Notes to Users

The financial information in this document is in Canadian dollars and is based on unaudited Interim Condensed Consolidated Financial Statements for the quarter ended July 31, 2012 prepared in accordance with International Financial Reporting Standards (IFRS), unless otherwise noted. This document is not audited and should be read in conjunction with our Q3 2012 Report to Shareholders and our 2011 Annual Report. Certain comparative amounts have been reclassified to conform to the current period's presentation.

RBC adopted IFRS effective November 1, 2010 (Transition date) and provided comparative results for 2011 under IFRS.

RBC Investor Services, formerly RBC Dexia IS, Caribbean banking units, formerly operating as RBTT Financial Group (RBTT) and Blue Bay results are reported on a one-month lag.

Presentation Changes - IFRS

Discontinued operations

Under IFRS, Balance Sheet adjustments related to discontinued operations are made prospectively from the date of classification as discontinued operations. The results of discontinued operations are reported as a separate component of income or loss for both current and all comparative periods. The classification of our U.S. Retail Banking operations as discontinued operations has been reflected in our Consolidated Balance Sheets beginning in the quarter ending July 31, 2011. The sale of Liberty Life Insurance Company announced in October 2010 has also been reflected as discontinued operations under IFRS from the Transition date.

Significant reporting changes made to this document effective Q3/12

We completed the acquisition of the remaining 50% stake in the joint venture RBC Dexia from Banque Internationale à Luxembourg S.A. (formerly Dexia Banque Internationale à Luxembourg S.A.). As a result of this transaction, we own 100% of RBC Dexia which has been subsequently rebranded RBC Investor Services (RBCIS). For further details, refer to the "Key corporate events of 2012" section of our Q3 2012 RTS.

Effective the third quarter of 2012, we no longer have discontinued operations as the sale of our U.S. regional retail banking operations closed in the second quarter. Residual amounts are not material and have been included in Corporate Support.

Significant reporting changes made to this document effective Q2/12

Sale of U.S. regional retail banking operations

On March 2, 2012, we completed the disposition of our U.S. regional retail banking operations to PNC Financial Services Group, Inc. These operations were classified as discontinued operations. For further details, refer to the "Key corporate events of 2012" section of our Q3 2012 Report to Shareholders.

Announced acquisition of the other 50% stake in RBC Dexia Investor Services Limited (RBC Dexia)

On April 3, 2012, we announced a definitive agreement to acquire the other 50 per cent stake in the joint venture RBC Dexia. As a result, we recorded in the second quarter of 2012 a loss of \$212 million (\$202 million after-tax). The transaction is subject to regulatory approvals and other customary closing conditions and is expected to be completed in the third quarter of 2012. For further details, refer to the "Key corporate events" of 2012 section of our Q2 2012 Report to Shareholders.

Cash collateral for derivatives and margin deposits with exchanges

During the quarter, we retrospectively reclassified cash collateral paid from Interest bearing deposits with banks and loans - Wholesale to Other assets and Cash collateral received from Deposits to Other liabilities to better reflect the nature of the balances. These changes are reflected in average balances and credit quality ratios. The reclassification does not include cash collateral that is received or paid on securities borrowed and securities loaned, which is currently classified in Assets purchased under reverse repurchase agreements and securities borrowed and Obligations related to assets sold under repurchase agreements and securities loaned, respectively.

Significant reporting changes made to this document effective Q1/12

Cash and Other assets

We reclassified certain amounts on the Balance Sheet from Cash to Other assets to align to the IFRS definition of cash equivalents, which treats precious metals as commodities rather than cash.

Share of profit in associates

We reclassified certain amounts on the Statement of Income relating to non-associates, which were reported in the Share of profit in associates category under Canadian GAAP, to the Other category.

Gains (Losses) on Certain Market and Credit Related Items

We updated the 'Fair value adjustments on RBC debt - Other segments' amounts reported in the Gains (Losses) on Certain Market and Credit Related Items table to capture amounts previously omitted.

Embedded value

Effective Q4/10, we updated the embedded value amounts reported in Insurance to capture dividend payments previously omitted.

Realized gains/losses on AFS Securities

We updated realized gains and realized losses/writedowns. No net impact to the net gain and losses reported.

Allowance for credit losses

We updated the individually and collectively assessed amounts.

Selected average balances

We have updated certain average balances reported on pages 4, 13, and 16.

Financial Highlight changes

We updated certain financial highlights measures to correct amounts previously reported.

Key performance and Non-GAAP measures

Management measures and evaluates the performance of our consolidated operations and each of our segments based on a number of different measures including net income and non-GAAP measures.

For details, refer to the 'How we measure and report our business segments' section in our Q3 2012 Report to Shareholders and 2011 Annual Report. Readers are cautioned that key performance measures and non-GAAP measures do not have any standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures presented by other companies.

Adjusted basis measures

Adjusted basis measures such as adjusted net income available to common shareholders, adjusted diluted earnings per share (EPS) and adjusted ROE are calculated by adding back to net income the after-tax amount of amortization of other intangibles, any goodwill impairment, the dilutive impact of exchangeable shares, and significant items. These adjusting charges exclude the amortization of computer software intangibles.

Attributed capital (Economic capital)

An estimate of the amount of equity capital required to underpin risks. It is calculated by estimating the level of capital that is necessary to support our various businesses, given their risks, consistent with our desired solvency standard and credit ratings.

Economic profit

Economic profit is net income (loss) after non-controlling interests excluding the after-tax effect of amortization of other intangibles, less a capital charge for use of attributed capital.

Return on equity (ROE)

Business segment return on equity is calculated as net income available to common shareholders divided by Average attributed capital for the period and using methods that are intended to approximate the average of the daily balances for the period. Corporate Support also includes average unattributed capital.

Return on risk capital (RORC)

Net income available to common shareholders divided by average risk capital. Business segment RORC is calculated as net income available to common shareholders divided by average risk capital for the period.

Risk capital

Risk capital includes credit, market (trading and non-trading), insurance-specific, operational, business and fixed assets risk capital.

Unattributed capital

Unattributed capital represents common equity in excess of common equity attributed to our business segments and is reported in the Corporate Support segment.

¹ Stock-based compensation includes the cost of stock options, stock appreciation rights, performance deferred shares, deferred compensation plans and the impact of related economic hedges.

² As a result of our announced acquisition of the other 50 percent interest in RBC Dexia Investor Services Limited, that we did not already own, we were required to revalue our existing 50 percent interest in the joint venture. This revaluation resulted in a total writedown of \$168 (before- and after-tax) of goodwill and intangibles.

¹ Reported results include securitized residential mortgage and credit card loans and related amounts for income and provision for credit losses. As at Q3/12, the average securitized residential mortgage and credit card loans included were \$46.1 billion and \$6.1 billion, respectively. Securitized residential mortgages and credit card loans are included in Total assets, Total earning assets, Loans and acceptances, Residential mortgage, Credit cards. Under IFRS, these transactions are being reported on our balance sheet.

² Q3/12 results include a favourable mortgage prepayment adjustment of \$125 million (\$92 million after-tax). Q2/11 includes a gain on the sale of the remaining VISA shares of \$29 million (\$21 million after-tax).

³ Effective Q1/12, we prospectively revised our capital allocation methodology to further align our allocation processes with evolving regulatory capital requirements. The revised methodology replaced the pro-rata allocation of unallocated capital that was used in 2011 and the impacts are being phased-in over fiscal 2012 in anticipation of our requirement to report under Basel III requirements in 2013. The revised methodology resulted in a reduction in attributed capital for Canadian Banking and an increase in attributed capital for Capital Markets.

⁴ Excluding the adjustment noted in (2) above, Q3/12 ROE was 38.9%, NIM was 2.74%, efficiency ratio was 44.8% and operating leverage was 3.5%.

⁵ As at Q3/12, average personal secured loans was \$45.2 billion and average personal unsecured loans was \$31.6 billion.

⁶ RBC AUA includes \$37.9 billion (April 30, 2012 - \$36.5 billion, July 31, 2011 - \$34.7 billion) of securitized mortgages and credit card loans.

¹ Premium and deposits equals net earned premiums excluding the cost of premiums to other institutions for reinsurance coverage, plus segregated fund deposits.

² Investment income can experience volatility arising from fluctuation in the fair value through profit or loss assets. The investments which support actuarial liabilities are predominantly fixed income assets designated as fair value through profit or loss and consequently changes in fair values of these assets are recorded in investment income in the consolidated statements of income. Changes in fair values of these assets are largely offset by changes in the fair value of the actuarial liabilities, the impact of which is reflected in insurance policyholder benefits and claims.

³ Premiums and deposits include premiums on risk-based insurance and annuity products, and individual and group segregated fund deposits, consistent with insurance industry practices.

⁴ The revenue impact of the change in fair value on investments backing policyholder liabilities is reflected in Investment income and largely offset in PBCAE.

¹ Results reflect the previously announced loss of \$224 million (\$213 after-tax) related to our announced acquisition of the other 50 percent interest in RBC Dexia. For further information, refer to the Key corporate events of the 2012 section of our Q3 2012 Report to Shareholders.

² Includes Caribbean banking businesses. RBTT Financial Group (RBTT) results are reported on a one-month lag. AUA - RBC and AUM - RBC include the AUA and AUM of RBTT.

³ The acquisition of the remaining 50% stake in RBC Dexia closed on July 27, 2012 and was subsequently rebranded RBC Investor Services (RBCIS). Our third quarter reflects 100% of RBCIS's results from July 27, 2012 to July 31, 2012.

⁴ Calculated based on Banking information and excludes RBC Dexia IS amounts.

¹ Effective Q1/12, we prospectively revised our capital allocation methodology to further align our allocation processes with evolving regulatory capital requirements. The revised methodology replaced the pro-rata allocation of unallocated capital that was used in 2011 and the impacts are being phased-in over fiscal 2012 in anticipation of our requirement to report under Basel III requirements in 2013. The revised methodology resulted in a reduction in attributed capital for Canadian Banking and an increase in attributed capital for Capital Markets.

¹ Under Canadian GAAP, this amount comprises of the PCL for loans not yet identified as impaired and an adjustment related to losses on securitized card loans managed by Canadian Banking. In Q2/11 and 2009, PCL also included an amount related to the reclassification of certain AFS securities to loans.

² Net income reflects income attributable to both shareholders and NCI. Net income attributable to NCI for the three months ended July 31 2012 was \$24 millions (April 30, 2012 - \$23 million; July 31, 2011 - \$23 million). For the nine months ended July 31, 2012, net income attributable to NCI was \$70 millions (July 31, 2011 - \$69 millions).

³ Average assets under Canadian GAAP included adjustments relating to securitized assets managed by Canadian Banking.

¹ On April 29, 2011, we completed the divestiture of Liberty Life Insurance Company (Liberty Life), our U.S. life insurance business, to Athene Holding Ltd for US\$628 million (C\$ 641 million). As a result of this transaction, we classified the results of Liberty Life as discontinued operations. As well, on June 20, 2011, we announced a definitive agreement to sell our U.S. regional retail banking operations to PNC Financial Services Group, Inc. Discontinued operations also includes the results of our U.S. builder finance loans portfolio, as this loan portfolio is being wound down. Comparative financial information, starting from 2009, has been restated to reflect these results of operations as discontinued operations. Under IFRS, Balance Sheet adjustments related to discontinued operations are made prospectively from the date of classification as discontinued operations (U.S. Retail Banking in Q3/11, Liberty Life at November 1, 2010). The results of discontinued operations are reported as a separate component of income or loss for both current and all comparative periods.

² Our estimated loss on sale of our U.S. regional retail banking operations was \$304 million after taxes. Goodwill impairment was taken on transition to IFRS, which decreased Retained Earnings by \$1.3 billion

³ This table is a Basel II Pillar 3 disclosure requirement. Ratios have been calculated using guidelines issued by the U.S. Federal Reserve Board under Basel I. RBC Bank USA was sold and the sale transaction was completed in Q2/12.

¹ Calculated using methods intended to approximate the average of the daily balances for the period, as applicable.

² IFRS 2011 averages are calculated based on Q1/11 and Q2/11 consolidated Balance Sheet amounts, and Q3/11 and Q4/11 continuing operations amounts.

³ Average total loans are reported net of allowance for loan losses. Average retail and wholesale balances are reported on a gross basis (before deducting allowance for loan losses).

⁴ Amounts include securitized residential mortgages and credit cards. RBC AUA includes \$37.9 billion (April 30, 2012 - \$36.5 billion, July 31, 2011 - \$34.7 billion) of securitized mortgages and credit card loans.

⁵ The acquisition of the remaining 50% stake in RBC Dexia closed on July 27, 2012 and was subsequently rebranded RBC Investor Services (RBCIS). Our third quarter reflects 100% of RBCIS's results from July 27, 2012 to July 31, 2012.

¹ Beginning Q1/12, revised OSFI regulatory guidelines resulted in the exclusion of Canadian residential mortgages under the National Housing Act (NHA) mortgage-backed securities (MBS) program from regulatory securitization reporting. Under the revised guidelines, we are no longer reporting: MBS sold, MBS retained, and Impact of securitizations on net income before income taxes.

² The amounts include assets that we have securitized but continue to service.

³ Other primarily relates to foreign exchange translation gains and losses. For bond participation certificates, maturity of bonds is also included in this category.

⁴ Amounts relate to discontinued operations.

⁵ In Q2/12, Other includes the value of U.S. residential mortgages sold to PNC Financial Services Group, Inc.

¹ Beginning Q1/12, revised OSFI regulatory guidelines resulted in the exclusion of Canadian residential mortgages under the NHA MBS program from regulatory securitization reporting.

Under the revised requirements, the following sections were removed as they were no longer applicable: Loans managed (except for past due and net write-offs relating to credit card loans), Our financial asset securitization retained interests, and Financial asset securitizations capital charges.

² Amounts reported are based on regulatory securitization reporting requirements as it includes our credit card loans. It excludes our Canadian residential mortgages under the NHA MBS program which also encompass our Canadian social housing mortgages. These amounts differ from, and are not directly comparable to amounts reported in our Report to Shareholders due to the differences between IFRS accounting and regulatory consolidation.

³ Amounts represent credit card loans securitized greater than 90 days past due.

⁴ Comprised of multi-seller asset-backed commercial paper conduit programs. The outstanding securitized assets reflect our maximum exposure to loss. Of the outstanding securitized assets, 99% of these are internally rated as investment grade.

⁵ Average annual net loss rates reflect impaired/past due assets. In our conduit programs, our risk of loss is significantly reduced due to the presence of first loss credit protection provided by the sellers of the financial assets. This protection provides an average coverage multiple as disclosed above, representing the number of times the credit enhancement provided by others, would cover losses. Refer to our 2011 Annual Report for a detailed discussion on credit protection and other factors, including additional credit enhancements which reduce our risk of loss.

⁶ Amounts are reported on a two-month lag.

¹ The amounts reported are based on the regulatory securitization reporting requirements. It includes our credit card loans. It excludes our Canadian residential mortgages under the NHA MBS program which also encompass our Canadian social housing mortgages. These amounts differ from, and are not directly comparable to amounts reported in our Report to Shareholders due to the differences between IFRS accounting and regulatory consolidation.

² Amounts reflect regulatory exposure values.

³ Securitization exposures include securities, liquidity facilities, protection provided to securitization positions, other commitments and credit enhancements.

⁴ Comparative amounts presented have been revised from those previously reported.

⁵ Includes securitization exposures deducted entirely from Tier 1 capital and other exposures deducted from total capital. Capital charges for Standardized approach deductions are net of ACL and partial write-offs. Capital charges for Rating based approach and Internal assessment approach are gross of ACL and partial write-offs.

¹ Under IFRS, we record items related to Contributed surplus directly to Retained earnings.

² As prescribed by OSFI, certain items of Other components of equity are included in the determination of regulatory capital. Accumulated net foreign currency translation adjustments are included in Tier 1 capital. Net unrealized fair value losses on available-for-sale equities are deducted in the determination of Tier 1 capital while net unrealized fair value gains on available-for-sale equities are included in Tier 2A capital.

³ Basel II goodwill deduction reflects total consolidated goodwill.

⁴ Securitization deduction from Tier 1 capital consists of Seller's interest in credit cards of \$9 million and securitizations rated below BB- of \$492 million and unrated positions of \$nil. Of the total deduction from Tier 1 \$298 million is related to the banking book and \$203 million is related to the trading book.

⁵ Starting November 1, 2011 OSFI requires that the investment in insurance subsidiaries must be deducted 50% from each of Tier I and Tier 2 capital.

⁶ Innovative capital instruments are included in Other Liabilities on the Balance Sheet.

⁷ As defined in the guidelines issued by OSFI.

⁸ Subordinated debentures that are within five years of maturity are subject to straight-line amortization to zero during their remaining term and, accordingly, are included at their amortized value.

⁹ Securitization deduction from Tier 2 capital consists of Seller's interest in credit cards of \$9 million and securitizations rated below BB- of \$492 million and unrated positions of \$nil. Of the total deduction from Tier 2, \$298 million is related to the banking book and \$203 million is related to the trading book.

¹⁰ Comparative information (Q2/11 and Q1/11) has been restated to reflect the correction of Gross-adjusted assets. No impact to periods prior to 2011.

¹ Calculated using guidelines issued by OSFI under the Basel II framework.

² Total exposure represents exposure at default which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances or partial write-offs and does not reflect the impact of credit risk mitigation and collateral held.

³ Represents the average of counterparty risk weights within a particular category.

⁴ The minimum capital requirements for each category can be calculated by multiplying the total RWA by 8%.

⁵ For credit risk, a majority of our portfolios use the AIRB Approach and the remainder use the Standardized Approach.

⁶ Basel II defines banking book equities based on the economic substance of the transaction rather than the legal form or accounting treatment associated with the financial instrument. As such, differences exist in the identification of equity securities held in the banking book and those reported in the financial statements. Banking book equities are financial instruments held for investment purposes and are not part of our trading book, consisting of publicly-traded and private equities, partnership units, venture capital and derivatives instruments tied to equity interests. As at Q3/12, the amount of publicly-traded equity exposures was \$278 million and private equity exposures amounted to \$944 million. Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor.

⁷ The amount of available-for-sale securities held in the banking book that were "grandfathered" under Basel II, and thus subject to a 100% risk-weighting until the end of 2017, was \$113 million for Q3/12.

⁸ The scaling factor represents a calibration adjustment of 6% as prescribed by OSFI under the Basel II framework and is applied to RWA amounts for credit risk assessed under the AIRB Approach.

⁹ For credit risk, portfolios using the Standardized and Advanced Internal Ratings Based (AIRB) Approach represents 11% and 79%, respectively, of RWA. The remaining 10% represents Balance Sheet assets not included in Standardized or AIRB Approaches.

¹⁰ For market risk RWA measurement, we use an internal models approach where we have obtained regulatory approval, and a standardized approach for products yet to be approved.

¹¹ Regulatory capital for our correlation trading portfolios is determined through the standardized approach as prescribed by OSFI. Therefore, we do not have a Comprehensive Risk Charge for these portfolios. Our securitization and re-securitization positions in our trading book also have capital requirements under the standardized approach. The changes in value due to market and credit risk in the securitization and re-securitization in the trading book are managed through the daily mark-to-market process. Furthermore, we employ market risk measures such as sensitivities to changes in option-adjusted spreads and underlying asset prices as well as VaR and stress testing measures.

¹² The incremental risk charge (IRC) was \$598 million as at Q3/2012. The average was \$638 million, high was \$782 million and low was \$517 million for Q3/2012. The IRC is measured over a one-year horizon at a 99.9% confidence level. We utilize a technique known as Monte Carlo simulation process to generate a statistically relevant number of loss scenarios due to ratings migration and default in order to establish the losses at that confidence level. We also make certain assumptions about position liquidity (the length of time to close out a position) within the model that range from a floor three months to maximum of one year. The determination of liquidity is based on issuer type and credit rating. Credit rating migration and default probabilities are based on historical data.

¹³ The models are subject to the same internal independent vetting and validation procedures used for all regulatory capital models. Important assumptions are re-reviewed at least annually. Due to long time horizon and high confidence level of the risk measure, we do not perform backtesting as we do for the VaR measure.

¹⁴ For operational risk, we use the Standardized Approach.

¹ Calculated using guidelines issued by OSFI under the Basel II framework.

² Internal capital generation is net income available to common shareholders less common share dividends.

³ Under IFRS, we record items related to Contributed surplus directly to Retained earnings.

⁴ Includes changes to investments in insurance subsidiaries, regulatory capital deductions for goodwill, substantial investments, eligible general allowance, non-controlling interests, securitization related amounts, treasury shares (other than common) and other adjustments to retained earnings.

⁵ Transitional adjustments for IFRS are shown under Other.

⁶ Effective Q1/12, we prospectively revised our capital allocation methodology to further align our allocation processes with evolving regulatory capital requirements. The revised methodology replaced the pro-rata allocation of unallocated capital that was used in 2011 and the impacts are being phased-in over fiscal 2012 in anticipation of our requirement to report under Basel III requirements in 2013. The revised methodology resulted in a reduction in attributed capital for Canadian Banking and an increase in attributed capital for Capital Markets.

⁷ Under/(over) attribution of capital is reported in Corporate Support.

¹ Amounts prior to Q2/12 represent consolidated (combined continuing and discontinued) operations.

² Gross credit risk exposure is before allowance for loan losses. Exposure to Basel II asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credit are included in Personal.

³ Includes contingent liabilities such as letters of credit and guarantees, available-for-sale debt securities and deposits with financial institutions.

⁴ Includes repurchase and reverse repurchase agreements and securities borrowing and lending transactions.

⁵ For trading-related credit risk, we use statistical models to derive a credit risk exposure profile by modeling the potential value of the portfolio or trades with each counterparty over its life to estimate expected credit risk exposure and expected loss.

⁶ The model takes into account wrong-way risk which arises when default risk and credit exposure increase together, in which case we use the worst case exposure value.

⁷ Credit equivalent amount after factoring in master netting agreements.

⁸ Based on country of residence of borrower.

¹ Amounts prior to Q2/12 represent consolidated (combined continuing and discontinued) operations.

² Eligible financial collateral includes cash and deposit, gold, as well as qualifying debt securities, equities and mutual funds.

³ Under the AIRB approach, disclosure on eligible financial collateral is not required as the benefit the collateral provides has been taken into account in the Loss Given Default (LGD) estimates in our internal LGD risk rating system.

⁴ Increase in retail exposure covered by credit risk mitigation between Q4/11 and Q3/12 is accounted for by the implementation of OSFI guidelines on classification of certain mortgage-backed securities in Basel II as of Q4/11.

⁵ Includes contingent liabilities such as letters of credit and guarantees, available-for-sale debt securities, and deposits with financial institutions.

⁶ Includes repurchase and reverse repurchase agreements and securities borrowing and lending transactions.

⁷ Credit equivalent amount after factoring in master netting agreements.

⁸ Represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation.

¹ Amounts prior to Q2/12 represent consolidated (combined continuing and discontinued) operations.

² Represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation.

³ To determine the appropriate risk weight, credit assessments by OSFI-recognized external credit rating agencies of S&P, Moody's, Fitch and DBRS are used. For rated exposures, primarily in the sovereign and bank classes, we assign the risk weight corresponding to OSFI's standard mapping. For unrated exposures, mainly in the business and retail classes, we generally apply OSFI prescribed risk weights in accordance with OSFI's standards and guidelines taking into consideration certain exposure specific factors including counterparty type, exposure type and credit risk mitigation technique employed.

⁴ Actual loss reflects internal credit loss experience realized over a given period or "point in time". Actual loss rate is the sum of the impairment losses on impaired loans divided by average of loans and acceptances period end outstanding for the current and prior 3-quarter period. Actual losses prior to Q4/11 are the same as CGAAP due to implementation of IFRS in Basel II as of Q1/11.

⁵ Estimated loss represents expected loss which is calculated using the Basel II "through the cycle" parameters of probability of default x loss given default x exposure at default, conservatively estimated based on available historical loss data. Estimated loss rate is the expected loss divided by loans and acceptances outstanding at the beginning of the applicable consecutive 4-quarter period defined above. Actual loss will normally exceed estimated loss during economic downturns and come below in periods of expansion. Estimated losses in 2011 are the same as CGAAP due to implementation of IFRS in Basel II as of Q1/11.

⁶ Average annual actual loss rate from fiscal 2003 through to the most recent full year. The information will be updated on an annual basis.

² Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation such as guarantees. Exposure under Basel II asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credit are included in Personal.

³ Total exposure includes loans and acceptances outstanding and undrawn commitments and represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation.

⁴ Represents the exposure-weighted average of probability of default, loss given default rate, exposure at default (EAD) rate and risk weight within each internal rating. EAD rate is a percentage of undrawn commitments (notional amount) that is currently undrawn but expected to be drawn in the event of a default.

⁵ Ratings 8-10 or above are regarded as investment grade while ratings 11-13 or below to 17-20 inclusive are non-investment grade. Ratings 21-22 represent impaired/default.

¹ Comprises credit default swaps, total return swaps and credit default baskets. As at Q3/12, over 97% of our net exposures are with investment grade counterparties.

² Gross fair value before netting.

³ Replacement cost includes the impact of netting but excludes collateral.

⁴ Comprises credit default swaps.

⁵ As at Q3/12, Other related to health \$20 million, and other \$nil million.

¹ For the remaining instruments, these adjustments are determined on a pooled basis and thus, have been excluded. As at Q3/12, positive fair values exclude market and credit valuation adjustments of \$649 m

² Impact of offsetting derivative assets and liabilities on contracts where we have both (a) unconditional and legally enforceable netting agreement in place and (b) we intend to settle the contracts on either a net basis or simultaneously. The right of setoff is considered unconditional if its exercise is not contingent upon the occurrence of a future event; it is considered conditional if it becomes exercisable only upon the occurrence of a future event, such as bankruptcy, insolvency, default, or change in control. For Q3/12, the net derivative balance was further netted by \$421 million against the margins balance.

³ Additional impact of offsetting credit exposures on contracts where we have a legally enforceable master netting agreement in place but do not intend to settle the contracts on a net basis or simultaneously.

⁴ As at Q3/12, the notional amounts exclude exchange traded of \$460.9 billion, over-the-counter options written of \$176.9 billion, and non-trading credit derivatives of \$1.7 billion.

⁵ Calculated using guidelines issued by OSFI under the BASEL II framework

⁶ Comprises credit default swaps, total return swaps and credit default baskets. The above excludes credit derivatives issued for other-than-trading purposes related to bought and sold protection with a replacement cost of \$17 million as at Q3/12.

⁷ Comprises precious metal, commodity stable value and equity-linked derivative contracts.

⁸ As at Q3/12, the total credit equivalent amount after netting includes collateral applied of \$12.8 billion.

¹ Business segment ROE is based on Average attributed capital. Under/(over) attribution of capital is reported in Corporate Support

² We do not report ROE and RORC for Corporate Support as they are considered not meaningful.

³ Effective Q3/12 discontinued operations are included in Corporate Support.

Glossary

Definition

Assets under administration (AUA)

Assets administered by us, which are beneficially owned by clients. Services provided in respect of assets under administration are of an administrative nature, including safekeeping, collecting investment income, settling purchase and sale transactions, and record keeping.

Assets under management (AUM)

Assets managed by us, which are beneficially owned by clients. Services provided in respect of assets under management include the selection of investments and the provision of investment advice. We have assets under management that are also administered by us and included in assets under administration.

Embedded value

The sum of the value of equity held in our Insurance segment and the value of in-force business (existing policies).

Goodwill and intangibles

Goodwill represents the excess of the price paid for the business acquired over the fair value of the net identifiable assets acquired. An intangible asset is an identifiable non-monetary asset without physical substance.

Gross-adjusted assets (GAA)

GAA are used in the calculation of the Assets-to-Capital multiple. They represent our total assets including specified off-balance sheet items and net of prescribed deductions. Off balance sheet items for this calculation are direct credit substitutes, including letters of credit and guarantees, transaction-related contingencies, trade-related contingencies and sale and repurchase agreements.

Taxable equivalent basis (teb)

Income from certain specified tax-advantaged sources is increased to a level that would make it comparable to income from taxable sources. There is an offsetting adjustment in the tax provision, thereby generating the same after-tax net income. We record teb adjustments in Capital Markets and record elimination adjustments in Corporate Support.

Total trading revenue

Total trading revenue is comprised of trading related revenue recorded in Net interest income and Non-interest income.

Ratios

Capital ratios

The percentage of risk-adjusted assets supported by capital, using the guidelines of OSFI based on standards issued by the Bank for International Settlements and GAAP financial information.

Efficiency ratio

Non-interest expense as a percentage of total revenue.

Return on assets

Net income as a percentage of average assets.

Tier 1 common ratio

Tier 1 capital less qualifying other non-controlling interests, less Innovative Tier 1 capital instruments less preferred shares (both net of treasury shares) divided by risk-weighted assets. This ratio is calculated consistent with a stress testing measure used by the U.S. Federal Reserve for U.S. banks in determining capital adequacy under certain adverse scenarios, except that our calculation of Tier 1 common ratio is based on the Basel II methodology.

Calculations

Assets-to-capital multiple

Total assets plus specified off balance sheet items, as defined by the Office of the Superintendent of Financial Institutions Canada (OSFI), divided by total regulatory capital.

Adjusted ROE

Adjusted net income divided by average capital.

Average balances (assets, loans and acceptances, and deposits)

Calculated using methods intended to approximate the average of the daily balances for the period.

Calculations (continued)

Average common equity

Calculated using methods intended to approximate the average of the daily balances for the period. For the business segments, calculated using methods intended to approximate the average of the daily attributed capital for the period.

Average earning assets

The average carrying value of deposits with banks, securities, assets purchased under reverse repurchase agreements and certain securities borrowed, and loans based on daily balances for the period.

Average risk capital

Calculated using methods intended to approximate the average of the daily risk capital balances for the period. Average risk capital includes Credit, Market (trading and non-trading), Insurance, Operational, Business and Fixed Asset risk capital.

Average attributed capital includes risk capital plus the Goodwill and Intangible capital.

Capital charge

Calculated by multiplying the cost of capital by the amount of average common equity. The cost of capital is a proxy for the after-tax return that we estimate to be required by shareholders for the use of their capital. The cost of capital is regularly reviewed and adjusted from time to time based on prevailing market conditions.

Common equity

Common equity includes common shares, common treasury shares, retained earnings and other components of equity.

Diluted EPS

Diluted EPS is net income from continuing operations attributable to common shareholders divided by the average diluted shares outstanding. Both net income and number of shares outstanding have been adjusted for the impact of exchangeable shares.

Dividend yield

Dividends per common share divided by the average of the high and low share prices in the relevant period.

Market capitalization

End of period common shares outstanding multiplied by the closing common share price on the Toronto Stock Exchange.

Net interest margin (average assets)

Net interest income as a percentage of total average assets.

Net interest margin (average earning assets)

Net interest income as a percentage of total average earning assets.

Net write-offs

Gross write-offs less recoveries of amounts previously written off.

Risk-weighted assets (RWA) - Basel II

Used in the calculation of risk-based capital ratios as defined by the guidelines issued by OSFI based on Basel II effective November 1, 2007 and on the "Enhancements to the Basel II framework" issued by the Basel Committee on Banking Supervision (BCBS) and adopted by OSFI effective November 2011. A majority of our credit risk portfolios use AIRB Approach and the remainder uses Standardized Approach for the calculation of RWA based on the total exposure (i.e. exposure at default, and counterparty risk weights). For market risk measurement we use the internal models approach for products with regulatory approval and a standardised approach for all other products. For Operational risk, we use the Standardised Approach. In addition, Basel II requires a transitional capital floor adjustment.
