Ihres Kapitals zurückzuerhalten. Dieser Schutz vor künftigen Marktentwicklungen gilt jedoch nicht, wenn Sie das Produkt vor dem Laufzeitende einlösen und ebenso wenig im Fall der sofortigen Beendigung durch die Emittentin.

Durch die Inflation sinkt im Zeitverlauf der Kaufwert des Geldes. Dies könnte zu einem realen Wertverlust des zurückgezahlten Kapitals oder der Zinsen, die Ihnen in Bezug auf die Anlage gezahlt werden könnten, führen.

Wenn wir Ihnen nicht das zahlen können, was Ihnen zusteht, könnten Sie das gesamte angelegte Kapital verlieren.

Für detaillierte Angaben zu allen auf das Produkt bezogenen Risiken siehe die Risikoabschnitte des Prospekts und etwaiger Nachträge dazu wie im Abschnitt 7 „Sonstige zweckdienliche Angaben“ beschrieben.

Performance-Szenarien Was Sie bei diesem Produkt am Ende herausbekommen, hängt von der künftigen Marktentwicklung ab. Die künftige Marktentwicklung ist ungewiss und lässt sich nicht mit Bestimmtheit vorhersagen.

Die dargestellten Szenarien beruhen auf Ergebnissen aus der Vergangenheit und bestimmten Annahmen. Die Märkte könnten sich künftig völlig anders entwickeln.

Das optimistische, mittlere und pessimistische Szenario veranschaulichen mögliche Ergebnisse, die auf der Grundlage der Simulation unter Anwendung der Wertentwicklung des Basiswerts in den letzten 5 Jahren berechnet wurden. Das Stressszenario zeigt, was Sie unter extremen Marktbedingungen zurückbekommen könnten. Dieses Produkt kann nicht einfach eingelöst werden. Wenn Sie früher als zum Ende der empfohlenen Haltedauer aussteigen, haben Sie keine Garantie und es können zusätzliche Kosten anfallen.

In den angeführten Zahlen sind sämtliche Kosten des Produkts selbst enthalten, jedoch unter Umständen nicht alle Kosten, die Sie an Ihren Berater oder Ihre Vertriebsstelle zahlen müssen. Unberücksichtigt ist auch Ihre persönliche steuerliche Situation, die sich ebenfalls auf den am Ende erzielten Betrag auswirken kann.

3. Was geschieht, wenn die Emittentin nicht in der Lage ist, die Auszahlung vorzunehmen?

Der Anleger trägt das Risiko, dass die Emittentin möglicherweise nicht in der Lage ist, ihren Verpflichtungen im Zusammenhang mit dem Produkt nachzukommen, z.B. im Fall einer Insolvenz der Emittentin oder einer behördlichen Anordnung von Abwicklungsmaßnahmen. Dies kann den Wert des Produkts wesentlich nachteilig beeinflussen und könnte dazu führen, dass Sie Ihre Investition in das Produkt teilweise oder ganz verlieren. Das Produkt ist keine Einlage und unterliegt keiner Einlagensicherung.

4. Welche Kosten entstehen?

Die Person, die Ihnen dieses Produkt verkauft oder Sie dazu berät, kann Ihnen weitere Kosten berechnen. Sollte dies der Fall sein, teilt diese Person Ihnen diese Kosten mit und legt dar, wie sich diese Kosten auf Ihre Anlage auswirken werden.

Kosten im Zeitverlauf

In den Tabellen werden Beträge dargestellt, die zur Deckung verschiedener Kostenarten von Ihrer Anlage entnommen werden. Diese Beträge hängen davon ab, wie viel Sie anlegen, wie lange Sie das Produkt halten und wie gut sich das Produkt entwickelt. Die hier dargestellten Beträge veranschaulichen einen beispielhaften Anlagebetrag und verschiedene mögliche Anlagezeiträume.

Wir haben folgende Annahme zugrunde gelegt:

- Im ersten Jahr würden Sie den angelegten Betrag zurückerhalten (0 % Jahresrendite). Für die anderen Halteperioden haben wir angenommen, dass sich das Produkt wie im mittleren Szenario dargestellt entwickelt.
- 10.000 USD werden angelegt

	Wenn Sie nach 1 Jahr aussteigen	Wenn Sie nach 2 Jahren aussteigen
Kosten insgesamt	100 USD	50 USD
Jährliche Auswirkungen der Kosten*	1,01%	0,26% pro Jahr

*Diese Angaben veranschaulichen, wie die Kosten Ihre Rendite pro Jahr während der Haltedauer verringern. Wenn Sie beispielsweise zum Ende der empfohlenen Haltedauer aussteigen, wird Ihre durchschnittliche Rendite pro Jahr voraussichtlich 4,39% vor Kosten und 4,12% nach Kosten betragen.

Wir können einen Teil der Kosten zwischen uns und der Person aufteilen, die Ihnen das Produkt verkauft, um die für Sie erbrachten Dienstleistungen zu decken. Der Betrag wird Ihnen mitgeteilt.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. Intended retail investor The product is intended to be offered to retail investors who fulfil all of the criteria below:

- they have basic knowledge and/or experience of investing in similar products which provide a similar market exposure and have the ability to understand the product and its possible risks and rewards, either independently or through professional advice;
- they seek income and/or full protection of the product notional amount, subject to the issuer's ability to pay, expect the movement in the reference rate to perform in a way that generates a favourable return and have an investment horizon of the recommended holding period specified below;
- they accept the risk that the issuer could fail to pay or perform its obligations under the product but otherwise they are not able to bear any loss of their investment; and
- they are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

2. What are the risks and what could I get in return?

Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product until 28 April 2025. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

You are entitled to receive back at least 100.00% of your capital. However, this protection against future market performance will not apply if you cash in before maturity or in case of immediate termination by the issuer.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed or interest you may be paid under the investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

Performance scenarios What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		2 years	
Example investment:		USD 10,000	
Scenarios		If you exit after 1 year	If you exit after 2 years (Recommended holding period)
Minimum	USD 10,746. The return is only guaranteed if you hold the product to maturity. You could lose some or all of your investment.		
Stress	What you might get back after costs	USD 10,329	USD 10,746
	Average return each year	3.29%	3.66%
Unfavourable	What you might get back after costs	USD 10,342	USD 10,746
	Average return each year	3.42%	3.66%
Moderate	What you might get back after costs	USD 10,410	USD 10,842
	Average return each year	4.10%	4.12%
Favourable	What you might get back after costs	USD 10,585	USD 11,036
	Average return each year	5.85%	5.05%

The favourable, moderate and unfavourable scenarios represent possible outcomes that have been calculated based on simulations using the reference asset's performance over up to 5 past years. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period you do not have a guarantee and you may have to pay extra costs.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if the issuer is unable to pay out?

You are exposed to the risk that the issuer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested

	If you exit after 1 year	If you exit after 2 years
Total costs	USD 100	USD 50
Annual cost impact*	1.01%	0.26% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.39% before costs and 4.12% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	0.50% of the amount you pay when entering this investment. These costs are already included in the price you pay.	USD 50
Exit costs	0.50% of your investment before it is paid out to you. These costs are already included in the price you receive and are only incurred if you exit before maturity. If you hold the product until maturity, no exit costs will be incurred.	USD 50

5. How long should I hold it and can I take money out early?

Recommended holding period: 2 years

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 28 April 2025 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. No fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Not applicable	Price quotation	Percentage
Smallest tradable unit	USD 1,000		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

2. ¿Qué riesgos corro y qué podría obtener a cambio?

Indicador de riesgo

Riesgo más bajo

Riesgo más alto

El indicador de riesgo supone que usted mantendrá el producto hasta el 28 de abril de 2025. El riesgo real puede variar considerablemente en el caso que usted desinvierta anticipadamente, por lo que es posible que recupere menos dinero. Es posible que no pueda vender su producto fácilmente o puede que tenga que vender su producto a un precio que influirá considerablemente en la cantidad que recibirá.

El indicador resumido de riesgo es una guía del nivel de riesgo de este producto en comparación con otros productos. Muestra las probabilidades de que el producto pierda dinero, debido a la evolución de los mercados o porque no podamos pagarlo.

Hemos clasificado este producto en la clase de riesgo 1 en una escala del 1 al 7, que es la clase de riesgo más baja. Esta evaluación califica la posibilidad de sufrir pérdidas en rentabilidades futuras como muy baja, y la probabilidad de que una mala coyuntura de mercado influya en nuestra capacidad de pagarle como muy improbable.

En la medida en que la moneda del país en el que usted compra este producto o la moneda de su cuenta difiere de la moneda del producto, por favor tenga en cuenta el riesgo cambiario. Usted recibirá los pagos en una moneda diferente, por lo que el retorno final que usted obtenga depende del tipo de cambio entre las dos monedas. Este riesgo no se considera en el indicador señalado anteriormente.

Tiene derecho a recuperar al menos un 100,00% de su capital. No obstante, esta protección contra la evolución futura del mercado no se aplicará si usted lo hace efectivo antes del vencimiento o en caso de terminación inmediata por el emisor.

La inflación erosiona el valor de compra del efectivo con el tiempo y esto puede resultar en la disminución en términos reales de cualquier capital reembolsado o interés que se le pueda pagar en virtud de la inversión.

Si no podemos pagarle lo que se le debe, podría perder toda su inversión.

Para obtener información detallada acerca de todos los riesgos relacionados con el producto, consulte las secciones de riesgo en el folleto y sus suplementos, tal como se especifica en la sección "7. Otros datos de interés" expuesta a continuación.

Favorable	Lo que podría recibir tras deducir los costes	10.585 USD	11.036 USD

Los escenarios favorable, moderado y desfavorable representan posibles resultados que se han calculado en base a simulaciones utilizando el rendimiento de los activos de referencia durante un período máximo de los últimos 5 años. El escenario de tensión muestra lo que usted podría recibir en circunstancias extremas de los mercados. Este producto no puede hacerse efectivo fácilmente. Si opta por salirse de la inversión antes de que transcurra el período de mantenimiento recomendado no dispone de ninguna garantía y podría tener que pagar costes adicionales.

Las cifras presentadas incluyen todos los costes del producto propiamente dicho, pero es posible que no incluyan todos los costes que usted deba pagar a su asesor o distribuidor. Las cifras no tienen en cuenta su situación fiscal personal, que también puede influir en la cantidad que reciba.

3. ¿Qué pasa si el emisor del PRIIP no puede pagar?

Usted está expuesto al riesgo de que el emisor no pueda asumir sus obligaciones de pago en relación con el producto, por ejemplo, en caso de insolvencia (incapacidad de pago / sobreendeudamiento) o de una orden administrativa de medidas de resolución. Esto puede afectar significativamente y de forma adversa al producto y podría llevarle a perder parte o la totalidad de su inversión. El producto no es un depósito y por lo tanto no está cubierto por ningún sistema de protección de depósitos.

4. ¿Cuáles son los costes?

La persona que le asesore sobre este producto o se lo venda puede cobrarle otros costes. En tal caso, esa persona le facilitará información acerca de estos costes y de la incidencia que tienen en su inversión.

Costes a lo largo del tiempo

Los cuadros muestran los importes que se detraen de su inversión para cubrir diferentes tipos de costes. Estos importes dependen de cuánto invierte, de cuánto tiempo mantiene el producto y de lo buenos que sean los resultados del producto. Los importes indicados aquí ilustran un ejemplo de inversión de una determinada cuantía durante diferentes períodos de inversión posibles.

Hemos partido de los siguientes supuestos:

- El primer año recuperaría usted el importe invertido (rendimiento anual del 0%). En relación con los demás períodos de mantenimiento, hemos supuesto que el producto evoluciona tal como muestra el escenario moderado.
- Se invierten 10.000 USD

	<i>En caso de salida después de 1 año</i>	<i>En caso de salida después de 2 años</i>
Costes totales	100 USD	50 USD
Incidencia anual de los costes*	1,01%	0,26% cada año

*Refleja la medida en que los costes reducen su rendimiento cada año a lo largo del período de mantenimiento. Por ejemplo, muestra que, en caso de salida al término del período de mantenimiento recomendado, el rendimiento medio que se prevé que obtendrá cada año será del 4,39% antes de deducir los costes y del 4,12% después de deducir los costes.

Es posible que compartamos parte de los costes con la persona que le vende el producto para cubrir los servicios que le presta. El importe le será comunicado.

Composición de los costes

	<i>Costes únicos de entrada o salida</i>	<i>En caso de salida después de 1 año</i>
Costes de entrada	0,50% del importe que pagará usted al realizar esta inversión. Estos costes ya están incluidos en el precio que paga.	50 USD
Costes de salida	0,50% de su inversión antes de que se le pague. Estos costes ya están incluidos en el precio que recibe y solo se pagarán si sale antes del vencimiento. Si mantiene el producto hasta el vencimiento, no se pagarán costes de salida.	50 USD

5. ¿Cuánto tiempo debo mantener la inversión, y puedo retirar dinero de manera anticipada?

Período de mantenimiento recomendado: 2 años

El producto tiene como objetivo proporcionarle la rentabilidad descrita en la sección "1. ¿Qué es este producto?". No obstante, esto sólo será de aplicación si se mantiene el producto hasta la fecha de vencimiento. Por lo tanto, se recomienda mantener el producto hasta el 28 de abril de 2025 (el vencimiento).

El producto no garantiza la posibilidad de desinversión distinta de la venta del producto (1) a través de la bolsa (si el producto está negociado en bolsa) o (2) fuera de la bolsa, cuando se ha efectuado una oferta para dicho producto. El emisor no cobrará honorarios ni penalizaciones por ninguna transacción de este tipo. Sin embargo, su intermediario puede cobrar una comisión de ejecución, si le correspondiera. Al vender el producto antes de su vencimiento, podría recibir una cantidad inferior a la que habría recibido si hubiera mantenido el producto hasta su vencimiento.

Cotización en bolsa	No aplicable	Precio de cotización	Precio en porcentaje
Unidad mínima de cotización	1.000 USD		

En condiciones de mercado volátiles o inusuales, o en caso de problemas/interrupciones técnicas, la compra y/o venta del producto puede ser obstaculizada y/o suspendida temporalmente y puede no ser posible en absoluto.

Investisseurs de détail visés Le produit est destiné à être offert aux investisseurs de détail qui remplissent tous les critères ci-dessous:

- ils possèdent des connaissances et/ou expériences fondamentales de l'investissement dans des produits similaires offrant une exposition similaire sur le marché et ont la capacité de comprendre le produit et ses risques et avantages éventuels, soit de manière indépendante, soit par des conseils professionnels;
- ils recherchent le profit et/ou la protection complète du montant nominal du produit, sous réserve de la capacité de l'initiateur à payer, s'attendent à ce que le taux de référence évolue de manière à générer un rendement favorable et disposent d'un horizon d'investissement correspondant à la période de détention recommandée ci-dessous;
- ils acceptent le risque que l'émetteur ne paie pas ou ne respecte pas ses obligations contractuelles liées au produit, mais ne sont pas en mesure de supporter une perte de leur investissement; et
- ils sont prêts à accepter un niveau de risque pour obtenir des rendements potentiels qui est compatible avec l'indicateur synthétique de risque présenté ci-dessous.

2. Quels sont les risques et qu'est-ce que cela pourrait me rapporter?

Indicateur de risque

Risque le plus faible

Risque le plus élevé

L'indicateur de risque part de l'hypothèse que vous conservez le produit jusqu'au 28 avril 2025. Le risque réel peut varier si vous optez pour une sortie anticipée et vous pourriez obtenir un rendement moins élevé. Il est possible que vous ne puissiez pas revendre facilement votre produit ou que vous deviez le vendre à un prix qui aurait un impact significatif sur votre rendement.

L'indicateur synthétique de risque permet d'apprécier le niveau de risque de ce produit par rapport à d'autres. Il indique la probabilité que ce produit enregistre des pertes en cas de mouvements sur les marchés ou d'une impossibilité de notre part de vous payer.

Nous avons classé ce produit dans la classe de risque 1 sur 7, qui est la classe de risque la plus basse. Autrement dit, les pertes potentielles liées aux futurs résultats du produit se situent à un niveau très faible et, si la situation venait à se détériorer sur les marchés, il est très peu probable que notre capacité à vous payer en soit affectée.

Si la devise du pays dans lequel vous achetez ce produit ou la devise de votre compte diffère de la devise du produit, veuillez faire attention au risque de change. Les sommes qui vous seront versées le seront dans une autre monnaie; votre gain final dépendra donc du taux de change entre les deux monnaies. Ce risque n'est pas pris en compte dans l'indicateur ci-dessus.

Vous avez le droit à la restitution d'au moins 100,00% de votre capital. Toutefois, cette protection contre les performances futures du marché ne s'appliquera pas si vous sortez avant l'échéance ou en cas de résiliation immédiate par l'émetteur.

L'inflation érode la valeur d'achat de l'argent au fil du temps, ce qui peut provoquer la baisse en termes réels de tout capital remboursé ou de tout intérêt que vous pouvez recevoir dans le cadre de l'investissement.

Si nous ne sommes pas en mesure de vous verser les sommes dues, vous pouvez perdre l'intégralité de votre investissement.

Pour obtenir des informations détaillées sur tous les risques liés au produit, veuillez-vous reporter aux sections sur les risques dans le prospectus ainsi qu'aux suppléments éventuels y figurant, comme indiqué dans la section « Autres informations pertinentes » ci-dessous.

Scénarios de performance

Ce que vous obtiendrez de ce produit dépend des performances futures du marché. L'évolution future du marché est aléatoire et ne peut être prédictive avec précision.

Les scénarios présentés représentent des exemples basés sur les résultats du passé et sur certaines hypothèses. Les marchés pourraient évoluer très différemment à l'avenir.

Période de détention recommandée:	2 ans	
	Exemple d'investissement:	10 000 USD
Scénarios	Si vous sortez après 1 an	Si vous sortez après 2 ans (Période de détention recommandée)
Minimum	10 746 USD. Le rendement n'est garanti que si vous détenez le produit jusqu'à l'échéance. Vous pourriez perdre tout ou une partie de votre investissement.	
Tensions	Ce que vous pourriez obtenir après déduction des coûts Rendement annuel moyen	10 329 USD 3,29%
Défavorable	Ce que vous pourriez obtenir après déduction des coûts Rendement annuel moyen	10 342 USD 3,42%
Intermédiaire	Ce que vous pourriez obtenir après déduction des coûts Rendement annuel moyen	10 410 USD 4,10%
Favorable	Ce que vous pourriez obtenir après déduction des coûts Rendement annuel moyen	10 585 USD 5,85%
		11 036 USD 5,05%

Les scénarios favorable, intermédiaire et défavorable représentent des résultats possibles basés sur des simulations utilisant la performance de l'actif de référence pendant une période jusqu'aux 5 dernières années. Le scénario de tensions montre ce que vous pourriez obtenir dans des situations de marché extrêmes. Il n'est pas facile de sortir de ce produit. Si vous sortez de l'investissement avant la fin de la période de détention recommandée aucune garantie ne vous est donnée et vous pourriez subir des coûts supplémentaires.

Les chiffres indiqués comprennent tous les coûts du produit lui-même, mais pas nécessairement tous les frais dus à votre conseiller ou distributeur. Ces chiffres ne tiennent pas compte de votre situation fiscale personnelle, qui peut également influer sur les montants que vous recevez.

3. Que se passe-t-il si l'émetteur n'est pas en mesure d'effectuer les versements?

Vous êtes exposé au risque que l'émetteur ne soit pas en mesure d'honorer ses obligations concernant le produit, par exemple en cas d'insolvabilité ou de décision administrative de mesure de résolution. Cela peut avoir une incidence défavorable sur la valeur du produit et pourrait vous amener à perdre tout ou partie de votre investissement dans le produit. Le produit n'est pas un dépôt et, en tant que tel, n'est pas couvert par un système de protection des dépôts.

4. Que va me coûter cet investissement?

Il se peut que la personne qui vous vend ce produit ou qui vous fournit des conseils à son sujet vous demande de payer des coûts supplémentaires. Si c'est le cas, cette personne vous informera au sujet de ces coûts et vous montrera l'incidence de ces coûts sur votre investissement.

Coûts au fil du temps Les tableaux présentent les montants prélevés sur votre investissement afin de couvrir les différents types de coûts. Ces montants dépendent du montant que vous investissez, du temps pendant lequel vous détenez le produit et du rendement du produit. Les montants indiqués ici sont des illustrations basées sur un exemple de montant d'investissement et différentes périodes d'investissement possibles.

Nous avons supposé que:

- au cours de la première année, vous récupéreriez le montant que vous avez investi (rendement annuel de 0%). Que pour les autres périodes de détention, le produit évolue de la manière indiquée dans le scénario intermédiaire.
- 10 000 USD sont investis

	<i>Si vous sortez après 1 an</i>	<i>Si vous sortez après 2 ans</i>
Coûts totaux	100 USD	50 USD
Incidence des coûts annuels*	1,01%	0,26% chaque année

*Ceci montre dans quelle mesure les coûts réduisent annuellement votre rendement au cours de la période de détention. Par exemple, ceci montre que si vous sortez à la fin de la période de détention recommandée, il est prévu que votre rendement moyen par an soit de 4,39% avant déduction des coûts et de 4,12% après cette déduction.

Il se peut que nous partagions les coûts avec la personne qui vous vend le produit afin de couvrir les services qu'elle vous fournit. Cette personne vous informera du montant.

Composition des coûts

	Coûts ponctuels à l'entrée ou à la sortie	Si vous sortez après 1 an
Coûts d'entrée	0,50% du montant que vous payez au moment de l'entrée dans l'investissement. Ces coûts sont déjà compris dans le prix que vous payez.	50 USD
Coûts de sortie	0,50% de votre investissement avant qu'il ne vous soit payé. Ces coûts sont déjà compris dans le prix que vous recevez et seront dus seulement si vous sortez avant échéance. Si vous détenez le produit jusqu'à l'échéance, aucun coût de sortie ne sera dû.	50 USD

5. Combien de temps dois-je le conserver, et puis-je retirer de l'argent de façon anticipée?

Période de détention recommandée: 2 ans

Le produit vise à vous fournir le rendement décrit dans la section « 1. En quoi consiste ce produit? » ci-dessus. Toutefois, cela ne s'applique que si le produit est détenu jusqu'à l'échéance. Il est donc recommandé que le produit soit conservé jusqu'au 28 avril 2025 (échéance).

Le produit ne garantit pas la possibilité de désinvestir autrement qu'en vendant le produit soit (1) via la bourse (si le produit est négocié en bourse), soit (2) de manière bilatérale si une offre pour le produit existe. Dans les deux cas, l'émetteur n'appliquera pas de frais ou pénalités supplémentaires. Des frais d'exécution peuvent toutefois être facturés par votre courtier pour l'exécution de toute opération. En vendant le produit avant l'échéance, vous encourez le risque de recevoir un rendement inférieur à celui que vous auriez reçu si vous aviez conservé le produit jusqu'à l'échéance.

Cotation boursière	Non applicable	Cotation de prix	Pourcentage
Plus petite unité négociable	1 000 USD		

Dans des conditions de marché volatiles ou exceptionnelles, ou en cas de défaillances techniques ou perturbations, l'achat et/ou la vente du produit peut être temporairement entravé et/ou suspendu et éventuellement peut ne pas être possible du tout.

6. Comment puis-je formuler une réclamation?

- accettino il rischio che l'emittente possa non essere in grado di pagare o di adempiere ai propri obblighi derivanti dal prodotto, e non siano in grado di sostenere alcuna perdita del proprio investimento; e
- al fine di ottenere un rendimento potenziale, siano disposti ad accettare un livello di rischio coerente con quello indicato dall'indicatore sintetico di rischio sotto riportato.

2. Quali sono i rischi e qual è il potenziale rendimento?

Indicatore di rischio

Rischio più basso

Rischio più alto

L'indicatore sintetico di rischio presuppone che il prodotto sia mantenuto fino al 28 aprile 2025. Il rischio effettivo può variare in misura significativa in caso di disinvestimento in una fase iniziale e la somma rimborsata potrebbe essere minore. Potrebbe non essere possibile vendere facilmente il prodotto o potrebbe essere possibile vendere soltanto ad un prezzo che incide significativamente sull'importo incassato.

L'indicatore sintetico di rischio è un'indicazione orientativa del livello di rischio di questo prodotto rispetto ad altri prodotti. Esso esprime la probabilità che il prodotto subisca perdite monetarie a causa di movimenti sul mercato o a causa della nostra incapacità di pagarvi quanto dovuto.

Abbiamo classificato questo prodotto al livello 1 su 7, che corrisponde alla classe di rischio più bassa. Ciò significa che le perdite potenziali dovute alla performance futura del prodotto sono classificate nel livello molto basso e che è molto improbabile che le cattive condizioni di mercato influenzino la nostra capacità di pagarvi quanto dovuto.

Nel caso in cui la valuta del paese in cui acquistate il prodotto differisca dalla valuta del prodotto, si prega di tenere in considerazione il rischio di cambio. Riceverete pagamenti in una valuta straniera, quindi il rendimento finale che otterrete dipenderà dal tasso di cambio tra le due valute. Questo rischio non è contemplato nell'indicatore sintetico di rischio sopra riportato.

L'investitore ha diritto alla restituzione di almeno il 100,00% del capitale investito. Tuttavia, questa protezione dalla performance futura del mercato non si applicherà nel caso di disinvestimento prima della data di scadenza o nel caso di estinzione immediata da parte dell'emittente.

L'inflazione erode il valore di acquisto del denaro nel corso del tempo. Ciò può comportare un calo in termini reali di qualsiasi capitale rimborsato o di qualsiasi interesse che può essere pagato all'investitore nell'ambito dell'investimento.

Nel caso in cui non fossimo in grado di pagarvi quanto dovuto, potreste perdere il vostro intero investimento.

Per informazioni più dettagliate su tutti i rischi relativi al prodotto, si rinvia alle sezioni rischio del prospetto e agli eventuali supplementi al medesimo, come precisato di seguito nella sezione "7. Altre informazioni rilevanti".

Scenari di performance Il possibile rimborso dipenderà dall'andamento futuro dei mercati, che è incerto e non può essere previsto con esattezza.

Gli scenari riportati sono illustrazioni basate sui risultati passati e su alcune ipotesi. Nel futuro i mercati potrebbero avere un andamento molto diverso.

Periodo di detenzione raccomandato:	2 anni		
Esempio di investimento:	10.000 USD		
Scenari	In caso di uscita dopo 1 anno	In caso di uscita dopo 2 anni	(Periodo di detenzione raccomandato)
Minimo	10.746 USD. Il rendimento è garantito solo se il prodotto è detenuto fino alla scadenza. Potreste perdere il vostro intero investimento o parte di esso.		
Stress	Possibile rimborso al netto dei costi Rendimento medio per ciascun anno	10.329 USD 3,29%	10.746 USD 3,66%
Sfavorevole	Possibile rimborso al netto dei costi Rendimento medio per ciascun anno	10.342 USD 3,42%	10.746 USD 3,66%
Moderato	Possibile rimborso al netto dei costi Rendimento medio per ciascun anno	10.410 USD 4,10%	10.842 USD 4,12%
Favorevole	Possibile rimborso al netto dei costi	10.585 USD	11.036 USD

Lo scenario favorevole, lo scenario moderato e lo scenario sfavorevole rappresentano i risultati possibili che sono stati calcolati sulla base di simulazioni che utilizzano la performance dell'asset di riferimento per un periodo che comprende fino a 5 anni passati. Lo scenario di stress indica quale potrebbe essere l'importo rimborsato in circostanze di mercato estreme. Questo prodotto non è facilmente liquidabile. In caso di uscita da un investimento prima del periodo di detenzione raccomandato non vi è alcuna garanzia e potrebbe essere necessario sostenere costi supplementari.

Le cifre riportate comprendono tutti i costi del prodotto in quanto tale, ma possono non comprendere tutti i costi da voi pagati al consulente o al distributore. Le cifre non tengono conto della vostra situazione fiscale personale, che può incidere anch'essa sull'importo del rimborso.

3. Cosa accade nel caso in cui l'emittente non sia in grado di corrispondere quanto dovuto?

State assumendo il rischio che l'emittente possa non essere in grado di adempiere alle obbligazioni assunte in relazione al prodotto, ad esempio a causa di fallimento o nel caso di una decisione ufficiale per l'avvio di un'azione di risoluzione. Ciò potrebbe avere un impatto negativo significativo sul valore del prodotto e potrebbe comportare la perdita di una parte o dell'intero capitale investito. Il prodotto non è un deposito e pertanto non è coperto da nessun sistema di protezione dei depositi.

4. Quali sono i costi?

La persona che fornisce consulenza sul PRIIP o che lo vende potrebbe addebitare altri costi, nel qual caso fornirà informazioni su tali costi, illustrandone l'impatto sull'investimento.

Andamento dei costi nel tempo

Le tabelle mostrano gli importi prelevati dall'investimento per coprire diversi tipi di costi. Tali importi dipendono dall'entità dell'investimento, dalla durata della detenzione del prodotto e dall'andamento del prodotto. Gli importi sono qui riportati a fini illustrativi e si basano su un importo esemplificativo dell'investimento e su diversi possibili periodi di investimento.

Si è ipotizzato quanto segue:

- Nel primo anno recupero dell'importo investito (rendimento annuo dello 0%). Per gli altri periodi di detenzione si è ipotizzato che il prodotto abbia la performance indicata nello scenario moderato.
- 10.000 USD di investimento

	In caso di uscita dopo 1 anno	In caso di uscita dopo 2 anni
Costi totali	100 USD	50 USD
Incidenza annuale dei costi*	1,01%	0,26% ogni anno

*Dimostra come i costi riducano ogni anno il rendimento nel corso del periodo di detenzione. Ad esempio, se l'uscita avviene nel periodo di detenzione raccomandato, si prevede che il rendimento medio annuo sarà 4,39% prima dei costi e 4,12% al netto dei costi.

Una parte dei costi può essere condivisa con la persona che vende il prodotto per coprire i servizi che fornisce. L'importo vi verrà comunicato in seguito.

Composizione dei costi

	Costi una tantum di ingresso o di uscita	In caso di uscita dopo 1 anno
Costi di ingresso	0,50% dell'importo pagato al momento della sottoscrizione dell'investimento. Questi costi sono già inclusi nel prezzo pagato.	50 USD
Costi di uscita	0,50% del vostro investimento prima che vi venga pagato. Questi costi sono già inclusi nel prezzo che ricevete e sono sostenuti soltanto in caso di uscita prima della scadenza. Nel caso in cui deteniate il prodotto fino alla scadenza, non incorrerete in alcun costo di uscita.	50 USD

5. Per quanto tempo dovrei detenerlo? Posso ritirare il capitale prematuramente?

Periodo di detenzione raccomandato: 2 anni

Il prodotto è finalizzato a rimborsare l'importo descritto nella sezione "1. Cos'è questo prodotto?". Tuttavia, ciò vale solamente nel caso in cui il prodotto venga detenuto fino alla data di scadenza. Pertanto, si raccomanda di detenerlo fino al 28 aprile 2025 (data di scadenza).

Questo prodotto non garantisce la possibilità di disinvestimento, se non tramite la vendita del prodotto (1) in borsa (nel caso in cui il prodotto sia negoziato in borsa) oppure (2) fuori borsa, qualora vi sia un'offerta per tale prodotto. Nessuna commissione o penale sarà addebitata dall'emittente per tali transazioni, tuttavia potrebbe essere applicata una commissione di esecuzione da parte dell'intermediario, se del caso. Vendendo il prodotto prima della scadenza, l'investitore potrebbe ricevere un importo inferiore all'importo che si sarebbe ricevuto detenendo il prodotto fino alla data di scadenza.

Quotazione in borsa	Non applicabile	Quotazione del prezzo	Percentuale
Lotto minimo di negoziazione	1.000 USD		

In caso di condizioni di mercato volatili o eccezionali, o in caso di problemi tecnici/malfunzionamenti, l'acquisto e/o la vendita del prodotto possono essere temporaneamente impediti e/o sospesi o anche risultare del tutto impossibili.
