Second Quarter 2014**

**Royal Bank of Canada second quarter 2014 results**

All amounts are in Canadian dollars and are based on financial statements prepared in compliance with International Accounting Standard 34 *Interim Financial Reporting*, unless otherwise noted.

**TORONTO, May 22, 2014** – Royal Bank of Canada (RY on TSX and NYSE) today reported net income of \$2,201 million for the second quarter ended April 30, 2014, up \$292 million or 15% from the prior year. Our results reflect solid performance across all of our businesses, including record earnings in Wealth Management and higher earnings in Capital Markets, Personal & Commercial Banking and Investor & Treasury Services, and positive operating leverage.

“We delivered earnings of \$2.2 billion and a return on equity of 19% while maintaining a strong capital position. These results demonstrate the earnings power of RBC, our prudent approach to risk management and our ability to manage costs effectively,” said Gordon M. Nixon, RBC CEO. “We continue to extend our leadership positions in Canada and select global markets through our ongoing focus on our clients.”

**Q2 2014 compared to Q2 2013**

- Net income of \$2,201 million (up 15% from \$1,909 million)
- Diluted earnings per share (EPS) of \$1.47 (up \$0.22 from \$1.25)
- Return on common equity (ROE) of 19.1% (up from 18.7%)
- Basel III Common Equity Tier 1 (CET1) ratio of 9.7%

**YTD 2014 compared to YTD 2013**

- Net income of \$4,293 million (up 9% from \$3,956 million)
- Diluted EPS of \$2.85 (up \$0.26 from \$2.59)
- ROE of 18.6% (down from 19.4%)

## Management's Discussion and Analysis

Management's Discussion and Analysis (MD&A) is provided to enable a reader to assess our results of operations and financial condition for the three and six month periods ended or as at April 30, 2014, compared to the corresponding periods in the prior fiscal year and the three month period ended January 31, 2014. This MD&A should be read in conjunction with our unaudited Interim Condensed Consolidated Financial Statements for the quarter ended April 30, 2014 (Condensed Financial Statements) and related notes and our 2013 Annual Report. This MD&A is dated May 21, 2014. All amounts are in Canadian dollars, unless otherwise specified, and are based on financial statements prepared in accordance with International Accounting Standard (IAS) 34, *Interim Financial Reporting*, as issued by the International Accounting Standards Board (IASB), unless otherwise noted.

Additional information about us, including our 2013 Annual Information Form, is available free of charge on our website at [rbc.com/investorrelations](http://rbc.com/investorrelations), on the Canadian Securities Administrators' website at [sedar.com](http://sedar.com) and on the EDGAR section of the United States (U.S.) Securities and Exchange Commission's (SEC) website at [sec.gov](http://sec.gov).

### Caution regarding forward-looking statements

From time to time, we make written or oral forward-looking statements within the meaning of certain securities laws, including the "safe harbour" provisions of the *United States Private Securities Litigation Reform Act of 1995* and any applicable Canadian securities legislation. We may make forward-looking statements in this Q2 2014 Report to Shareholders, in other filings with Canadian regulators or the SEC, in other reports to shareholders and in other communications. Forward-looking statements in this document include, but are not limited to, statements relating to our financial performance objectives, vision and strategic goals, the economic and market review and outlook for Canadian, U.S., European and global economies, the regulatory environment in which we operate, the outlook and priorities for each of our business segments, and the risk environment including our liquidity and funding management. The forward-looking information contained in this document is presented for the purpose of assisting the holders of our securities and financial analysts in understanding our financial position and results of operations as at and for the periods ended on the dates presented and our financial performance objectives, vision and strategic goals, and may not be appropriate for other purposes. Forward-looking statements are typically identified by words such as "believe", "expect", "foresee", "forecast", "anticipate", "intend", "estimate", "goal", "plan" and "project" and similar expressions of future or conditional verbs such as "will", "may", "should", "could" or "would".

By their very nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties, which give rise to the possibility that our predictions, forecasts, projections, expectations or conclusions will not prove to be accurate, that our assumptions may not be correct and that our financial performance objectives, vision and strategic goals will not be achieved. We caution readers not to place undue reliance on these statements as a number of risk factors could cause our actual results to differ materially from the expectations expressed in such forward-looking statements. These factors – many of which are beyond our control and the effects of which can be difficult to predict – include: credit, market, liquidity and funding, insurance, regulatory compliance, operational, strategic, reputation and competitive risks and other risks discussed in the Risk management and Overview of other risks sections of our 2013 Annual Report and the Risk management section of this Q2 2014 Report to Shareholders; the impact of regulatory reforms, including relating to the Basel Committee on Banking Supervision's (BCBS) global standards for capital and liquidity reform, the *Dodd-Frank Wall Street Reform and Consumer Protection Act* and the regulations issued and to be issued thereunder, over-the-counter derivatives reform, the payments system in Canada, the U.S. *Foreign Account Tax Compliance Act* (FATCA), and regulatory reforms in the United Kingdom (U.K.) and Europe; the high levels of Canadian household debt; cybersecurity; the business and economic conditions in Canada, the U.S. and certain other countries in which we operate; the effects of changes in government fiscal, monetary and other policies; our ability to attract and retain employees; the accuracy and completeness of information concerning our clients and counterparties; the development and integration of our distribution networks; model, information technology and social media risk; and the impact of environmental issues.

We caution that the foregoing list of risk factors is not exhaustive and other factors could also adversely affect our results. When relying on our forward-looking statements to make decisions with respect to us, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. Material economic assumptions underlying the forward looking statements contained in this Q2 2014 Report to Shareholders are set out in the Overview and outlook section and for each business segment under the heading Outlook and priorities in our 2013 Annual Report, as updated by the Overview section of this Q2 2014 Report to Shareholders. Except as required by law, we do not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by us or on our behalf.

Additional information about these and other factors can be found in the Risk management and Overview of other risks sections of our 2013 Annual Report and the Risk management section of this Q2 2014 Report to Shareholders.

Information contained in or otherwise accessible through the websites mentioned does not form part of this report. All references in this report to websites are inactive textual references and are for your information only.

### Overview

#### About Royal Bank of Canada

Royal Bank of Canada is Canada's largest bank, and one of the largest banks in the world, based on market capitalization. We are one of North America's leading diversified financial services companies, and provide personal and commercial banking, wealth management services, insurance, investor services and capital markets products and services on a global basis. We employ approximately 79,000 full- and part-time employees who serve more than 16 million personal, business, public sector and institutional clients through offices in Canada, the U.S. and 42 other countries. For more information, please visit [rbc.com](http://rbc.com).

- (1) Comparative amounts prior to November 1, 2013 have been restated for the adoption of new accounting standards. For further details, refer to Note 2 of our Condensed Financial Statements.
- (2) Average amounts are calculated using methods intended to approximate the average of the daily balances for the period. This includes ROE and Average common equity. For further details, refer to the Key performance and non-GAAP measures section.
- (3) These measures may not have a standardized meaning under generally accepted accounting principles (GAAP) and may not be comparable to similar measures disclosed by other financial institutions. For further details, refer to the Key performance and non-GAAP measures section.
- (4) Effective the first quarter of 2013, Assets-to-capital multiple is calculated on a transitional basis as per the Office of the Superintendent of Financial Institutions (OSFI) Capital Adequacy Requirements (CAR) Guideline.
- (5) Includes AUA from Investor Services and \$32.2 billion (January 31, 2014 – \$32.3 billion, April 30, 2013 – \$35.8 billion) of securitized mortgages and credit card loans.
- (6) Defined as dividends per common share divided by the average of the high and low share price in the relevant period.
- (7) Average amounts are calculated using month-end spot rates for the period.

## Economic, market and regulatory review and outlook – data as at May 21, 2014

### Canada

The Canadian economy grew in the first calendar quarter of 2014 at an estimated rate of 1.7%, with the rate of growth slowing compared to the last calendar quarter of 2013, largely reflecting the dampening impact of poor weather conditions in late 2013. The unemployment rate improved to 6.9% in April 2014 from 7.0% in February 2014 due to a modest rise in employment. The Canadian dollar was little changed against the U.S. dollar in the early part of the second calendar quarter of 2014, as short-term interest rate differences between Canada and the U.S. did not change significantly, and commodity prices stayed relatively stable. Housing market activity was impacted by harsh weather conditions, as indicated by sharply lower housing starts in the first three months of 2014. We expect the Canadian economy to grow at a rate of 2.5% in calendar 2014 due to an improvement in exports resulting from a stronger U.S. economy and the weaker Canadian dollar, as well as increased business investment and consumer spending. The Bank of Canada maintained the overnight rate at 1% in April 2014, and we do not expect a change to the current rate until the second calendar quarter of 2015.

### U.S.

The U.S. economy grew at an estimated rate of 0.1% during the first calendar quarter of 2014. The U.S. economy was also impacted by the poor weather conditions, which weighed on housing market activity and business investment. The labour market continued to recover and the unemployment rate decreased to 6.3% in April from 7.0% in the final calendar quarter of 2013. The Federal Reserve (Fed) reduced its monthly asset purchases in March and April, by \$10 billion each time (from \$65 billion to \$45 billion), on the basis of the continuing improvement in the economy. As a result of the firming in the labour market, we expect the Fed to continue to reduce its monthly asset purchases, and to conclude the program by the end of 2014. We expect the U.S. economy to grow at a rate of 2.6% during calendar 2014, due to stronger consumer spending and improved business investment. Given the low level of inflation and gradual recovery in the labour market, we expect the Fed's key interest rate to be maintained within the current funds target range of 0.0% to 0.25% until the fourth calendar quarter of 2015.

### Europe

The Eurozone economy continued its modest recovery and grew in the first calendar quarter of 2014 at an estimated rate of 0.1%. The unemployment rate was little changed in March 2014 compared to the prior calendar quarter, at an elevated level of 11.8%. The European Central Bank (ECB) maintained its key interest rate at 0.25% during the first calendar quarter. With Eurozone inflation decreasing to 0.5% in March 2014 and only increasing slightly to 0.7% in April, we expect the ECB to take policy action, possibly through a decrease in key interest rates, to address money market liquidity issues. We expect the Eurozone economy to grow at a rate of 1.2% during calendar 2014.

### Financial markets

Capital markets in Canada and the U.S. generally improved compared to our previous fiscal quarter, despite the Fed's continued reduction of monthly asset purchases. Yields on long-term Canadian and U.S. government bonds were essentially flat compared to our prior fiscal quarter, and continued to remain near historical lows. Corporate credit spreads in North America remained narrow during the quarter, enabling corporations to continue to borrow at lower costs. Agricultural commodity prices increased during our second fiscal quarter, resulting from poor weather conditions in North America and political uncertainty in certain emerging market economies. Currency market and equity index volatility resulting from ongoing political and economic uncertainty impacted certain emerging market economies. Certain metal prices, particularly nickel, increased during the fiscal quarter as this ongoing political uncertainty raised concerns about the supply of these metals.

### Regulatory environment

We continue to monitor and prepare for regulatory developments in order to ensure timely and accurate compliance with new requirements in a manner that seeks to mitigate adverse business or economic impacts. Those requirements include relevant aspects of the U.S. *Dodd-Frank Wall Street Reform and Consumer Protection Act* ("Dodd-Frank Act"), including the recently finalized Volcker Rule and Foreign Banking Organization ("FBO") Rule. We are also continuing to monitor and prepare for global reforms of Over-the-Counter (OTC) derivatives in a number of areas (e.g. trade reporting; clearing; exchange trading requirements).

As reported last quarter, final regulations implementing the Volcker Rule's restrictions on proprietary trading and certain fund activities were issued by U.S. authorities on December 10, 2013. While the final rule upheld the prohibition on banking entities' engaging in proprietary trading and having certain relationships with hedge and private equity funds, it also provided some flexibility for activities conducted outside the U.S. As a result, Canadian banks may continue to trade in debt guaranteed by Canadian government entities, invest in Canadian funds, and trade on a proprietary basis outside of the U.S. The rule also contains other exclusions and exemptions for market-making, hedging, and underwriting activities. The deadline to comply with the rule's provisions was also extended by one year to July 21, 2015. RBC is continuing to assess the impact of the final rule through ongoing discussions with implementing regulators and others in the industry, internal analysis of RBC business impacts, and implementation of measures to conform impacted activities and investments to the rule's requirements. We expect to be able to rely on exclusions and exemptions available under the rule, in which case changes to certain existing business activities will not be necessary. Activities and investments for which no exemption or exclusion is available will need to be brought into conformance by the July 2015 effective date, absent any extensions. Extensive compliance and monitoring programs will also be required to monitor and report ongoing compliance with the rule. The combined impact of these changes is not expected to materially affect RBC's overall results.

At the same time, we are preparing for compliance with the Federal Reserve Board's final rule for non-U.S. banks with subsidiaries, affiliates and branches operating in the U.S. ("*Enhanced Prudential Standards for Bank Holding Companies and Foreign Banking Organizations*"), which, as reported in Q1, was issued on February 18, 2014. As a foreign banking organization with more than US\$50 billion in U.S. non-branch assets, RBC will be required to establish a U.S. intermediate holding company (IHC) into which all of our U.S. legal entities must be placed and for which certain U.S. based requirements will apply. The IHC will become subject to Federal Reserve oversight comparable to U.S. bank holding companies. As a result, changes to our existing practices will be required to provide the governance and infrastructure needed to support these U.S.-specific requirements in areas of financial reporting, capital and liquidity, risk management, and stress testing. An implementation plan outlining our approach for meeting these requirements by the July 1, 2016 effective date, including the formation of the IHC, must be filed with the Federal Reserve by

January 1, 2015. The Federal Reserve has stated that it plans to issue, at a later date, separate rules to apply early remediation requirements and limits on exposures to single counterparties. The final rule also deferred application of U.S.-based leverage requirements to January 1, 2018.

Canadian banks have been providing capital and leverage ratios calculated under Basel III to OSFI since January 2013, and will start publicly reporting the leverage ratio commencing January 1, 2015. Also, Basel III capital requirements for the six largest Canadian banks will increase effective January 1, 2016. OSFI is expected to provide guidance on the domestic implementation of the remaining Basel III measures later this year, or in 2015, and we anticipate we will be well-positioned to meet those requirements.

For a discussion on risk factors resulting from these and other regulatory developments which may affect our business and financial results, refer to the Risk management – Top and emerging risks section of our 2013 Annual Report. For further details on our framework and activities to manage risks, refer to the Risk management and Capital management sections of our 2013 Annual Report, and the Risk management and Capital management sections of this Q2 2014 Report to Shareholders.

## Key corporate events of 2014

### Jamaican banking operations

On January 29, 2014, we announced that we entered into a definitive agreement to sell RBC Royal Bank (Jamaica) Limited and RBTT Securities Jamaica Limited (collectively RBC Jamaica) to Sagicor Group Jamaica Limited. The transaction is subject to customary closing conditions, including regulatory approvals and is expected to close in the third quarter. As a result of the transaction, we recorded an impairment loss of \$60 million in the first quarter of 2014. No additional impairment loss was recognized on the disposal of RBC Jamaica this quarter. In addition, amounts included in Other components of equity related to the disposal will be subsequently recorded in income upon close of the transaction. As of April 30, 2014, Other components of equity included unrealized losses on foreign currency translation related to the disposal of \$45 million (January 31, 2014 - \$40 million). For further details, refer to Note 7 of our Condensed Financial Statements.

## Financial performance

### Overview

#### Q2 2014 vs. Q2 2013

Net income of \$2,201 million was up \$292 million or 15% from a year ago. Diluted earnings per share (EPS) of \$1.47 was up \$0.22 and return on common equity (ROE) of 19.1% was up 40 basis points (bps) from 18.7%. Our Common Equity Tier 1 (CET1) ratio was 9.7%.

Our results reflected solid performance across all our business segments, including higher earnings in Capital Markets, Personal & Commercial Banking, Wealth Management and Investor & Treasury Services. The increase in net income was primarily driven by strong revenue growth across our trading and corporate and investment banking businesses, volume growth across most of our Canadian banking businesses, and higher average fee-based client assets in Wealth Management resulting from capital appreciation and strong net sales. The impact of foreign exchange translation also contributed to the increase. These factors were partially offset by higher costs in support of business growth. In addition, the prior year included a restructuring charge of \$44 million (\$31 million after-tax) related to the integration of Investor Services, primarily in Europe.

For further details on our results and CET1 ratio, refer to the Business segment results and Capital management sections, respectively.

#### Q2 2014 vs. Q1 2014

Net income increased \$109 million from the prior quarter. Diluted EPS was up \$0.09 and ROE was up 100 bps from 18.1% last quarter.

The increase in net income mainly reflected higher average fee-based client assets in Wealth Management, higher equity trading results and increased debt origination reflecting strong issuance activity mainly in the U.S. Lower provision for credit losses (PCL) in our Canadian banking portfolios also contributed to the increase. In addition, the prior quarter included a loss of \$60 million (before- and after-tax) related to the sale of RBC Jamaica, as well as a provision of \$40 million (\$32 million after-tax) related to post-employment benefits and restructuring charges in the Caribbean. These factors were largely offset by the negative impact of seasonal factors, including fewer days in the quarter, and lower loan syndication activity and higher litigation provisions and related legal costs, both in Capital Markets.

#### Q2 2014 vs. Q2 2013 (Six months ended)

Net income of \$4,293 million increased \$337 million or 9% from a year ago. Six month diluted EPS of \$2.85 was up \$0.26 and ROE of 18.6% was down 80 bps.

Our results reflected solid volume growth across our Canadian banking businesses, solid growth in our trading and lending businesses, and higher average fee-based client assets in Wealth Management resulting from capital appreciation and strong net sales. Lower PCL and a lower effective tax rate, both primarily in Capital Markets, and the impact of foreign exchange translation also contributed to the increase. These factors were partially offset by higher costs in support of business growth and higher net claims costs in Insurance. In addition, our results in the current period included the loss related to the sale of RBC Jamaica and the provision related to post-employment benefits and restructuring charges in the Caribbean, both noted above.

#### Estimated impact of foreign exchange translation on our consolidated financial results

Our foreign currency-denominated results are impacted by exchange rate fluctuations. Revenue, PCL, insurance policyholder benefits, claims and acquisition expense (PBCAE), non-interest expense and net income denominated in foreign currency are translated at the average rate of exchange for the period.

Our results were impacted by the weaker Canadian dollar relative to other currencies in the three and six month periods ended April 30, 2014. The following table reflects the estimated impact of foreign exchange translation on key income statement items:

(Millions of Canadian dollars, except per share amounts)	For the three months ended		For the six months ended
	Q2 2014 vs. Q2 2013	Q2 2014 vs. Q1 2014	Q2 2014 vs. Q2 2013
<b>Increase (decrease):</b>			
Total revenue	\$ 283	\$ 76	\$ 504
PCL	2	1	2
PBCAE	25	6	42
Non-interest expense	164	43	307
Net income	51	15	85
<b>Impact on EPS:</b>			
Basic	\$ .04	\$ .01	\$ .06
Diluted	.03	.01	.06

Changes in the relevant average exchange rates that impact our business are shown in the following table:

(Average foreign currency equivalent of C\$1.00) (1)	For the three months ended			For the six months ended	
	April 30 2014	January 31 2014	April 30 2013	April 30 2014	April 30 2013

## Q2 2014 vs. Q2 2013

Total revenue increased \$553 million or 7% from last year. The impact of foreign exchange translation this quarter increased our total revenue by \$283 million.

Net interest income increased \$227 million or 7%, mainly due to volume growth in Canadian Banking across most businesses. Higher trading-related net interest income, strong growth in lending in Capital Markets, and higher net interest income resulting from growth in client deposits in Investor Services also contributed to the increase.

Investments revenue increased \$231 million or 15%, mainly due to higher average fee-based client assets resulting from capital appreciation and strong net sales in Wealth Management. Higher mutual fund distribution fees in Canadian Banking also contributed to the increase.

Insurance revenue decreased \$121 million or 10%, mainly due to the change in fair value of investments backing our policyholder liabilities resulting from the increase in long-term interest rates, largely offset in PBCAE. This factor was partially offset by volume growth in our European life products.

Trading revenue in Non-interest income increased \$149 million. Total trading revenue of \$798 million, which comprises trading-related revenue recorded in Net interest income and Non-interest income, was up \$232 million or 41%, mainly due to higher equity and fixed income trading revenue driven by higher client activity and improved market conditions. In addition, our trading revenue in the current quarter included a favourable accounting adjustment related to fair value adjustments on certain RBC debt <sup>(2)</sup>.

Banking revenue increased \$55 million or 6%, mainly due to the impact of foreign exchange translation, and higher service fee revenue including the implementation of full-service pricing across the Caribbean. These factors were partially offset by lower loan syndication activity in Capital Markets.

Underwriting and other advisory revenue increased \$27 million or 7%, primarily due to higher mergers and acquisitions (M&A) primarily in the U.S. and Asia Pacific, and higher debt origination mainly in the U.S. and Canada.

#### Q2 2014 vs. Q1 2014

Total revenue decreased \$184 million or 2% from the prior quarter, mainly due to the change in fair value of investments backing our policyholder liabilities resulting from the increase in long-term interest rates, largely offset in PBCAE. The negative impact of seasonal factors, including fewer days in the quarter in our banking businesses, and lower loan syndication activity also contributed to the decrease. These factors were partially offset by higher equities trading revenue and the impact of foreign exchange translation. In addition, the prior quarter was favourably impacted by revenue from two new U.K. annuity contracts.

#### Q2 2014 vs. Q2 2013 (Six months ended)

Total revenue increased \$1,149 million or 7%, primarily due to the impact of foreign exchange translation which increased our total revenue by \$504 million and higher average fee-based client assets resulting from capital appreciation and strong net sales in Wealth Management. Solid volume growth across all businesses in Canadian Banking, higher trading revenue, and the inclusion of our acquisition of Ally Canada also contributed to the increase. These factors were partially offset by lower loan syndication activity. In addition, our prior year revenue was favourably impacted by the disposition of our London Metal Exchange (LME) shares.

(2) Effective the second quarter of 2014, we prospectively adopted the own credit provisions of IFRS 9 *Financial Instruments* with an initial application date of November 1, 2013. Changes in fair value in our financial liabilities designated as at fair value through profit or loss (FVTPL) attributable to changes in credit risk are now recorded in other comprehensive income (OCI). For further details, refer to Note 2 of our Condensed Financial Statements.

#### Provision for credit losses

##### Q2 2014 vs. Q2 2013

Total PCL decreased \$43 million or 15% from a year ago, mainly due to lower provisions in Capital Markets and Canadian Banking, partially offset by higher provisions in Caribbean Banking.

##### Q2 2014 vs. Q1 2014

Total PCL decreased \$48 million or 16% from the prior quarter, mainly due to lower provisions in Canadian Banking and Wealth Management, partially offset by higher provisions in Capital Markets and Caribbean Banking.

##### Q2 2014 vs. Q2 2013 (Six months ended)

Total PCL decreased \$100 million or 16% from the prior year, mainly due to lower provisions in Capital Markets.

For further details on PCL, refer to the Credit quality performance section.

#### Insurance policyholder benefits, claims and acquisition expense

##### Q2 2014 vs. Q2 2013

PBCAE decreased \$108 million or 12% from a year ago, mainly due to the change in fair value of investments backing our policyholder liabilities, which was largely offset in revenue. This factor was partially offset by the impact of foreign exchange translation and higher claims costs in International Insurance products.

##### Q2 2014 vs. Q1 2014

PBCAE decreased \$152 million or 15% from the prior quarter, mainly due to the change in fair value of investments backing our policyholder liabilities, which was largely offset in revenue. Lower claims costs in Canadian insurance products this quarter and two new U.K. annuity contracts in the prior quarter also contributed to the decrease.

##### Q2 2014 vs. Q2 2013 (Six months ended)

PBCAE increased \$169 million or 10% from the prior year, mainly due to the change in fair value of investments backing our policyholder liabilities, which was largely offset in revenue. The two new U.K. annuity contracts and the impact of foreign exchange translation also contributed to the increase.

#### Non-interest expense

(Millions of Canadian dollars)	For the three months ended			For the six months ended	
	April 30 2014	January 31 2014	April 30 2013	April 30 2014	April 30 2013
Salaries	\$ 1,185	\$ 1,200	\$ 1,159	\$ 2,385	\$ 2,275
Variable compensation	1,104	1,108	963	2,212	2,045
Benefits and retention compensation	396	431	374	827	744
Share-based compensation	49	111	76	160	157
Human resources	\$ 2,734	\$ 2,850	\$ 2,572	\$ 5,584	\$ 5,221
Other expenses	1,592	1,531	1,437	3,123	2,831
<b>Non-interest expense</b>	<b>\$ 4,326</b>	<b>\$ 4,381</b>	<b>\$ 4,009</b>	<b>\$ 8,707</b>	<b>\$ 8,052</b>

**Q2 2014 vs. Q2 2013**

Non-interest expense increased \$317 million or 8%, primarily reflecting the impact of foreign exchange translation of \$164 million and higher variable compensation driven by higher results in Capital Markets and higher revenue in Wealth Management. Higher costs in support of business growth, and higher litigation provisions and related legal costs in Capital Markets also contributed to the increase. These factors were partially offset by continuing benefits from our efficiency management activities. In addition, the prior year was unfavourably impacted by a restructuring charge of \$44 million related to the integration of Investor Services, primarily in Europe.

**Q2 2014 vs. Q1 2014**

Non-interest expense decreased \$55 million or 1%, as the prior quarter included a loss of \$60 million related to the sale of RBC Jamaica, as well as a provision of \$40 million related to post-employment benefits and restructuring charges in the Caribbean. The impact of seasonal factors, including fewer days in the current quarter also contributed to the decrease. These factors were partially offset by higher litigation provisions and related legal costs in Capital Markets, the impact of foreign exchange translation, and higher marketing costs related to our Olympic sponsorship.

**Q2 2014 vs. Q2 2013 (Six months ended)**

Non-interest expense increased \$655 million or 8%, primarily reflecting the impact of foreign exchange translation of \$307 million, higher variable compensation driven by higher revenue in Wealth Management and higher earnings in Capital Markets, and higher costs in support of business growth. The loss related to the sale of RBC Jamaica, as well as the provision related to post-employment benefits and restructuring charges in the Caribbean, both noted above, also contributed to the increase. These factors were partially offset by continuing benefits from our efficiency management activities. In addition, the prior year was unfavourably impacted by the restructuring charge related to the integration of Investor Services as noted above.

**Income taxes**

(Millions of Canadian dollars, except percentage amounts)	For the three months ended			For the six months ended	
	April 30 2014	January 31 2014	April 30 2013	April 30 2014	April 30 2013
Net income before income taxes	\$ 2,870	\$ 2,799	\$ 2,483	\$ 5,669	\$ 5,244
Income taxes	\$ 669	\$ 707	\$ 574	\$ 1,376	\$ 1,288
Effective income tax rate (1)	23.3%	25.3%	23.1%	24.3%	24.6%

(1) Total income taxes as a percentage of net income before income taxes.

**Q2 2014 vs. Q2 2013**

Income tax expense increased \$95 million or 17%, and the effective income tax rate of 23.3% increased 20 bps from 23.1% in the prior year.

**Q2 2014 vs. Q1 2014**

Income tax expense decreased \$38 million or 5%, and the effective income tax rate of 23.3% decreased 200 bps from 25.3% in the prior quarter, largely due to lower unfavourable tax adjustments and higher income from tax advantaged sources. The prior quarter was unfavourably impacted by the loss related to the sale of RBC Jamaica.

**Q2 2014 vs. Q2 2013 (Six months ended)**

Income tax expense increased \$88 million or 7%, mainly due to higher earnings before tax. The effective income tax rate of 24.3% decreased 30 bps from 24.6%, primarily due to lower earnings in higher tax rate jurisdictions, partially offset by higher unfavourable tax adjustments.

**Business segment results****How we measure and report our business segments**

The key methodologies and assumptions used in our management reporting framework are periodically reviewed by management to ensure they remain valid and remain unchanged from October 31, 2013. For further details, refer to the How we measure and report our business segments section of our 2013 Annual Report.

**Key performance and non-GAAP measures****Performance measures****Return on common equity (ROE)**

We measure and evaluate the performance of our consolidated operations and each business segment using a number of financial metrics such as net income and ROE. We use ROE, at both the consolidated and business segment levels, as a measure of return on total capital invested in our business. Management views the business segment ROE measure as a useful measure for supporting investment and resource allocation decisions because it adjusts for certain items that may affect comparability between business segments and certain competitors. For further details, refer to the Key performance and non-GAAP measures section of our 2013 Annual Report.

The following table provides a summary of our ROE calculation:

(Millions of Canadian dollars, except percentage amounts)	For the three months ended							January 31	April 30

Total average common equity (1), (2)	\$ 14,850	\$ 5,450	\$ 1,500	\$ 2,150	\$ 13,650	\$ 7,150	\$ 44,750	\$ 39,350
ROE (3)	29.1%	18.4%	41.3%	19.9%	14.5%	n.m.	18.6%	19.4%

(1) Average common equity represent rounded figures.

(2) The amounts for the segments are referred to as attributed capital or economic capital.

(3) Calculated under Basel III, including comparative periods. ROE is based on actual balances of average common equity before rounding.

n.m. not meaningful

## Non-GAAP measures

### Economic profit

Economic profit is net income excluding the after-tax effect of amortization of other intangibles less a capital charge for use of attributed capital. It measures the return generated by our businesses in excess of our cost of capital, thus enabling users to identify relative contributions to shareholder value. Economic profit is a non-GAAP measure, does not have a standardized meaning under GAAP and may not be comparable to similar measures disclosed by other financial institutions.

The capital charge includes a charge for common equity and preferred shares. Effective the first quarter of 2014, we revised our cost of equity to 9.0% from 8.5% in 2013, largely as a result of higher long-term interest rates.

The following table provides a summary of our Economic profit:

(Millions of Canadian dollars)	For the three months ended							January 31	April 30
	April 30							2014	2013
	Personal & Commercial Banking	Wealth Management	Insurance	Investor & Treasury Services	Capital Markets	Corporate Support	Total	Total	Total

(1) NIM is calculated as Net interest income divided by Average total earning assets.

(2) Efficiency ratio is calculated as Non-interest expense divided by Total revenue.

(3) Average total earning assets and average loans and acceptances include average securitized residential mortgages and credit card loans for the three months ended April 30, 2014 of \$52.7 billion and \$8.3 billion, respectively (January 31, 2014 – \$52.9 billion and \$7.2 billion; April 30, 2013 – \$46.5 billion and \$7.2 billion).

(4) AUA includes securitized residential mortgages and credit card loans as at April 30, 2014 of \$23.9 billion and \$8.3 billion respectively (January 31, 2014 – \$25.1 billion and \$7.2 billion; April 30, 2013 – \$28.6 billion and \$7.2 billion).

**Q2 2014 vs. Q2 2013**

Net income increased \$76 million or 7% compared to the prior year largely reflecting volume growth across most of our domestic businesses and lower PCL in Canada. These factors were partially offset by higher costs in support of business growth.

Total revenue increased \$159 million or 5%.

Canadian Banking revenue increased \$143 million or 5%, resulting from volume growth across most businesses, and higher mutual fund distribution fees.

Caribbean & U.S. Banking revenue was up \$16 million or 8% mainly due to the impact of foreign exchange translation, and the implementation of full-service pricing across the Caribbean.

Net interest margin increased 6 bps, reflecting favourable funding mix partially offset by competitive pricing pressures. The prior year was unfavourably impacted by accounting volatility.

PCL decreased \$22 million, with the PCL ratio decreasing 4 bps, primarily due to lower provisions in our commercial lending portfolios in Canada, partially offset by higher provisions in our Caribbean portfolios. For further details, refer to the Credit quality performance section.

Non-interest expense increased \$66 million or 4%, compared to the prior year, largely due to higher costs in support of business growth, higher marketing costs related to our Olympic sponsorship, and the impact of foreign exchange translation. These factors were partially offset by continuing benefits from our efficiency management activities.

**Q2 2014 vs. Q1 2014**

Net income increased \$44 million or 4%, as the prior quarter included a loss of \$60 million (before- and after-tax) related to the sale of RBC Jamaica, as well as a provision of \$40 million (\$32 million after-tax) related to post-employment benefits and restructuring charges in the Caribbean. In addition, the current quarter was favourably impacted by lower PCL in Canada. These factors were largely offset by the negative impact of seasonal factors, including fewer days in the quarter and increased marketing costs related to our Olympic sponsorship.

Net interest margin increased 1 bp primarily due to favourable funding mix.

**Q2 2014 vs. Q2 2013 (Six months ended)**

Net income increased \$43 million or 2%, reflecting solid volume growth across all businesses in Canada and the inclusion of our acquisition of Ally Canada. These factors were partially offset by the loss related to the sale of RBC Jamaica and the provision related to post-employment benefits and restructuring charges in the Caribbean, both noted above, as well as higher costs in support of business growth.

Total revenue increased \$378 million or 6%, largely due to solid volume growth across our domestic businesses, the inclusion of our acquisition of Ally Canada, higher mutual fund distribution fees, the impact of foreign exchange translation, and higher foreign exchange revenue.

PCL increased \$11 million, with the PCL ratio decreasing 1 bp. For further details, refer to the Credit quality performance section.

Non-interest expense increased \$265 million or 9%, primarily due to the loss related to the sale of RBC Jamaica and the provision related to post-employment benefits and restructuring charges in the Caribbean, both noted above, higher costs in support of business growth, the impact of foreign exchange translation, and higher marketing costs related to our Olympic sponsorship. These factors were partially offset by continuing benefits from our efficiency management activities.

Average deposits	260,600	259,800	246,800	260,200	244,300
AUA (4)	198,400	189,200	177,500	198,400	177,500
PCL on impaired loans as a % of average net loans and acceptances	0.25%	0.30%	0.29%	0.27%	0.28%

(1) NIM is calculated as Net interest income divided by Average total earning assets.

(2) Efficiency ratio is calculated as Non-interest expense divided by Total revenue.

(3) Average total earning assets and average loans and acceptances include average securitized residential mortgages and credit card loans for the three months ended April 30, 2014 of \$52.7 billion and \$8.3 billion, respectively (January 31, 2014 – \$52.9 billion and \$7.2 billion; April 30, 2013 – \$46.5 billion and \$7.2 billion).

(4) AUA includes securitized residential mortgages and credit card loans as at April 30, 2014 of \$23.9 billion and \$8.3 billion respectively (January 31, 2014 – \$25.1 billion and \$7.2 billion; April 30, 2013 – \$28.6 billion and \$7.2 billion).

## Q2 2014 vs. Q2 2013

Net income increased \$86 million or 8%, reflecting volume growth across most businesses and lower PCL. This was partially offset by higher costs in support of business growth.

Total revenue increased \$143 million or 5%.

Personal Financial Services revenue increased \$103 million or 6% primarily due to volume growth in residential mortgages, personal deposits and personal loans, and higher mutual fund distribution fees.

Business Financial Services revenue increased \$16 million or 2%, largely reflecting solid volume growth in business deposits and loans, partially offset by spread compression due to competitive pressures.

Cards and Payment Solutions revenue increased \$24 million or 4% due to higher credit card spreads, transaction volumes, and loan balances.

Net interest margin increased 6 bps compared to the prior year, as favourable funding mix was partially offset by spread compression due to competitive pricing pressures. The prior year was unfavourably impacted by accounting volatility.

PCL decreased \$29 million, with the PCL ratio decreasing 4 bps, reflecting lower provisions in our commercial lending portfolio.

Non-interest expense increased \$53 million or 4%, mainly reflecting higher costs in support of business growth, and increased marketing costs related to our Olympic sponsorship. These factors were partially offset by continuing benefits from our efficiency management activities.

## Q2 2014 vs. Q1 2014

Net income decreased \$27 million or 2%, mainly due to the negative impact of seasonal factors, including fewer days in the quarter, and higher marketing costs related to our Olympic sponsorship. These factors were partially offset by lower PCL compared to the prior quarter.

Net interest margin increased 1 bp primarily due to favourable funding mix.

## Q2 2014 vs. Q2 2013 (Six months ended)

Net income increased \$133 million or 6%, primarily due to solid volume growth across all businesses, and the inclusion of our acquisition of Ally Canada. These factors were partially offset by higher costs in support of business growth and higher PCL.

Total revenue increased \$332 million or 6%, largely reflecting solid volume growth across all businesses, the inclusion of our acquisition of Ally Canada and higher mutual fund distribution fees.

PCL increased \$16 million, with the PCL ratio decreasing 1 bp, mostly due to higher provisions in our personal loans portfolio, partially offset by lower provisions in our credit card and commercial lending portfolios.

Non-interest expense increased \$130 million or 5%, mostly due to higher costs in support of business growth including higher staff costs, a litigation provision, and higher marketing costs related to our Olympic sponsorship. These factors were partially offset by continuing benefits from our efficiency management activities.

(1) Effective the first quarter of 2014, BlueBay results are no longer reported on a one-month lag. As a result, the first quarter of 2014 included four months of results from BlueBay.

(2) Pre-tax margin is defined as Net income before income taxes divided by Total revenue.

(3) Represents client-facing advisors across all our wealth management businesses.

### Q2 2014 vs. Q2 2013

Net income increased \$56 million or 25% from a year ago, mainly due to higher average fee-based client assets.

Total revenue increased \$209 million or 16%.

Canadian Wealth Management revenue increased \$63 million or 14%, mainly due to higher average fee-based client assets resulting from capital appreciation and net sales.

U.S. & International Wealth Management revenue increased \$67 million or 12%. In U.S. dollars, revenue increased \$21 million or 4%, mainly due to higher average fee-based client assets resulting from capital appreciation and net sales.

Global Asset Management revenue increased \$79 million or 23%, mainly due to higher average fee-based client assets reflecting capital appreciation and strong net sales, and the impact of foreign exchange translation.

Non-interest expense increased \$134 million or 13%, mainly due to the impact of foreign exchange translation, increased staff levels and infrastructure investments in support of business growth and higher variable compensation driven by higher revenue.

### Q2 2014 vs. Q1 2014

Net income increased \$43 million or 18% as compared to the prior quarter, mainly due to higher average fee-based client assets resulting from capital appreciation and net sales. Last quarter also included PCL on a few accounts.

**Q2 2014 vs. Q2 2013 (Six months ended)**

Net income increased \$62 million or 14%, mainly due to higher average fee-based client assets.

Total revenue increased \$404 million or 15%, mainly due to higher average fee-based client assets resulting from capital appreciation and strong net sales, and the impact of foreign exchange translation.

PCL increased \$20 million due to provisions on a few accounts.

Non-interest expense increased \$298 million or 14%, mainly due to the impact of foreign exchange translation, higher variable compensation driven by higher revenue, and higher staff levels and infrastructure investments in support of business growth.

(1) Investment income can experience volatility arising from fluctuation in the fair value of FVTPL assets. The investments which support policyholder liabilities are predominantly fixed income assets designated as at FVTPL. Consequently changes in the fair values of these assets are recorded in investment income in the consolidated statement of income and are largely offset by changes in the fair value of the actuarial liabilities, the impact of which is reflected in insurance policyholder benefits and claims.

(2) Premiums and deposits include premiums on risk-based insurance and annuity products, and individual and group segregated fund deposits, consistent with insurance industry practices.

**Q2 2014 vs. Q2 2013**

Net income decreased \$10 million or 6% from a year ago mainly due to higher claims costs in our International Insurance products.

Total revenue decreased \$121 million or 10% as compared to the prior year.

Canadian Insurance revenue decreased \$166 million or 21%, mainly due to the change in fair value of investments backing our policyholder liabilities resulting from the increase in long-term interest rate, largely offset in PBCAE.

International Insurance revenue increased \$45 million or 10%, mainly due to the impact of foreign exchange translation and volume growth in our European life products.

PBCAE decreased \$108 million or 12%, largely due to the change in fair value of investments backing our policyholder liabilities, which was largely offset in revenue. This factor was partially offset by the impact of foreign exchange translation and higher claims costs in International Insurance products.

Non-interest expense increased \$5 million or 4%, primarily due to higher staff costs in support of business growth, partially offset by continuing benefits from our efficiency management activities.

**Q2 2014 vs. Q1 2014**

Net income was relatively flat compared to the prior quarter as lower net claims costs in Canadian Insurance products were mostly offset by earnings in the prior quarter from two new U.K. annuity contracts.

**Q2 2014 vs. Q2 2013 (Six months ended)**

Net income decreased \$17 million or 5%, as earnings from two new U.K. annuity contracts were more than offset by higher net claims costs in Canadian Insurance products.

Total revenue increased \$140 million or 6%, mainly due to earnings from two new U.K. annuity contracts. The change in fair value of investments backing our policyholder liabilities, which was largely offset in PBCAE, and the impact of foreign exchange translation also contributed to the increase.

PBCAE increased \$169 million or 10%, mainly due to the change in fair value of investments backing our policyholder liabilities, which was largely offset in revenue. The two new U.K. annuity contracts and the impact of foreign exchange translation also contributed to the increase.

Non-interest expense increased \$16 million or 6%, mainly due to higher costs in support of business growth, partially offset by continuing benefits from our efficiency management activities.

#### Q2 2014 vs. Q2 2013

Net income increased \$47 million or 72%. Excluding a restructuring charge in the prior year of \$44 million (\$31 million after-tax) related to the integration of Investor Services, primarily in Europe<sup>(1)</sup>, net income increased \$16 million or 17%, reflecting continuing benefits from our efficiency management activities and higher net interest income resulting from growth in client deposits.

Total revenue increased \$24 million or 5%, mainly due to the impact of foreign exchange translation and higher net interest income resulting from growth in client deposits. These factors were partially offset by a decrease in custodial fees and lower foreign exchange revenue in Investor Services resulting from lower transaction volumes.

Non-interest expense decreased \$41 million or 11%. Excluding the restructuring charge in the prior year<sup>(1)</sup>, non-interest expense increased \$3 million or 1% as continuing benefits from our efficiency management activities were more than offset by the impact of foreign exchange translation.

#### Q2 2014 vs. Q1 2014

Net income increased \$6 million or 6%, mainly related to higher net interest income resulting from growth in client deposits and an increase in custodial fees. These factors were partially offset by lower foreign exchange revenue resulting from decreased volatility in the foreign exchange forwards market.

#### Q2 2014 vs. Q2 2013 (Six months ended)

Net income increased \$74 million or 51%. Excluding the restructuring charge in the prior year<sup>(1)</sup>, net income increased \$43 million or 25%, largely due to continuing benefits from our efficiency management activities and higher net interest income resulting from growth in client deposits. These factors were partially offset by lower funding and liquidity revenue.

Total revenue increased \$26 million or 3%, mainly reflecting the impact of foreign exchange translation and higher net interest income resulting from growth in client deposits. These factors were partially offset by lower funding and liquidity revenue, a decrease in custodial fees, and lower foreign exchange revenue in Investor Services.

Non-interest expense decreased \$73 million or 10%. Excluding the restructuring charge in the prior year<sup>(1)</sup>, non-interest expense decreased \$29 million or 4%, largely reflecting continuing benefits from our efficiency management activities and a one-time legal recovery. These factors were partially offset by the impact of foreign exchange translation.

(1) Results excluding the restructuring charge in the prior year are non-GAAP measures. Non-GAAP measures do not have a standardized meaning under GAAP and may not be comparable to similar measures disclosed by other financial institutions. We believe that excluding this specified item is more reflective of ongoing operating results, will provide readers with a better understanding of management's perspective and should enhance comparability of the financial performance for the three and six month periods ended April 30, 2014 with the corresponding periods in the prior year and the three month period ended April 30, 2013.

(1) The teab adjustment for the three months ended April 30, 2014 was \$122 million (January 31, 2014 – \$95 million, April 30, 2013 – \$101 million). For further discussion, refer to the How we measure and report our business segments section of our 2013 Annual Report.

**Q2 2014 vs. Q2 2013**

Net income increased \$124 million or 32%, driven primarily by strong revenue growth across our trading and corporate and investment banking businesses and the impact of foreign exchange translation. These factors were partially offset by higher variable compensation on higher results.

Total revenue increased \$310 million or 20%.

Corporate and Investment Banking revenue increased \$81 million or 11%, largely due to strong growth in lending mainly in the U.S., higher M&A primarily in the U.S. and Asia Pacific, and the impact of foreign exchange translation. These factors were partially offset by lower loan syndication activity.

Global Markets revenue increased \$254 million or 31%, mainly due to higher equity and fixed income trading revenue and higher debt origination driven by higher client activity and improved market conditions and the impact of foreign exchange translation. In addition, trading revenue in the current quarter included a favourable accounting adjustment related to fair value adjustments on certain RBC debt<sup>(2)</sup>.

Other revenue decreased \$25 million, mainly due to lower gains on certain legacy portfolios.

PCL decreased \$27 million, mainly due to a provision on a single account as compared to provisions in the prior year related to a couple of accounts. For further details, refer to the Credit quality performance section.

Non-interest expense increased \$153 million or 16%, largely due to higher variable compensation on higher results and the impact of foreign exchange translation. Higher litigation provisions and related legal costs also contributed to the increase. These factors were partially offset by continuing benefits from our efficiency management activities.

**Q2 2014 vs. Q1 2014**

Net income was flat compared to the prior quarter. Higher equity trading revenue and higher debt origination reflecting strong issuance activity mainly in the U.S., was largely offset by lower loan syndication activity in the U.S. and Canada, and higher litigation provisions and related legal costs.

**Q2 2014 vs. Q2 2013 (Six months ended)**

Net income increased \$167 million or 20%, mainly due to solid growth in our trading and lending businesses and the impact of foreign exchange translation. Lower PCL and a lower effective tax rate in the current year of 32% compared to 35% in the prior year also contributed to the increase. These factors were partially offset by higher litigation provisions and related legal costs.

(2) Effective the second quarter of 2014, we prospectively adopted the own credit provisions of IFRS 9 *Financial Instruments* with an initial application date of November 1, 2013. Changes in fair value in our financial liabilities designated as at FVTPL attributable to changes in credit risk are now recorded in OCI. For further details, refer to Note 2 of our Condensed Financial Statements.

Total revenue increased \$213 million or 6%, primarily due to the impact of foreign exchange translation and higher trading revenue driven by higher client activity and improved market conditions. Solid growth in lending mainly in the U.S. also contributed to the increase. These factors were partially offset by lower loan syndication activity. In addition, our prior year revenue was favourably impacted by the disposition of our LME shares.

PCL decreased \$138 million, mainly reflecting a provision taken on a single account compared to higher provisions on a few accounts in the prior year.

Non-interest expense increased \$164 million or 8%, mainly due to the impact of foreign exchange translation, higher litigation provisions and related legal costs and higher variable compensation on higher results. These factors were partially offset by continuing benefits from our efficiency management activities.

<b>Net income</b> <sup>(2)</sup>	<b>\$ 35</b>	<b>\$ 18</b>	<b>\$ 36</b>	<b>\$ 53</b>	<b>\$ 45</b>

(1) Teb adjusted.

(2) Net income reflects income attributable to both shareholders and Non-Controlling Interests (NCI). Net income attributable to NCI for the three months ended April 30, 2014 was \$23 million (January 31, 2014 – \$23 million; April 30, 2013 – \$24 million). For the six months ended April 30, 2014 was \$46 million (April 30, 2013 – \$47 million).

Due to the nature of activities and consolidated adjustments reported in this segment, we believe that a comparative period analysis is not relevant. The following identifies material items affecting the reported results in each period.

Net interest income (loss) and income taxes (recoveries) in each period in Corporate Support include the deduction of the teb adjustments related to the gross-up of income from Canadian taxable corporate dividends recorded in Capital Markets. The amount deducted from net interest income (loss) was offset by an equivalent increase in income taxes (recoveries). The teb amount for the three months ended April 30, 2014 was \$122 million as compared to \$95 million in the prior quarter and \$101 million in the prior year period. For the six months ended April 30, 2014, the amount was \$217 million as compared to \$191 million in the prior year. For further discussion, refer to the How we measure and report our business segments section of our 2013 Annual Report.

In addition to the teb impacts noted above, the following identifies the other material items affecting the reported results in each period.

### Q2 2014

Net income was \$35 million largely reflecting asset/liability management activities and gains on private equity investments.

### Q1 2014

Net income was \$18 million largely reflecting asset/liability management activities.

### Q2 2013

Net income was \$36 million largely reflecting asset/liability management activities, partially offset by net unfavourable tax adjustments.

### Q2 2014 (Six months ended)

Net income was \$53 million largely reflecting asset/liability management activities and gains on private equity investments.

### Q2 2013 (Six months ended)

Net income was \$45 million largely reflecting asset/liability management activities, partially offset by net unfavourable tax adjustments.

## Quarterly results and trend analysis

Our quarterly results are impacted by a number of trends and recurring factors, which include seasonality of certain businesses, general economic and market conditions, and fluctuations in the Canadian dollar relative to other foreign currencies. The following table summarizes our results for the last eight quarters (the period):

(Millions of Canadian dollars, except per share and percentage amounts)	2014		2013				2012	
	Q2	Q1	Q4	Q3	Q2	Q1	Q4	Q3
<b>Continuing operations</b>								
Net interest income	\$ 3,449	\$3,460	\$3,351	\$3,392	\$3,222	\$3,284	\$3,174	\$3,273
Non-interest income	4,821	4,994	4,568	3,776	4,495	4,574	4,294	4,290
<b>Total revenue</b>	<b>\$ 8,270</b>	<b>\$8,454</b>	<b>\$7,919</b>	<b>\$7,168</b>	<b>\$7,717</b>	<b>\$7,858</b>	<b>\$7,468</b>	<b>\$7,563</b>

(1) Fluctuations in the Canadian dollar relative to other foreign currencies have affected our consolidated results over the period.

### Notable items affecting our consolidated results

- In the first quarter of 2014, our results included a loss of \$60 million (before- and after-tax) related to the sale of RBC Jamaica, as well as a provision of \$40 million (\$32 million after-tax) related to post-employment benefits and restructuring charges in the Caribbean.
- In the fourth quarter of 2013, our results included a charge of \$160 million (\$118 million after-tax) as a result of a new tax legislation in Canada, which affects the policyholders' tax treatment of certain individual life insurance policies, as well as net favourable income tax adjustments including a \$124 million income tax adjustment related to prior years.
- In the third quarter of 2013, our results included net favourable income tax adjustments including a \$90 million income tax adjustment related to the prior year.
- In the second quarter of 2013, our results included a restructuring charge of \$44 million (\$31 million after-tax) related to the integration of Investor Services, primarily in Europe.
- In the third quarter of 2012, our results included a release of \$128 million of tax uncertainty provisions and interest income of \$72 million (\$53 million after-tax) related to a refund of taxes paid due to the settlement of several tax matters with the CRA, as well as a favourable adjustment of \$125 million (\$92 million after-tax) resulting from a change in methodology with respect to the timing of recognition of mortgage prepayment interest, and a loss of \$12 million (\$11 million after-tax) related to the acquisition of the remaining 50% stake of RBC Dexia.

### Trend analysis

Economic conditions in Canada and the U.S. generally continued to improve modestly over the period supported by low unemployment levels and solid housing activity. Capital markets activity in both countries has also improved since 2013, despite the recent decreases in monthly asset purchases by the Fed. Concerns over European sovereign debt created uncertainty in global financial markets in 2012, with recent volatility being caused by political and economic instability in certain emerging market economies. For further details, refer to the Economic, market and regulatory review and outlook section.

Solid earnings have generally trended upwards over the period. This trend was driven mostly by solid volume growth in our Canadian Banking businesses and strong Capital Markets results, particularly since the third quarter of 2013. Wealth Management results over the period have been driven by higher average fee-based clients, reflecting capital appreciation and strong net sales, and higher transaction volumes. Insurance results fluctuated over the period, primarily due to the timing of new U.K. annuity contracts, actuarial adjustments, and claims costs. An unfavourable charge resulting from new tax legislation in Canada as noted above impacted Insurance results in the fourth quarter of 2013. Investor & Treasury Services results have generally trended upwards due to benefits from our efficiency management activities and improved business performance.

Revenue has generally trended upwards over the period, driven by solid volume growth in our Canadian Banking businesses, growth in our corporate and investment banking business, and higher average fee-based client assets in Wealth Management. Our acquisition of Ally Canada has contributed incremental revenue since the second quarter of 2013. Trading revenue generally fluctuated over the period, with the increase in the past three quarters largely driven by higher client activity and improved market

conditions. Net interest income has also trended upwards over the period, primarily due to solid volume growth across our Canadian Banking businesses, partially offset by spread compression caused by the continuing low interest rate environment and competitive pricing pressures. Starting in the first quarter of 2014, the declining value of the Canadian dollar has contributed to the increase in revenue.

Despite growth in loans, PCL has remained relatively stable over the period reflecting strong asset quality. Wealth Management had provisions in the fourth quarter of 2013 and the first quarter of 2014 related to a few accounts.

PBCAE has fluctuated quarterly as it includes the changes to the fair value of investments backing our policyholder liabilities, which is largely offset in revenue. PBCAE has also been impacted by volume growth in our Insurance businesses as well as actuarial liability adjustments and generally lower claims costs. PBCAE in the fourth quarter of 2013 included a charge as a result of new tax legislation in Canada as noted above.

While we continue to focus on efficiency management activities, non-interest expense has generally trended upwards over the period largely in support of business growth. Our acquisition of Ally Canada has contributed incremental costs since the second quarter of 2013, and the first quarter of 2014 was impacted by the loss related to the sale of RBC Jamaica and a provision in the Caribbean as noted above. Starting in the first quarter of 2014, the declining value of the Canadian dollar has also contributed to the increase.

Our effective income tax rate has fluctuated over the period, largely as a result of varying levels of income being reported in jurisdictions with different tax rates, as well as fluctuating levels of income from tax-advantaged sources (Canadian taxable corporate dividends). Our effective tax rate has also been impacted by various tax adjustments as noted above.

### Results by geographic segment <sup>(1)</sup>

For geographic reporting, our segments are grouped into Canada, U.S. and Other International. Transactions are primarily recorded in the location that best reflects the risk due to negative changes in economic conditions and prospects for growth due to positive economic changes. The following table summarizes our financial results by geographic region.

(Millions of Canadian dollars)	For the three months ended									For the six months ended					
	April 30 2014			January 31 2014			April 30 2013			April 30 2014			April 30 2013		
	Canada	U.S.	Other International	Canada	U.S.	Other International	Canada	U.S.	Other International	Canada	U.S.	Other International	Canada	U.S.	Other International
<b>Total revenue</b>	\$ 5,123	\$ 1,545	\$ 1,602	\$ 5,385	\$ 1,560	\$ 1,509	\$ 5,089	\$ 1,278	\$ 1,350	\$ 10,508	\$ 3,105	\$ 3,111	\$ 9,899	\$ 2,822	\$ 2,854
<b>Net income – total</b>	\$ 1,603	\$ 287	\$ 311	\$ 1,586	\$ 332	\$ 174	\$ 1,510	\$ 190	\$ 209	\$ 3,189	\$ 619	\$ 485	\$ 3,041	\$ 531	\$ 384

(1) For geographic reporting, our segments are grouped into Canada, U.S. and Other International. For further details, refer to Note 29 of our 2013 Annual Consolidated Financial Statements.

### Q2 2014 vs. Q2 2013

Net income in Canada was up \$93 million or 6% from the prior year, mainly reflecting volume growth across most of our banking businesses, higher average fee-based client assets, and lower PCL. These factors were partially offset by higher costs in support of business growth.

U.S. net income was up \$97 million or 51% from the prior year, largely due to higher equity and fixed income trading results driven by higher client activity and improved market conditions and the impact of foreign exchange translation. Strong growth in lending and higher M&A activity also contributed to the increase. These factors were partially offset by lower loan syndication activity.

Other International net income was up \$102 million or 49% from the prior year, mainly due to higher fixed income and equity trading results. In addition, the prior year was unfavourably impacted by a restructuring charge of \$44 million (\$31 million after-tax) related to the integration of Investor Services, primarily in Europe.

### Q2 2014 vs. Q1 2014

Net income in Canada was up \$17 million or 1% from the prior quarter, mainly due to lower PCL in Canadian Banking and higher average fee-based client assets in Wealth Management. Lower net claims costs in Canadian Insurance products also contributed to the increase. These factors were partially offset by the negative impact of seasonal factors, including fewer days in the quarter primarily in our banking businesses.

U.S. net income was down \$45 million or 14%, primarily due to lower loan syndication and M&A activity, and higher litigation provisions and related legal costs all in Capital Markets. These factors were partially offset by a favourable accounting adjustment related to fair value adjustments on certain RBC debt<sup>(2)</sup>, and higher debt origination reflecting strong issuance activity.

Other International net income was up \$137 million or 79%, as the prior quarter included a loss in the prior quarter of \$60 million (before- and after-tax) related to the sale of RBC Jamaica, as well as a provision of \$40 million (\$32 million after-tax) related to post-employment benefits and restructuring charges in the Caribbean. Higher trading results in Capital Markets and lower PCL in Wealth Management also contributed to the increase. These factors were partially offset by earnings in the prior quarter from two new U.K. annuity contracts in Insurance.

### Q2 2014 vs. Q2 2013 (Six months ended)

Net income in Canada was up \$148 million or 5% from the previous year, primarily reflecting solid volume growth across all our banking businesses, and the inclusion of our acquisition of Ally Canada. Higher average fee-based client assets in Wealth Management also contributed to the increase. These factors were partially offset by higher net claims costs in Canadian Insurance products and higher costs in support of business growth.

(2) Effective the second quarter of 2014, we prospectively adopted the own credit provisions of IFRS 9 *Financial Instruments* with an initial application date of November 1, 2013. Changes in fair value in our financial liabilities designated as at FVTPL attributable to changes in credit risk are now recorded in OCI. For further details, refer to Note 2 of our Condensed Financial Statements.

U.S. net income was up \$88 million or 17%, primarily due to higher equity and fixed income trading revenue driven by higher client activity and improved market conditions, and the impact of foreign exchange translation. Solid growth in lending and lower PCL both in our Capital Markets business also contributed to the increase. These factors were partially offset by higher litigation provisions and related legal costs.

Other International net income was up \$101 million or 26%, largely due to lower PCL and earnings from two new U.K. annuity contracts in Insurance. These factors were partially offset by the loss related to the sale of RBC Jamaica and the provision related to post-employment benefits and restructuring charges in the Caribbean, both noted above. In addition, the prior year was unfavourably impacted by the restructuring charge related to the integration of Investor Services, primarily in Europe as noted above and favourably impacted by the disposition of our LME shares.

## Financial condition

### Condensed balance sheets <sup>(1)</sup>

<b>Total liabilities and equity</b>	<b>\$ 895,893</b>	<b>\$ 904,714</b>	<b>\$ 866,440</b>

(1) Foreign currency-denominated assets and liabilities are translated to Canadian dollars.

Our consolidated balance sheet was impacted by foreign currency translation. As a result, our total assets and our total liabilities and equity increased by approximately \$32 billion compared to last year due to the weaker Canadian dollar and decreased by approximately \$9 billion compared to last quarter due to the stronger Canadian dollar.

### Q2 2014 vs. Q2 2013

Total assets were up \$29 billion or 3% from the previous year.

Interest-bearing deposits with banks decreased by \$2 billion or 25%, largely due to lower deposits with central banks, partially offset by the impact of foreign exchange translation.

Securities were up \$15 billion or 9% compared to the prior year, primarily due to an increase in corporate debt securities, largely reflecting our management of liquidity and funding risk and business growth. The impact of foreign exchange translation and increased equity trading positions in support of business activities also contributed to the increase. These factors were partially offset by a decrease in government debt securities.

Assets purchased under reverse repurchase agreements (reverse repos) and securities borrowed increased \$9 billion or 7%, mainly attributable to the impact of foreign exchange translation.

Loans were up \$25 billion or 6%, predominantly due to solid volume growth in residential mortgages and an increase in wholesale loans resulting from business growth. The impact of foreign exchange translation also contributed to the increase.

Derivative assets were down \$21 billion or 22%, mainly attributable to lower fair values on interest rate swaps, partially offset by higher fair values in cross currency interest rate swap positions.

Other assets were relatively flat compared to last year as the impact of foreign exchange translation and an increase in customers' liability under acceptances were offset by a decrease in cash collateral requirements.

Total liabilities were up \$25 billion or 3% from the previous year.

Deposits increased \$55 billion or 10%, mainly attributable to higher business deposits, largely reflecting our issuances of covered bonds, other fixed term notes, and commercial paper to satisfy funding requirements and increased client activity. Demand for our high-yield savings accounts and other product offerings in our retail business and the impact of foreign exchange translation also contributed to the increase.

Derivative liabilities were down \$24 billion or 25%, primarily attributable to lower fair values on interest rate swaps, partially offset by higher fair values in cross currency interest rate swap positions.

Other liabilities decreased \$4 billion or 2%, mainly reflecting a decrease in repurchase agreements and lower cash collateral requirements. These factors were largely offset by the impact of foreign exchange translation.

Total equity increased \$5 billion or 10%, largely reflecting higher retained earnings, net of dividends.

## Q2 2014 vs. Q1 2014

Total assets decreased \$9 billion or 1% from the prior quarter, primarily attributable to the impact of foreign exchange translation and a decrease in assets purchased under reverse repos largely due to lower client activity. These factors were offset by growth in wholesale loans, mainly driven by increased client activity and business growth, and an increase in equity trading positions.

Total liabilities decreased \$9 billion or 1% from the prior quarter, primarily attributable to the impact of foreign exchange translation. Lower business and government deposits and a decrease in repurchase agreements largely due to lower client activity also contributed to the decrease. These factors were largely offset by an increase in personal deposits, higher obligations related to securities sold short and higher cash collateral requirements.

## Off-balance sheet arrangements

In the normal course of business, we engage in a variety of financial transactions that, for accounting purposes, are not recorded on our Consolidated Balance Sheets. Off-balance sheet transactions are generally undertaken for risk, capital and funding management purposes which benefit us and our clients. These include transactions with structured entities and may also include the issuance of guarantees. These transactions give rise to, among other risks, varying degrees of market, credit, liquidity and funding risk, which are discussed in the Risk management section. Refer to pages 41 to 43 of our 2013 Annual Report for a more detailed discussion of these types of arrangements.

We use structured entities to securitize our financial assets as well as assist our clients in securitizing their financial assets. These entities are not operating entities, typically have no employees, and may or may not be recorded on our Consolidated Balance Sheets.

## Securizations of our financial assets

We periodically securitize our credit card receivables, residential and commercial mortgage loans and bond participation certificates primarily to diversify our funding sources, enhance our liquidity position and for capital purposes. We also securitize residential and commercial mortgage loans for sales and trading activities.

The majority of our securitization activities are recorded on our Consolidated Balance Sheets. We securitize our credit card receivables, on a revolving basis, through a consolidated structured entity. We securitize single and multiple-family residential mortgages through the National Housing Act Mortgage-Backed Securities (NHA MBS) program, which are not derecognized from our Consolidated Balance Sheets. For details of these activities, refer to Note 6 and Note 7 of our 2013 Annual Consolidated Financial Statements.

## Involvement with unconsolidated structured entities

In the normal course of business, we engage in a variety of financial transactions with structured entities to support our customers' financing and investing needs, including securitization of client financial assets, creation of investment products, and other types of structured financing. The following table summarizes structured entities in which we have significant financial interests but have not consolidated.

(Millions of Canadian dollars)	As at					
	April 30 2014		January 31 2014		April 30 2013	
	Total assets	Maximum exposure (1)	Total assets	Maximum exposure (1)	Total assets	Maximum exposure (1)
<b>Unconsolidated structured entities</b>						
Multi-seller conduits (2)	\$ 32,246	\$ 32,873	\$ 32,434	\$ 32,936	\$ 28,647	\$ 29,051
Structured finance	4,446	1,618	4,149	1,371	4,650	1,567
Investment funds	1,934	1,717	1,860	1,686	1,528	1,287
Third-party securitization vehicles	12,138	1,295	10,725	1,016	8,868	1,287
Other	304	92	251	76	1,265	288
	<b>\$ 51,068</b>	<b>\$ 37,595</b>	<b>\$ 49,419</b>	<b>\$ 37,085</b>	<b>\$ 44,958</b>	<b>\$ 33,480</b>

(1) The maximum exposure to loss resulting from significant financial interests in these entities consists mostly of investments, loans, liquidity and credit enhancement facilities and fair value of derivatives. The maximum exposure to loss may exceed the total assets in the multi-seller conduits, as our liquidity facilities may sometimes be extended for up to 102% of the total value of the assets in the conduits.

(2) Represents multi-seller conduits that we administer.

We have the ability to use credit mitigation tools such as third party guarantees, credit default swaps, and collateral to mitigate risks assumed through securitization and re-securitization exposures. The process in place to monitor the credit quality of our securitization and re-securitization exposures involves, among other things, reviewing the performance data of the underlying assets. We affirm our ratings each quarter and formally confirm or assign a new rating at least annually. For further details on our activities to manage risks, refer to the Risk management section.

Approximately 74% of assets in unconsolidated structured entities in which we have significant financial interests were internally rated A or above, compared to 76% in the prior quarter and 79% in the prior year. The decrease relative to prior periods is primarily related to the purchase, in the first quarter, of bonds issued by a third party securitization vehicle and, this quarter, funding a new structured entity that issues a term collateralized loan obligation. For multi-seller conduits, 100% of assets were internally rated A or above, versus the prior quarter and prior year of 99%. All transactions funded by the unconsolidated multi-seller conduits are internally rated using a rating system which is largely consistent with that of the external rating agencies.

The assets in unconsolidated structured entities as at April 30, 2014 have varying maturities and a remaining expected weighted average life of approximately 3.8 years.

#### *RBC-administered multi-seller conduits*

We administer multi-seller conduits which are used primarily for the securitization of our clients' financial assets. As at April 30, 2014, the notional amount of backstop liquidity facilities we provide to these conduits decreased by \$190 million or 1% from the prior quarter and increased by \$3.7 billion or 13% from the prior year. Partial credit enhancement facilities we provide decreased by \$36 million from the prior quarter and increased by \$368 million from the prior year. The increases from the prior year are primarily due to an increase in the outstanding securitized assets of the multi-seller conduits in support of our clients' securitization needs. Total loans extended to the multi-seller conduits under the backstop liquidity facilities decreased by \$68 million from the prior quarter and by \$379 million from the prior year primarily due to principal repayments.

Our overall exposure decreased nominally compared to the prior quarter primarily due to exchange rate differences, and increased by \$3.8 billion or 13% compared to the prior year, reflecting growth of the business. Correspondingly, total assets of the multi-seller conduits decreased by \$188 million or 1% over the prior quarter and increased by \$3.6 billion or 13% over the prior year. The increase from the prior year is primarily in the Credit Card, Student Loan, Dealer Floor Plan, and Transportation Finance asset classes.

As at April 30, 2014, the total asset-backed commercial paper (ABCP) issued by the conduits amounted to \$20 billion, a decrease of \$475 million or 2% from the prior quarter and an increase of \$4.4 billion or 29% from the prior year. The decrease in the amount of ABCP issued by the multi-seller conduits compared to the prior quarter is primarily due to exchange rate differences. The increase from prior year is primarily due to an increase in the outstanding securitized assets of the multi-seller conduits and an increase in client usage. The rating agencies that rate the ABCP rated 73% of the total amount issued within the top ratings category and the remaining amount in the second highest ratings category compared with 73% in the prior quarter and 77% in the prior year.

We sometimes purchase ABCP issued by the multi-seller conduits in our capacity as a placement agent in order to facilitate overall program liquidity. As at April 30, 2014, the fair value of our inventory was \$107 million (January 31, 2014 – \$4 million; April 30, 2013 – \$80 million). Fluctuations in our inventory held reflect normal trading activity. This inventory is classified as Securities – Trading on our Consolidated Balance Sheets.

#### *Structured finance*

We invest in auction rate securities (ARS) of trusts which fund their long-term investments in student loans by issuing short-term senior and subordinated notes. As at April 30, 2014, the total assets of the unconsolidated ARS trusts in which we have significant investments were \$2.9 billion (January 31, 2014 – \$2.9 billion; April 30, 2013 – \$3.3 billion). Our maximum exposure to loss, representing our on-balance sheet investment in these ARS trusts, as at April 30, 2014, was \$717 million (January 31, 2014 – \$728 million; April 30, 2013 – \$819 million). The decrease in our maximum exposure to loss relative to the prior periods relate to redemptions and exchange rate differences. As at April 30, 2014, approximately 89% of these investments were rated AA or higher based on ratings published by Standard & Poor's.

We also provide liquidity facilities to certain municipal bond Tender Option Bond (TOB) programs in which we have a significant interest but do not consolidate. As at April 30, 2014, the total assets of these unconsolidated municipal bond TOB trusts were \$1.1 billion (January 31, 2014 – \$1.0 billion; April 30, 2013 – \$1.2 billion) and our maximum exposure to loss was \$641 million (January 31, 2014 – \$627 million; April 30, 2013 – \$695 million).

During the quarter, we provided senior warehouse financing to an unaffiliated structured entity established to acquire loans and issue a term collateralized loan obligation transaction. Proceeds from the collateralized loan obligations will be used to repay the senior warehouse financing. The maximum exposure to loss of \$247 million represents the amount of senior warehouse funding outstanding as of April 30, 2014.

#### *Investment funds*

We enter into fee-based equity derivative transactions with third parties including mutual funds, unit investment trusts and other investment funds. These transactions provide their investors with the desired exposure to the referenced funds, and we economically hedge our exposure from these derivatives by investing in those referenced funds which are also managed by third parties. Our maximum exposure as at April 30, 2014, which is primarily related to our investments in the reference funds, was \$1.1 billion (January 31, 2014 – \$1.0 billion; April 30, 2013 – \$865 million). The total assets held in the unconsolidated reference funds as at April 30, 2014 were \$1.3 billion (January 31, 2014 – \$1.2 billion; April 30, 2013 – \$1.1 billion).

We also provide liquidity facilities to certain third party investment funds. The funds issue unsecured variable-rate preferred shares and invest in portfolios of tax-exempt municipal bonds. As at April 30, 2014, total assets in these funds were \$613 million (January 31, 2014 – \$623 million; April 30, 2013 – \$415 million) and our maximum exposure to loss, which reflects our undrawn liquidity commitment, was \$624 million (January 31, 2014 – \$634 million; April 30, 2013 – \$422 million). The decreases in total assets and our maximum exposure to loss compared to the prior quarter are primarily related to exchange rate differences. The increases in total assets and our maximum exposure to loss from the prior year are primarily related to exchange rate differences and new commitments entered into during the prior year, respectively.

*Third-party securitization vehicles*

We hold significant interests in certain unconsolidated third-party securitization vehicles, which are structured entities. We, as well as other financial institutions, are obligated to provide funding to these entities up to our maximum commitment level and are exposed to credit losses on the underlying assets after various credit enhancements. As at April 30, 2014, total assets of these entities were \$6.1 billion (January 31, 2014 – \$5.6 billion; April 30, 2013 – \$4.4 billion) and our maximum exposure to loss in these entities was \$1.0 billion (January 31, 2014 – \$833 million; April 30, 2013 – \$987 million). The increases in total assets and our maximum exposure compared to the prior quarter primarily reflect additional securitized assets funded by us and other investors in one entity. The increases from the prior year relate to exchange rate differences and additional securitized assets funded, partially offset by full repayment of one commitment and the amortization of several other commitments.

We also invest in the securities issued by unconsolidated third-party structured entities, including government-sponsored entities, as part of our trading activities. These investments do not carry a funding commitment; therefore our maximum exposure to loss is limited to our investment. As at April 30, 2014, total assets of entities in which we have significant investments were \$6 billion (January 31, 2014 – \$5.2 billion; April 30, 2013 – \$4.4 billion). Our maximum exposure to loss in these entities was \$267 million (January 31, 2014 – \$183 million; April 30, 2013 – \$300 million). Fluctuations in the amounts presented for these entities reflect normal trading activity and the extent to which our investments in certain entities are significant as at the end of the reporting period.

**Guarantees, retail and commercial commitments**

We provide guarantees and commitments to our clients that expose us to liquidity and funding risks. Our maximum potential amount of future payments in relation to our commitments and guarantee products as at April 30, 2014 was \$244 billion compared to \$244 billion in the prior quarter and \$215 billion in the prior year. The increase compared to the prior year relates primarily to higher Other commitments to extend credit and Backstop liquidity facilities, driven by business growth and the impact of foreign currency translation. Refer to Liquidity and Funding Management and Note 26 to our 2013 Annual Consolidated Financial Statements for details regarding our guarantees and commitments.

(1) Includes contingent liabilities such as letters of credit and guarantees, available-for-sale (AFS) debt securities, deposits with financial institutions and other assets.

(2) Credit equivalent amount after factoring in master netting agreements.

(3) Gross credit risk exposure is before allowance for loan losses. Exposure under Basel III asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credit are included in Personal.

(4) Refer to Note 5 of our 2013 Annual Consolidated Financial Statements for the definition of these terms.

**Q2 2014 vs. Q1 2014**

Total gross credit risk exposure decreased \$7 billion or 1% from the prior quarter, primarily attributable to a decrease in wholesale exposure. Retail exposure increased \$3 billion or 1%, primarily due to increases in Canadian Personal exposure and continued volume growth in Canadian residential mortgages. Wholesale exposure decreased \$10 billion or 1%, primarily attributable to a reduction in assets purchased under reverse repos, largely due to lower client activity. This factor was partially offset by growth in loans and acceptances outstanding and letters of credit and guarantees mainly driven by business growth. Wholesale loan utilization was 38%, up slightly from 37% in the prior quarter.

**Gross credit risk exposure by geography** <sup>(1)</sup>

<b>Net exposure to Europe</b> <sup>(3)</sup>	<b>\$ 13,640</b>	<b>\$ -</b>	<b>\$ 39,005</b>	<b>\$ -</b>	<b>\$ 1,800</b>	<b>\$ 3,012</b>	<b>\$ 57,457</b>	<b>\$ 56,198</b>	<b>\$ 50,473</b>

(1) Comprised of undrawn commitments of \$8.8 billion to corporate entities, \$2 billion to financial entities and \$1 billion to sovereign entities. On a country basis, exposure is comprised of \$4.5 billion to U.K., \$2.5 billion to France, \$2.1 billion to Germany, \$425 million to Ireland, \$345 million to Spain, with the remaining \$2 billion related to Other Europe. Of the undrawn commitments, over 88% are to investment grade entities.

(2) Securities include \$16.5 billion of trading securities (January 31, 2014 - \$17.2 billion), \$13.4 billion of deposits (January 31, 2014 - \$13 billion) and \$9.1 billion of AFS securities (January 31, 2014 - \$8.4 billion).

(3) Excludes \$1.3 billion (January 31, 2014 - \$1.6 billion) of exposures to supranational agencies and \$2.6 billion (January 31, 2014 - \$2.6 billion) of exposures to trade credit reinsurance.

Our gross credit risk exposure is calculated based on the definitions provided under the Basel III framework whereby risk exposure is calculated before taking into account any collateral and inclusive of an estimate of potential future changes to that credit exposure. On that basis, our total European exposure as at April 30, 2014 was \$163 billion. Our gross drawn exposure to Europe was \$49 billion, after taking into account collateral held against repo-style transactions of \$59 billion, letters of credit and guarantees, and undrawn commitments for loans of \$34 billion and potential future credit exposure to derivatives of \$22 billion. Our net exposure to Europe was \$57 billion, after taking into account \$8 billion of collateral, primarily in cash, we hold against derivatives and the addition of trading securities of \$16 billion held in our trading book. Our net exposure to Europe also reflected \$0.2 billion of mitigation through credit default swaps, which are largely used to hedge single name exposures and market risk.

(1) Geographic profile is based on country of risk, which reflects our assessment of the geographic risk associated with a given exposure. Typically, this is the residence of the borrower.

(2) Gross credit risk exposure to peripheral Europe is comprised of \$nil to Greece (January 31, 2014 – \$nil), Ireland \$2.7 billion (January 31, 2014 – \$1.1 billion), Italy \$0.2 billion (January 31, 2014 – \$0.3 billion), Portugal \$0.1 billion (January 31, 2014 – \$0.1 billion), and Spain \$1.1 billion (January 31, 2014 – \$1.3 billion).

## Q2 2014 vs. Q1 2014

Net credit risk exposure to Europe increased \$1 billion from the prior quarter to \$57 billion. Increased exposure in Netherlands, Germany, Switzerland and U.K. were partially offset by a decrease in Luxembourg. Our net exposure to peripheral Europe, which includes Greece, Ireland, Italy, Portugal and Spain, remained minimal with total outstanding exposure of \$1.6 billion as at April 30, 2014. This exposure increased \$0.5 billion from the prior quarter, largely due to an increase in Ireland.

Our exposure was predominantly investment grade. Our net exposure to larger European countries, including the U.K., Germany and France, was primarily related to our capital markets, wealth management and investor services businesses, particularly in fixed income, treasury services, derivatives, and corporate and individual lending. These are predominantly client-driven businesses where we transact with a range of European financial institutions, corporations and individuals. In addition, we engage in primary dealer activities in the U.K., where we participate in auctions of government debt and act as a market maker and provide liquidity to clients. Exposures to other European countries are largely related to securities which include trading securities, deposits, and available-for-sale (AFS) securities.

Our trading securities are related to both client market making activities and our funding and liquidity management needs. All of our trading securities are marked-to-market on a daily basis. Deposits are primarily related to deposits with central banks or financial institutions and also included deposits related to our wealth management business in the Channel Islands. AFS securities are largely comprised of Organization of Economic Co-operation and Development government and corporate debt. Our European corporate loan book is run on a global basis and the underwriting standards for this loan book reflect the same approach to the use of our balance sheet as we have applied in both Canada and the U.S. We had no PCL on this portfolio for this quarter, compared to a PCL recovery of \$1 million in the prior quarter. The gross impaired loans ratio of this loan book was 0.18%, down slightly from 0.19% in the prior quarter.

<b>Average (4), (5)</b>	<b>71%</b>	<b>71%</b>	<b>71%</b>	<b>70%</b>	<b>71%</b>	<b>71%</b>

(1) Residential mortgages excludes residential mortgages within the homeline products.

(2) Homeline products are comprised of both residential mortgages and home equity lines of credit.

(3) Refer to the Risk management section of our 2013 Annual Report for the definition of these regions.

(4) The average LTV ratio for newly originated and acquired uninsured residential mortgages and homeline products is calculated on a weighted basis by mortgage amounts at origination.

(5) For newly originated mortgages and homeline products, LTV is calculated based on the total facility amount for the residential mortgage and homeline product divided by the value of the related residential property.

n.m. not meaningful

While the above table provides the LTV ratios for the current quarter originations, the LTV ratio on our outstanding balances of the entire Canadian Banking uninsured residential mortgages including homeline products is 56% as at April 30, 2014 (January 31, 2014 – 56%). This calculation is weighted by mortgage balances and adjusted for property values based on the Teranet – National Bank National Composite House Price Index.

We employ a risk-based approach to property valuation. Property valuation methods include automated valuation models (AVM) and appraisals. An AVM is a tool that estimates the value of a property by reference to market data including sales of comparable properties and price trends specific to the Metropolitan Statistical Area in which the property being valued is located. Using a risk-based approach, we also employ appraisals which can include drive-by or full on-site appraisals.

We continue to actively manage our entire mortgage portfolio and perform stress testing, based on a combination of increasing unemployment, rising interest rates, and a downturn in real estate markets. Our stress test results indicate the vast majority of our residential mortgage and homeline clients have sufficient capacity to continue making payments in the event of a shock to one of the above noted parameters.

(1) PCL in Corporate Support and Other primarily comprised of PCL for loans not yet identified as impaired. For further information, refer to the How we measure and report our business segments section of our 2013 Annual Report.

(2) Geographic information is based on residence of borrower.

(3) PCL on impaired loans as a % of average net loans and acceptances.

**Q2 2014 vs. Q2 2013**

Total PCL decreased \$43 million, or 15%, from a year ago. PCL ratio of 23 bps, decreased 6 bps.

PCL in Personal & Commercial Banking decreased \$22 million or 9%, and the PCL ratio decreased 4 bps, mainly due to lower provisions in our commercial lending portfolios in Canada, partially offset by higher provisions in Caribbean portfolios on a few accounts.

PCL in Capital Markets decreased \$27 million, mainly due to a provision taken on a single account in the technology & media sector as compared to provisions in the prior year related to a couple of accounts also in the technology & media sector.

**Q2 2014 vs. Q1 2014**

Total PCL decreased \$48 million or 16%, from the prior quarter. PCL ratio of 23 bps, decreased 4 bps.

PCL in Personal & Commercial Banking decreased \$43 million or 16%, and the PCL ratio decreased 4 bps, mainly due to lower provisions in our personal loans and commercial lending portfolios, partially offset by higher provisions in Caribbean portfolios on a few accounts.

PCL in Wealth Management decreased \$19 million as the prior quarter included provisions on a few accounts.

PCL in Capital Markets was \$13 million mainly reflecting a provision taken on a single account as noted above. This compares to a recovery in PCL of \$2 million in the prior quarter.

**Q2 2014 vs. Q2 2013 (Six months ended)**

Total PCL decreased \$100 million or 16% from last year. PCL ratio of 25 bps, decreased 7 bps.

PCL in Personal & Commercial Banking increased \$11 million or 2%, mainly due to higher provisions in our personal loan portfolio, partially offset by lower provisions in our Canadian credit cards and commercial lending portfolios.

PCL in Wealth Management increased \$20 million due to provisions on a few accounts.

PCL in Capital Markets decreased \$138 million, mainly reflecting a provision taken on a single account as noted above compared to higher provisions in the prior year on a few accounts in the technology & media sector.

(1) Geographic information is based on residence of borrower.

(2) GIL as a % of loans and acceptances.

**Q2 2014 vs. Q2 2013**

Total GIL decreased \$210 million from a year ago. The GIL ratio decreased 9 bps.

GIL in Personal & Commercial Banking increased \$45 million or 2%, and the GIL ratio was 55 bps. The increase in GIL was mainly due to higher impaired loans in our Canadian personal and commercial lending portfolios, partially offset by lower impaired loans in our residential mortgages.

GIL in Capital Markets decreased \$246 million or 81%, primarily due to lower impaired loans in technology & media, financing products and industrial products sectors, primarily reflecting sales and write-offs.

**Q2 2014 vs. Q1 2014**

Total GIL decreased \$136 million or 6% from the prior quarter. The GIL ratio decreased 4 bps.

GIL in Personal & Commercial Banking increased \$14 million or 1%, mainly due to higher impaired loans in our Commercial lending, partially offset by lower impaired loans in our residential mortgages and Caribbean wholesale portfolios.

GIL in Wealth Management decreased \$66 million, mainly due to write-offs related to a few accounts.

GIL in Capital Markets decreased \$83 million or 60%, primarily due to lower impaired loans in technology & media and financing products sectors, primarily reflecting sales and write-offs.

**Allowance for credit losses (ACL)**

**Q2 2014 vs. Q2 2013**

Total ACL decreased \$83 million or 4% from a year ago, mainly related to lower ACL in Capital Markets.

**Q2 2014 vs. Q1 2014**

Total ACL decreased \$96 million or 5% from last quarter, mainly related to lower ACL in Wealth Management.

**Loan forbearance**

As recommended by EDTF, we have provided a summary of our forbearance policy with respect to loans.

In our overall management of borrower relationships, economic or legal reasons may necessitate forbearance to certain clients with respect to the original terms and conditions of their loans. We strive to identify borrowers in financial difficulty early and modify their loan terms/restructure in order to maximize collection and to avoid foreclosure, repossession, or other legal remedies. In these circumstances, a borrower may be granted concessions that would not otherwise be considered. We have specialized groups and formalized policies that direct the management of delinquent or defaulted borrowers. Examples of such concessions to retail borrowers may include rate reduction, principal forgiveness, and term extensions. Concessions to wholesale borrowers may include restructuring the agreements, modifying the original terms of the agreement and/or relaxation of covenants. For both retail and wholesale loans, the appropriate remediation techniques are based on the individual borrower's situation, the bank's policy and the customer's willingness and capacity to meet the new arrangement. When a loan is restructured, the recorded investment in the loan is reduced as of the date of restructuring to the amount of the net cash flows receivable under the modified terms, discounted at the effective interest rate inherent in the loan (prior to restructuring).

**Market risk****Market risk measures – FVTPL positions****VaR and Stressed VaR**

We measure VaR at the 99th percentile confidence level for price movements over a one day holding period using historic simulation of the last two years of equally weighted historic market data. These calculations are updated daily with current risk positions with the exception of credit valuation adjustments (CVA) and certain other positions which are updated weekly. Market risk Stressed VaR is calculated on a weekly basis in a similar manner as Market risk VaR with the exception that it is computed using a fixed historical one year period of extreme volatility and its inverse rather than the most recent two year history. The stress period used is the interval from September 2008 through August 2009. Stressed VaR is calculated weekly for all portfolios. For further details of our approach to the management of market risk, refer to the Market risk section of our 2013 Annual Report.

The following table shows Market risk VaR (VaR) and Market risk Stressed VaR (SVaR) for FVTPL positions, with the exception of those in a designated hedging relationship and positions held in RBC Insurance.

(Millions of Canadian dollars)	April 30 2014				January 31 2014		April 30 2013

<b>Market risk Stressed VaR</b>	<b>\$ 96</b>	<b>\$ 103</b>	<b>\$ 121</b>	<b>\$ 92</b>	<b>\$ 87</b>	<b>\$ 81</b>

(1) General credit spread risk is measured under interest rate VaR while credit specific risk captures issuer-specific credit spread volatility.

(2) Market risk VaR is less than the sum of the individual risk factor VaR results due to portfolio diversification.

### Q2 2014 vs. Q2 2013

Average VaR of \$36 million for the second quarter of 2014 was down \$6 million compared to the prior year. The decrease was mainly driven by the roll forward of the historical time period used to calculate VaR, in particular the market volatility of 2011 following the downgrade of the credit rating for the U.S. is no longer included in the VaR window.

Average Stressed VaR was up \$19 million compared to the prior year due to increased positions in mortgage-backed securities (MBS) and high grade credit-sensitive fixed income debt whose price behaviour was particularly volatile in the historical period used to calculate Stressed VaR when compared to more recent history. The impact of foreign exchange translation on foreign-denominated portfolios also contributed to the Stressed VaR increase.

### Q2 2014 vs. Q1 2014

Average VaR of \$36 million was up \$2 million compared to last quarter mainly driven by higher equity risk and interest rate risk. Average Stressed VaR of \$103 million was unchanged from the prior quarter.

### Q2 2014 vs. Q2 2013 (Six months ended)

Average VaR of \$35 million decreased \$7 million compared to the prior year, largely driven by the roll forward of the historical time period used to calculate VaR. Average Stressed VaR increased \$22 million from \$81 million in the prior year largely driven by increased positions in MBS and high grade credit-sensitive fixed income debt and the impact of foreign exchange translation as noted above.

The following chart graphically displays a bar chart of our daily trading profit and loss and a line chart of our daily Market risk VaR. During the quarter there were no daily net trading losses.

### Market risk measures for other FVTPL positions

#### Assets and liabilities of RBC Insurance

We offer a range of insurance products to clients and hold investments to meet the future obligations to policyholders. The investments which support policyholder liabilities are predominantly fixed income assets designated as FVTPL. Consequently changes in the fair values of these assets are recorded in investment income in the consolidated statements of income and are largely offset by changes in the fair value of the actuarial liabilities, the impact of which is reflected in insurance policyholder benefits and claims. Liabilities with respect to insurance obligations are reported at \$8.2 billion as of April 30 2014. We held \$6.3 billion of trading securities in support of the liabilities. We also held \$1.7 billion of securities classified as AFS as investments.

#### Market risk measures – Structural Interest Rate Positions

The following table provides the potential before-tax impact of an immediate and sustained 100 bps increase or decrease in interest rates on net interest income and economic value of equity of our non-trading portfolio, assuming that no further hedging is undertaken. All interest rate risk measures are based upon interest rate exposures at a specific time and continuously change as a result of business activities and our risk management actions. During the second quarter of 2014, our interest rate risk exposure was well within our target levels.

	April 30 2014						January 31 2014		April 30 2013	
	Economic value of equity risk			Net interest income risk (2)			Economic value of equity risk	Net interest income risk (2)	Economic value of equity risk	Net interest income risk (2)
	Canadian dollar impact	U.S. dollar impact (1)	Total	Canadian dollar impact	U.S. dollar impact (1)	Total				
(Millions of Canadian dollars)										
<b>Before-tax impact of:</b>										
100bps increase in rates	\$ (688)	\$ (4)	\$ (692)	\$ 386	\$ 11	\$ 397	\$ (483)	\$ 467	\$ (500)	\$ 437
100bps decrease in rates	567	1	568	(357)	(1)	(358)	406	(318)	337	(311)

(1) Represents the impact on the non-trading portfolios held in our U.S. banking operations.

(2) Represents the 12-month Net interest income exposure to an instantaneous and sustained shift in interest rates.

### Market risk measures for other material non-trading portfolios

#### Market risk – AFS

We held \$43 billion of securities classified as AFS as at April 30, 2014, compared to \$40 billion as at January 31, 2014. We hold debt securities designated as AFS primarily as investments and to manage interest rate risk in our non-trading banking activity. Certain legacy debt portfolios are also classified as AFS. As at April 30, 2014, our portfolio of AFS securities (excluding those held in our Insurance business) exposes us to interest rate risk of a pre-tax loss of \$4.8 million, as measured by the change in the value of the securities for a one basis point parallel increase in yields. The portfolio also exposes us to credit spread risk of a pre-tax loss of \$9.8 million, as measured by the change in value for a one basis point widening of credit spreads. Changes in the value of these securities are reported in other comprehensive income. Our available-for-sale securities also include equity exposures of \$1.7 billion as at April 30, 2014, down from \$1.8 billion last quarter.

### Derivatives in hedge accounting relationships

Derivative assets in a designated hedge accounting relationship of \$2 billion as at April 30, 2014 were unchanged compared to the prior quarter, and derivative liabilities of \$805 million as at April 30, 2014 were down from \$1.3 billion in the prior quarter. We use interest rate swaps to manage our structural interest rate risk, as described in the Market Risk section of our 2013 Annual Report. To the extent these swaps are considered effective hedges, changes in their fair value are recognized in other comprehensive income. The interest rate risk for the designated cash flow hedges, measured as the change in the value of the securities for a one basis point parallel increase in yields, was positive \$3.2 million as of April 30, 2014.

We also use interest rate swaps to hedge changes in the fair value of certain fixed-rate instruments. Changes in fair value of the interest rate swaps and the hedged assets that are related to interest rate movements are reflected in income.

We also use foreign exchange derivatives to manage our exposure to equity investments in subsidiaries that are denominated in foreign currencies, particularly the U.S. dollar and British pound. Changes in the fair value of these hedges and the cumulative translation adjustment related to our structural foreign exchange risk are reported in other comprehensive income.

### Linkage of market risk to selected balance sheet items

The following table provides the linkages between selected balance sheet items with positions included in our trading market risk and non-trading market risk disclosures, which illustrates how we manage market risk for our assets and liabilities through different risk measures.

(Millions of Canadian dollars)	As at April 30, 2014

(1) Traded risk includes FVTPL positions whose revaluation gains and losses are reported in revenue. Market risk measures of VaR, Stressed VaR and Stress testing are used as risk controls for traded risk.

(2) Non-traded risk includes positions used in the management of the structural interest rate risk (SIRR) and other non-trading portfolios. Other material non-trading portfolios include positions from our Insurance business and AFS securities not included in SIRR.

The following footnotes provide additional information on the Non-traded risk amounts:

(3) Cash and due from banks includes \$6,088 million included in SIRR. An additional \$1,031 million is included in other risk controls.

(4) Interest-bearing deposits with banks of \$4,336 million are included in SIRR.

(5) Trading securities include \$6,283 million in securities used in the management of the structural interest rate risk of RBC Insurance, which is not included in our disclosed SIRR measure.

(6) Available-for-sale securities of \$39,174 million are included in SIRR. An additional \$3,909 million are held by our insurance businesses that do not contribute to our SIRR measures and certain legacy assets.

(7) Assets purchased under reverse repurchase agreements include \$205 million reflected in SIRR.

(8) Retail loans include \$307,235 million reflected in SIRR.

(9) Wholesale loans include \$97,620 million reflected in SIRR. An additional \$1,123 million is used in the management of the structural interest rate risk of RBC Insurance.

(10) Investments for the account of segregated fund holders are included in the management of the structural interest rate risk of RBC Insurance.

(11) Other assets include \$33,526 million reflected in SIRR. An additional \$2,373 million is used in the management of the structural interest rate risk of RBC Insurance.

(12) Other assets include \$6,502 million of physical and other assets that are not subject to market risk.

(13) Deposits include \$477,000 million reflected in SIRR.

(14) Insurance and investment contracts for the account of segregated fund holders are included in the management of the structural interest rate risk of RBC Insurance.

(15) Obligations related to assets sold under repurchase agreements include \$188 million reflected in SIRR.

(16) Other liabilities include \$8,818 million used in the management of the structural interest rate risk of RBC Insurance, and \$27,192 million contribute to our SIRR measure.

(17) Other liabilities include \$11,336 million of payroll related and other liabilities that are not subject to market risk.

- (12) Other assets include \$6,078 million of physical and other assets that are not subject to market risk.
- (13) Deposits include \$472,620 million reflected in SIRR.
- (14) Insurance and investment contracts for the account of segregated fund holders are included in the management of the structural interest rate risk of RBC Insurance.
- (15) Obligations related to assets sold under repurchase agreements include \$325 million reflected in SIRR.
- (16) Other liabilities include \$8,582 million used in the management of the structural interest rate risk of RBC Insurance, and \$25,524 million contribute to our SIRR measure.
- (17) Other liabilities include \$11,150 million of payroll related and other liabilities that are not subject to market risk.

## Liquidity and funding management

There have been no material changes to our Liquidity Management Framework from the framework described in our 2013 Annual Report. We continue to maintain liquidity and funding that is appropriate for the execution of our strategy. Our liquidity and funding risk remain well within our risk appetite.

We continue to monitor and, as appropriate, modify our risk policies, practices and processes to align with regulatory developments and to position ourselves for the prospective regulatory reforms, such as the Basel III regulatory liquidity standards established by the BCBS and supported by OSFI and other jurisdictions. The BCBS liquidity standards include minimum requirements for two regulatory measures, the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR). In January 2013, the BCBS released its final rules for LCR, with phased timelines for compliance, starting with a minimum of 60% coverage in 2015 and increasing by 10% annually to 100% in 2019. In January 2014, the BCBS released its final paper on “Liquidity coverage ratio disclosure standards” and published a consultative document on the NSFR guidelines. Banks are expected to comply with the BCBS LCR disclosure standards beginning in the first full fiscal quarter of calendar 2015 (Q2 for Canadian banks). Comments on the consultative document on NSFR were submitted in early April to the BCBS. Planned implementation for NSFR is 2018. In this interim observation period, we submit regular LCR and NSFR reports to OSFI.

In November 2013, OSFI released a consultative document “Liquidity Adequacy Requirements (LAR) Guideline” for public review and comment by January 24, 2014. The objective of this guideline is to describe the methodologies supporting a series of liquidity metrics that will be used by OSFI to assess the liquidity adequacy of an institution. The LAR guideline converts the BCBS liquidity requirements (including LCR, NSFR and monitoring tools) into OSFI guidance as well as incorporating OSFI’s Net Cumulative Cash Flow (NCCF) metric into formal domestic regulation. OSFI introduced the NCCF in 2010 and we submit a formal compliance report to OSFI on a monthly basis. The assumptions and parameters for NCCF contained in the LAR guideline have been in some instances materially modified from existing NCCF requirements. OSFI has designated the NCCF as a supervisory tool rather than a liquidity metric with a prescribed minimum standard like LCR and eventually NSFR. Of note in the LAR guideline is that, while the LCR implementation date of January 2015 is consistent with the BCBS requirement, there will be no phase-in period as the minimum LCR requirement for Canadian institutions at that date will be 100% compared to the minimum 60% coverage as prescribed by BCBS. Implementation for the revised NCCF and other liquidity monitoring tools will also be January 2015. Intraday monitoring tools will be implemented by 2017. We expect OSFI will publish its final guidance shortly.

### Risk measurement

To monitor and control risk within appropriate tolerances, limits are set on various internal and regulatory metrics reflecting a range of time horizons and severity of stress conditions. Risk methodologies and underlying assumptions for internal metrics are periodically reviewed and validated to assess alignment with our operating environment, expected economic and market conditions, rating agency preferences, regulatory requirements and accepted practices.

In our internal metrics, liquidity risk is measured using contractual maturity dates for some assets and liabilities (e.g., wholesale lending and funding) and effective maturity for others. In the effective maturity approach, the liquidity value of assets and liabilities is determined based on observed behavioural or market-based patterns unrelated to contractual maturity. For example, effective maturity may be shorter than contractual maturity if the demonstrated behaviour of the asset suggests that it can be monetized before maturity. Effective maturity for a liability may be longer than contractual maturity if the demonstrated behaviour of the liability suggests that it will be extended or rolled over at maturity. Specific examples include government bonds for assets as they can be quickly and reliably monetized and relationship-based deposits for liabilities where a significant portion is typically assigned core value although contractual maturity dates may be quite short or even legally characterized as available on demand (conversely, demand loans display attributes of longer term assets and are treated accordingly from an effective maturity perspective). Internally derived assumptions consider all relevant material and available data, information and methods of quantifying liquidity risk.

For further details on our methodologies and measurement, refer to the Liquidity and funding management section of our 2013 Annual Report.

### Risk Profile

As at April 30, 2014, relationship-based deposits, which are the primary source of funding for retail loans and mortgages, were \$375 billion or 54% of our total funding (January 31, 2014 – \$371 billion<sup>(1)</sup> or 52%<sup>(1)</sup>). Funding for highly liquid assets consisted primarily of short-term wholesale funding that reflects the expected monetization period of these assets. This wholesale funding comprised unsecured short-term liabilities of \$74 billion and secured (repos and short sales) liabilities of \$120 billion, and represented 10% and 17% of total funding as at April 30, 2014, respectively (January 31, 2014 – \$84 billion<sup>(1)</sup> and \$120 billion or 12%<sup>(1)</sup> and 17% of total funding, respectively). Long-term wholesale funding is mostly used to fund less liquid wholesale assets. Additional quantitative information is provided in the following Funding section.

As at April 30, 2014, we held earmarked contingency liquidity assets of \$12 billion, of which \$7 billion was in U.S. currency and \$5 billion was in Canadian currency (January 31, 2014 – \$12 billion of which \$7 billion was in U.S. currency and \$5 billion was in Canadian currency). During the quarter ended April 30, 2014, we held on average \$12 billion, of which \$7 billion was in U.S. currency and \$5 billion was in Canadian currency (January 31, 2014 – \$12 billion of which \$7 billion was in U.S. currency and \$5 billion was in Canadian currency). We also held a derivatives pledging liquid asset buffer of US\$4 billion as at April 30, 2014 to mitigate the volatility of our net pledging requirements for derivatives trading (January 31, 2014 – US\$4 billion). This buffer averaged US\$4 billion during the quarter ended April 30, 2014 (January 31, 2014 – US\$4 billion).

As recommended by the EDTF, the following tables provide summaries of our liquidity reserve and asset encumbrance. Unencumbered assets represent, for the most part, a ready source of funding that can be accessed quickly, when required. In the Liquidity reserve table, available liquid assets consist of on-balance sheet cash and securities holdings as well as securities received as collateral from securities financing (reverse repos and off-balance sheet collateral swaps) and derivative transactions and constitute the preferred source for quickly accessing liquidity. The other component of our liquidity reserve consists primarily of uncommitted and undrawn central bank credit facilities that could be accessed under exceptional circumstances provided certain pre-conditions could be met and where advances could be supported by eligible assets (e.g. certain unencumbered loans) not included in the liquid assets category. The Asset encumbrance table provides a comprehensive view of the assets available to the bank, not just the liquidity reserve, and identifies assets already pledged as well as those available for use as collateral (including unencumbered assets from the Liquidity reserve table) for secured funding purposes. Less liquid assets such as mortgages and credit card receivables can in part be monetised although requiring more lead times relative to liquid assets. As at April 30, 2014, our assets available as collateral comprised 65% of our total liquid assets. For the purpose of constructing the following tables, encumbered assets include: (i) bank-owned liquid assets that are either pledged as collateral (e.g., repo financing and derivative pledging) or not freely available due to regulatory or internal policy requirements (e.g., earmarked to satisfy mandatory reserve or local capital adequacy requirements and to maintain continuous access to payment and settlement systems); (ii) securities received as collateral from securities financing and derivative transactions which have either been re-hypothecated where permissible (e.g., to obtain financing through repos or to cover securities sold short) or have no liquidity value since re-hypothecation is prohibited; and (iii) illiquid assets that have been securitized and sold into the market or that have been pledged as collateral in support of structured term funding vehicles. We do not include encumbered assets as a source of available liquidity in measuring liquidity risk. Unencumbered assets are the difference between total and encumbered assets from both on- and off-balance sheet sources.

(1) Amounts have been revised from those previously presented.

**Liquidity reserve** <sup>(1)</sup>

<b>Total unencumbered liquid assets</b>	<b>\$ 328,724</b>	<b>\$ 337,440</b>

- (1) Information is provided from an enterprise-wide perspective and amounts shown are based on face value. In managing liquidity risk, we consider legal, regulatory, tax and other constraints that may impede transferability of liquidity among RBC units.
- (2) The Bank-owned liquid assets amount includes securities owned outright by the bank or acquired via on-balance sheet securities finance transactions.
- (3) Includes liquid securities issued by provincial governments and U.S. government sponsored entities working under U.S. Federal government's conservatorship (e.g. Federal National Mortgage Association and Federal Home Loan Mortgage Corporation).
- (4) Includes Auction Rate Securities.
- (5) Includes loans that qualify as eligible collateral for the discount window facility available to us at the Federal Reserve Bank of New York. Amounts are face value and would be subject to collateral margin requirements applied by the Federal Reserve Bank to determine collateral value/borrowing capacity. Access to the discount window borrowing program is conditional on meeting requirements set by the Federal Reserve Bank and borrowings are typically expected to be infrequent and due to uncommon occurrences requiring temporary accommodation.
- (6) Represents our unencumbered Canadian dollar non-mortgage loan book (at face value) that could, subject to satisfying conditions precedent to borrowing and application of prescribed collateral margin requirements, be pledged to the Bank of Canada for advances under its Emergency Lending Assistance (ELA) program. ELA and other central bank facilities are not considered sources of available liquidity in our normal liquidity risk profile but could in extraordinary circumstances, where normal market liquidity is seriously impaired, allow us and other banks to monetize assets eligible as central bank collateral to meet requirements and mitigate further market liquidity disruption.
- (7) Represents pledges related to over-the-counter (OTC) and exchange traded derivative transactions.

– Others (7)	10,438	–	–	44,242	54,680	12,187	–	–	44,688	56,875
<b>Total assets</b>	<b>\$252,644</b>	<b>\$1,102</b>	<b>\$377,957</b>	<b>\$312,108</b>	<b>\$943,811</b>	<b>\$256,075</b>	<b>\$1,102</b>	<b>\$381,330</b>	<b>\$316,129</b>	<b>\$954,636</b>

(1) Information is provided from an enterprise-wide perspective and amounts shown are based on face value. In managing liquidity risk, we consider legal, regulatory, tax and other constraints that may impede transferability of liquidity among RBC units.

(2) Includes assets restricted from use to generate secured funding due to legal or other constraints.

(3) Includes loans that could be used to collateralize central bank advances. Our unencumbered Canadian dollar non-mortgage loan book (at face value) could, subject to satisfying conditions precedent to borrowing and application of prescribed collateral margin requirements, be pledged to the Bank of Canada for advances under its ELA program. We also lodge loans that qualify as eligible collateral for the discount window facility available to us at the Federal Reserve Bank of New York. ELA and other central bank facilities are not considered sources of available liquidity in our normal liquidity risk profile but could in extraordinary circumstances, where normal market liquidity is seriously disrupted, allow us and other banks to monetize assets eligible as central bank collateral to meet requirements and mitigate market liquidity dislocations.

(4) Other unencumbered assets are not subject to any restrictions on their use to secure funding or as collateral but would not be considered readily available since they may not be acceptable at central banks or other for other lending programs.

(5) Includes bank-owned liquid assets and securities received as collateral from off-balance sheet securities financing and derivative transactions.

(6) Certain Non-mortgage loans have been reclassified from Retail loans to Wholesale loans. As a result, amounts have been revised from those previously presented.

(7) The Pledged as collateral amounts relate to OTC and exchange traded derivative transactions.

Other sources of liquidity that could be available to mitigate stressed conditions include: (i) our unused wholesale funding capacity, which is regularly assessed using an established methodology that is periodically reviewed and, as necessary, revised, and (ii) central bank standby lending facilities if, in extraordinary circumstances, market sources were disrupted and temporarily not sufficiently liquid to allow us to monetize our unencumbered liquid assets (as opposed to loans as described above) to meet our normal daily requirements (e.g., Bank of Canada, Federal Reserve Bank, Bank of England, Bank of France and the Central Bank of Luxembourg).

**Funding***Funding strategy*

Core funding, comprising capital, longer-term wholesale liabilities and a diversified pool of personal and, to a lesser extent, commercial and institutional deposits, is the foundation of our structural liquidity position.

*Deposit profile*

Core deposits currently represent 70% of our total deposits (January 31, 2014 – 70%). Core deposits consist of our own statistically derived liquidity adjusted estimates of the highly stable portions of our relationship-based balances (demand, notice and fixed-term) together with wholesale funds maturing beyond one year. During the quarter, core deposit levels increased by about 2% due to growth in relationship deposits and an extension of our wholesale funding maturity profile. For further details on the gross dollar amounts of our relationship-based deposits and our wholesale funds maturing beyond one year, refer to the Risk profile section and the following Composition of wholesale funding table, respectively.

*Long-term debt issuance*

Our wholesale funding activities are well-diversified by geography, investor segment, currency, structure and maturity. We maintain an ongoing presence in different funding markets, which allows us to continuously monitor market developments and trends, identify opportunities and risks, and take appropriate and timely actions. We operate longer-term debt issuance registered programs. The following table summarizes these programs with their authorized limits by geography.

Canada	U.S.	Europe/Asia
<ul style="list-style-type: none"> <li>Canadian Shelf – \$15 billion</li> </ul>	<ul style="list-style-type: none"> <li>SEC Registered – US\$25 billion</li> <li>SEC Registered Covered Bonds – US\$12 billion</li> </ul>	<ul style="list-style-type: none"> <li>European Debt Issuance Program – US\$40 billion</li> <li>Covered Bond Program – Euro 23 billion</li> <li>Japanese Issuance Programs – JPY 1 trillion</li> </ul>

We also raise long-term funding using Canadian Deposit Notes, Canadian NHA MBS, Canada Mortgage Bonds, credit card receivable-backed securities, Kangaroo Bonds (issued in the Australian domestic market by foreign firms) and Yankee Certificates of Deposit (issued in the U.S. domestic market by foreign firms). We continuously evaluate expansion into new markets and untapped investor segments against relative issuance costs since diversification expands our wholesale funding flexibility and minimizes funding concentration and dependency, and generally reduces financing costs. As presented in the following charts, our current long-term debt profile is well diversified by currency as well as by type of long-term funding products. Maintaining competitive credit ratings is also critical to cost-effective funding.

(1) Mortgage-backed securities and Canada Mortgage Bonds

The following table provides our composition of wholesale funding and represents our enhanced disclosure in response to EDTF recommendations.

(1) Excludes bankers' acceptances.

(2) Only includes deposits raised by treasury. Excludes deposits associated with services we provide to these banks (e.g., custody, cash management).

(3) Only includes consolidated liabilities, including our collateralized commercial paper program.

(4) Includes deposit notes.

(5) Includes notes where the payout is tied to movements in foreign exchange, commodities and equities.

(6) Includes credit card, auto and mortgages.

(7) Includes tender option bonds, bearer deposit notes and other long-term structured deposits.

(8) Amounts have been revised from those previously presented.

**Contractual maturities of financial assets, financial liabilities and off-balance sheet items**

The following tables provide remaining contractual maturity profiles of all our assets, liabilities, and off-balance sheet items at their carrying value (i.e. amortized cost or fair value) at the balance sheet date and have been enhanced in response to EDTF recommendations. Off-balance sheet items are allocated based on the expiry date of the contract.

Details of contractual maturities and commitments to extend funds are a source of information for the management of liquidity risk. Among other purposes, these details form a basis for modeling a behavioural balance sheet with effective maturities to calculate liquidity risk measures. For further details, refer to the Risk measurement section.

(1) Trading debt securities classified as fair value through profit or loss have been included in the less than 1 month category as there is no expectation to hold these assets to their contractual maturity.

(2) Amounts have been revised from those previously presented.

(3) A major portion of relationship-based deposits are repayable on demand or at short notice on a contractual basis while, in practice, these customer balances form a core base, as explained in the preceding Deposit profile section, for our operations and liquidity needs.

### Credit ratings

Our ability to access unsecured funding markets and to engage in certain collateralized business activities on a cost-effective basis are primarily dependent upon maintaining competitive credit ratings. Credit ratings and outlooks provided by rating agencies reflect their views and are based on their methodologies. Ratings are subject to change from time to time, based on a number of factors including, but not limited to, our financial strength, competitive position and liquidity and other factors not completely within our control.

On January 24, 2014, Fitch Ratings affirmed our ratings with a stable outlook along with the six other largest Canadian banks.

The following table presents our major credit ratings<sup>(1)</sup> and outlooks as at May 21, 2014:

	As at May 21, 2014 (2)		
	Short-term debt	Senior long-term debt	Outlook
Moody's	P-1	Aa3	stable
Standard & Poor's	A-1+	AA-	stable
Fitch Ratings	F1+	AA	stable
Dominion Bond Rating Services	R-1(high)	AA	stable

- (1) Credit ratings are not recommendations to purchase, sell or hold a financial obligation inasmuch as they do not comment on market price or suitability for a particular investor. Ratings are determined by the rating agencies based on criteria established from time to time by them, and are subject to revision or withdrawal at any time by the rating organization.
- (2) Kroll Bond Rating Agency has assigned RBC senior long-term and short-term debt and deposit ratings of AA and K1+, respectively, with a stable outlook. These ratings were unsolicited and we did not participate in the rating process.

#### Additional contractual obligations for rating downgrades

A lowering of our credit rating may have potentially adverse consequences for our funding capacity or access to the capital markets, may also affect our ability, and the cost, to enter into normal course derivative or hedging transactions and may require us to post additional collateral under certain contracts. However, we estimate, based on periodic reviews of ratings triggers embedded in our existing businesses and of our funding capacity sensitivity, that a minor downgrade would not significantly influence our liability composition, funding access, collateral usage and associated costs. The following table presents the additional collateral obligations required at the reporting date in the event of a one-, two- or three-notch downgrade to our credit ratings. These additional collateral obligations are incremental requirements for each successive downgrade and do not represent the cumulative impact. The amounts reported change periodically as a result of several factors including the transfer of trading activity to centrally cleared financial market infrastructures and exchanges, the expiration of transactions with downgrade triggers, the imposition of internal limitations on new agreements to exclude downgrade triggers, as well as normal course mark to market of positions with collateralized counterparties moving from a negative to a positive position. There is no outstanding senior debt issued in the market that contains rating triggers which would lead to early prepayment of principal.

#### Additional contractual obligations for rating downgrades

(Millions of Canadian dollars)	As at					
	April 30 2014			January 31 2014		
	One-notch downgrade	Two-notch downgrade	Three-notch downgrade	One-notch downgrade	Two-notch downgrade	Three-notch downgrade

Other contractual funding or margin requirements (1)	402	113	36	425	143	80

- (1) Includes GICs issued by our municipal markets business out of New York and London.

### Capital management

There have been no material changes to our Capital Management Framework from that described in our 2013 Annual Report. We continue to monitor and prepare for new regulatory capital developments in order to ensure timely and accurate compliance with these requirements.

Effective January 1, 2014, the CVA capital charge will be phased in over a five year period beginning 2014 and ending December 31st, 2018 to ensure an implementation similar to that in other countries. In accordance with the guidance, there are two possible options to phase in the CVA capital charge. Under the option selected by RBC, Option 1, CVA increased RWA for purposes of calculating CET1, Tier 1 and Total Capital ratios, and will be phased-in using a 57%, 65% and 77% phase-in multiple respectively, and vary by year up to the end of 2018.

In January 2014, the BCBS released its final paper on "Basel III leverage ratio framework and disclosure requirements", which requires banks to disclose the leverage ratio and its components, effective the first full fiscal quarter of 2015 (Q2 2015). The leverage ratio is defined as the capital measure divided by the exposure measure. The capital measure is currently defined as Tier 1 capital and the exposure measure is the sum of (a) on-balance sheet exposures; (b) derivative exposures; (c) securities financing transaction (SFT) exposures and (d) off-balance sheet items. The minimum leverage ratio is 3%. For further details, refer to the Capital Management section of our 2013 Annual Report.

The following table provides a summary of OSFI regulatory target ratios under Basel III. Our capital position remained strong during the quarter and our capital ratios remain well above OSFI regulatory targets.

Basel III Capital Ratios	OSFI regulatory target requirements for large banks under Basel III					RBC capital ratios as at April 30, 2014	Meet or exceed OSFI target ratios	OSFI target requirements as of (1)
	Minimum	Capital Conservation Buffer	Minimum including Capital Conservation Buffer	D-SIBs Surcharge (1)	Minimum including Capital Conservation Buffer and D-SIBs surcharge (1)			
Common Equity Tier 1 (%)	> 4.5%	2.5%	> 7.0%	1.0%	> 8.0%	9.7%	✓	2013/2016
Tier 1 capital (%)	> 6.0%	2.5%	> 8.5%	1.0%	> 9.5%	11.4%	✓	2014/2016
Total capital (%)	> 8.0%	2.5%	> 10.5%	1.0%	> 11.5%	13.2%	✓	2014/2016

- (1) The domestic systemically important banks (D-SIBs) surcharge will be applicable to risk weighted capital commencing January 1, 2016.

## Regulatory capital, RWA and capital ratios

(Millions of Canadian dollars, except percentage and multiple amounts)	As at		
	April 30 2014	January 31 2014	April 30 2013
<b>Capital</b>			
CET 1	\$ 33,756	\$ 32,998	\$ 28,288
Tier 1 capital	39,725	39,414	34,942
Total capital	46,237	45,978	43,527
<b>RWA</b>			
Credit risk	\$ 258,275	\$ 253,799	\$ 231,264
Market risk	46,104	44,055	37,850
Operational risk	44,715	43,898	42,323
<b>Total RWA</b>	<b>\$ 349,094</b>	<b>\$ 341,752</b>	<b>\$ 311,437</b>
<b>Capital ratios and multiples (1)</b>			
CET1 ratio	9.7%	9.7%	9.1%
Tier 1 capital ratio	11.4%	11.5%	11.2%
Total capital ratio	13.2%	13.5%	14.0%
Assets-to-capital multiple (2)	17.5X	17.6X	16.6X
Gross-adjusted assets (GAA) (billions) (2)	\$ 849.8	\$ 850.8	\$ 788.7

- (1) To enhance comparability among other global financial institutions, the following are our transitional capital ratios. The transitional CET1, Tier 1 and Total capital ratios as at April 30, 2014 were 11.8%, 11.8% and 13.5% respectively. Transitional is defined as capital calculated according to the current year's phase-in of regulatory adjustments and phase-out of non-qualifying capital instruments.
- (2) Effective the first quarter of 2013, Assets-to-capital multiple and GAA are calculated on a transitional basis as per OSFI CAR Guideline.

## Q2 2014 vs. Q1 2014

- (1) Represents rounded figures.
- (2) Internal capital generation of \$1.1 billion represents Net income available to shareholders less common and preferred shares dividends.

Our Basel III CET 1 ratio was 9.7% as at April 30, 2014, which was flat as compared to the prior quarter, mainly reflecting internal capital generation mostly offset by higher RWA, which included both business growth and an update to retail risk parameters. Common share repurchases reduced the CET1 ratio by 3 bps.

Our Basel III Tier 1 capital ratio was down 10 bps, mainly due to the redemption of \$850 million of preferred shares along with higher RWA, which included both business growth and an update to retail risk parameters, partially offset by internal capital generation.

RWA increased \$7 billion to \$349 billion, mainly reflecting higher credit risk RWA primarily from growth in the loan book along with an update to retail risk parameters, and an increase to market risk RWA largely reflecting higher risk levels in certain fixed income and equity portfolios. Our risk parameters are independently validated and updated on a regular basis. Further to the update of our retail risk parameters in the current quarter, we are in the process of conducting our review of the parameters related to our corporate and business lending portfolios, which is expected to be completed over the next few quarters. For further details, refer to the Credit risk section of our 2013 Annual Report.

Our Total capital ratio was down 30 bps, mainly due to the redemption of \$850 million of preferred shares along with higher RWA, which included both business growth and an update to retail risk parameters, partially offset by internal capital generation.

As at April 30, 2014, our Assets-to-capital multiple (ACM) (on a transitional basis) was 17.5X as compared to ACM as at January 31, 2014 of 17.6X. The decrease was mainly due to internal capital generation partially offset by the redemption of preferred shares.

**Selected capital management activity**

The following table provides our selected capital management activity for the three months and six months ended April 30, 2014.

(Millions of Canadian dollars, except number of shares)	For the three months ended April 30, 2014		For the six months ended April 30, 2014

(1) For further details about our capital management activity, refer to Note 10 of our Condensed Financial Statements.

(2) Effective February 24, 2010, we have the right to convert into common shares at our option, subject to certain restrictions.

(3) Dividend rate will reset every five years.

On November 1, 2013, we renewed our normal course issuer bid (NCIB) which permits us to purchase up to 30 million of our common shares. The NCIB expires on October 31, 2014. For the three and six months ended April 30, 2014, we have purchased 1.4 million of our common shares under the NCIB. The total cost of the share repurchase was \$100 million, comprised of a book value of \$14 million, with an additional \$86 million premium paid on repurchase.

As at May 16, 2014, the number of outstanding common shares and stock options was 1,441,356,056 and 9,627,524, respectively, and the number of outstanding preferred shares was 170,000,000, of which 20,000,000 are classified as preferred share liability. As at May 16, 2014, the number of Treasury shares – preferred and Treasury shares – common was (79,779) and (897,944), respectively.

### Attributed capital

Our methodology for allocating capital to our business segments is based on the higher of fully diversified economic capital and the Basel III regulatory capital requirements. The capital conversion rate is aligned with our target CET1 ratio set in our Capital Plan. Risk-based capital attribution provides a uniform base for performance measurement among business segments, which compares to our overall corporate return objective and facilitates management decisions in resource allocation in conjunction with other factors. Capital attribution to each business segment might vary due to the evolving changes in regulatory requirements such as the implementation of the CVA capital charge effective January 1, 2014, and the D-SIBs surcharge implementation commencing January 1, 2016.

The following table provides a summary of the components of our attributed capital:

(Millions of Canadian dollars)	For the three months ended		
	April 30 2014	January 31 2014	April 30 2013
Credit risk	\$ 13,050	\$ 13,000	\$ 11,700
Market risk (trading and non-trading)	3,600	3,900	3,400
Operational risk	4,300	4,200	4,050
Business and fixed asset risk	2,750	2,700	2,600
Insurance risk	550	500	450
Goodwill and intangibles	11,350	11,350	10,800
Regulatory capital allocation	4,400	3,900	2,650
Attributed capital	\$ 40,000	\$ 39,550	\$ 35,650
Under attribution of capital	5,550	4,500	4,200
<b>Average common equity</b>	<b>\$ 45,550</b>	<b>\$ 44,050</b>	<b>\$ 39,850</b>

### Q2 2014 vs. Q2 2013

Attributed capital increased \$4 billion largely due to an increase in Credit risk reflecting the impact of foreign exchange translation and business growth. Goodwill and intangible risk increased mainly due to the impact of foreign exchange translation along with the recognition of intangibles in certain businesses. Increase in Operational and Business risks was driven by growth in revenue. Regulatory capital allocation increased \$2 billion, mainly reflecting the inclusion of the CVA capital charge along with rate changes.

We remain well capitalized with current levels of available capital exceeding the attributed capital required to underpin all of our material risks. Unattributed capital increased from the prior year as we retained additional capital in anticipation of the additional capital requirements by OSFI for D-SIBs.

### Q2 2014 vs. Q1 2014

Attributed capital increased \$500 million, largely due to the increase in regulatory capital allocation driven by business growth, as well as an increase in both Operational and Business risks arising from higher gross revenue. This was partially offset by a decrease in non-trading Market risk.

## Additional financial information

## Exposures to selected financial instruments

## Exposure to U.S. subprime and Alt-A through residential mortgage-backed securities (RMBS), collateralized debt obligations (CDOs) and mortgages

(Millions of Canadian dollars)	As at							
	April 30, 2014				April 30, 2013			
	Subprime RMBS	Alt-A RMBS	CDOs that may contain subprime or Alt-A	Total	Subprime RMBS	Alt-A RMBS	CDOs that may contain subprime or Alt-A	Total
<b>Fair value of securities</b>	\$ 186	\$ 240	\$ –	\$ 426	\$ 184	\$ 178	\$ 16	\$ 378
<b>Fair value of securities by rating</b>								
AAA	\$ 4	\$ –	\$ –		\$ 12	\$ –	\$ –	
AA	37	4	–		38	3	–	
A	33	3	–		15	–	–	
BBB	25	5	–		24	–	–	
Below BBB	87	228	–		95	175	16	
<b>Total</b>	\$ 186	\$ 240	\$ –	\$ 426	\$ 184	\$ 178	\$ 16	\$ 378
<b>Fair value of securities by vintage</b>								
2003 (or before)	\$ –	\$ 24	\$ –		\$ 7	\$ 3	\$ –	
2004	8	44	–		6	30	–	
2005	84	114	–		83	83	16	
2006	57	42	–		60	36	–	
2007 and greater	37	16	–		28	26	–	
<b>Total</b>	\$ 186	\$ 240	\$ –	\$ 426	\$ 184	\$ 178	\$ 16	\$ 378
<b>Amortized cost of subprime/Alt-A mortgages (whole loans)</b>	\$ 8	\$ 37	\$ –	\$ 45	\$ 7	\$ 28	\$ –	\$ 35
<b>Total subprime and Alt-A exposures</b>	\$ 194	\$ 277	\$ –	\$ 471	\$ 191	\$ 206	\$ 16	\$ 413

## Sensitivities of fair value of securities to changes in assumptions:

100 bps increase in credit spread	\$ (7)	\$ (9)
100 bps increase in interest rates	(1)	(11)
20% increase in default rates	(4)	(5)
25% decrease in prepayment rates	(2)	4

Certain activities and transactions we enter into expose us to the risk of default of U.S. subprime and Alt-A residential mortgages. Our exposures to U.S. subprime and Alt-A residential mortgages of \$471 million represented less than 0.1% of our total assets as at April 30, 2014, compared to \$413 million or 0.1% in the prior year. The increase of \$58 million was primarily due to the purchase of certain securities and the impact of foreign exchange translation.

## Q2 2014 vs. Q2 2013

Our total holdings of RMBS noted in the table above may be exposed to U.S. subprime risk. As at April 30, 2014, our U.S. subprime RMBS exposure of \$186 million increased \$2 million or 1% from the prior quarter. Of this exposure, \$74 million or 40% of our related holdings were rated A and above, an increase of \$9 million from the prior year due to the purchase of certain securities.

As at April 30, 2014, U.S. subprime RMBS holdings rated AAA comprised 2% of our total U.S. subprime RMBS holdings compared with 7% in the prior year due to the sale of securities. As at April 30, 2014, our exposure to U.S. subprime loans of \$8 million was relatively unchanged with the prior quarter.

Of our total portfolio of RMBS, holdings with a fair value of \$240 million may be exposed to U.S. Alt-A risk. U.S. Alt-A exposures, increased \$62 million from the prior year due to the purchase of certain securities and the impact of foreign exchange translation. Approximately 24% of these RMBS were issued during 2006 and onwards, compared to 35% in the prior year. As at April 30, 2014, our exposure to U.S. Alt-A loans of \$37 million increased \$9 million from the prior year.

We currently do not hold CDOs that may be exposed to U.S. subprime or Alt-A risk. As at April 30, 2014, our U.S. subprime CDOs exposure decreased \$16 million from the prior year due to the sale of these securities. As at April 30, 2014, the fair value of our corporate CDOs, which were predominately comprised of \$1.2 billion of corporate collateralized loan obligations decreased \$0.6 billion from the prior year mainly due to the redemption of certain securities.

## Off-balance sheet arrangements

For our off-balance sheet arrangements including multi-seller conduits, structured investment vehicles and other variable interest entities as at April 30, 2014, refer to the Off-balance sheet arrangements section.

## Leveraged finance

Leveraged lending involves the provision of debt financing to borrowers where proceeds are generally used to finance equity buyouts, mergers and acquisitions, business recapitalizations, and bridge facilities and meet certain leverage criteria. We revised our definition during the quarter as we previously defined leveraged finance as primarily being related with a financial sponsor-related entity. As at April 30, 2014, our total commitments, including funded and unfunded amounts, were \$15.8 billion.

## Commercial mortgage-backed securities

The fair value of our total direct holdings of commercial mortgage-backed securities was \$124 million as at April 30, 2014.

## Assets and liabilities measured at fair value

Our financial instruments at fair value are classified as Level 1, 2, or 3, in accordance with the fair value hierarchy set out in IFRS 13, *Fair Value Measurement*. For further details on the fair value of our financial instruments and transfers between levels of the fair value hierarchy, refer to Note 3 of our Condensed Financial Statements.

The following tables presents the total fair value of each major class of financial assets and financial liabilities measured at fair value and the percentage of the fair value of each class categorized as Level 1, 2, or 3 as at April 30, 2014.

(Millions of Canadian dollars, except percentage amounts)	As at April 30, 2014				
	Fair value (1)	Level 1 (1)	Level 2 (1)	Level 3 (1)	Total
<b>Financial assets</b>					
Securities at FVTPL	\$ 148,398	41%	58%	1%	100%
Available-for-sale	42,682	15%	73%	12%	100%
Loans – Wholesale	2,312	0%	80%	20%	100%
Derivatives	107,286	2%	97%	1%	100%
Other assets	997	61%	39%	0%	100%
<b>Financial liabilities</b>					
Deposits	\$ 72,094	0%	92%	8%	100%
Derivatives	108,495	2%	96%	2%	100%

(1) The derivative assets and liabilities presented in the table above do not reflect the impact of netting.

## Accounting and control matters

### Summary accounting policies and estimates

Our Condensed Financial Statements are presented in compliance with International Accounting Standard (IAS) 34, *Interim Financial Reporting*. The significant accounting policies are described in Note 2 of our Condensed Financial Statements and Note 2 of our 2013 Annual Consolidated Financial Statements.

### Changes in accounting policies and disclosure

We have adopted several new and amended IFRS standards effective November 1, 2013. These new and amended standards include IFRS 10 *Consolidated Financial Statements*, IFRS 11 *Joint Arrangements*, IFRS 12 *Disclosure of Interest in Other Entities*, IAS 27 *Separate Financial Statements*, IAS 28 *Investments in Associates and Joint Ventures*, IFRS 13 *Fair Value Measurement*, IAS 19 *Employee Benefits*, IFRS 7 *Disclosure – Offsetting Financial Assets and Financial Liabilities*, and the own credit provisions of IFRS 9 *Financial Instruments*. Refer to Note 2 of our Condensed Financial Statements for details of these changes.

## Controls and procedures

### Disclosure controls and procedures

As of April 30, 2014, management evaluated, under the supervision of and with the participation of the Chief Executive Officer and the Chief Administrative Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as defined under rules adopted by the United States Securities and Exchange Commission. Based on that evaluation, the Chief Executive Officer and the Chief Administrative Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of April 30, 2014.

### Internal control over financial reporting

No changes were made in our internal control over financial reporting during the quarter ended April 30, 2014, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## Related party transactions

Our policies and procedures for related party transactions have not changed significantly from October 31, 2013. For further information, refer to Note 28 of our 2013 Annual Consolidated Financial Statements.

## EDTF recommendations index

On October 29, 2012, the Enhanced Disclosure Task Force (EDTF), established by the Financial Stability Board, issued its report Enhancing the Risk Disclosures of Banks, which included 32 recommendations aimed at achieving transparent, high-quality risk disclosures. As a result, our enhanced disclosures have been provided in our 2013 Annual Report, Q2 2014 Report to Shareholders (RTS) and Supplementary Financial Information package (SFI).

The following index summarizes our disclosure by EDTF recommendation:

Type of Risk	Recommendation	Disclosure	Location of disclosure		
			RTS page	Annual Report page	SFI page
General	1	Table of contents for EDTF risk disclosure	46	98	
	2	Define risk terminology and measures	–	46-49	–
	3	Top and emerging risks	–	183-185	–
	4	New regulatory ratios	33-34, 40	44-45	–
Risk governance, risk management and business model	5	Risk management organization	–	65,77	–

(1) We are required to maintain balances with central banks and other regulatory authorities. The total balances were \$2.3 billion as at April 30, 2014 (January 31, 2014 – \$2.6 billion; October 31, 2013 – \$2.6 billion; April 30, 2013 – \$2.6 billion; January 31, 2013 – \$2.6 billion; October 31, 2012 – \$2.1 billion).

The accompanying notes are an integral part of these Interim Condensed Consolidated Financial Statements. Comparative amounts prior to November 1, 2013 have been restated for the adoption of new accounting standards. Refer to Note 2.

**Note 1 General information**

Our unaudited Interim Condensed Consolidated Financial Statements (Condensed Financial Statements) are presented in compliance with International Accounting Standard (IAS) 34, *Interim Financial Reporting*. The Condensed Financial Statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the audited 2013 Annual Consolidated Financial Statements and the accompanying notes included on pages 99 to 180 in our 2013 Annual Report. Tabular information is stated in millions of Canadian dollars, except per share amounts and percentages. On May 21, 2014, the Board of Directors authorized the Condensed Financial Statements for issue.

**Note 2 Summary of significant accounting policies, estimates and judgments**

Except as indicated below, the Condensed Financial Statements have been prepared using the same accounting policies and methods used in preparation of our audited 2013 Annual Consolidated Financial Statements.

**Changes in accounting policies**

During the quarter, we adopted the following new accounting standard.

**Own credit provisions of IFRS 9 Financial Instruments (IFRS 9)**

The own credit provisions of IFRS 9 change the accounting for financial liabilities designated as at fair value through profit or loss (FVTPL). Previously under IAS 39 *Financial Instruments: Recognition and Measurement* (IAS 39), all fair value changes in financial liabilities designated as at FVTPL were recognized in net income. Under IFRS 9, the changes in the fair value of these liabilities attributable to our own credit are recognized in Other comprehensive income (OCI) rather than income. Amounts recognized in OCI will not be reclassified subsequently to net income.

We prospectively adopted the own credit provisions of IFRS 9 with an initial application date of November 1, 2013. Fair value changes in our financial liabilities designated as at FVTPL attributable to changes in our own credit risk are now recorded in OCI. The remaining fair value changes continue to be recorded in Trading revenue or Non-interest income – Other. We did not restate our quarterly or annual results for periods prior to February 1, 2014 as the amounts were not significant. Amounts recognized in the Statement of Income in the first quarter of 2014 have been recorded in OCI in this quarter.

The table below presents the impact of adopting the above standard on our Consolidated Statement of Comprehensive Income and Consolidated Statement of Income for the six months ended April 30, 2014. Results as reported under the own credit provisions of IFRS 9 are compared to the pro-forma results had we continued to apply IAS 39. The adoption did not impact our Consolidated Balance Sheet.

(Millions of Canadian dollars, except per share amounts)	For the six months ended April 30, 2014		
	Pro-forma (IAS 39)	Impact	As reported (IFRS 9)
<b>Consolidated Statement of Comprehensive Income</b>			
Total other comprehensive income, net of taxes	\$ 799	\$ (82)	\$ 717
<b>Consolidated Statement of Income</b>			
Non-interest income – Trading revenue	\$ 503	\$ 107	\$ 610
Non-interest income – Other	231	5	236
Non-interest expense – Human resources (1)	5,548	36	5,584
Net income	4,237	56	4,293
Basic earning per share (in dollars)	2.82	0.04	2.86
Diluted earnings per share (in dollars)	2.81	0.04	2.85

(1) Adjustments relate to variable compensation arrangements.

During the first quarter, we adopted the following new accounting standards.

**Amendments to IAS 19 Employee Benefits (IAS 19)**

The amendments to IAS 19 change the accounting for pension and other post-employment benefits, specifically with respect to actuarial gains and losses, past service costs, interest expense and return on plan assets. The amended standard eliminates the deferral and amortization of actuarial gains and losses in net income, instead requiring the immediate recognition of actuarial gains and losses in OCI. Past service costs are immediately recognized in the period in which a plan amendment occurs. Net interest, calculated by applying the discount rate to the Net defined benefit liability or asset, replaces the Interest cost and Expected return on plan assets components of Defined benefit pension expense. The amendments also introduce a number of interim and annual disclosure requirements for defined benefit plans.

We retrospectively adopted the amendments on November 1, 2013. Under the amended standard, we recognize the present value of our defined benefit obligation under each of our defined benefit plans, less the fair value of the plan's assets, as a liability reported in Employee benefit liabilities on our Consolidated Balance Sheets. For plans where there is a net defined benefit asset, the amount is reported as an asset in Employee benefit assets. New interim disclosures have been provided in Note 9.

**IFRS 10 Consolidated Financial Statements (IFRS 10)**

IFRS 10 replaces the consolidation requirements in IAS 27 *Consolidated and Separate Financial Statements* (IAS 27) and SIC-12 *Consolidation – Special Purpose Entities* (SIC-12) and provides a single consolidation model applicable to all types of entities. IFRS 10 is based on the existing principle that an entity should consolidate all other entities that it controls.

**Note 2 Summary of significant accounting policies, estimates and judgments** (continued)

Under IAS 27 and SIC-12, control was based on having a majority of the voting interests or, for special purpose entities (SPEs), an overall assessment of the purpose and design of the entity, our decision making rights, and our exposure to the majority of the risks and rewards of ownership. Under IFRS 10, control is based on three conditions, which must all be satisfied: (i) decision making power over the relevant activities, (ii) exposure to variable returns, and (iii) a link between decision making power and returns. IFRS 10 introduces a substantial amount of application guidance that expands on new and existing principles related to the determination of control. It places a greater emphasis on decision making power by making it a required condition for control, removes the bright lines for assessing exposure to risks and rewards, and introduces new considerations related to our role as a principal or an agent in entities over which we have decision making power. The determination of control is based on the current facts and circumstances and is to be continuously assessed.

We retrospectively adopted IFRS 10 on November 1, 2013. On adoption, RBC Capital Trust II has been deconsolidated as our involvement does not expose us to variable returns. See Note 20 of our 2013 Annual Report for further details on our innovative capital instruments.

**IFRS 11 Joint Arrangements (IFRS 11)**

IFRS 11 requires a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations arising from the arrangement. IFRS 11 requires a joint operator to recognize and measure the assets and liabilities in relation to its interest in the arrangement, and a joint venturer to apply the equity method of accounting. We retrospectively adopted IFRS 11 on November 1, 2013. The adoption resulted in a change to our method of accounting for joint ventures from proportionate consolidation to the equity method.

**IFRS 12 Disclosure of Interest in Other Entities (IFRS 12)**

IFRS 12 provides enhanced guidance on the annual disclosure requirements of a reporting entity's interests in other entities. The standard requires an entity to disclose information that helps users to evaluate (i) the nature of, and risks associated with, a reporting entity's interests in subsidiaries, joint arrangements, associates and unconsolidated structured entities (off-balance sheet structures); and (ii) the effect of those interests on the entity's financial position, financial performance and cash flows. We adopted IFRS 12 on November 1, 2013; however, the adoption of IFRS 12 did not impact the Condensed Financial Statements. The annual disclosures required by IFRS 12, including comparative periods, will be presented in our 2014 Annual Consolidated Financial Statements.

**IAS 27 Separate Financial Statements (IAS 27) and IAS 28 Investments in Associates and Joint Ventures (IAS 28)**

As a consequence of the new IFRS standards IFRS 10, IFRS 11 and IFRS 12, the IASB issued amended and retitled IAS 27 *Separate Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures*. We retrospectively adopted these new requirements on November 1, 2013. The adoption did not impact the Condensed Financial Statements.

**IFRS 13 Fair Value Measurement (IFRS 13)**

IFRS 13 provides a revised definition of fair value and sets out a framework for measuring fair value in a single standard. IFRS 13 also requires more comprehensive disclosure requirements on fair value measurement. The measurement and disclosure requirements of IFRS 13 apply when another standard requires or permits the item to be measured at fair value with limited exceptions. We prospectively adopted IFRS 13 on November 1, 2013. The adoption did not have a material impact on the Condensed Financial Statements. New interim disclosures required by IAS 34 as a result of the adoption of IFRS 13 are presented in Note 3.

**IFRS 7 Disclosure – Offsetting Financial Assets and Financial Liabilities (IFRS 7)**

The amendments to IFRS 7 require expanded disclosures to enable users to assess the effect of offsetting arrangements on an entity's financial position. The amendments require entities to disclose both gross and net amounts associated with master netting agreements and similar arrangements, including the effects of financial collateral, whether or not they are presented net on the balance sheet. We adopted the amendments to IFRS 7 on November 1, 2013. The adoption of the amendments did not impact the Condensed Financial Statements. The annual disclosures required by the amendments, including comparative periods, will be presented in our 2014 Annual Consolidated Financial Statements.

The tables below present the impact of the above standards adopted during the first quarter on our Consolidated Balance Sheets as at October 31, 2013, April 30, 2013 and October 31, 2012 and Consolidated Statements of Income for the years ended October 31, 2013 and 2012.

**Note 3 Fair value of financial instruments**

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. We determine fair value by incorporating all factors that market participants would consider in setting a price, including commonly accepted valuation approaches.

The Board of Directors provides oversight on valuation of financial instruments, primarily through the Audit Committee and Risk Committee. The Audit Committee reviews the presentation and disclosure of financial instruments that are measured at fair value, while the Risk Committee assesses adequacy of governance structures and control processes for these instruments.

We have established policies, procedures and controls for valuation methodologies and techniques to ensure fair value is reasonably estimated. Major valuation processes and controls include, but are not limited to, profit and loss decomposition, independent price verification (IPV) and model validation standards. These control processes are managed by either Finance or Group Risk Management and are independent of the relevant businesses and their trading functions. Profit and loss decomposition is a process to explain the fair value changes of certain positions and is performed daily for trading portfolios. All fair value instruments are subject to IPV, a process whereby trading function valuations are verified against external market prices and other relevant market data. Market data sources include traded prices, brokers and price vendors. Other valuation techniques are used when a price or quote is not available. Some valuation processes use valuation models to determine fair value. We have a systematic and consistent approach to control model use. Valuation models are approved for use within our model risk management framework. The framework addresses, among other things, model development standards, validation processes and procedures, and approval authorities. One significant model control is the validation process. The purpose of model validation is to ensure that a model is suitable for its intended use and to set limitations for its use. All models are re-validated regularly.

Other controls include the use of a documented third-party pricing source list. The third-party pricing source list gives priority to those services and prices having the highest and most consistent accuracy. The level of accuracy is developed over time by comparing third-party price values to traders' or system values, to other pricing service values and, when available, to actual trade data.

Refer to Note 2 in our 2013 Annual Report for the valuation techniques used to fair value our significant financial assets and liabilities. There have been no significant changes to the valuation techniques. As described in Note 10, we have issued new preferred share liabilities which are valued based on recent transaction prices.

In determining fair value, a hierarchy is used which prioritizes the inputs to valuation techniques. The fair value hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Determination of fair value based on this hierarchy requires the use of observable market data whenever available. Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that we have the ability to access at the measurement date. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and model inputs that are either observable, or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 inputs are one or more inputs that are unobservable and significant to the fair value of the asset or liability. Unobservable inputs are used to measure fair value to the extent that observable inputs are not available at the measurement date. The availability of inputs for valuation may affect the selection of valuation techniques. The classification of a financial instrument in the hierarchy for disclosure purposes is based upon the lowest level of input that is significant to the measurement of fair value.

**Carrying value and fair value of selected financial instruments**

The following tables provide a comparison of the carrying and fair values for each classification of financial instruments.

	As at April 30, 2014								
	Carrying value and fair value			Carrying value	Fair value			Total carrying amount	Total fair value
	Financial instruments classified as at FVTPL	Financial instruments designated as at FVTPL	Available-for-sale instruments measured at fair value	Loans and receivables and non-trading liabilities at amortized cost	Loans and receivables and non-trading liabilities	Held-to-maturity investments measured at amortized cost

(1) Business and government includes deposits from regulated deposit-taking institutions other than regulated banks.

(2) Bank refers to regulated banks.

(3) Fair values of certain deposits have been revised from results previously reported.

The following table presents the changes in the fair value of our financial liabilities designated as at FVTPL as well as their contractual maturity and carrying amounts. For our financial liabilities designated as at FVTPL, we measure the change in fair value attributable to changes in credit risk as the difference between the total change in the fair value of the instrument during the period and the change in the fair value attributable to changes in market conditions such as changes in a benchmark interest rate or foreign exchange rate.

**Liabilities designated as at fair value through profit or loss**

	As at April 30, 2014				
	Contractual maturity amount	Carrying value	Difference between carrying value and contractual maturity amount	Changes in fair value for the six months ended attributable to changes in credit risk included in other comprehensive income for positions still held	Cumulative change in fair value attributable to changes in credit risk for positions still held (1)
(Millions of Canadian dollars)

<b>Total</b>	<b>\$ 130,297</b>	<b>\$ 130,388</b>	<b>\$ 91</b>	<b>\$ 109</b>	<b>\$ 94</b>

(1) The cumulative change is measured from the initial recognition of the liabilities designated as at FVTPL. For the six months ended April 30, 2014, \$3 million of fair value losses previously included in OCI were realized for financial liabilities derecognized during the period.

(2) Business and government includes deposits from regulated deposit-taking institutions other than regulated banks.

(3) Bank refers to regulated banks.

**Fair value of assets and liabilities measured on a recurring basis and classified using the fair value hierarchy**

The following tables present the financial instruments that are measured at fair value on a recurring basis and classified by the fair value hierarchy as set out in IFRS 13.

**Note 3 Fair value of financial instruments** (continued)

- (1) As at April 30, 2014, residential and commercial mortgage-backed securities (MBS) included in all fair value levels of Trading securities were \$5,117 million and \$91 million (January 31, 2014 - \$5,992 million and \$114 million; October 31, 2013 - \$4,934 million and \$93 million; April 30, 2013 - \$10,052 million and \$82 million), respectively, and in all fair value levels of AFS securities, \$5,301 million and \$33 million (January 31, 2014 - \$3,627 million and \$34 million; October 31, 2013 - \$3,512 million and \$35 million; April 30, 2013 - \$3,550 million and \$45 million), respectively.
- (2) OECD stands for Organisation for Economic Co-operation and Development.
- (3) CDOs stand for Collateralized Debt Obligations.
- (4) Excludes \$14 million and \$387 million of AFS and held-to-maturity securities (January 31, 2014 - \$16 million and \$410 million; October 31, 2013 - \$15 million and \$401 million; April 30, 2013 - \$14 million and \$483 million), respectively, that are carried at cost.
- (5) IFRS 13 requirements are applied on a prospective basis and the standard permits an exception, through an accounting policy choice, to measure the fair value of a portfolio of financial instruments on a net open risk position basis when certain criteria are met. We have elected to use this policy choice to determine fair value of certain portfolios of financial instruments, primarily derivatives, on a net exposure to market or credit risk. The valuation adjustment amounts in this table include those determined on a portfolio basis.

**Note 3 Fair value of financial instruments** (continued)**Quantitative information about fair value measurements using significant unobservable inputs (Level 3 Instruments)**

The following table presents fair values of our significant Level 3 financial instruments, valuation techniques used to determine their fair values, ranges and weighted averages of unobservable inputs.

As at April 30, 2014 (Millions of Canadian dollars, except for prices, percentages and ratios)

Products	Reporting line in the fair value hierarchy table	Fair value		Valuation techniques	Significant unobservable inputs (1)	Range of input values (2), (3), (4)

- The acronyms stand for the following: (i) Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA); (ii) Price / Earnings (P/E); (iii) Enterprise Value (EV); (iv) Revenue (Rev); and (v) Consumer Price Index (CPI).
- Comparative information relating to periods before November 1, 2013 is not required by IFRS 13.
- The low and high input values represent the actual highest and lowest level inputs used to value a group of financial instruments in a particular product category. These input ranges do not reflect the level of input uncertainty, but are affected by the different underlying instruments within the product category. The input ranges will therefore vary from period to period based on the characteristics of the underlying instruments held at each balance sheet date. Where provided, the weighted average of the input values is calculated based on the relative fair values of the instruments within the product category. The weighted averages for derivatives are not presented in the table as they would not provide a comparable metric; instead, distribution of significant unobservable inputs within the range for each product category is indicated in the table.
- Price-based inputs are significant for certain debt securities, and are based on external benchmarks, comparable proxy instruments or pre-quarter-end trade data. For these instruments, the price input is expressed in dollars for each \$100 par value. For example, with an input price of \$105, an instrument is valued at a premium over its par value.
- The level of aggregation and diversity within each derivative instrument category may result in certain ranges of inputs being wide and unevenly distributed across the range. In the table, we indicated whether the majority of the inputs are concentrated toward the upper, middle, or lower end of the range, or evenly distributed throughout the range.
- Fair value of securities with liquidity discount inputs totalled \$96 million (January 31, 2014 – \$134 million).
- Net Asset Value (NAV) of a hedge fund is total fair value of assets less liabilities divided by the number of fund units. The NAVs of the funds and the corresponding equity derivatives referenced to NAVs are not considered observable as we cannot redeem certain of these hedge funds at NAV prior to the next quarter end. Private equities are valued based on NAV or valuation techniques. The range for NAV per unit or price per share has not been disclosed for the hedge funds or private equities due to the dispersion of prices given the diverse nature of the investments.
- Municipal guaranteed investment certificates were transferred out of Level 3 in the second quarter of 2014.
- The structured notes contain embedded equity or interest rate derivatives with unobservable inputs that are similar to those of the equity or interest rate derivatives.
- Other primarily includes certain insignificant instruments such as commodity derivatives, foreign exchange derivatives, credit derivatives and bank-owned life insurance.

**Note 3 Fair value of financial instruments** (continued)**Sensitivity to unobservable inputs and interrelationships between unobservable inputs***Yield, credit spreads/discount margins*

A financial instrument's yield is the interest rate used to discount future cash flows in a valuation model. An increase in the yield, in isolation, would result in a decrease in a fair value measurement and vice versa. A credit spread/discount margin is the difference between a debt instrument's yield and a benchmark instrument's yield. Benchmark instruments have high credit quality ratings, similar maturities and are often government bonds. The credit spread/discount margin therefore represents the discount rate used to present value cash flows of an asset to reflect the market return required for uncertainty in the estimated cash flows. The credit spread or discount margin for an instrument forms part of the yield used in a discounted cash flow calculation. Generally, an increase in the credit spread or discount margin will result in a decrease in fair value, and vice versa.

*Funding spread*

Funding spreads are credit spreads specific to our funding or deposit rates. A decrease in funding spreads, on its own, will increase fair value of our liabilities, and vice versa.

*Default rates*

A default rate is the rate at which borrowers fail to make scheduled loan payments. A decreasing default rate will typically increase the fair value of the loan, and vice versa. This effect will be significantly more pronounced for a non-government guaranteed loan than a government guaranteed loan.

*Prepayment rates*

A prepayment rate is the rate at which a loan will be repaid in advance of its expected amortization schedule. Prepayments change the future cash flows of a loan. An increase in the prepayment rate in isolation will result in an increase in fair value when the loan interest rate is lower than the then current reinvestment rate, and a decrease in the prepayment rate in isolation will result in a decrease in fair value when the loan interest rate is lower than the then current reinvestment rate. Prepayment rates are generally negatively correlated with interest rates.

*Recovery and loss severity rates*

A recovery rate is an estimation of the amount that can be collected in a loan default scenario. The recovery rate is the percentage of the recovered amount divided by the loan balance due. The inverse concept of recovery is loss severity. Loss severity is an estimation of the loan amount not collected when a loan defaults. The loss severity rate is the percentage of the loss amount divided by the loan balance due. Generally, an increase in the recovery rate or a decrease in the loss severity rate will increase the loan fair value, and vice versa.

Unobservable inputs of Auction Rate Securities (ARS), including the above discount margin, default rate, prepayment rate, recovery and loss severity rates, may not be independent of each other. The discount margin of ARS can be affected by a change in default rate, prepayment rate, or recovery and loss severity rates. Discount margins will generally decrease when default rates decline or when recovery rates increase. Prepayments may cause fair value to either increase or decrease.

*Capitalization rates*

A capitalization rate is a rate of return on a real estate property investment calculated by dividing a property's income by the property's value. A lower capitalization rate increases the property value, and vice versa.

*Volatility rates*

Volatility measures the potential variability of future prices and is often measured as the standard deviation of price movements. Volatility is an input to option pricing models used to value derivatives and issued structured notes. Volatility is used in valuing equity, interest rate, commodity and foreign exchange options. A higher volatility rate means that the underlying price or rate movements are more likely to occur. Higher volatility rates may increase or decrease an option's fair value depending on the option's terms. The determination of volatility rates is dependent on various factors, including but not limited to, the underlying's market price, the strike price and maturity.

*Dividend yields*

A dividend yield is the underlying equity's expected dividends expressed as an annual percentage of its price. Dividend yield is used as an input for forward equity price and option models. Higher dividend yields will decrease the forward price, and vice versa. A higher dividend yield will increase or decrease an option's value, depending on the option's terms.

*Correlation rates*

Correlation is the linear relationship between the movements in two different variables. Correlation is an input to the valuation of derivative contracts and issued structured notes when an instrument's payout is determined by correlated variables. When variables are positively correlated, an increase in one variable will result in an increase in the other variable. When variables are negatively correlated, an increase in one variable will result in a decrease in the other variable. The referenced variables can be within a single asset class or market (equity, interest rate, commodities, credit and foreign exchange) or between variables in different asset classes (equity to foreign exchange, or interest rate to foreign exchange, etc.). Changes in correlation will either increase or decrease a financial instrument's fair value depending on the terms of its contractual payout.

*Interest rates*

An interest rate is the percentage amount charged on a principal or notional amount. Increasing interest rates will decrease the discounted cash flow value of a financial instrument, and vice versa.

*Consumer Price Index swap rates*

A Consumer Price Index (CPI) swap rate is expressed as a percentage of an increase in the average price of a basket of consumer goods and services, such as transportation, food and medical care. An increase in the CPI swap rate will cause inflation swap payments to be larger, and vice versa.

*EV/EBITDA multiples, P/E multiples, EV/Rev multiples, and liquidity discounts*

Private equity valuation inputs include EV/EBITDA multiples, P/E multiples and EV/Rev multiples. These are used to calculate either enterprise value or share value of a company based on a multiple of earnings or revenue estimates. Higher multiples equate to higher fair values for all multiple types, and vice versa. A liquidity discount may be applied when few or no transactions exist to support the valuations.

**Changes in fair value measurement for instruments measured on a recurring basis and categorized in Level 3**

The following tables present the changes in fair value measurements on a recurring basis for instruments included in Level 3 of the fair value hierarchy.

	For the three months ended April 30, 2014								Changes in unrealized gains (losses) included in earnings for assets and liabilities for the period ended April 30, 2014 for positions still held

(1) These amounts include the foreign currency translation gains or losses arising on consolidation of foreign subsidiaries relating to the Level 3 instruments, where applicable. The unrealized gains on AFS securities were \$41 million recognized in Other comprehensive income for the three months ended April 30, 2014 (January 31, 2014 – gains of \$63 million; April 30, 2013 – gains of \$6 million) and gains of \$104 million for the six months ended April 30, 2014 (April 30, 2013 – losses of \$17 million), excluding the translation gains or losses arising on consolidation.

(2) Other includes amortization of premiums or discounts recognized in net income.

(3) Net derivatives as at April 30, 2014 included derivative assets of \$647 million (January 31, 2014 – \$1,289 million, October 31, 2013 – \$1,194 million; April 30, 2013 – \$786 million) and derivative liabilities of \$1,936 million (January 31, 2014 – \$2,382 million, October 31, 2013 – \$2,748 million; April 30, 2013 – \$2,646 million).

(1) Comparative information relating to periods before November 1, 2013 is not required by IFRS 13.

**Transfers between fair value hierarchy levels for instruments carried at fair value on a recurring basis**

Transfers between Level 1 and Level 2, and transfers in and out of Level 3 are assumed to occur at the end of the period. For an asset or a liability that transfers into Level 3 during the period, the entire change in fair value for the period is excluded from the Total realized/unrealized gains (losses) included in earnings column of the above reconciliation, whereas for transfers out of Level 3 during the period, the entire change in fair value for the period is included in the same column of the above reconciliation.

Transfers between Level 1 and Level 2 are dependent on whether fair value is obtained on the basis of quoted market prices in active markets (Level 1) as opposed to fair value estimated using observable inputs in a discounted cash flow model (Level 2). For the three months ended April 30, 2014, \$585 million of certain government bonds reported in Trading and Available-for-sale U.S. state, municipal and agencies debt, and \$150 million included in Obligations related to securities sold short were transferred from Level 1 to the corresponding Level 2 balances (January 31, 2014—\$552 million and \$191 million).

During the three months ended April 30, 2014, significant transfers out of Level 3 to Level 2 included: (i) over-the-counter equity options of \$668 million derivative-related assets and \$660 million derivative related liabilities for a net balance of \$8 million in Other contracts due to increased equity volatility observability; (ii) municipal guaranteed investment certificates of \$462 million in Business and government deposits as yields became observable; and (iii) certain equity-linked notes of \$156 million in Personal deposits as the unobservable inputs did not significantly affect their fair values.

During the three months ended January 31, 2014, significant transfers out of Level 3 to Level 2 included: (i) Other OECD government debt of \$366 million due to improved price transparency; (ii) certain equity-linked notes of \$704 million in Personal deposits; (iii) bank-owned life insurance portfolio of \$311 million backed by underlying assets with observable prices; and (iv) cross currency swaps of \$149 million in Net derivative balances due to shorter maturities.

**Positive and negative fair value movements of Level 3 financial instruments measured on a recurring basis from using reasonably possible alternative assumptions**

A financial instrument is classified as Level 3 in the fair value hierarchy if one or more of its unobservable inputs may significantly affect the measurement of its fair value. In preparing the financial statements, appropriate levels for these unobservable input parameters are chosen so that they are consistent with prevailing market evidence or management judgment. Due to the unobservable nature of the prices or rates, there may be uncertainty about valuation of these Level 3 financial instruments.

The following table summarizes the impact to fair values of Level 3 financial instruments using reasonably possible alternative assumptions. This sensitivity disclosure is intended to illustrate the potential impact of the relative uncertainty in the fair value of Level 3 financial instruments. In reporting the sensitivities below, we have considered offsetting balances in instances when: (i) the move in valuation factor caused an offsetting positive and negative fair value movement, (ii) both offsetting instruments are in Level 3, and (iii) when exposures are managed and reported on a net basis. With respect to overall sensitivity, it is unlikely in practice that all reasonably possible alternative assumptions would be simultaneously realized.

### Sensitivity results

As at April 30, 2014, the effects of applying other reasonably possible alternative assumptions to the Level 3 asset positions would be an increase of \$153 million and a reduction of \$214 million in fair value, of which \$65 million and \$124 million would be recorded in Other components of equity. The effects of applying these assumptions to the Level 3 liability positions would result in a decrease of \$124 million and an increase of \$108 million in fair value.

**Note 3 Fair value of financial instruments** (continued)**Level 3 valuation inputs and approaches to developing reasonably possible alternative assumptions**

The following is a summary of the unobservable inputs of the Level 3 instruments and our approaches to develop reasonably possible alternative assumptions used to determine sensitivity.

Financial assets or liabilities	Sensitivity methodology
Asset-backed securities, corporate debt, government debt and municipal bonds	The positive and negative sensitivities are determined based on plus or minus one standard deviation of the bid-offer spreads or input prices if a sufficient number of prices is received, or using high and low vendor prices as reasonably possible alternative assumptions.
Auction Rate Securities	In calculating the sensitivity of these ARS, we decreased the discount margin between 11% and 14% and increased the discount margin between 18% and 34%, depending on the specific reasonable range of fair value uncertainty for each particular financial instrument's market. Changes to the discount margin reflect historic monthly movements in the student loan asset-back securities market.
Private equities, hedge fund investments and related equity derivatives	NAVs of the private equity positions, hedge funds and related equity derivatives are provided by the fund managers, and as a result, there are no other reasonably possible alternative assumptions for these investments.
Interest rate derivatives	Sensitivities of interest rate and cross currency swaps are derived using plus or minus one standard deviation of these inputs, and an amount based on model and parameter uncertainty, where applicable.
Equity derivatives	Sensitivity of the Level 3 position will be determined by shifting the unobservable model inputs by plus or minus one standard deviation of the pricing service market data including volatility, dividends or correlations, as applicable.
Bank funding and deposits	Sensitivities of deposits are calculated by shifting the funding curve by plus or minus certain basis points.
Structured notes	Sensitivities for interest-rate-linked and equity-linked structured notes are derived by adjusting inputs by plus or minus one standard deviation, and for other deposits, by estimating a reasonable move in the funding curve by plus or minus certain basis points.
Municipal guaranteed investment certificates	Sensitivity is calculated using plus or minus one standard deviation of the funding curve bid-offer spread.

	Realized gains	\$ 77	\$ 40	\$ 51	\$ 117
Realized losses	(1)	(7)	(3)	(8)	(7)
Impairment losses	(5)	(10)	(4)	(15)	(17)
	\$ 71	\$ 23	\$ 44	\$ 94	\$ 110

- (1) The following related to our insurance operations are excluded from Net gain (loss) on AFS securities and included in Insurance premiums, investment and fee income on the Consolidated Statement of Income: Realized gains for the three months ended April 30, 2014 were \$3 million (January 31, 2014 – \$6 million; April 30, 2013 – \$nil); Realized gains for the six months ended April 30, 2014 were \$9 million (April 30, 2013 – \$nil). Realized losses for the three and six months ended April 30, 2014 were \$1 million. There were no realized losses for the three months ended January 31, 2014 and April 30, 2013, or for the six months ended April 30, 2013. There were also no impairment losses related to our insurance operations for the three or six months ended April 30, 2014 and April 30, 2013.

AFS securities are assessed for objective evidence of impairment at each reporting date and more frequently when conditions warrant. Depending on the nature of the securities under review, we apply specific methodologies to assess whether the cost/amortized cost of the security would be recovered.

The total cost/amortized cost of the AFS portfolio, as at April 30, 2014, increased by \$2,382 million or 6% compared to January 31, 2014. The increase is largely due to net purchases of Canadian government debt, Corporate debt and other debt, and U.S. state, municipal and agencies debt.

Gross unrealized gains of \$830 million, as of April 30, 2014, decreased by \$53 million or 6% compared to January 31, 2014. This decrease is mainly from sales as well as declines in fair value from increasing interest rates on Canadian government debt – Federal.

Gross unrealized losses of \$250 million, as of April 30, 2014, decreased by \$34 million or 12% compared to January 31, 2014. This decrease mainly reflects fair value improvements from tightening credit spreads and lower long term interest rates as well as partial redemptions of U.S. state, municipal and agencies debt.

Management believes that there is no objective evidence of impairment on the above-mentioned securities that are in an unrealized loss position as at April 30, 2014.

### Held-to-maturity securities

Held-to-maturity securities stated at amortized cost are subject to periodic impairment review and are classified as impaired when, in management's opinion, there is no longer reasonable assurance of the timely collection of the full amount of principal and interest. The impairment review of held-to-maturity securities is primarily based on the impairment model for loans. Management believes that there is no objective evidence of impairment on our held-to-maturity securities as at April 30, 2014.

### Net gain (loss) on available-for-sale securities

During the three months ended April 30, 2014, \$71 million of net gains were recognized in Non-interest income as compared to \$23 million in the prior quarter and \$44 million in the prior year. The current period reflects net realized gains of \$76 million mainly comprised of distributions from and gains on sale of certain Equities and sale of Canadian government debt. Partially offsetting the net realized gains are \$5 million of impairment losses on certain Equities.

For the six months ended April 30, 2014, \$94 million of net gains were recognized in Non-interest income as compared to \$110 million in the prior year. The current period reflects net realized gains of \$109 million mainly comprised of distributions from and gains on sale of certain Equities, redemption and restructuring of certain Asset-backed securities, and sale of certain Canadian government debt. Partially offsetting the net realized gains are \$15 million of impairment losses on certain Equities.

## Note 7 Significant dispositions

## Personal &amp; Commercial Banking

On January 29, 2014, we announced that we have entered into a definitive agreement to sell RBC Royal Bank (Jamaica) Limited and RBTT Securities Jamaica Limited (collectively, RBC Jamaica). The transaction is subject to customary closing conditions, including regulatory approvals and is expected to close in the third quarter. As a result of the transaction, the assets and liabilities of RBC

**Note 7 Significant dispositions** (continued)

Jamaica are classified as held for sale and presented in Other assets and Other liabilities. During the three months ended April 30, 2014, no additional impairment loss was recognized on the disposal group (January 31, 2014 – an impairment loss of \$60 million included in Non-interest expense – Other). Also, amounts included in Other components of equity related to the disposal group will be subsequently recorded in income upon close of the transaction. As of April 30, 2014, Other components of equity included unrealized losses on foreign currency translation related to the disposal group of \$45 million (January 31, 2014 – \$40 million).

The major class of assets, liabilities and equity that are included in the disposal group as held for sale include:

(1) Deposits payable on demand include all deposits for which we do not have the right to notice of withdrawal. These deposits include both savings and chequing accounts.

(2) Deposits payable after notice include all deposits for which we can legally require notice of withdrawal. These deposits are primarily savings accounts.

(3) Term deposits include deposits payable on a fixed date. These deposits include term deposits, guaranteed investment certificates and similar instruments. As at April 30, 2014, the balance of term deposits also include senior deposit notes we have issued to provide long-term funding of \$143 billion (January 31, 2014 – \$141 billion; October 31, 2013 – \$134 billion; April 30, 2013 – \$116 billion).

(4) The geographical splits of the deposits are based on the point of origin of the deposits and where the revenue is recognized.

(5) Europe includes the United Kingdom, Switzerland and the Channel Islands.

The following table presents the contractual maturities of our term deposit liabilities.

	Pension plans		Other post-employment plans	
	April 30 2014	April 30 2013	April 30 2014	April 30 2013
Actuarial (gains) losses:				
Changes in financial assumptions	\$ 266	\$ 524	\$ 37	\$ 81
Return on plan assets (excluding interest based on discount rate)	(427)	(392)	–	–
	\$ (161)	\$ 132	\$ 37	\$ 81

(1) Market based assumptions, including Changes in financial assumptions and Return on plan assets, are reviewed and updated on a quarterly basis. All other assumptions are updated during our annual review of plan assumptions.

**Note 10 Significant capital and funding transactions****Subordinated debentures**

On November 4, 2013, we redeemed all \$1 billion outstanding 5.45% subordinated debentures due on November 4, 2018 for 100% of their principal amount plus accrued interest to the redemption date.

**Preferred share liabilities**

On January 30, 2014, we issued 20 million Non-Cumulative, 5-Year Rate Reset Preferred Shares Series AZ for gross proceeds of \$500 million. For the initial five year period to the earliest redemption date of May 24, 2019, the shares pay quarterly cash dividends, if declared, at a rate of 4.00% per annum. The dividend rate will reset on the earliest redemption date and every fifth year thereafter at a rate equal to the 5-year Government of Canada bond yield plus a premium of 2.21%. Holders have the option to convert their shares into non-cumulative floating rate First Preferred Shares, subject to certain conditions, on the earliest redemption date and every fifth year thereafter at a rate equal to the 3-month Government of Canada Treasury Bill yield plus 2.21%. Subject to the consent of the Office of the Superintendent of Financial Institutions (OSFI) and the requirements of the Bank Act (Canada), we may redeem the shares in whole or in part for cash at a price per share of \$25 on the earliest redemption date and every fifth year thereafter. The shares are recorded as liabilities due to the inclusion of non-viability contingency capital provisions, necessary for the shares to qualify as regulatory capital under Basel III. Dividends are recorded as a reduction of equity due to their discretionary nature.

**Trust capital securities**

On December 31, 2013, RBC Capital Trust II, an open-end unit trust established by RBC, redeemed all \$900 million principal amount of Trust Capital Securities – Series 2013 for cash at a redemption price of \$1,000 per unit.

**Preferred shares**

On February 24, 2014, we issued 2.4 million Non-Cumulative Floating Rate First Preferred Shares, Series AK, totaling \$61 million through a holder option, one-for-one conversion of some of our Non-Cumulative 5-Year Rate-Reset First Preferred Shares, Series AJ.

Also on February 24, 2014, we redeemed all issued and outstanding Non-Cumulative 5-Year Rate-Reset First Preferred Shares, Series AN (9 million shares), Series AP (11 million shares), and Series AR (14 million shares) for cash at a redemption price of \$25 per share.

**Common shares issued** <sup>(1)</sup>

(Millions of Canadian dollars, except number of shares)	For the three months ended					
	April 30, 2014		January 31, 2014		April 30, 2013	
	Number of shares (thousands)	Amount	Number of shares (thousands)	Amount	Number of shares (thousands)	Amount

Stock options exercised <sup>(2)</sup>	1,674	\$ 95	1,158	\$ 52
Purchased for cancellation <sup>(3)</sup>	(1,381)	(14)	(2,089)	(21)
	293	\$ 81	(931)	\$ 31

(1) The requirements of our dividend reinvestment plan (DRIP) are satisfied through either open market share purchases or shares issued from treasury. During the three months ended April 30, 2014, January 31, 2014, April 30, 2013 and January 31, 2013, our DRIP's requirements were satisfied through open market share purchases.

(2) Amounts include cash received for stock options exercised during the period and the fair value adjustment to stock options.

(3) During the three and six months ended April 30, 2014, we purchased for cancellation common shares at an average cost of \$72.41 (April 30, 2013 – \$61.31) per share, with a book value of \$10.03 (April 30, 2013 – \$9.94) per share.

## Note 11 Earnings per share

	For the three months ended			For the six months ended

(Millions of Canadian dollars, except share and per share amounts)					
<b>Basic earnings per share</b>					
Net Income	\$ 2,201	\$ 2,092	\$ 1,909	\$ 4,293	\$ 3,956
Dividends on preferred shares and preferred share liabilities	(52)	(62)	(64)	(114)	(129)
Net income attributable to non-controlling interest	(26)	(25)	(24)	(51)	(49)
Net income available to common shareholders	2,123	2,005	1,821	4,128	3,778
Weighted average number of common shares (in thousands)	1,443,115	1,442,434	1,445,238	1,442,769	1,445,366
Basic earnings per share (in dollars)	\$ 1.47	\$ 1.39	\$ 1.26	\$ 2.86	\$ 2.61
<b>Diluted earnings per share</b>					
Net income available to common shareholders	\$ 2,123	\$ 2,005	\$ 1,821	\$ 4,128	\$ 3,778
Dilutive impact of exchangeable shares	4	10	13	14	26
Net income available to common shareholders including dilutive impact of exchangeable shares	2,127	2,015	1,834	4,142	3,804
Weighted average number of common shares (in thousands)	1,443,115	1,442,434	1,445,238	1,442,769	1,445,366
Stock options (1)	2,757	2,835	2,285	2,799	2,189
Issuable under other share-based compensation plans	–	–	92	–	148
Exchangeable shares (2)	4,399	13,473	20,393	9,011	20,983
Average number of diluted common shares (in thousands)	1,450,271	1,458,742	1,468,008	1,454,579	1,468,686
Diluted earnings per share (in dollars)	\$ 1.47	\$ 1.38	\$ 1.25	\$ 2.85	\$ 2.59

- (1) The dilutive effect of stock options was calculated using the treasury stock method. When the exercise price of options outstanding is greater than the average market price of our common shares, the options are excluded from the calculation of diluted earnings per share. For the three months ended April 30, 2014, no outstanding options were excluded from the calculation of diluted earnings per share (January 31, 2014 – no outstanding options; April 30, 2013 – no outstanding options). For the six months ended April 30, 2014, no outstanding options were excluded from the calculation of diluted earnings per share (April 30, 2013 – no outstanding options).
- (2) Includes exchangeable preferred shares and trust capital securities.

## Note 12 Litigation

We are a large scale global institution that is subject to many different complex legal and regulatory requirements that continue to evolve. As a result, Royal Bank of Canada and its subsidiaries are and have been subject to a variety of legal proceedings, including civil claims and lawsuits, regulatory examinations, investigations, audits and requests for information by various governmental regulatory agencies and law enforcement authorities in various jurisdictions. Some of these matters may involve novel legal theories and interpretations. Management reviews the status of all proceedings on an ongoing basis and will exercise its judgment in resolving them in such manner as management believes to be in the Bank's best interest.

During the quarter, there has been the following update to our legal proceedings:

A decision by the Delaware Court of Chancery dated March 7, 2014, in a class action against Royal Bank of Canada, held Royal Bank of Canada liable for damages to former shareholders of Rural/Metro Corporation in connection with the buyout of Rural/Metro Corporation. The Court has not yet made a decision on damages and any appeal that may be available to Royal Bank of Canada cannot be pursued until such decision has been made. At this time, it is not possible to predict the outcome of this proceeding, nor the timing of its resolution. While management believes the ultimate resolution of this proceeding will not have a material financial impact on the Bank, the potential liability from this proceeding could be material to our results of operations in any particular period.

Please refer Note 26 to our 2013 Annual Consolidated Financial Statements for a description of our additional significant actions.

(1) Inter-segment revenue and share of profits in associates are not material.

(2) Interest revenue is reported net of interest expense as management relies primarily on net interest income as a performance measure.

(3) Taxable equivalent basis (Teb). The Teb adjustment for the three months ended April 30, 2014 was \$122 million (January 31, 2014 – \$95 million; April 30, 2013 – \$101 million). The Teb adjustment for the six months ended April 30, 2014 was \$217 million (April 30, 2013 – \$191 million).

(4) During the second quarter of 2013, RBC Investor Services incurred a restructuring provision of \$44 million. The majority of the provision was incurred for severance related to our European operations.

**Note 14 Capital management****Regulatory capital and capital ratios**

OSFI formally establishes risk-based capital targets for deposit-taking institutions in Canada. These targets are currently a Common Equity Tier 1 (CET1) ratio of greater than or equal to 7%, a Tier 1 capital ratio of greater than or equal to 8.5% and a Total capital ratio of greater than or equal to 10.5%. In addition, Canadian banks are required to ensure that their Assets-to-capital multiple, which is calculated by dividing gross adjusted assets by Total capital, does not exceed a maximum level prescribed by OSFI. During the second quarter of 2014, we have complied with all capital requirements imposed by OSFI.

	As at			
	April 30 2014	January 31 2014	October 31 2013	April 30 2013
(Millions of Canadian dollars, except percentage and multiple amounts)				
<b>Capital</b>				
Common equity Tier 1 capital	\$ 33,756	\$ 32,998	\$ 30,541	\$ 28,288
Tier 1 capital	39,725	39,414	37,196	34,942
Total capital	46,237	45,978	44,716	43,527
<b>Risk-weighted assets</b>				
Credit risk	\$ 258,275	\$ 253,799	\$ 232,641	\$ 231,264
Market risk	46,104	44,055	42,184	37,850
Operational risk	44,715	43,898	44,156	42,323
<b>Total risk-weighted assets</b>	<b>\$ 349,094</b>	<b>\$ 341,752</b>	<b>\$ 318,981</b>	<b>\$ 311,437</b>
<b>Capital ratios and multiples</b>				
Common Equity Tier 1 ratio	9.7%	9.7%	9.6%	9.1%
Tier 1 capital ratio	11.4%	11.5%	11.7%	11.2%
Total capital ratio	13.2%	13.5%	14.0%	14.0%
Assets-to-capital multiple <sup>(1)</sup>	17.5X	17.6X	16.6X	16.6X

(1) Effective the first quarter of 2013, Assets-to-capital multiple is calculated on a transitional basis as per OSFI guidelines. The transitional methodology is defined as capital calculated according to the current year's phase-in of regulatory adjustments and phase-out of non-qualifying capital instruments.

**Note 15 Subsequent events**

On May 2, 2014, we announced our intention to redeem all \$600 million outstanding 5.95% subordinated debentures due on June 18, 2103 for 100% of their principal amount plus accrued interest to the redemption date. The redemption will occur on June 18, 2014.

### Stock exchange listings

(Symbol: RY)  
  
Common shares are listed on:  
Canada – Toronto Stock  
Exchange (TSX)  
U.S. – New York Stock Exchange  
(NYSE)  
Switzerland – Swiss Exchange (SIX)

All preferred shares are listed on  
the TSX.

### Valuation day price

For capital gains purposes, the  
Valuation Day (December 22,  
1971) cost base for our common  
shares is \$7.38 per share. This  
amount has been adjusted to  
reflect the two-for-one share split  
of March 1981 and the two-for-one  
share split of February 1990. The  
one-for-one share dividends paid  
in October 2000 and April 2006 did  
not affect the Valuation Day value  
for our common shares.

### Direct deposit service

Shareholders in Canada and  
the U.S. may have their RBC  
common share dividends  
deposited directly to their bank  
account by electronic funds  
transfer. To arrange for this  
service, please contact our  
Transfer Agent and Registrar,  
Computershare Trust Company  
of Canada.

### Eligible dividend designation

For purposes of the enhanced  
dividend tax credit rules  
contained in the *Income Tax Act*  
(Canada) and any  
corresponding provincial and  
territorial tax legislation, all  
dividends (and deemed  
dividends) paid by us to  
Canadian residents on our  
common and preferred shares  
after December 31, 2005, are  
designated as “eligible  
dividends.”

### Dividend dates for 2014

Subject to approval by the Board of Directors

	Ex-dividend dates	Record dates	Payment dates
Common and preferred shares series W, AA, AB, AC, AD, AE, AF, AG, AJ, AL, AT, AV and AX	January 23 April 22 July 22 October 23	January 27 April 24 July 24 October 27	February 24 May 23 August 22 November 24
Preferred shares series AK and AZ	April 22 July 22 October 23	April 24 July 24 October 27	May 23 August 22 November 24
Preferred shares series AN, AP and AR (1)	January 23	January 27	February 24

Unless stated otherwise, all  
dividends (and deemed  
dividends) paid by us hereafter are  
designated as “eligible dividends”  
for the purposes of such rules.

### Common share repurchases

We are engaged in a Normal  
Course Issuer Bid (NCIB). During  
the one-year period commencing  
November 1, 2013, we may  
repurchase for cancellation, up to  
30 million common shares in the  
open market at market prices. We  
determine the amount and timing  
of the purchases under the NCIB,  
subject to prior consultation with  
the Office of the Superintendent of  
Financial Institutions Canada  
(OSFI).

A copy of our Notice of Intention to  
file a NCIB may be obtained,  
without charge, by contacting our  
Corporate Secretary at our Toronto  
mailing address.

### 2014 Quarterly earnings release dates

First quarter	February 26
Second quarter	May 22
Third quarter	August 22
Fourth quarter	December 3

(1) We redeemed all issued and outstanding Non-Cumulative 5-Year Rate-Reset First Preferred Series AN, AP and AR on February 24, 2014.
