## Table of Contents

Page
Notes to Users
Key performance and Non-GAAP measures
Glossary
Financial Highlights
Consolidated Results7

## Capital

Capital
Risk-weighted assets

## Page

```
Capital (continued)
    Regulatory capital generation
    Economic Capital
    Capital ratios for significant banking subsidiary
    Securitization subject to early amortization - seller's interest
    Our financial asset securitizations
    Financial asset securitizations - capital charges
    Loans managed
    U.S. banking loans
Credit Quality
    Loans and acceptances
    Gross impaired loans
    Provision for credit losses
    Allowance for credit losses
    Credit quality ratios
```

## Credit Risk Exposure

```
Gross credit risk exposure by geography and portfolio
Exposure covered by credit risk mitigation
Credit exposure by residual contractual maturity
Credit exposure of portfolios under the standardized approach
by risk weight
Actual losses vs. estimated losses
Retail credit exposure by portfolio and risk category
Wholesale credit exposure by portfolio and risk rating
Realized gains and losses on available-for-sale securities Trading credit derivatives
Other than trading credit derivatives positions
Fair value of derivative instruments
Derivative-related credit risk
```

The financial information in this document is in Canadian dollars and is based on unaudited interim financial statements prepared in accordance with Canadian generally accepted accounting principles (GAAP), unless otherwise noted. This document is not audited and should be read in conjunction with our Q2 2011 Report to Shareholders and our 2010 Annual Report to Shareholders Certain comparative amounts have been reclassified to conform to the current period's presentation.

## Significant reporting changes made to this document in Q2/11

Treasury shares
During the quarter, we changed the presentation of our sales and purchases of treasury stock from a net basis to a gross basis. This change pertains to our common and preferred shares Impact to treasury shares from Q1/10 have been revised to conform to the current period's presentation.

## Significant reporting changes made to this document in Q1/11

## Capital Markets - Business realignment

We realigned Capital Markets to better reflect how we manage our businesses. Global Markets comprises our fixed income, foreign exchange, equity sales and trading, treasury and funding and commodities businesses, proprietary trading operations and remaining portfolio of corporate collateralized debt obligations. Corporate and Investment Banking comprises our debt and equity origination, advisory services, loan syndication, corporate lending, client securitization, global credit, equity research, private equity and commercial and correspondent banking businesses. Other contains our legacy businesses and includes our bank-owned life insurance (BOLI) stable value products, U.S. commercial mortgage-backed securities, U.S. auction rate securities and other legacy portfolios. Certain of these products are also disclosed as market and credit related items as described in our 2010 Annual Report.

For debt and equity origination, revenues are allocated between Global Markets and Corporate and Investment Banking based on the contribution of each group in accordance with an established agreement.

## Wealth Management - Business realignment

We made a number of organizational changes in Wealth Management to better align our operating structure with our goals and to accelerate our global growth strategy

## Trading Revenue

We reclassified certain amounts relating to fair value adjustments on certain RBC debt designated as HFT in Capital Markets, which were reported in the Other category, to the Trading revenue category of Non-interest income to better reflect their nature.

## Economic Capital

We revised our economic capital methodology, prospectively, to include an additional pro-rata allocation to the business segments of previously unallocated capital. The revised allocation methodology further aligns our capital allocation processes with the new higher capital requirements of Basel III

## Accounting adjustment - Impact of securitizations

We have updated the net impact of securitization to capture the mark-to-market on unsold mortgage-backed securities held in Capital Markets. Comparative information was not available past Q1/10. Impact of securitization on non-interest income and net income for $\mathrm{Q} 1 / 10$ to $\mathrm{Q} 4 / 10$ reflect these adjustments

## Basel II banking book equities

We moved the banking book equities disclosure, specifically the allocation between public and private exposures, to become part of the risk-weighted assets (Basel II) disclosure Refer to footnote 8 on page 21 of this Supplementary

Basel I reporting
We ceased reporting Basel I amounts. Comparison between Basel I and Basel II numbers are not meaningful, and analysis should continue to be focused on Basel II methodology.

 do not have any standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures presented by other companies.

## Performance measures

## Attributed capital (Economic capital)

An estimate of the amount of equity capital required to underpin risks. It is calculated by estimating
the level of capital that is necessary to support our various businesses, given their risks, consistent with our desired solvency standard and credit ratings.

## Average risk capital

Calculated using methods intended to approximate the average of the daily risk capital balances for the period.

## Return on equity (ROE)

Business segment return on equity is calculated as net income available to common shareholders divided by Average attributed capital for the period and using methods that are intended to approximate the average of the daily balances for the period. Corporate Support also includes average unattributed capital.

## Non-GAAP measures

Cash basis measures
Cash basis measures such as cash net income, cash diluted earnings per share (EPS) and cash ROE are calculated by adding back to net income the after-tax amount on the amortization of intangibles other than software and the goodwill impairment. These non-cash charges do not deplete our cash reserves.

## Return on risk capital (RORC)

Net income available to common shareholders divided by average risk capital. Business segment RORC is
calculated as net income available to common shareholders divided by average risk capital for the period

## Risk capital

Risk capital includes credit, market (trading and non-trading), insurance-specific, operational, business and fixed assets risk capital

## Unattributed capita

Unattributed capital represents common equity in excess of common equity attributed to our business segments and is reported in the Corporate Support segment.

## Economic profit

Economic profit is net income excluding the after-tax effect of amortization of other intangibles, less a capital charge for use of attributed capital.

## Assets-to-capital multiple

Total assets plus specified off balance sheet items, as defined by the Office of the Superintendent of Financial Institutions Canada (OSFI), divided by total regulatory capital.

Assets under administration (AUA)
Assets administered by us, which are beneficially owned by clients. Services provided in respect of assets under administration are of an administrative nature, including safekeeping, collecting investment income, settling purchase and sale transactions, and record keeping.

Assets under management (AUM)
Assets managed by us, which are beneficially owned by clients. Services provided in respect of assets under management include the selection of investments and the provision of investment advice. We have assets under management that are also administered by us and included in assets under administration.

Goodwill and intangibles
Represents our net investment in goodwill and intangibles.

Gross-adjusted assets (GAA)
GAA are used in the calculation of the Assets-to-Capital multiple. They represent our total assets including specified off-balance sheet items and net of prescribed deductions. Off-balance sheet items for this calculation are direct credit substitutes, including letters of credit and guarantees, transaction-related contingencies, trade-related contingencies and sale and repurchase agreements.

Taxable equivalent basis (teb)
Income from certain specified tax-advantaged sources is increased to a level that would make it comparable to income from taxable sources. There is an offsetting adjustment in the tax provision, thereby generating the same after-tax net income. We record teb adjustments in Capital Markets and record elimination adjustments in Corporate Support.

## Total trading revenue

Total trading revenue is comprised of trading related revenue recorded in Net interest income and Non-interest income.

## Ratios

## Capital ratios

The percentage of risk-weighted assets supported by capital, using the guidelines of OSFI based on standards issued by the Bank for International Settlements and GAAP financial information.

## Efficiency ratio

Non-interest expense as a percentage of total revenue.

Return on assets
Net income as a percentage of average assets.

## Calculations

Average balances (assets, loans and acceptances, and deposits)
Calculated using methods intended to approximate the average of the daily balances for the period.

## Average common equity

Calculated using methods intended to approximate the average of the daily balances for the period. For the business segments, calculated using methods intended to approximate the average of the daily attributed capital for the period.

## Average earning assets

The average carrying value of deposits with banks, securities, assets purchased under reverse repurchase agreements and certain securities borrowed, and loans based on daily balances for the period.

## Capital charge

Calculated by multiplying the cost of capital by the amount of average common equity. The cost of capital is a proxy for the after-tax return that we estimate to be required by shareholders for the use of their capital. The cost of capital is regularly reviewed and adjusted from time to time based on prevailing market conditions.

## Market capitalization

End of period common shares outstanding multiplied by the closing common share price on the Toronto Stock Exchange

Return on common equity (ROE)
Net income less preferred share dividends, expressed as a percentage of average common equity.

## Tier 1 common ratio

Tier 1 capital less qualifying other non-controlling interest in subsidiaries, less Innovative Tier 1 capita instruments less preferred shares (both net of treasury shares) divided by risk-weighted assets. This ratio is calculated consistent with a stress testing measure used by the U.S. Federal Reserve for U.S. banks in determining capital adequacy under certain adverse scenarios, except that our calculation of Tier 1 common ratio is based on the Basel II methodology.

## Dividend yield

Dividends per common share divided by the average of the high and low share prices in the relevant period.

## Net interest margin (average assets)

Net interest income as a percentage of total average assets

Net interest margin (average earning assets)
Net interest income as a percentage of total average earning assets
Net write-offs
Gross write-offs less recoveries of amounts previously written off

## Risk-weighted assets (RWA) - Basel II

Used in the calculation of risk-based capital ratios as defined by guidelines issued by OSFI based on Basel II, effective November 1, 2007. A majority of our credit risk portfolios use the AIRB Approach and the remainder use a Standardized Approach for the calculation of RWA based on the total exposure (i.e. exposure at default, and counterparty risk weights). For market risk RWA measurement, we use internal models approach for products with regulatory approval and a standardized approach for products to be approved. For Operational risk we use the Standardized Approach. In addition, Basel II requires a transitional capital floor adjustment.

${ }^{2}$ Calculated using methods intended to approximate the average of the daily balances for the period, as applicable.
${ }_{3}^{2}$ Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009.
${ }^{3}$ Average total loans are reported net of allowance for loan losses. Average retail and wholesale balances are reported on a gross basis (before deducting allowance for loan losses).
${ }^{4}$ AUA - RBC and AUM - RBC include RBTT balances reported on a one-month lag.
${ }^{5}$ AUA - RBC Dexia IS represents the total AUA of the joint venture, of which we have a $50 \%$ ownership interest, reported on a one-month lag.

${ }_{2}^{1}$ The amounts include assets that we have securitized but continue to service.
${ }^{2}$ Other primarily relates to foreign exchange translation gains and losses
Mortgage-backed securities - retained are reported as securities on the Balance Sheet.
${ }^{4}$ Excludes the impact of liquidity, credit and administration fees earned on the securitization of client or third-party assets that are recorded in securitization revenue.
Comparative information has been restated for 2010 to capture the mark-to-market on unsold mortgage backed securities held in Capital Markets. Comparative information was not available past Q1/10,

${ }^{1}$ Comparative information has been restated as at November 1, 2008 due to the implementation of amendments to CICA Handbook Section 3855 issued in August, 2009.
${ }^{2}$ As prescribed by OSFI, certain components of Accumulated other comprehensive income are included in the determination of regulatory capital. Accumulated net foreign currency translation adjustments are included in Tier 1 capital.
Net unrealized fair value losses on available-for-sale equities are deducted in the determination of Tier 1 capital while net unrealized fair value gains on available-for-sale equities are included in Tier 2A capital.
Basel II goodwill deduction reflects total consolidated goodwill.
 Securitization deduction from Tier 1 capital consists of Seller's interest in credit cards of $\$ 26$ million and securitizations rated below BB- of $\$ 648$ million and unrated positions of $\$ 103$ million
${ }^{6}$ Innovative capital instruments are included in Other Liabilities on the Balance Sheet
${ }^{7}$ As defined in the guidelines issued by OSFI.
${ }^{8}$ Subordinated debentures that are within five years of maturity are subject to straight-line amortization to zero during their remaining term and, accordingly, are included at their amortized value.
${ }^{9}$ Securitization deduction from Tier 2 capital consists of Seller's interest in credit cards of $\$ 7$ million and securitizations rated below BB- of $\$ 648$ million and unrated positions of $\$ 103$ million.

${ }^{1}$ Calculated using guidelines issued by OSFI under the Basel II framework.
${ }^{2}$ Total exposure represents exposure at default which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances or partial write-offs and does not reflect the impact of credit risk mitigation and collateral held.
${ }^{3}$ Represents the average of counterparty risk weights within a particular category
${ }^{4}$ The minimum capital requirements for each category can be calculated by multiplying the total RWA by $8 \%$.
${ }^{5}$ For credit risk, a majority of our portfolios use the AIRB Approach and the remainder use the Standardized Approach.

the amount of publicly-traded equity exposures was $\$ 396$ million and private equity exposures amounted to $\$ 1,180$ million. Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor
${ }^{8}$ The scaling factor represents a calibration adjustment of $6 \%$ as prescribed by OSFI under the Basel II framework and is applied to RWA amounts for credit risk assessed under the AIRB Approach.
${ }^{9}$ For credit risk, porffolios using the Standardized and Advanced Internal Ratings Based (AIRB) Approach represents $21 \%$ and $67 \%$, respectively, of RWA. The remaining $12 \%$ represents Balance Sheet assets not included in Standardized or AIRB Approaches.
${ }^{10}$ For market risk RWA measurement, we use an internal models approach where we have obtained regulatory approval, and a standardized approach for products yet to be approved.
${ }^{11}$ For operational risk, we use the Standardized Approach

${ }^{1}$ Gross credit risk exposure is before allowance for loan losses. Exposure to Basel II asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credits are included in Personal
Based on residence of borrower.
Includes contingent liabilities such as letters of credit and guarantees, and available-for-sale debt securities.
includes repurchase and reverse repurchase agreements and securities borrowing and lending transactions.
Credit equivalent amount after factoring in master netting agreements.
Total exposure represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation. Exposure under Basel II asset classes of qualifying revolving retail and other retail are largely included within Personal and Credit cards, while home equity lines of credit are included in Personal. For trading credit risk, we use statistical models to derive a credit risk exposure profile by modeling the potential value of the porftolio of trades with each counterparty over its life to estimate
expected credit risk exposure and expected loss. The model takes into account wrong-way risk which arises when default risk and credit exposure increase together, in which case we use the worst case exposure value.

${ }^{1}$ Represents exposure at default, which is the expected gross exposure upon the default of an obligor. This amount is before any specific allowances and does not reflect the impact of credit risk mitigation.

 guidelines taking into consideration certain exposure specific factors including counterparty type, exposure type and credit risk mitigation technique employed.
${ }^{3}$ Actual loss reflects internal credit loss experience realized over a given period or "point in time". Actual loss rate is the sum of specific provision for credit losses divided by average of loans and acceptances period end outstanding for the current and prior 3-quarter period.
 historical loss data. Estimated loss rate is the expected loss divided by loans and acceptances outstanding at the beginning of the applicable consecutive 4-quarter period defined above. Actual loss will normally exceed estimated loss during economic downturns and come below in periods of expansion.
${ }^{5}$ Average annual actual loss rate from fiscal 2003 through to the most recent full year.
