What is a G-SIB?

In November 2011, the Financial Stability Board (FSB) published an integrated set of policy measures with the goal of enhancing the transparency of the relative scale of banks' in a global context, as well as to address the systemic risk and moral hazard associated with systemically important financial institutions. These policy measures have become known as the Global Systemically Important Bank (G-SIB) Framework, and include an assessment methodology for determining the importance of international banks to the global financial industry. A G-SIB is a financial institution whose failure could have significant impact to the wider financial system and economic activity. G-SIBs are subject to additional capital surcharge dependent on their G-SIB score, as well as increased supervisory scrutiny.

The Office of the Superintendent of Financial Institutions (OSFI) Capital Adequacy Requirements (CAR) Guideline clarifies that if, and when, a Canadian bank is designated a G-SIB, the higher of the Domestic Systemically Important Bank (D-SIB) and G-SIB surcharges will apply.

We were first designated a G-SIB by the FSB in November 2017 based on the bank's financial position as at year ended 31 October 2016 and methodology published by the Basel Committee on Banking Supervision (BCBS).

The list includes 30 international banks and is updated annually, in November. We are one of only two Canadian Banks identified as G-SIBs.

How are G-SIBs identified?

Identification of G-SIBs is prescribed by the FSB using a methodology developed by the BCBS. The methodology is based on 13 indicators grouped in the following five categories:

- Size
- Interconnectedness
- Substitutability/financial institution infrastructure
- Complexity
- Cross-jurisdictional activity

A score is assigned to each of the five categories and is calculated based on the individual score and weights of the indicators within that category; with the Bank's overall score calculated as the sum of all category scores. The assessment methodology is reviewed and revised annually by the BCBS for items deemed for addition to, or removal from the 13 indicators.

The information disclosed in this report is a detailed version of the G-SIB indicators included in our first quarter Report to Shareholders. The indicator values are calculated based on the instructions provided by the BCBS. The information presented is not directly comparable with other disclosures.

What are G-SIBs subject to?

G-SIBs are required to hold additional Common Equity Tier 1 ('CET1') capital surcharge between 1% and 3.5%, depending on the score from the G-SIB assessment methodology. The G-SIB capital surcharge ensures that G-SIBs maintain additional capital to absorb potential future losses. Our Q1 2023 capital ratios exceed the regulatory minimum, inclusive of the required G-SIB surcharge of 1%. In addition, G-SIBs are subject to higher Total Loss-absorbing Capacity (TLAC) requirements to ensure the sufficiency of loss absorbing capacity in a resolution situation.

In 2013 OSFI designated Canada's six largest banks D-SIBs. D-SIBs are subject to enhanced supervision as well as increased capital, resolution and disclosure requirements. The current recovery and resolution requirements for G-SIBs have been adopted in OSFI's D-SIB Regulatory Oversight Framework, of which we are included.
