## Notes to Users

The financial information in this document is in Canadian dollars and is based on financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP), unless otherwise noted. This document is not audited and should be read in conjunction with our Q1 2008 Report to Shareholders, our 2007 Annual Report to Shareholders and the Glossary on page 2 of this document. Certain comparative amounts have been reclassified to conform to the current period's presentations.

## Significant reporting changes made to this document in 01/08

## U.S. Ioan portfolio information

For the three and 12 months ended October 31, 2007, we reclassified (i) new impaired loans and gross impaired loans, (ii) net impaired loans, and (iii) allowance for credit losses and provision for credit losses, which were overstated by $\$ 30$ million, $\$ 22$ million and $\$ 8$ million, respectively, in our U.S. retail residential mortgage portfolio and were understated by $\$ 30$ million, $\$ 22$ million and $\$ 8$ million, respectively in our U.S. wholesale real estate and related portfolio. Aggregate amounts of new impaired loans, gross impaired loans, net impaired loans, allowance for credit losses and provision for credit losses are unchanged. These reclassifications did not impact our consolidated net income or balance sheet

## Net interest income reclassification

We reclassified certain Trading revenue reported in Q4/07 in Capital Markets from Non-interest income - Trading revenue to Net interest income to better reflect its nature. There was no impact to Total Trading revenue as a result of this reclassification. Comparative amounts in Q4/07 for Net interest income, Non-interest income - Trading revenue, Net interest margin and Non-interest income as a percentage of Total revenue reflect the change.

## Assets under administration

We revised the calculation for assets under administration for Canadian Banking to reflect the inclusion of mutual funds sold through our Canadian branch network.

## Economic capita

We enhanced our Economic Capital methodologies and parameters, which mainly resulted in a decrease of capital for market risk allocated to our business segments and to an increase of capital for credit risk allocated to our Capital Markets segment

## Key performance and Non-GAAP measures

Management measures and evaluates the performance of our consolidated operations and each of our segments based on a number of different measures including net income and non-GAAP measures. For details, refer to
How we measure and report our business segments in our O1 2008 Report to Shareholders, and our 2007 Annual Report to Shareholders. We also include non-GAAP cash basis financial measures in this documen which wirl How we measure and report our business segments in our Q1 2008 Report to Shareholders, and our 2007 Annual Report to Shareholders. We also include non-GAAP cash basis financial measures in this document which we standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures presented by other companies.

## Performance measures

## Risk capital <br> and fixed assets risk capital.

Attributed capital (Economic capital)
ate of the amount of equity capital required to underpin risks. It is calculated by estimating the level of capital that is necessary to support our van

Unattributed capital
Unatributed capital represents common equity in excess of common equity attributed to our
business segments and is reported in the Corporate Support segment.
Average risk capital
Calculated using methods intended to approximate the average of the daily risk capital balances for the period.

Return on risk capital (RORC)
Net income available to common shareholders divided by average risk capital. Refer to page 27 for the business segments RORC calculation. Business segment R .

```
Return on equity (ROE)
Business segment return on equity is calculated as net income available to common shareholders divided by average attributed capital for the period. Corporate Support also includes average
``` nattributed capital. Refer to page 27 for calculation of ROE.

\section*{Non-GAAP measures}

Cash basis measures basis measures such as cash net income, cash diluted earnings per share (EPS) and cash ROE are calculated by adding back to net income the after-tax amount of other intangibles.
These non-cash charges do not deplete our cash reserves.
Defined operating leverage
ur defined operating leverage is defined as the difference between revenue growth rate (as adjusted) and non-interest expense growth rate (as adjusted). Revenue is based on a taxable equivalent basis, excluding onsolidated variable interest enities (VISs) and Global Insurance revenue. Our revenue in 2007 exclu excludes Global Insurance expense.

Economic profit
conomic profit is net income available to common shareholders excluding the after-tax effect of amortization of other intangibles, less a capital charge for use of attributed capital.

\section*{Glossary}

Goodwill and intangibles

Taxable equivalent basis (teb)
Income from certain tax-advantaged sources are reported on a taxable equivalent basis (teb). Under this approach, revenue from tax-advantaged sources are grossed up, which currently includes only our Canadia taxable corporate dividends recorded in Net interest income, to their tax equivalent value with a corresponding offset recorded in the provision for income taxes. We record teb adjustments in Capital Markets and record
elimination adjustments in Corporate Support thereby generating the same after-tax net income as reported under GAAP.

Total trading revenue
Total tra
income.

\section*{Ratios}

The percentage of risk-adjusted assets supported by capital, using the guidelines of the Office of the Superintendent of Financial Institutions Canada (OSFI) based on standards issued by the Bank for

Efficiency ratio
Non-interest expense as a percentage of total revenue
Return on assets
Net income divided by average assets.
Return on common equity (ROE)
n shareholders divided by average common equity for the period. Refer to page 25 for ROE calculation.
\(\frac{\text { Assets under administration (AUA) }}{\text { Assets administered by us which are }}\)
Assets administered by us which are beneficially owned by clients. Services provided in respect of assets under administration are of an administrative nature, including safekeeping, collecting investment income, settling purchase and sale transactions, and recordkeeping.

Assets under management (AUM)
Assets managed by us which are beneficially owned by clients. Services provided in respect of assets under
management include the selection of investments and the provision of investment advice. We have assets under
management that are also administered by us and included in assets under administration.

Calculations
Average balances (assets, loans and acceptances, and deposits)
alculated using methods intended to approximate the average of the daily balances for the period.

\section*{Average common equity}
alculated as the average of the month-end common equity balances for the period. For the business eriont, calculated using methods intended to approximate the average of the daily attributed capital for the

Average earning assets
The average carrying value of deposits with banks, securities, assets purchased under reverse repurchas agreements and certain securities borrowed, and loans based on daily balances for the period.

Capital charge
Calculated by multiplying the cost of capital by the amount of average common equity. The cost of capital is a roxy for the atter-tax return that we estimate to be required by shareholders for the use of their capital.

Market capitalization
nd of period common shares outstanding multiplied by the closing common share price on the Toronto Stock Exchange
Net interest margin (average assets)
Net interest income divided by average assets.
Net interest margin (average earning assets)
Net write-offs
Gross write-offs less recoveries of amounts previously written off.

\section*{Risk-adjusted assets - Basel}
sed in the calculation of risk-based capital ratios as defined by guidelines issued by the OSFI. The face value of assets is discounted using risk-weighting factors in order to reflect a comparable risk per dollar among redit equivalent amount, and then by applying appropriate risk-weighting factors. Specific and general marke risk-adjusted assets are added to the calculation of the balance sheet and off-balance sheet risk-adjusted ssets to obtain the total risk-adjusted assets.
Risk-adjusted assets - Basel II
Used in the calculation of risk-based capital ratios as defined by guidelines issued by the OSFI based on Basel II, effective November 1, 2007. A majority of our credit risk portfolios use the AIRB Approach and the remainder use a Standardized Approach for the calculation of Risk-adjusted assets (RAA) based on the total exposure, i.e. exposure at default, and counterparty risk weights. For market risk RAA measurement, we use internal models approach for products with regulatory approval and a standardized approach for products to be approved sitional capital floor adjustment. For more details, refer to Report to Shareholders.

\end{tabular}

Commencing Q1/08, capital ratios and risk-adjusted assets are calculated using guidelines issued by the OSFI under the new Basel II framework. Comparative amounts are calculated using guidelines issued by the OSFI under the Basel I framework. Risk-adjusted assets for April 30,2007 have been restated to reflect a \(\$ 563\) million adjustment related to equity derivative contracts.
Common shares outstanding at end of period includes Treasury shares (shares acquired and held by subsidiaries for reasons other than cancellation). Average common shares outstanding excludes Treasury shares.
\({ }^{4}\) Closing share price divided by diluted earnings per share
Calculated using number of common shares outstanding, except as noted.
\({ }^{6}\) Effective Q1/08, statutory holiday pay for part-time employees have been excluded from our full-time equivalent (FTE) calculation consistent with our management reporting framework. All comparative amounts reflect the change to the FTE calculation. Bank branches which provide banking services directly to clients.

\footnotetext{
\({ }^{1}\) Stock-based compensation includes the cost of stock options, stock appreciation rights, performance deferred shares, deferred compensation plans and the impact of related economic hedges.
\({ }^{2}\) In 2005, Other includes \(\$ 29\) million for recognition of RBC's claims against the Enron Corp. (Enron) bankruptcy estate, and a provision for Enron litigation-related matters of \(\$ 591\) million.
}

\({ }^{1}\) Effective Q1/07, we no longer classify amounts as specified items. Amounts shown are reported on an after-tax basis. For further details, refer to our 2007 Annual Report to Shareholders.
\({ }^{2}\) These measures are defined in the "Non-GAAP measures" section.
\({ }^{3}\) Excludes the impact of the financial instruments accounting standards related to Global Insurance
\({ }^{4}\) In 2005, non-interest expense also excludes Enron litigation-related provision. For further details, refer to Specified items above.
\({ }^{5}\) Other adjustments include primarily foreign exchange translations on non-Canadian dollar-denominated goodwill.

\section*{\({ }^{1}\) Includes income taxes and non-controlling interest in net income of subsidiaries}
\({ }^{2}\) Effective October 31, 2006, RBC Mortgage Company had disposed of substantially all its remaining assets and obligations and we no longer separately classify its results in our unaudited Interim Consolidated Financial Statements. Results reported on a total consolidated basis are comparable to results from continuing operations for the corresponding prior periods.

\({ }^{1}\) Calculated using methods intended to approximate the average of the daily balances for the period.
\({ }^{2}\) Average total loans are reported net of allowance for loan losses. Average retail and wholesale balances are reported on a gross basis (before deducting allowance for loan losses).
\({ }^{3}\) Prior to Q1/07, all amounts were reported as from continuing operations except for Total assets which also included assets of discontinued operations on page 12.
\({ }^{4}\) AUA have been revised to include mutual funds sold through our Canadian branch network. Comparative amounts have been restated to reflect this change.
\({ }^{5}\) AUA - RBC Dexia IS represents the total AUA of the joint venture as at December 31, 2007, of which we have a \(50 \%\) ownership interes

Mortgage-backed securities - retained are reported as securities on the Balance Sheet.
\({ }^{3}\) Upon adoption of CICA's financial instruments accounting standards on November 1, 2006, mortgage-backed securities - retained arising from securitization are reported at fair value on the Balance Sheet. Excludes the impact of liquidity, credit and administration fees earned on the securitization of client or third-party assets that are recorded in securitization revenue.

\({ }^{1}\) As defined in
\({ }^{2}\) This amount is Shareholders' equity less preferred shares of \(\$ 2,050\) million plus other items not included in regulatory capital of \(\$ 83\) million.
\({ }^{3}\) Basel II goodwill deduction reflects total consolidated goodwill. Basel I goodwill deduction reflects consolidated goodwill net of insurance goodwill.
in full from Tier 2 capital. Under Basel I, these investments were deducted from Total capital.
\({ }_{5}{ }^{5}\) in full from tieritization deduction from Tier 1 capital consists of Seller's interest in residential mortgages of \(\$ 88\) million and credit cards of \(\$ 24\) million, and securitizations purchased as an investor of \(\$ 112\) million.
\({ }_{7}^{6}\) Subordinated debentures that are within five years of maturity are subject to straight-line amortization to zero during their remaining term and, accordingly, are included at their amortized value.
As prescribed by the OSFI, certain components of Accumulated other comprehensive income are included in the determination of regulatory capital. Accumulated net foreign currency translation adjustments are included in Tier 1 capital
Net unrealized fair value losses on available-for-sale equities are deducted in the determination of Tier 1 capital while net unrealized fair value gains on available-for-sale equities are included in Tier 2 A capital.
\({ }^{8}\) Securitization deduction from Tier 2 capital consists of Seller's interest in residential mortgages of \(\$ 88\) million and credit cards of \(\$ 4\) million, and securitizations purchased as an investor of \(\$ 112\) million.
Internal capital generation is net income available to common shareholders less common share dividends.
Includes changes to investments in insurance subsidiaries, regulatory capital deductions for goodwill, substantial investments, eligible general allowance, non-controlling interest in subsidiaries, securitization related amounts, treasury shares (other than common) and other adjustments to retained earnings.

\hline
\end{tabular}
\({ }^{1}\) Calculated using guidelines issued by the OSFI under the new BASEL II framework. For further details, refer to pages 82 to 83 of the Risk management section in our 2007 Annual Report.
\({ }^{2}\) Total exposure represents exposure at default which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances or partial write-offs and does not reflect the impact of credit risk mitigation and collateral held.
\({ }^{3}\) Represents the average of counterparty risk weights within a particular category.
\({ }^{4}\) For credit risk, portfolios using the Standardized and AIRB Approach represented \(27 \%\) and \(61 \%\), respectively, of RAA. The remaining \(12 \%\) represents Balance Sheet assets not included in Standardized or AIRB Approaches.
\({ }^{5}\) The minimum capital requirements for each category can be calculated by multiplying the total RAA by \(8 \%\)
\({ }^{6}\) For credit risk, a majority of our portfolios use the AIRB Approach and the remainder use a Standardized Approach.
'The amount of available-for-sale securities held in the banking book that were "grandfathered" under Basel II, and thus subject to a \(100 \%\) risk-weighting until the end of 2017 , was \(\$ 1,260\) million for Q1/08
\({ }^{\gamma}\) The scaling factor represents a calibration adjustment of \(6 \%\) as prescribed by the OSFI under the Basel II framework and is applied to RAA amounts for credit risk assessed under the AIRB Approach
\({ }^{y}\) For market risk RAA measurement, we use an internal models approach where we have obtained regulatory approval, and a standardized approach for products yet to be approved
\({ }^{10}\) For operational risk, we use the Standardized Approach.
\({ }^{11}\) Transitional adjustment as prescribed by the OSFI Capital Adequacy Requirements guideline Section 1.7
n.a. not applicable

\section*{Total risk-adjusted assets \({ }^{8}\)}

Calculated using ouidelines issued by the OSFI under the Basel I framework
\({ }^{2}\) The amount of credit exposure attributable to an off-balance sheet financial instrument, derived from the notional value of exposure
\({ }^{3}\) When calculating risk-adjusted assets, amortized costs rather than fair value balances are used for certain asset classes as prescribed by the OSFI.
Amounts are shown net of allowance for loan losses.
\({ }^{5}\) OECD stands for Organisation for Economic Co-operation and Development.
\({ }^{6}\) In Q4/07, we implemented a new trading credit risk system that enables clearer identification of these balances, resulting in a lower risk-adjusted balance.
Excludes non-trading credit derivatives given guarantee treatment for credit risk capital purposes.
\({ }^{8}\) Risk-adjusted assets for April 30,2007 has been restated to reflect a \(\$ 563\) million adjustment related to equity derivative contracts.

\({ }^{1}\) Based on residence of borrower
\({ }^{2}\) Includes contingent liabilities such as letters of credit and guarantees, and available-for-sale debt securities
\({ }^{3}\) Includes repurchase and reverse repurchase agreements and securities borrowing and lending transactions.
\({ }^{4}\) After factoring in the master netting agreements.
\({ }^{5}\) Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and
does not reflect the impact of credit risk mitigation. Exposure under Basel II asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards,
while home equity lines of credit are included in Personal.
\({ }^{6}\) Includes certain synthetic mortgage securitizations
\({ }^{7}\) Includes small business exposure managed on a pooled basis.
\({ }^{8}\) Includes small business exposure managed on an individual client basis.
\({ }^{9}\) Sovereign refers to all central governments and agencies, central banks, as well as other qualifying public sector entities and multilateral development banks.
\({ }^{10}\) Bank refers primarily to regulated deposit-taking institutions and securities firms. -26-

\hline
\end{tabular}

measures are based on actual balances before rounding.
\({ }^{2}\) Average risk capital includes Credit, Market (trading and non-trading), Insurance, Operational, Business and fixed assets risk capital. Average attributed capital includes risk capital plus the net amounts of goodwill and intangibles capital.
\({ }^{3}\) Unattributed capital is reported in Corporate Support and included in its calculation of ROE.
\({ }^{4}\) RORC is based on Average risk capital only. Segment ROE is based on Average attributed capital. We do not report RORC for Corporate Support as it is not considered meaningful.```
