\section*{Page}

\section*{Capital (continued)}

Regulatory capital generation - Basel II and Basel I
Economic capital
Capital ratios for significant banking subsidiary

Securitization subject to early amortization - seller's interest
Our financial asset securitizations
Loans managed
Financial asset securitizations - capital charges

\section*{Credit Quality}

Loans and acceptances
Gross impaired loans
Provision for credit losses
Allowance for credit losses
U.S. banking loans

Credit quality ratios

\section*{Credit Risk Exposure}

Credit risk exposure by geography and portfolio
Exposure covered by credit risk mitigation
Credit exposure by residual contractual maturity
Credit exposure of portfolios under the standardized approach
by risk weight
Actual losses vs. estimated losses
Retail credit exposure by portfolio and risk category
Wholesale credit exposure by portfolio and risk rating

Realized gains and losses on available-for-sale securities
Banking book equity exposures
Fair value of derivative instruments
Trading credit derivatives
Other than trading credit derivatives positions
Derivative-related credit risk
Calculation of ROE and RORC

The financial information in this document is in Canadian dollars and is based on unaudited interim financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP), unless otherwise noted. This document is not audited and should be read in conjunction with our Q1 2010 Report to Shareholders and our 2009 Annual Report to Shareholders. Certain comparative amounts have been reclassified to conform to the current period's presentation.

Significant reporting changes made to this document in Q1/10
We reclassified certain retail deposits distributed through 3rd party brokers which were previously reported in Corporate Support to Canadian Banking. Average deposit balances for Q1/09 to Q4/09 reflect these adjustments.

Management measures and evaluates the performance of our consolidated operations and each of our segments based on a number of different measures including net income and non-GAAP measures. For details, refer to the we believe provides investors with standardized meaning Performance measures

\section*{Performanc
Risk capital}

Risk capital
(trading and non-trading), insurance-specific, operational,
business and fixed assets risk capital.

Atrributed capital (Economic capital)
estimate of the amount of equity capital required to underpin risks. It is calculated by estimating
the level of capital that is necessary to support our various businesses, given their risks, consistent
with our desired solvency standard and credit ratings.

Unatributed capital represents common equity in excess of common equity attributed to our business segments and is reported in the Corporate Support segment.

Average risk capital
Calculated using methods intended to approximate the average of the daily risk capital balances for the period.

\section*{Return on risk capital (RORC)}

Net income available to common shareholders divided by average risk capital. Refer to page 41 for the business segments' RORC calculation. Business segment RORC is calculated as net income available to common shareholders divided by average risk capital for the period.

Return on equity (ROE)
Business segment return on equity is calculated as net income available to common shareholders divided by Average attributed capital for the period and using methods that are intended to approximate the average of the daily balances for the period. Corporate Support also includes average unattributed capital. Refe to page 41 for calculation of ROE.

\section*{Non-GAAP measures}

Cash basis measures such as cash net income, cash diluted earnings per share (EPS) and cash ROE are calculated by adding back to net income the after-tax amount on the amortization of other intangibles and the goodwill impairment. These non-cash charges do not deplete our cash reserves.

\section*{Defined operating leverage}

Our defined operating leverage is defined as the difference between revenue growth rate (as adjusted) and non-interest expense growth rate (as adjusted). Revenue is based on a taxable equivalent basis, excluding consolidated variable interest entities (VIEs) and Insurance revenue. Our revenue in 2007 excludes accounting adjustments related to the financial instruments accounting standards. Non-interest expense excludes Insurance expense.

\section*{Economic profit}

Economic profit is net income available to common shareholders excluding the after-tax effect of amortization of other intangibles, less a capital charge for use of attributed capital

\section*{Glossary}

\section*{Assets-to-capital multiple}

Total assets plus specified off balance sheet items, as defined by the Office of the Superintendent of Financial Institutions Canada (OSFI), dividend by total regulatory capital.

\section*{Assets under administration (AUA)}

Assets administered by us, which are beneficially owned by clients. Services provided in respect of assets under
administration are of an administrative nature, including safekeeping, collecting investment income, settling purchase and sale transactions, and record keeping

Assets under management (AUM)
Assets managed by us, which are beneficially owned by clients. Services provided in respect of assets under management include the selection of investments and the provision of investment advice. We have assets under management that are also administered by us and included in assets under administration.

Goodwill and intangibles
Represents our net investment in goodwill and intangibles.
Gross-adjusted assets (GAA)
GAA are used in the calculation of the Assets-to-Capital multiple. They represent our total assets including specified off-balance sheet items and net of prescribed deductions. Off balance sheet items for this calculation are direct credit substitutes, including letters of credit and guarantees, transaction-related contingencies, trade-related contingencies and sale and repurchase agreements.

\section*{Taxable equivalent basis (teb)}

Income from certain specified tax-advantaged sources is increased to a level that would make it comparable
to income from taxable sources. There is an offsetting adjustment in the tax provision, thereby generating
the same after-tax net income. We record teb adjustments in Capital Markets and record elimination
adjustments in Corporate Support. See the How we measure and report our business segments in our 2009 Annual Report.

Total trading revenue
Total trading revenue is comprised of trading related revenue recorded in Net interest income and Non-interes income.

\section*{Ratios \\ \\ Capital ratios} \\ \\ Capital ratios}

The percentage of risk-adjusted assets supported by capital, using the guidelines of OSFI
based on standards issued by the Bank for International Settlements and GAAP financial information.

\section*{Efficiency ratio}

Non-interest expense as a percentage of total revenue.

\section*{Return on assets}

Net income as a percentage of average assets.
Return on common equity (ROE)
Net income less preferred share dividends, expressed as a percentage of average common equity. Refer to page 41 for ROE calculation.

\section*{Tangible common equity / Tier 1 common capital ratio}

Tier 1 capital less qualifying other non-controlling interest in subsidiaries, less Innovative Tier 1 capital instruments less preferred shares (both net of treasury shares) divided by risk-adjusted assets. This ratio is calculated consistent with a stress testing measure used by the U.S. Federal Reserve for U.S. banks in determining capital adequacy under certain adverse scenarios except that our calculation of tangible common equity / Tier 1 common capital ratio is based on the Basel II methodology as detailed in our 2009 Annual Report For more details, refer to the Key performance and non-GAAP measures section of our Q1 2010 Report to Shareholders.

\section*{Glossary continued}

\section*{Calculations}

Average balances (assets, loans and acceptances, and deposits)
Calculated using methods intended to approximate the average of the daily balances for the period.

\section*{Average common equity}

Calculated using methods intended to approximate the average of the daily balances for the period. For the business segments, calculated using methods intended to approximate the average of the daily attributed capital for the period.

\section*{Average earning assets}

The average carrying value of deposits with banks, securities, assets purchased under reverse repurchase agreements and certain securities borrowed, and loans based on daily balances for the period.

\section*{Capital charge}

Calculated by multiplying the cost of capital by the amount of average common equity. The cost of capital is a proxy for the after-tax return that we estimate to be required by shareholders for the use of their capital. The cost of capital is regularly reviewed and adjusted from time to time based on prevailing market conditions

End of period common shares outstanding multiplied by the closing common share price on the Toronto Stock Exchange.

\section*{Dividend yield}

Dividends per common share divided by the average of the high and low share prices in the relevant period.

\section*{Net interest margin (average assets)}

Net interest income as a percentage of total average assets.
Net interest margin (average earning assets)
Net interest income as a percentage of total average earning assets
Net write-offs
Gross write-offs less recoveries of amounts previously written off
Risk-adjusted assets - Basel I
Used in the calculation of risk-based capital ratios as defined by guidelines issued by OSFI. The face value of is discounted using risk-weighted factors in order to reflect a comparable risk per dollar among all types of assets. The risk inherent in off-balance sheet instruments is also recognized, first by determining a credit equivalent and then by applying appropriate risk-weighting factors. Specific and general market risk-adjusted assets are added to the calculation of the Balance Sheet and off-balance sheet risk-adjusted assets to obtain the total risk-adjusted assets.

\section*{Risk-adjusted assets - Basel II}

Used in the calculation of risk-based capital ratios as defined by guidelines issued by OSFI based on Basel II, effective November 1, 2007. A majority of our credit risk portfolios use the AIRB Approach and the remainder use a Standardized Approach for the calculation of Risk-adjusted assets (RAA) based on the total exposure i.e. exposure at default, and counterparty risk weights. For market risk RAA measurement, we use internal models approach for products with regulatory approval and a standardized approach for products to be approved For Operational risk, we use the Standardized Approach. In addition, Basel II requires a transitional capital floo adjustment. For more details, refer to our Q1 2010 Report to Shareholders and our 2009 Annual Report.

\end{tabular}

Comparative information has been restated as at November 1,2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009 .
\({ }^{2}\) Commencing O1/08, capital ratios and risk-adjusted assets are calculated using guidelines issued by OSFI under the new Basel II framework. Comparative amounts are calculated using guidelines issued by the OSFI under the Base I framework.
Commencing Q1/08, capital ratios and risk-adju
\({ }^{3}\) Effective Q2/08, the OSFI amended the treatment of the general allowance in the calculation of the Assets-to-capital multiple under Basel II. Comparative ratios have not been revised.
Common shares outstanding at end of period includes Treasury shares (shares acquired and held by subsidiaries for reasons other than cancellation). Average common shares outstanding excludes Treasury shares
Closing share price divided by diluted earnings per share.
Calculated using number of common shares outstanding, except as noted

\footnotetext{
\({ }^{1}\) remium and deposits equals net earned premiums excluding the cost of premiums to other institutions for reinsurance coverage, plus segregated fund deposits.
}
\({ }^{2}\) Investment income can experience volatility arising from fluctuation in the fair value of held-for-trading assets. The investments which support actuarial liabilities are predominantly fixed income assets designated as held-for-trading, and consequently
changes in fair values of these assets are recorded in investment income in the consolidated statements of income. Changes in fair values of these assets are largely offset by changes in the fair value of the actuarial liabilities, the impact of which is reflected in insurance policyholder benefits and claims.
\({ }^{3}\) Premiums and deposits include premiums on risk-based insurance and annuity products, and individual and group segregated fund deposits, consistent with insurance industry practices.
Includes revenue impact of the change in fair value on investments backing policyholder liabilities is reflected in Investment income and largely offset in PBCAE.
\({ }^{5}\) Excludes the amortization of computer software intangibles.

\end{tabular}
\({ }^{1}\) The amounts include assets that we have securitized but continue to service.
Opening balance in Q3/08 relates to securitization activities prior to the acquisition of RBTT.
Other primarily relates to foreign exchange translation gains and losses

Commencing Q1/08, non-interest income includes the impact of hedging activities on securitization. Prior to \(\mathrm{Q} 1 / 08\), the impact was nominal

\hline
\end{tabular}
\({ }^{1}\) Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009.
\({ }^{2}\) As defined in the guidelines issued by OSFI. Basel I and Basel II calculations are not directly comparable

Net unrealized fair value losses on available-for-sale equities are deducted in the determination of Tier 1 capital while net unrealized fair value gains on available-for-sale equities are included in Tier 2 A capital.
\({ }^{4}\) Basel II goodwill deduction reflects total consolidated goodwill. Basel I goodwill deduction reflects consolidated goodwill net of insurance goodwill.
\({ }^{5}\) Under Basel II, substantial investment deductions are made \(50 \%\) from each of Tier I and Tier 2 capital. There was a transitional provision until October 31, 2008, to deduct
substantial investments held prior to December 31, 2006 in full from Tier 2 capital. Under Basel I, these investments were deducted from Total capital.
\({ }^{6}\) Securitization deduction from Tier 1 capital consists of Seller's interest in residential mortgages of \(\$ 31\) million and credit cards of \(\$ 28\) million, and securitizations rated
below BB- of \(\$ 849\) million and unrated positions of \(\$ 80\) million.
\({ }^{7}\) Subordinated debentures that are within five years of maturity are subject to straight-line amortization to zero during their remaining term and, accordingly, are included at their amortized value
\({ }^{8}\) Securitization deduction from Tier 2 capital consists of Seller's interest in residential mortgages of \(\$ 31\) million and credit cards of \(\$ 5\) million, and securitizations rated
below BB- of \(\$ 849\) million and unrated positions of \(\$ 81\) million.
\({ }^{9}\) Effective Q2/08, OSFI amended the treatment of the general allowance in the calculation of Basel II Asset-to-capital multiple. Comparative ratios have not been revised.

\({ }^{1}\) Opening retained earnings as at November 1, 2006 has been restated.
Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009
\({ }^{3}\) As defined in the guidelines issued by OSFI. Basel I and Basel II calculations are not directly comparable
Basel II goodwill deduction reflects total consolidated goodwill. Basel I goodwill deduction reflects consolidated goodwill net of insurance goodwill.
\({ }^{5}\) Subordinated debentures that are within five years of maturity are subject to straight-line amortization to zero during their remaining term and, accordingly, are included at their amortized value
As prescribed by OSFI, certain components of Accumulated other comprehensive income are included in the determination of regulatory capital. Accumulated net foreign currency translation adjustments are included in Tier 1 capital.
Net unrealized fair value losses on available-for-sale equities are deducted in the determination of Tier 1 capital while net unrealized fair value gains on available-for-sale equities are included in Tier 2 A capital.

\({ }^{\circ}\) Calculated using guidelines issued by OSFI under the new BASEL II framework. For further details, refer to pages 48 to 52 of the Risk management section in our 2009 Annual Report.
Total exposure represents exposure at default which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances or partial write-offs and does not reflect the impact of credit risk mitigation and collateral held.
Represents the average of counterparty risk weights within a particular category.
\({ }^{4}\) For credit risk, portfolios using the Standardized and Advanced Internal Ratings Based (AIRB) Approach represents \(24 \%\) and \(64 \%\), respectively, of RAA. The remaining \(12 \%\) represents Balance Sheet assets not included in Standardized or AIRB Approaches.
The minimum capital requirements for each category can be calculated by multiplying the total RAA by \(8 \%\).
\({ }^{6}\) For credit risk, a majority of our portfolios use the AIRB Approach and the remainder use the Standardized Approach.
The amount of available-for-sale securities held in the banking book that were "grandfathered" under Basel II, and thus subject to a \(100 \%\) risk-weighting until the end of 2017 , was \(\$ 239\) million for Q1/10.
The scaling factor represents a calibration adjustment of \(6 \%\) as prescribed by OSFI under the Basel II framework and is applied to RAA amounts for credit risk assessed under the AIRB Approach.
For market risk RAA measurement, we use an internal models approach where we have obtained regulatory approval, and a standardized approach for products yet to be approved.
For operational risk, we use the Standardized Approach.
Transitional adjustment as prescribed by OSFI Capital Adequacy Requirements guideline Section 1.7.

U.S. residential mortgage-backed securities created and sold \({ }^{6}\)
\({ }^{1}\) All residential mortgages securitized are Canadian mortgages and are government guaranteed
\({ }^{2}\) Securities purchased during the securitization process.
\({ }^{3}\) Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009.
Includes impaired loans as well as loans that are contractually 90 days past due but are not considered impaired.
int at acquisition to sell to special purpose entities
\({ }^{6}\) Loans held as at August 1, 2009 were reclassified to held-for-trading securities in accordance with CICA's amendments to Section 3855 . The reclassified securities are included in the 2008 balances and excluded from 2009 balances.

Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009.
Wholesale - Real estate and related allowance for credit losses in Q1/10 is comprised of allowances based in Canada of \(\$ 34\) million, United States of \(\$ 249\) million and Other International of \(\$ 29\) million
Wholesale - Other in Q1/10 related to financing products, \(\$ 189\) million; other services, \(\$ 93\) million; health, \(\$ 7\) million; holding and investments, \(\$ 9\) million; and other, \(\$ 36\) million.
Geographic information is based on residence of borrower.

\({ }^{1}\) Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009.
\({ }^{2}\) Other adjustments include primarily foreign exchange translations on non-Canadian dollar denominated ACL. Included in the wholesale general allowance adjustment is \(\$ 27\) million related to the loans
acquired in connection with the acquisition of RBTT of which we have reclassified \(\$ 22\) million to specific allowance as it related to specific wholesale loans; the remaining \(\$ 5\) million
was recorded in net income in Q3/09. In Q3/08, adjustment of \(\$ 57\) million relates to loans acquired in connection with the acquisition of RBTT.
\({ }^{3}\) Adjustment amounts include: RBTT \(\$ 4\) million in Q2/09 and \(\$ 25\) million in Q3/08, Alabama National BanCorporation \(\$(4)\) million in Q4/08 and \(\$ 54\) million in Q2/08 respectively and Flag Bank \(\$ 21\) million in 2007 .

Based on residence of borrower
Includes contingent liabilities such as letters of credit and guarantees, and available-for-sale debt securities.
\({ }^{3}\) Includes repurchase and reverse repurchase agreements and securities borrowing and lending transactions.
Credit equivalent amount after factoring in master netting agreements.
Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation
Exposure under Basel II asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credit are included in Personal.
derive a credit risk exposure profile by modeling the potential value of the portfolio of trades with each counterparty over its life to estimate expected credit risk exposure and expected loss.
way risk which arises when default risk and credit exposure increase together, in which case we use the worst case exposure value.
\({ }^{6}\) Includes certain synthetic mortgage securitizations

\({ }_{2}^{1}\) Eligible financial collateral includes cash and deposit, gold, as well as qualifying debt securities, equities and mutual funds. \({ }^{2}\) Under the AIRB approach, disclosure on eligible financial collateral is not required as the beneffit the collateral provides has been taken into account in the Loss Given Default (LGD) estimates in our internal LGD risk rating system. \({ }^{3}\) Includes contingent liabilities such as letters of credit and guarantees, and available-for-sale debt securities.
Includes repurchase and reverse repurchase agreements and securities borrowing and lending transactions.
\({ }_{6}^{5}\) Credit equivalent amount after factoring in master netting agreements.
Represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation.
To determine the appropriate risk weight, credit assessments by OSFI-recognized external credit rating agencies of S\&P, Moody's, Fitch and DBRS are used. For rated exposure primarily in sovereign and bank, we assign the corresponding risk weight according to OSFI's standard mapping .
For unrated exposure mainly in business and retail, we generally apply OSFI prescribed risk weights in accordance with OSFI's standards and guidelines taking into consideration certain exposure specific factors including counterparty type, exposure type and credit risk mitigation technique employed.
Actual loss reflects internal credit loss experience realized over a given period or "point in time". Actual loss rate is the sum of specific provision for credit losses divided by average of loans and acceptances period end outstanding for the current and prior 3 quarters.
9 Estimated loss represents expected loss which is calculated using the Basel II "through the cycle" parameters of probabiility of default \(x\) loss given default \(x\) exposure at default, conservatively estimated based on available historical loss data.
Estimated loss rate is the expected loss divided by loans and acceptances outstanding at the beginning of the applicable consecutive 4 -quarter period defined above. Actual loss will normally exceed estimated loss during
economic downturns and come below in periods of expansion
\({ }^{10}\) Average annual actual loss rate from fiscal 2003 through to the
\({ }^{10}\) Average annual actual loss rate from fiscal 2003 through to the most recent full year. The information will be updated on an annual basis.

\footnotetext{
\({ }^{1}\) Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation such as guarantees. Exposure under Basel II asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credit are included in Personal
\({ }^{2}\) Ratings \(8-10\) or above are regarded as investment grade while ratings 11-13 or below to 17-20 inclusive are non-investment grade. Ratings 21-22 represent impaired/default. \({ }^{3}\) Total exposure includes loans and acceptances outstanding and undrawn commitments and represents exposure at default, which is the
expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation.
\({ }^{4}\) Represents the exposure-weighted average of probability of default, loss given default rate, exposure at default (EAD) rate and risk weight within each internal rating. EAD rate is a percentage of undrawn commitments (notional amount) that is currently undrawn but expected to be drawn in the event of a default.

\({ }^{1}\) Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009.
\({ }^{2}\) Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor. Basel II defines banking book equities based on the economic substance of the transaction
rather than the legal form or accounting treatment associated with the instrument. As such, differences exist in the identification of equity securities held in the banking book and those reported in the financial statements. Banking book equities are financial instruments held for investment purposes and are not part of our trading book, consisting of publicly traded and private equities, partnership units, venture capital and derivatives instruments tied to equity interests

As at Q1/10, the notional amounts exclude exchange traded of \(\$ 421\) billion, over-the-counter options written of \(\$ 202\) billion, and non-trading credit derivatives of \(\$ 2\) billion.
\({ }^{2}\) Calculated using guidelines issued by OSFI under the BASEL II framework.
\({ }^{3}\) Comprises credit default swaps, total return swaps and credit default baskets. The above excludes credit derivatives issued for other-than-trading purposes related to bought and sold protection with a replacement cost of \(\$ 79\) million as at Q1/10. As at Q1/10, credit derivatives issued for other-than-trading purposes related to sold protection with a replacement cost of \(\$\) niil,
credit equivalent amount of \(\$ 10\) million and risk-adjusted asset amount of \(\$ 3\) million which were given guarantee treatment per OSFI guidance.
\({ }^{5}\) As at \(\mathrm{Q} 1 / 10\), the total credit equivalent amount after netting includes collateral applied of \(\$ 6,099\) million.

\end{tabular}
\({ }^{1}\) Average risk capital, Goodwill and intangible capital, and Average attributed capital represent rounded figures. These amounts are calculated using methods intended to approximate the average of the daily balances for the period. ROE and RORC
Average risk capital includes Credit, Market (trading and non-trading), Insurance, Operational, Business and Fixed Asset risk capital. Average attributed capital includes risk capital plus the Goodwill and Intangible capital
Business segment ROE is based on Average atributed capital Under/(over) atribution of capital is reported in Corporate Support.
\({ }^{4}\) RORC is based on Average risk capital only. We do not report ROE and RORC for Corporate Support as they are considered not meaningful.
Other includes software intangible assets reclassified from Premises and equipment in Q1/09 on adoption of CICA Handbook Section 3064, Goodwill and Other Intangible Assets.```
